tion No. 1 thereof, and unless the men and the Company can otherwise agree, these yardmasters having heretofore been specified in Train and Yardmen's Schedule under the same conditions of employment as other yardmen, and with specified higher rates on an hourly basis, shall be paid on the same basis as to hours of service, overtime basis, and relative hourly rates with yard foremen.

The Board draws the attention of the parties to the very general standardization that has been made effective or that is being made effective in train and yard service, and suggests the desirability of standardization. In this particular case that would appear to be especially necessary from the fact that, on the larger and remaining portion of the Canadian National Railways, yardmasters are not included in schedule, but are paid on a monthly basis.

**Case No. 76.—The Canadian National Railways (Eastern Lines) and the Order of Railway Conductors, and the Brotherhood of Railroad Trainmen.**

The Canadian National Railways and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen requested the Canadian Railway Board of Adjustment No. 1 to give a decision as to the monthly mileage the Railway was entitled to receive from its conductors in passenger service on former Canadian Government Eastern Lines of the Canadian National Railways, under Supplement No. 16 to General Order No. 27. A joint statement submitted declared that under the schedule in effect at the time that Supplement No. 16 to General Order No. 27 was issued, the Company was entitled to receive 4,200 miles for a monthly guarantee of \$161.50, the rate per mile being 3.84 cents and the daily guarantee being \$5.38, the basis of the monthly guarantee being thirty times the daily guarantee. Supplement No. 16 to General Order No. 27 establishes a monthly mileage of 4,500 miles with a guarantee of \$180, the daily guarantee being \$6. The employees contended that question No. 22 of Interpretation No. 1 disposed of this question wherein it was provided that where the daily mileage was less than 150 there should be no change. It was further contended that there should be no change in the mileage, for the reason that, where Supplement No. 16 was ap-

plied in the United States to roads having a lower daily mileage, it was preserved. The men further contended that the unusual conditions that brought about their low mileage, as compared with other roads, were still in existence. The Company contended that as Supplement No. 16 established a higher rate per mile, and a higher guarantee per day and per month than the schedule rates and guarantee in effect at the time the said supplement was issued, even if the difference of 300 miles per month (4,200 to 4,500) were added to previous monthly guarantees, therefore, by applying the monthly mileage of 4,500 and guarantee of \$180, no reduction in monthly guarantee is made, and the Company felt justified in its claim that the former monthly mileage of 4,200 and guarantee of \$161.50 should become 4,500 miles and guarantee \$180. In support of their contention the Company quoted question 10-A, and answer thereto, as follows: "Some schedules provide that Conductors shall be paid \$161.50 per month for 4,000 miles or less. What is the present guarantee under Supplement No. 16? Decision: The former guarantee of \$161.50 becomes \$180 per month for 4,500 miles or less."

In a general statement the Board declared that while it was stated in the joint submission that Supplement No. 16 to General Order No. 27 established a monthly mileage of 4,500 miles, the supplement of itself did not so specify, but, as also stated in the joint submission, the basis of the monthly guarantee was thirty times the daily guarantee. The men admitted the fairness, in the case of baggagemen and brakemen, of adjusting the daily mileage up to the

number of miles which, at the mileage rates, were required to produce the daily money guarantee. In the case of the baggagemen, the existing mileage rate of 3 cents is higher than that provided in Supplement No. 16 (2.77 cents), and is therefore preserved; and this rate, divided into the daily guarantee of \$4.16 provided by Supplement No. 16 (which is higher than the old daily guarantee of \$3.87) gives the daily mileage required to make up the daily guarantee in money as 139 miles. Therefore, on the basis of thirty times the daily mileage, the monthly mileage for baggagemen becomes 4,170 miles, as compared with present monthly mileage of 4,200 miles. In the case of passenger brakemen the existing mileage rate of 2.79 cents being higher than that provided in Supplement No. 16 (2.66 cents) is preserved, and this rate divided into the daily guarantee of \$4 provided by Supplement No. 16 gives 143 miles as the daily mileage. The monthly mileage therefore becomes 4,290 miles, an increase as compared with the present monthly mileage of 4,200 miles. On the same principle, the monthly mileage for conductors becomes 4,500 miles, an increase of 300 miles, compared with the present monthly mileage. In the opinion of the Board the principle is the same in the case of the three members of the crew, and if it is fair, as admitted by the men, to increase the brakemen's mileage by 90 miles, it is not necessarily unfair to increase the conductors' mileage by 300, provided that higher daily, monthly or mileage rates are preserved.

By decision of the Board therefore, the contention of the Railways was sustained.

## COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

**T**HE Cost of Living Commission, appointed on January 21, 1919, to determine every three months the increase in the cost of living for coal miners on Vancouver Island, and to report the amount by which wages should therefore be increased or decreased, forwarded its report for the quarter ending March 31, 1920,\* to the Department on April 23, 1920. The Commission consisted of Mr. John McAllister, representing the miners; Mr. Tully Boyce, representing the operators; and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, as chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners are accustomed to trade in the various towns. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computation and adjustment for the quarter under review was the

same as used on all previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices on March 31 over December 31, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase or decrease as an equivalent to cover similar increases or decreases in clothing. An increase of 11.43 per cent was ascertained, which amounted to an increase in wages of  $34\frac{1}{3}$  cents per day where the base rate was \$3.00 per day, and 36 cents per day where the base rate was \$3.15, the increase in wages to become effective from May 1, 1920, and to apply to all underground service, clerical and office employees.

Sugar, jams, syrups, flour, cornmeal and coffee showed marked advances, but slight advances only occurred in canned vegetables, soaps, cereals, butter, milk, evaporated fruits, fresh beef, pork, mutton and veal.

A slight decrease was shown in beans, tapioca, canned meats, lard and bacon.

---

\*For previous orders see LABOUR GAZETTE, March, 1920, p. 263, and various preceding issues.

## STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1920

**T**WENTY-EIGHT strikes, involving about 3,798 employees, were reported as having commenced during April. There were in existence at some time or other during the month 44 strikes, involving about 6,249 workpeople. The total time loss on account of industrial disputes was estimated at 84,099 working days, as compared with 43,169 in March and 132,346 in April, 1919. The time loss occasioned by the 28 strikes which began in April was 40,029 working days, while a loss of 44,070 is charged to the 16 strikes that commenced prior to April. Termination was reported in the case of 7 disputes which commenced prior to April. Nineteen of the disputes

commencing during April terminated during the month, leaving the following 18 strikes, affecting approximately 1,691 workpeople on record on April 30: miners, Alice Arm, B.C., and South Minto; pottery workers, St. Johns; painters and decorators, Windsor; painters, paper-hangers and decorators, London; machinists, St. John and Sydney; metal polishers and buffers, Peterborough; moulders, Brantford, Sherbrooke and Toronto; shipbuilders, Three Rivers; pulp and paper workers, Bromptonville; weavers, Amherst; dairy drivers, Toronto; marine engineers, Sorel; tire builders, Guelph, and film revisors and shippers, Toronto.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—There were two strikes of lumber workers in British Columbia during the month. At Anchorage, 58 loggers went on strike to enforce the union demand for a closed shop. This strike terminated on April 21. The open shop remained in effect, and the company granted a wage increase of 50 cents per day. Seventy-five sawyers and packers at North Arm struck for a new wage schedule. A compromise agreement resulted and the strike terminated on April 15.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—This group again had the greatest time loss through strike activity during the month. Ten strikes, involving 2,088 employees and a time loss of 38,184 working days, was the approximation for the month. The strikes of miners in District 18, owing to the enforcing of the "closed shop" clause in Order 141, were either terminated or non-effective as regards time loss at the end of the month. A detailed statement of these strikes appeared in the April issue of the LABOUR GAZETTE at page 417. There was no change in the strike situation at South Minto where the miners have been out since December, 1919. Granite cutters at Beebe, Que., and at Toronto were out on brief strikes during the month. Miners and labourers at Alice Arm, B.C., went on strike for a minimum wage of \$6 per day minus a maximum deduction of \$1.25 per day for board. Other demands in-

cluded white sheets and pillow cases installed in the bunk houses. Seventy-five men were out under One Big Union instructions and the strike was untermiated at the end of the month.

**BUILDING AND CONSTRUCTION.**—Seven strikes, involving 741 employees and a time loss of 10,180 working days, was the summary for this group during April. Five of these seven strikes concerned the painting trade. The one causing the greatest time loss was that of 210 painters, involving 20 firms in Quebec City. In this strike, the employees demanded an increase of 15 cents per hour and union recognition. After being out three weeks, the employees resumed work at an increase of 12 cents per hour, pending the award of a board of arbitration, the new rate of pay being from 48 cents to 55 cents per hour. At Windsor, Ont., painters receiving 65 cents per hour went on strike demanding \$1 per hour. The employers agreed to pay 80 cents per hour, which was refused, and the strike was untermiated at the end of the month. At Moncton, N.B., the painters, who were receiving 45 cents to 50 cents per hour, demanded 80 cents per hour, which was later reduced to 70 cents per hour. The Master Painters' Association refused to accede to this demand, although willing to pay 50 cents to 60 cents per hour. After being on strike for three weeks a settlement was effected by Departmental mediation at a rate of from 55 cents to 65 cents per hour. At Guelph, the painters were receiving 40 cents per hour for a 59-hour week. They demanded 60 cents per hour for a 50-hour week. The employers offered 50 cents per hour, but the employees held out

and only resumed work when their demands were met. The strike of painters at London which commenced on March 1 was untermated at the end of the month, although most of the strikers had secured employment elsewhere. About 250 plasterers' labourers of an independent union in Toronto went on strike for a wage increase of 25 cents per hour. As a result of direct negotiation, the employees accepted an offer of a 15 cent per hour increase.

**METALS, MACHINERY AND CONVEYANCES.**—Twelve strikes, involving 1,602 employees and a time loss of 16,829 working days, constituted the summary for this group in April. Six new strikes commenced during the month. Of these, the strike of 800 shipbuilders at Three Rivers involved the greatest time loss. The employees' demands included a 44-hour week instead of the prevailing 48-hour week, and for an increase over the former rate (ranging from 55 cents to 75 cents per hour) to 90 cents per hour. The company wished to establish a 50-hour week at the former rate of pay. The employees agreed to abandon their demand for a 44-hour week and to continue at a 48-hour week, but they adhered to their claim for the increased rate. A strike resulted in one plant on April 19 and latest reports indicated that a second firm had since become involved in the strike. Machinists at Sydney, N.S., were out on strike for a 9-hour day, instead of the former 10-hour day; and a wage increase over the previous rate of 45-61½ cents per hour to 60-70 cents per hour. The company offered an 11 per cent increase, but were opposed to shortening the day owing to the curtailed production that would result. About 150 employees were involved. A brief strike of 132 carriage

workers at Alexandria was settled by a 15 per cent wage increase, with a further 10 per cent increase to be paid in August. The employees demanded a 25 per cent increase over their average rate of about \$3 per day.

**WOODWORKING.**—Mill workers in one firm at Montreal went on strike for a 15 cent per hour increase in wages that varied from 35 to 64 cents per hour. The company claimed that the original demand was only for a 10 cents per hour increase, which was met, upon which the employees extended their demand to 15 cents per hour. The strike terminated within a week, the men resuming work on increases ranging from 3 cents to 7½ cents per hour. About 109 employees were involved.

**PULP AND PAPER.**—A dispute regarding a requirement that one man should operate two machines resulted in a strike of the pulp and paper employees at Bromptonville, Que. About 150 employees were involved and the strike was untermated at the end of the month.

**PRINTING AND PUBLISHING.**—Acting without the sanction of their Local or the head office of the International Typographical Union, 89 compositors on the staff of the Montreal *Star* struck for increased wages. The employees were under a five year contract entered into in September, 1917. Since that time the company had increased the contract scale by about 35 per cent, but the men adhered to demands for \$40 per week for day work and \$45 per week for night work. The management offered \$36 and \$40 per week, which was rejected. As a result of pressure from their Union, the men resumed work at the company's scale.

**TEXTILES.**—One hundred and fifty textile employees at Amherst went out

## STRIKES AND LOCKOUTS DURING APRIL, 1920

Industry or Occupation.	Particulars	No. of employees affected	Time lost in working days
<b>Strikes commencing prior to April, 1920</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Coal miners, Bellevue, Alta. ....	Commenced March 9. Enforcing of "closed shop" clause in Order No. 141, requiring affiliation with U.M.W. of A., resulted in O.B.U. miners striking. Decided to resume operations at meetings held April 26.	320	6,720
Coal miners, Blairmore, Alta. ....	Commenced March 10. In sympathy with Bellevue miners' strike. Decided to resume operations at meetings held on April 26.	550	11,550
Coal miners, Canmore, Alta. ....	Commenced March 22. O.B.U. members strike against "closed shop" order. Work resumed at normal capacity April 26.	200	4,200
Coal miners, Coleman, Alta. ....	Commenced March 22. O.B.U. members strike against "closed shop" order. Work resumed at normal capacity April 12.	375	3,000
Coal miners, Hillcrest, Alta. ....	Commenced March 29. O.B.U. members strike against "closed shop" order. Work resumed at almost normal capacity April 28.	350	8,050
Miners, South Minto, N.B. ....	Commenced December 6, 1919. For increased wages and improved working conditions. Unterminated.	150	3,750
Miners and millmen, Cobalt, Ont. ....	Commenced March 22. Owing to dismissal of employees. Information received during the month states that no time was lost owing to this strike as strikers were replaced.		
Pottery workers, St. Johns, Que. ....	Commenced November, 1913. Against a reduction in wages. Unterminated.	36	
<b>BUILDING AND CONSTRUCTION—</b>			
Painters, paperhangers and decorators, London, Ont.	Commenced March 1. For increased wages. Unterminated.	4	100
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Machinists, St. Hyacinthe, Que. ....	Commenced March 25. For increased wages. Information received in the Department indicates this strike terminated about March 27.		
Machinists, St. John, N.B. ....	Commenced January 26. For increased wages and shorter hours. Unterminated.	70	1,750
Moulders, Brantford, Ont. ....	Commenced May 1, 1919. Demand for increased wages. Unterminated.	5	125
Moulders and coremakers, Sherbrooke, Que.	Commenced September 23, 1919. For increased wages. Unterminated.	36	900
Moulders and patternmakers, Toronto, Ont.	Commenced May 1, 1919. For increased wages and shorter hours. Unterminated.	30	750
Stove and furnace workers, Preston, Ont. ....	Commenced March 31. For increased wages. Men resumed work pending further settlement, April 8.	120	600
Structural iron workers, Hamilton. ....	Commenced March 22. For increased wages and shorter hours. Settled by negotiations; work resumed April 12.	150	1,200

## STRIKES AND LOCKOUTS DURING APRIL, 1920—Continued.

Industry or Occupation.	Particulars	No. of employees affected	Time lost in working days
<b>TRANSPORTATION—</b>			
Marine Engineers, Sorel, Que.....	Commenced March 12. For increased wages. Unterminated.....	30	750
<b>MISCELLANEOUS—</b>			
Film revisors and shippers, Toronto, Ont....	Commenced February 26. For increased wages. Unterminated.	25	625
<b>Strikes commencing during April, 1920</b>			
<b>LUMBERING—</b>			
Loggers, Anchorage, B.C.....	Commenced April 1. Refusal to accede to demand for closed shop. Settled by negotiations; company did not grant a closed shop. Work resumed April 21.	58	928
Shingle sawyers packers and labourers, North Arm, Fraser River, B.C.	Commenced April 7. For increased wages. Settled by negotiations; work resumed April 15.	75	498
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Miners (labourers) Alice Arm, B.C.....	Commenced April 21. For increased wages and improved conditions. Unterminated.	65	585
Granite cutters, Beebe, Que.....	Commenced April 3. For increased wages. Settled by mediation; work resumed April 12.	25	125
Granite cutters, Toronto, Ont.....	Commenced April 1. For increased wages. Settled by negotiations; work resumed April 16.	17	204
<b>BUILDING AND CONSTRUCTION—</b>			
Lathers, Toronto, Ont.....	Commenced April 1. For increased wages. Settled by negotiations; work resumed April 13.	150	1,500
Fainters, Quebec, Que.....	Commenced April 1. For increased wages and recognition of the union. Settled by mediation; work resumed April 28.	210	4,620
Painters and decorators, Windsor, Ont.....	Commenced April 1. For increased wages. Unterminated.....	87	2,175
Painters and paperhangers, Guelph, Ont....	Commenced April 1. For increased wages and shorter hours. Settled by negotiations; work resumed at the close of the month.	9	225
Painters and decorators, Moncton, N.B.....	Commenced April 1. For increased wages and shorter hours. Settled by mediation of the Department of Labour. Work resumed April 14.	31	310
Plasterers' labourers, Toronto, Ont.....	Commenced April 1. For increased wages. Settled by negotiations; work resumed April 7.	250	1,250
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Carriage workers, Alexandria, Ont.....	Commenced April 19. For increased wages. Settled by negotiations; work resumed April 27.	132	924
Machinists, Sydney, N.S.....	Commenced April 22. For increased wages and shorter hours. Unterminated.	150	1,200
Metal polishers and buffers, Peterborough, Ont.	Commenced April 10. For increased wages. Unterminated.....	19	342
Riveters, Levis, Que.....	Commenced April 19. For increased wages. Settled by negotiations; work resumed April 22.	25	75

## STRIKES AND LOCKOUTS DURING APRIL, 1920—Continued.

Industry or Occupation.	Particulars	No. of employees affected	Time loss in working days
<b>METALS, MACHINERY AND CONVEYANCES—</b> (Continued)			
Shipbuilders, Three Rivers, Que.....	Commenced April 19. For increased wages. Unterminated.....	800	8,800
Structural iron workers, Toronto, Ont.....	Commenced April 1. For increased wages and a weekly pay-day. Settled by negotiations; work resumed April 6.	65	163
<b>WOODWORKING—</b>			
Mill workers, Montreal, Que.....	Commenced April 19. For increased wages. Men returned to work under same conditions as existed prior to strike. Work resumed April 26.	109	600
<b>PULP AND PAPER—</b>			
Pulp and paper workers, Bromptonville, Que.....	Commenced April 20. Owing to a dispute of working conditions in the shop. Unterminated.	150	1,500
<b>PRINTING AND PUBLISHING—</b>			
Compositors, Montreal, Que.....	Commenced April 15. For increased wages. Settled by negotiations; work resumed April 22.	89	534
<b>TEXTILES—</b>			
Weavers, Amherst, N.S.....	Commenced April 14. Owing to discharge of employee. Unterminated.	150	2,100
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Meat packers, Hamilton, Ont.....	Commenced April 1. For increased wages and shorter hours. Settled by negotiations; work resumed April 19.	175	2,450
<b>LEATHER—</b>			
Collar and harness workmen, Toronto, Ont.	Commenced April 5. For increased wages. Settled by negotiations; work resumed April 8.	17	51
<b>TRANSPORTATION—</b>			
Coal handlers, Halifax, N.S.....	Commenced April 5. For increased wages. Settled through mediation of the Department of Labour; work resumed April 15.	400	3,600
Coal cart drivers, Hamilton, Ont.....	Commenced April 3. For increased wages. Settled by negotiations; work resumed April 17.	400	4,400
Dairy drivers, Toronto, Ont.....	Commenced April 29. For increased wages. Unterminated.....	60	120
<b>MUNICIPAL EMPLOYMENT—</b>			
Civic employees (labourers), Guelph, Ont....	Commenced April 15. For increased wages. Majority of workers returned while others had their places filled; work resumed April 19.	40	80
<b>MISCELLANEOUS—</b>			
Tire builders, Guelph, Ont.....	Commenced April 12. For increased wages on piece work. Unterminated.	40	680

on strike on account of a dispute over shop control in one of the weaving departments. An overseer wished to employ a man who was working in another department. The management refused this request. The man resigned and was re-employed in the weaving department. When this change was noticed, the manager dismissed the employee. The overseer then resigned and all the employees of the mill walked out in protest. The strike was unterninated at the end of the month.

**FOODS, LIQUORS AND TOBACCO.**—Meat packers and butchers at Hamilton were out on strike for two weeks owing to their wage demands being refused. The employees were receiving an average rate of 48½ cents per hour. They demanded from 70 to 95 cents per hour and an eight-hour day instead of the prevailing nine hours. One firm replaced a considerable number of the strikers, but, after direct negotiations, the dispute was settled by all the companies agreeing to pay an advance of 5 per cent on all wage rates. The men resumed work at from 50 to 55 cents per hour and on the basis of a 9-hour day.

**TRANSPORTATION.**—Four hundred coal

handlers at Halifax were out on strike from April 5 to 15 owing to their original wage demands being refused. The men demanded 85 cents per hour for day work and \$1.00 per hour for night work. The prevailing rates were 65 cents and 70 cents per hour, respectively. As a result of mediation by the Department, the men agreed to a 5 cents per hour increase in both rates, and that night work after 11 p.m. should be paid at the rate of \$1.50 per hour. A six-day strike of 400 coal teamsters in Hamilton terminated as a result of a wage increase of \$2 per week. The men were receiving \$22 to \$24 per week and originally demanded \$25 to \$27 per week. Dairy drivers in Toronto went on strike toward the close of the month for a wage minimum of \$30 per week—an increase of \$4 per week. About 60 men were involved, and at the end of the month the situation indicated an early settlement.

**MISCELLANEOUS.**—A strike of 40 rubber workers in a tire plant at Guelph commenced on April 12 and remained unternminated at the close of the month. The employees demanded a 10 per cent increase in wages, which up to the time of the dispute had averaged \$5 to \$5.50 per day.

### STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MARCH, 1920

THE following details with regard to strikes and lockouts in the United Kingdom during March, 1920, based on returns from employers and workpeople, are taken from the April issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes reported to the Department as beginning in

March was 184, as compared with 122 in the previous month, and 64 in March, 1919. In these new disputes nearly 96,000 workpeople were directly and over 4,000 workpeople indirectly involved, (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition over 34,000

workpeople were involved, either directly or indirectly, in 58 disputes which began before March and were still in progress at the beginning of that month. The total number of disputes in progress in March was thus 242, involving about 134,000 workpeople, as compared with about 110,000 workpeople involved in disputes in progress in February, 1920, and about 223,000 in March, 1919.

The following table classifies these disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned and the approximate time lost in all disputes in progress:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in March.	Aggregate loss of working days during March.
	Started before 1st March.	Started in March.	Total.		
Building.....	12	27	39	4,100	43,000
Mining and Quarrying.....	4	33	37	60,200	242,000
Metal, Engineering and Ship-building.....	11	34	45	28,600	275,000
Textile and Clothing.....	7	21	28	8,600	75,000
Transport.....	8	10	18	6,800	20,000
Other Trades.....	13	49	62	10,500	114,000
Employees of Public Authorities.....	3	10	13	6,200	19,000
<b>Total, March, 1920.....</b>	<b>58</b>	<b>184</b>	<b>242</b>	<b>134,000</b>	<b>788,000</b>
<b>Total, February, 1920.....</b>	<b>47</b>	<b>122</b>	<b>169</b>	<b>110,300</b>	<b>450,000</b>
<b>Total, March, 1919.....</b>	<b>40</b>	<b>64</b>	<b>104</b>	<b>223,000</b>	<b>1,139,000</b>

Of the 788,000 working days lost in March by all disputes in progress, about 367,000 were lost by disputes which began before March and were still in progress at the beginning of that month, and about 421,000 by disputes which began in the month.

CAUSES.—Of the 184 new disputes, 106, directly involving nearly 31,000 workpeople, arose on demands for advances in wages; 21, directly involving nearly 11,000 workpeople, on other wages questions; 4, directly involving about 3,000 workpeople, on questions respecting hours; 31, directly involving over 35,000 workpeople, on questions respecting the employment of particular classes or persons; 7, directly involving about 3,000 workpeople, on details of working arrangements; 10, directly involving about 2,000 workpeople, on questions of Trade Union principle; 2, directly involving about 10,000 workpeople, in sympathy with other disputes; and 3, directly involving over 1,000 workpeople, on other questions.

RESULTS.—During the month settlements were effected in the case of 96 new disputes, directly involving nearly 36,000 workpeople, and 24 old disputes directly involving over 5,000 workpeople. Of these new and old disputes, 35, directly involving over 13,000 workpeople, were settled in favour of the workpeople; 25, directly involving about 15,000 workpeople in favour of the employers; and 60, directly involving nearly 13,000 workpeople, were compromised. In the case of 29 other disputes, directly involving nearly 50,000 workpeople, work was resumed pending negotiations.

## UNIFORMITY OF LABOUR LAWS

### Report of the Dominion-Provincial Commission appointed to consider the subject

IT will be remembered that one of the resolutions passed at the National Industrial Conference called by the Minister of Labour, and which held its sessions at Ottawa in September, 1919, urged the advantage of uniformity in the labour laws of the Dominion and made a recommendation as to action to be taken. The terms of the resolution in question were as follows:

Resolved:

That the advantage of uniformity in the laws relating to the welfare of those engaged in industrial work in the several provinces of the Dominion of Canada be brought to the attention of the Government of Canada and of the Governments of the several provinces respectively; and, that this National Industrial Conference suggests the following as a means towards the end desired, namely:

The appointment of a Board composed as follows:

- (1) As respects the Dominion:
  - (a) A representative of the Government.
  - (b) A representative of the employers.
  - (c) A representative of the employees.
- (2) As respects each of the provinces:
  - (a) A representative of the Government.
  - (b) A representative of the employers.
  - (c) A representative of the employees.

And that the Dominion Government be requested to ask the Government of each of the provinces to select or have selected representatives in respect of the province as above set forth.'

The subject matter of this resolution was taken up by the Minister of Labour

with the Dominion Government and with the Governments of the several provinces, with the result that a commission was appointed on the lines laid down.

The Dominion and all the Provinces except Prince Edward Island were represented throughout the proceedings. Representatives from Prince Edward Island also were in attendance at the closing sessions of the commission.

The commission convened at Ottawa on Monday, April 26, its sessions being held in the Solicitor General's Offices, which had been kindly lent for the occasion. The proceedings opened with an address from the Honourable G. D. Robertson, Minister of Labour, who welcomed the members of the commission to the Capital and briefly outlined the subjects which would come naturally before them for consideration. Mr. F. A. Acland, Deputy Minister of Labour for Canada, and representing the Dominion Government, was appointed Chairman. The commission then took up its work, which proceeded from day to day until Saturday afternoon, May 1, when a conclusion was reached.

In the following pages will be found the terms of the Order-in-Council governing the proceedings and the text of the report made by the commission to the Minister of Labour. Copies of the report of the commission will be forwarded immediately by the Minister of Labour to the several provincial governments for their consideration.

## THE TERMS OF APPOINTMENT

(P.C. 721.)

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Administrator, on the 10th April, 1920.

The Committee of the Privy Council have had before them a report, dated 1st April, 1920, from the Minister of Labour, referring to a resolution which was adopted unanimously by the National Industrial Conference in Ottawa in the month of September, 1919, in the terms following:

“Resolved:

That the advantage of uniformity in the laws relating to the welfare of those engaged in industrial work in the several provinces of the Dominion of Canada be brought to the attention of the Government of Canada and of the Governments of the several provinces respectively; and that this National Industrial Conference suggests the following as a means towards the end desired, namely—

The appointment of a Board composed as follows:

- (1) As respects the Dominion:
  - (a) A representative of the Government.
  - (b) A representative of the employers.
  - (c) A representative of the employees.
- (2) As respects each of the Provinces:
  - (a) A representative of the Government.
  - (b) A representative of the employers.
  - (c) A representative of the employees.

And that the Dominion Government be requested to ask the Government of each of the Provinces to select or have selected representatives in respect of the Province as above set forth.”

The Minister states that in the month of October following the National Industrial Conference letters were addressed to the Prime Ministers of the several Provinces expressing the concurrence of the Government of Canada in the foregoing resolution and proposing the establishment of a Commission on the lines recommended by the Conference. Eight of the nine Provincial Governments have since concurred in the proposal and have in each case furnished the names of three persons to act on their behalf.

The Minister, therefore, recommends that a Commission be appointed for the purposes aforesaid under the provisions of Part I of Chapter 104, Revised Statutes of Canada, 1906, commonly called The Inquiries Act, to hold and conduct such inquiry, with all the powers conferred by the aforesaid statute, and that the Commission shall be composed as follows:

*As respects the Dominion of Canada:* On behalf of the Government—F. A. Acland, Deputy Minister of Labour, Ottawa, Ont. On behalf of Employers—J. G. Merrick, Secretary of the Employers' Association of Toronto, Toronto, Ont. On behalf of Employees—Tom Moore, President of the Trades and Labour Congress of Canada, Ottawa, Ont.

*As respects the Province of Nova Scotia:* On behalf of the Government—Major J. Welsford Macdonald, President of the Nova Scotia Branch of the Great War Veterans' Association, Pictou, N.S. On behalf of Employers—Fulton J. Logan, Member of the Legislative Council of the Province of Nova Scotia, Musquodoboit Harbour, Halifax County, N.S. On behalf of Employees—John A. Gillis, Financial Secretary of Lodge No. 1, Amalgamated Association of Iron, Steel and Tin Workers of North America, Sydney, N.S.

*As respects the Province of New Brunswick:* On behalf of the Government—Honourable C. W. Robinson, of Moncton, N.B., Minister without portfolio of the Government of New Brunswick. On behalf of Employers—Angus McLean, of Bathurst, N.B. On behalf of Employees—G. R. Melvin, Secretary, N. B. Federation of Labour, St. John, N.B.

*As respects the Province of Quebec:* On behalf of the Government—Louis O. Guyon, Deputy Minister of Labour for the Province of Quebec, Montreal, P.Q. On behalf of Employers—John Lowe, Manager of the Montreal Cottons, Limited, Valleyfield, P.Q. On behalf of Employees—Gustave Francq, Editor of the “Labour World,” Montreal, P.Q.

*As respects the Province of Ontario:* On behalf of the Government—Dr. W. A. Riddell, Deputy Minister of Labour for the Province of Ontario, Toronto, Ont. On behalf of Employers—Samuel Harris, President of the Harris Lithographing Company, Limited, Toronto, Ont. On behalf of Employees—H. J. Halford, Vice-President of the Trades and Labour Congress of Canada, and Fifth Vice-President, Journeymen Barbers' International Union, Hamilton, Ont.

*As respects the Province of Manitoba:* On behalf of the Government—E. McGrath, Secretary of the Bureau of Labour of the Province

of Manitoba, Winnipeg, Man. On behalf of Employers—H. B. Lyall, of the Manitoba Bridge and Iron Works, Winnipeg, Manitoba. On behalf of Employees—E. Robinson, Secretary of the Trades and Labour Council of the City of Winnipeg, Winnipeg, Man.

*As respects the Province of Saskatchewan:*

On behalf of the Government—T. M. Molloy, Secretary of the Bureau of Labour for the Province of Saskatchewan, Regina, Sask. On behalf of Employers—R. K. Leckie, Regina, Sask. On behalf of Employees—James Somerville, Representative of the International Association of Machinists, Moose Jaw, Sask.

*As respects the Province of Alberta:*

On behalf of the Government—John T. Stirling, Chairman of the Workmen's Compensation Board of Alberta, Edmonton, Alberta. On behalf of Employers—Walter F. McNeill, Commissioner, Western Coal Operators' Association, Calgary, Alberta. On behalf of Employees—Robt. McCreath, Edmonton, Alta.

*As respects the Province of British Columbia:* On behalf of the Government—J. D. McNiven, Deputy Minister of Labour, Victoria, B.C. On behalf of Employers—John J. Cough-

lan, of the shipbuilding firm of Coughlan and Sons, Vancouver, B.C. On behalf of Employees—James H. McVety, Treasurer, Vancouver Trades and Labour Council (International), Vancouver, B.C.

The Minister further recommends that the meetings of the Commission be held in Ottawa, commencing on Monday, April 26, 1920; that the Commissioners have the right to determine the manner of conducting the proceedings in respect of the inquiry, and that the report of the Commission on the matters investigated and their recommendations be presented to the Minister of Labour.

The Committee concur in the foregoing and submit the same for approval.

RODOLPHE BOUDREAU,  
Clerk of the Privy Council.

(NOTE.—No formal nominations to the Commission were received from the Government of Prince Edward Island, but at the request of the Prince Edward Island Government, Senator Murphy and Mr. J. E. Sinclair, M.P. for Queen's, Prince Edward Island, attended the closing sessions.)

## TEXT OF REPORT OF COMMISSION

Ottawa, May 1, 1920.

The Honourable Minister of Labour,

Ottawa, Canada.

Sir,—I have the honour to present the report of the Commission established under P.C. 721.

The duties placed on the Commission are best indicated in the resolution adopted unanimously by the National Industrial Conference at Ottawa in the month of September, 1919, in the terms following:

“Resolved:

That the advantage of uniformity in the laws relating to the welfare of those engaged in industrial work in the several provinces of the Dominion of Canada be brought to the attention of the Government of Canada and of the Governments of the several provinces respectively; and that this National Industrial Conference suggests the following as a means towards the end desired, namely:—

The appointment of a Board composed as follows:

(1) As respects the Dominion:

- (a) A representative of the Government.
- (b) A representative of the employers.
- (c) A representative of the employees.

(2) As respects each of the Provinces:

- (a) A representative of the Government.
- (b) A representative of the employers.
- (c) A representative of the employees.

And that the Dominion Government be requested to ask the Government of each of the Provinces to select or have selected representatives in respect of the Province as above set forth.”

A Commission on the lines here indicated was accordingly appointed by concurrent action on the part of the Federal Government and the Governments of the several provinces.

The Commission assembled at Ottawa on the morning of April 26th.

After an address from yourself as Minister of Labour, discussing generally the matters which would come before the commissioners, the Commission proceeded with its work; the undersigned being selected as chairman.

The various members of the Commission had, as a rule, prior to their arrival at the Capital, received from the Department of Labour copies of abstracts of Canadian legislation on each of the four following subjects, namely: (1) Workmen's Compensation, (2) Minimum Wages, (3) Inspection and Regulation of factories, shops and office buildings, (4) Regulation of Mines, and it was assumed by the Com-

mission that it would be the desire of the Government that these subjects, while by no means exhausting the field for effective work with respect to the unification of labour legislation, should in the first place receive attention. The Commission proceeded on these lines accordingly and after a brief review of the ground to be covered, Committees were appointed to take up for consideration and necessary action each of the four subjects named above; a Committee was also appointed to consider and deal with the subject of legislation with respect to industrial disputes so far as this matter was deemed to be before the commission. Each of these Committees has reported and their respective findings have been made a portion of the report of the Commission and are hereto attached.

A further Committee was appointed to consider the question of the establishment of an organization deemed likely to be of benefit for the promotion of the uniformity of labour legislation. The Committee submitted a document as a basis of discussion and not as its findings, but owing to variance of opinion the whole matter was laid on the table.

I beg to state in conclusion that the proceedings of the Commission throughout have been marked by a spirit of mutual good-will, and I am to express the view that it is felt the findings will be of material benefit for the purposes in view.

F. A. ACLAND,  
Chairman.

### Report of Committee on Workmen's Compensation Legislation

The Committee on Workmen's Compensation Legislation beg leave to recommend as follows:

1. That all Provinces adopt the idea of exclusive state insurance to be administered by a Board.

2. That all workmen, not specially exempted under the Act, who work in an industry which comes within the scope of the Act, shall be under the Act, regardless of the amount of their remuneration.

3. That all employees of Provincial Governments and of Municipalities, including Police and Firemen, be included within the scope of the Act.

4. That the scope of Compensation Acts be extended as far as practicable to include industries not now covered by the Acts.

5. That in all Provinces contributions to the accident fund shall be borne exclusively by the employer.

6. That all medical, surgical and hospital attention be supplied in cases of injury or industrial diseases.

7. That in every Province there should be a time limit within which claims for compensation should be filed.

8. That except in special cases payment of

compensation shall be made periodically direct to the claimant by the Board.

9. That injuries due to disease or accident arising out of and in the course of employment should be considered as coming within the scope of the Acts.

10. That the cost of administration of Workmen's Compensation in each Province be borne by the Government of that Province.

11. That rules and regulations for prevention of accidents be made by the Board in each Province, and safety committees composed of employers and employees be established in the various places of employment, and further that first aid appliances be installed at the various plants; all the foregoing to be under the direction of the Board.

12. Where under any Compensation Act the employer has the right to bring his employees under the Act by election, the employees should have the same right where a majority so decide.

13. That in cases of death or injury all Provinces should adopt a uniform scale of compensation.

14. Your Committee beg leave to call attention to the comparative table of Workmen's Compensation legislation in the different Provinces, which is produced herewith.

COMPARATIVE TABLE TO ACCOMPANY REPORT OF COMMITTEE ON WORKMEN'S COMPENSATION LEGISLATION.

	Nova Scotia.	New Brunswick.	Quebec.	Ontario.	Manitoba.	Saskatchewan.	Alberta.	British Columbia.

## II

## Report of Committee on Factory Laws

1. In view of the limitation, in certain Provinces, of the operations of the Factories Act to the industrial establishments where not less than a certain number of persons are employed, we would recommend:

"All industrial establishments in which one or more persons are employed where articles are manufactured, altered, cleaned, repaired, ornamented, finished, adapted for sale, broken up or demolished, or in which materials are transformed, shall be subject to inspection."

2. Employment of boys and girls:

No boy under 14 years of age or no girl under 15 years shall be employed in an industrial establishment.

3. Hours of employment for boys, girls and women:

In keeping with the draft convention of the Washington Conference limiting the hours of labour, we recommend that women, girls and boys shall not be employed for more than 48 hours in any one week, nor before six o'clock in the morning nor later than ten o'clock in the evening, nor more than ten hours in any one day, *including overtime*.

Boy shall mean a male person between the ages of 14 and 16 years.

4. That all laws at present existing in any Province dealing with the improvement of sanitation or the protection of life should be made general to such other industries as may be possible throughout the Dominion.

## SCHEDULE OF FACTORY ACT LEGISLATION.

Provinces.	Name of definition of law.	Scope of act.	Age of employment of children, boys and girls.	Hours of work, children and females.	Health and safety measures.
Alberta.....	The Factories Act, 1917.	All factories, shops and office buildings, premises determined by schedule "A" where power is used for preparing or manufacturing purposes.	Age of admission from 15 years. No provision for unhealthy occupations.	10 hours per day	Health and safety measure provided for in all provinces.
British Columbia.	The British Columbia Factories Act.	All premises where mechanical power is used or where three persons are employed, or all other premises that may be brought under the law by Order-in-Council.	15 for girls..... 14 for boys.	8 hours or 48 per week.	Health and safety measure provided for in all provinces.
Manitoba.....	The Manitoba Factories Act.	All premises where mechanical power is used for manufacturing purposes, or where three persons are employed, or other premises that may be brought under the law by Order-in-Council.	15 for girls..... 14 for boys.	9 hours or 54 a week.	Health and safety measure provided for in all provinces.
New Brunswick.	The New Brunswick Factories Act.	Building, office or place in which persons are employed in handicraft. Building under erection. Temporary work shop or shed is exempt.	14 for boy or girl.	10 hours a day and 60 a week.	Health and safety measure provided for in all provinces.
Nova Scotia...	Nova Scotia Factories Act.	Covers establishments in which persons are employed where manufacturing is being carried on where power is used, or any premises brought under by Order-in-Council.	14 for girls..... 14 for boys. except for some occupations.	9 hours, 54 per week.	Health and safety measure provided for in all provinces.

## SCHEDULE OF FACTORY ACT LEGISLATION (Concluded)

Provinces.	Name of definition of law.	Scope of act.	Age of employment of children, boys and girls.	Hours of work, children and females.	Health and safety measures.
Ontario.....	The Factory, Shop and Office Building Act.	Building, workshop, structure or premise of the description mentioned in Schedule "A" or any premise proclaimed by Order-in-Council. All premises where mechanical power is used or where five persons are employed.	14 for boys and girls, 16 for boys, 18 for girls in unhealthy industries	10 hour day and 60 week. No night work allowed.	Health and safety measure provided for in all provinces.
Saskatchewan-	The Saskatchewan Factories Act of 1909.	All premises where mechanical power is used, where three are employed or all other premises brought under the law by Order-in-Council.	14 for boy or girl.	48 hour week...	Health and safety measure provided for in all provinces.
Quebec.....	Industrial Establishments Act of Quebec.	All mills, factories, workshops, except shops where persons of one family, and do not operate with mechanical power. Mines also are exempt.	14 for boys and girls, 16 for boys and 18 for girls in dangerous occupations.	10 hours per day 60 week. Textile operatives 55 hour week. No night work allowed.	Cleanliness, light, air space, ventilation and safety mechanical appliance and in case of fire. Special provision in connection with dangerous or unhealthy occupation.

## III

## Report of Committee on Mines and Mining Laws

Your Committee, appointed to investigate the regulations of mines in Canada, and keeping in mind P.C. 722, being our guidance, have investigated the folio on mining laws, item by item for each and every Province, and after very extended deliberations, and considering the interests of all concerned, beg leave to report the results of our investigations and deliberations.

We find that many minor provisions exist in the various Acts throughout Canada which are made necessary by local conditions and concerning which no practicable uniformity is possible. The Committee have, therefore, directed their attention to those principles or provisions of a general character which are applicable to all Provinces.

We are pleased to report that we have been unanimous in all findings with the exception of one, and also pray that the Commission may approve of our work.

That we recommend that the mining laws be unified as follows:

1. That the age of 14 be the minimum age for boys working around mines (above ground), and that no boy be allowed to work beneath the surface unless he has attained the age of 16.

2. That we recommend:

That no boy under 18 years of age shall be in charge of or operating any power machinery used for moving material in a mine, and no person other than a man of 21 years of age or over shall operate any power machinery used for raising or lowering persons in a mine.

3. In order to bring uniformity in mining laws, we recommend that all provinces should insert regulations in mining laws providing for not more than 8 hours as a legal day's limit of the work, as incorporated already wholly or partly in the existing laws of Alberta, British Columbia, Ontario, Quebec and the Yukon.

4. That your Committee recommends:

That payment of wages at least semi-monthly be made compulsory by law in all provinces where such legislation is not already in existence, such payment to be made by cheque or currency. Payment of wages on hotel premises and the cashing of pay-cheques in or at a hotel or bar where intoxicating liquors are sold to be prohibited by law in all provinces.

5. That your Committee recommends:

That legislation providing for miners' liens be enacted in all provinces where such legislation is not already in existence, applying to mines, mining claims, mining lands or work connected therewith, and that every person who performs labour for wages shall have a lien thereon.

6. That your Committee recommends:

That legislation be enacted in all provinces where legislation is not already in existence, providing that no amount may be retained from wages of an employee except sums due for powder, coal, oil, rent, and such doctors' and hospital fees as may be approved by the Workmen's Compensation Board, and supplies necessary to the execution of the work carried on by such employee, nor shall an employer apply the wages of an employee to payment of a debt without the written consent of the employee given individually or by collective agreement.

7. That where, in any Province, examinations are required for certificates of competency for mine managers, pit-bosses, and other working officials, such examinations shall be conducted by a board composed of a government inspector, a working miner and a mine manager.

8. We would recommend that all candidates for certificates as mine managers, pit-bosses, etc., shall have at least five years' mining experience, produce evidence of ability, sobriety

and good conduct, and be at least 23 years of age.

9. Mine inspectors shall be holders of mine manager's certificates, with at least seven years' mining experience in the class of mines of which he is made inspector. He shall not be interested in mines in his district, either directly or indirectly.

10. We recommend that, without limiting the powers of inspectors, an inspector shall have power to enter, inspect and examine any mine or any part thereof at all reasonable times by day or night, to examine into and make enquiry respecting the state and condition of the mine, the ventilation and safety of mines, to give notice in writing of any matter, thing or practice which he considers dangerous or defective, and of its immediate remedy. If disagreement follows, the defect shall be referred to a board of arbitration consisting of a judge and representatives of interested parties, the decision of this tribunal to be final.

11. Resolved, that all mines shall have an adequate amount of ventilation passing therein, and that all mines be examined before the workmen enter the mine, and that a report of such inspection be made in a book to be kept at the mine for the purpose, and such report shall be available to any workman employed in mine.

12. The question of health of employees in mining camps is now being examined into by the different provinces concerned, with a view to fully protect the workers and as far as possible unify the laws, and we submit that this matter be referred to this tribunal for action.

13. Resolved, that the present laws with reference to special investigations which are in existence in several provinces be continued, and that the same provisions be made to extend to provinces where such laws are not in operation.

14. Resolved, that the Workmen's Compensation Board in each province where such board exists shall make provision for the administration of first aid and mine rescue work, and that where no boards are in existence, special provisions be made.

## IV

### Minimum Wages for Women and Girls

We approve the principle of a minimum wage for women and girls, and recommend that a competent authority be created in each Province in the Dominion to establish a minimum wage adequate to maintain self-support for women and girls, and such authority shall be

empowered to fix the hours of employment for such women and girls not already provided for by legislation, and further recommend that such hours of employment should not exceed 48 per week except of employees engaged in domestic or agricultural employment.

## V

**Report of Committee on Industrial Disputes Legislation**

The Committee has examined the existing legislation of the Dominion and Provinces with respect to industrial disputes, and is of the view that to secure a reasonable degree of uniformity with regard to the same it is desirable the following principles should be observed:

1. That disputes in mines and public utilities should be dealt with exclusively by federal legislation.

2. That federal legislation should be held to apply to public utilities under the control of a Province or municipality or other public or private authority.

3. That, whereas, in some cases provincial legislation has been enacted respecting industrial disputes which applies to all occupations giving rise to the relations of employer and employee and which therefore includes policemen and firemen, it should be provided that all disputes affecting policemen or firemen in all parts of Canada should come within the jurisdiction of the federal law.

4. The Committee lacks information enabling it to decide upon the advisability of the extension of the present federal law to other industries, and therefore makes no recommendation.

**THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE**

THE third meeting of the Governing Body of the International Labour Office began in London, England, on March 22, and closed on March 25. The first meeting of the Governing Body, it will be remembered, was held at Washington, D.C., in the last days of November, 1919, and immediately following the appointment of individual members by the International Labour Conference which had been in progress in that city. The second meeting was held in Paris and extended from January 26 to January 28.

Mr. F. A. Acland, Deputy Minister of Labour for Canada, acting as substitute for the Honourable G. D. Robertson, Minister of Labour, represented the Dominion Government, and Mr. Tom Moore, President of the Trades and Labour Congress of Canada, acting as substitute for Mr. P. M. Draper, of Ottawa, Secretary of that body, attended on behalf of the workmen of North America. The sessions were held in the Library of the House of Lords, which had been placed at the disposal of the Board. Mr. A. Fontaine, Chairman of the Board and representing the Government of France, presided, and Mr. A. Thomas, the Director, and Mr. H. B. Butler, Deputy Director, and other leading officials of

the International Labour Office, were in attendance. Reports were received from the Committees on Organization and Finance, which had been appointed at the Paris meeting of the Board, and these reports, after ample discussion, were adopted.

At the January meeting of the Board, Mr. F. Sokal, Government representative from Poland, had moved for the appointment of a Commission to visit the countries of Eastern Europe and Russia, with a view to inquiring into labour conditions and particularly to investigate the bearings of the Soviet governmental system on industrial workers. The Director reported that the question of the appointment of such a Commission had been, subsequent to the January meeting of the Board, taken up with the officials of the League of Nations, and the latter body had accepted the view that reliable information on such matters would be of the highest value and had suggested that it might be an advantage if the Commission were appointed by the League of Nations. After discussions between the officials of the League of Nations and those of the International Labour Office, the Council of the League of Nations had decided to appoint a Commission to investigate the

economic conditions in Soviet Russia, provided the consent of the Soviet government was received, and had invited the International Labour Office to name two persons, one an employer and one a workman, for appointment to the Commission. The Governing Body at its London session gave this matter much consideration, and decided to accept the suggestion of the Council of the League of Nations and named two persons, one representing employers and one representing workmen, for membership on the Commission to be appointed by the League of Nations, the persons in question being selected respectively by the groups affected. The Governing Body deemed it desirable, however, to proceed with the appointment of a Commission which would make a special inquiry into industrial and social conditions, thus covering matters which would, it was thought, fall outside the scope of the Commission appointed by the Council of the League of Nations, and a Commission was accordingly established, composed of ten members, four representing employers, four representing workmen and two representing governments. The Board decided that there might also be appointed one adviser for each member appointed by employers and workmen, and two advisers for each of the two members, to be named by governments. The employing and workmen groups named their members and advisers before the Board dispersed. It is understood that the workmen members of the Governing Body asked that Mr. Tom Moore or Mr. P. M. Draper would accept membership on the Commission, and that Mr. Moore was unable to accept either this proposition for Mr. Draper or himself; Mr. Arthur Martel, of Montreal, Vice-President of the Trades and Labour Congress of Canada, and representing the United Brotherhood of Carpenters and Joiners, was, however, named as one of the advisers. France and Great Britain were selected by the Government members of the Board as the two countries which should be requested to send Government delegates, and the Governments of Poland,

Czecho-Slovakia, Italy and Switzerland will be requested to name advisers to these delegates. Some discussion arose as to the relations of the International Labour Office to the League of Nations and the extent to which the International Labour Office is autonomous. So far as this question bore on the appointment of the Commission the feeling of the Board was that, while it was entirely within the authority of the Governing Body to appoint the Commission, there would be manifest advantage to all, that there should be the fullest measure of co-operation and that the Labour Commission would therefore preferably begin its work after the Commission established by the League of Nations had started its inquiry.

A further matter of importance related to the resolution adopted at the International Labour Conference at Washington in November last, requiring the Governing Body to set up an International Commission to study the question of regulating emigration and immigration and protecting the interests of wage earners not residing in their own country. The Conference had also decided that the representation of European States on this Commission should be limited to one-half of the total number of the members of the Commission. The Governing Body, in dealing with the matter, decided that the Commission in question should be composed of eighteen members and an independent chairman. In determining the composition of the Commission the following points were taken into consideration: first, that of equal representation of Governments and employers and workers; secondly, that of equal representation of European and non-European countries; and thirdly, that of the respective importance of different countries from the point of view of emigration and immigration. The Governing Body decided to invite the British Government to nominate an independent chairman of the Commission, and allotted to eighteen other countries seats for representatives of Governments, em-

employers and workers in accordance with the following list:

Governments. Employers.		Workers.
Brazil	South Africa	Germany
Canada	Argentina	Australia
China	Spain	United States
France	Greece	Poland
Japan	Czecho-Slovakia	Italy
India	Switzerland	Sweden

Canada, it will be observed, falls within the list of countries which will appoint a Government representative and a substitute.

The discussion on the subject indicated a general view that the Commission in question would not be brought formally together until shortly before the meeting of the General Conference, which is expected to be held early in 1921. It was understood that the Labour Office would in the meantime issue an extensive questionnaire and otherwise gather information pertaining generally to the subject of immigration, which would serve in the nature of a preliminary report on the subject and would be of value for the Commission as a basis for its work.

A further incident of interest in connection with the proceedings of the Governing Body was that pertaining to the establishment of permanent offices. The

International Labour Office is at present located in London in temporary quarters. The Labour Convention section of the Peace Treaty provides that the offices of the International Labour Office shall be at the same place as the offices of the League of Nations. Definite action on this point could not be taken pending the issue of a plebiscite to be taken on May 16, 1920, by the Swiss Government, which will determine whether or not Switzerland shall enter the League of Nations. Inquiry as to suitable premises, etc., at Geneva had been, however, made, and the Board instructed the Director to secure an option on certain buildings in that city, which will permit purchase or rental of the same in the event of the offices being permanently located there.

Some attention was given to the matter of the agenda of the Conference of 1921, and it was decided to place on the agenda questions which would relate to the applicability to agricultural workers of certain of the recommendations of the Washington Conference. The agenda will be more fully considered at the next meeting of the Board which will be held at Genoa on June 8, one week prior to the special conference which will be held in that city relating to the work of seamen.

## MANITOBA JOINT COUNCIL OF INDUSTRY

**I**N accordance with the provisions of the Manitoba Industrial Conditions Act,\* which became law on March 14, 1919, a Joint Council of Industry has been completed for the Province consisting of five members, namely:

Chairman—Rev. Dr. Charles W. Gordon, Winnipeg. Representing Labour—Alderman W. B. Simpson (of International Typographical Union); and Alderman E. Robinson (Secretary of Winnipeg Trades and Labour Council). Representing Employers—John Stovel of the Stovel Company Ltd., printers and

lithographers, Winnipeg; and H. B. Lyall, of the Manitoba Bridge and Iron Works Ltd., Winnipeg.

The Council holds office during the pleasure of the Lieutenant Governor in Council. It has authority on complaint of any person or organization or on its own initiative, to investigate conditions in any industry where a dispute is in progress or is considered likely to arise; to examine the cost of living of employees and publish monthly reports thereon, and to report also on cases of excessive prices; to publish monthly statistical employment reports and encourage the formation of labour organ-

\*See LABOUR GAZETTE, April 1919, page 492.

izations; to investigate conditions of employment from time to time, including housing, sanitation, apprenticeship, facilities for education and recreation, and provision for the future; to report on unfair profits made in any industry at the expense of the employees' wages; to assist employees having specific grievances against their employers to secure redress in a court of competent jurisdiction; to formulate complaints and secure convictions against persons appearing to have committed offences against existing laws affecting employment; to examine existing or pending

legislation and to propose laws designed to better conditions of employment and to prevent unemployment. Full publicity is required for all reports and decisions of the Council, and no decision is to be finally adopted before a duly advertised public meeting has been held at which any interested party or any citizen may appear. In addition to the powers provided in the Act, the Council has the same powers as are vested in the Court of King's Bench of Manitoba in respect to enforcing attendance of witnesses, compelling production of documents and other evidence and punishing persons guilty of contempt.

## THE KANSAS INDUSTRIAL COURT ACT

### A criticism of certain provisions of the law

THE new law establishing the Court of Industrial Relations for the State of Kansas was described in some detail in the March issue of the *LABOUR GAZETTE*. The law is based on the principle that in all industrial disputes the public interest must remain paramount. The Kansas legislation has since been made the subject of an interesting article by Professor W. E. Atkins, of the University of Chicago, in the April issue of the *Journal of Political Economy*.

The Court of Industrial Relations, according to Professor Atkins, should be regarded as an experiment the result of which might, or might not, be of special import in the history of the relations of labour to the state. Certain opinions may be ventured, however, as to the probable success of the Kansas line of approach, through consideration of (a) certain difficulties of procedure, and (b) certain variables which may interfere with the carrying out of the experiment.

With respect to the first consideration, Professor Atkins suggests that the act contains some weaknesses in draft-

ing and points to section 12, which provides as follows:

In case of such proceedings in the Supreme Court by either party, the evidence produced before said Court of Industrial Relations may be considered by the said Supreme Court, but said Supreme Court, if it deem further evidence necessary to enable it to render a just and proper judgment, may admit such additional evidence in open court or order it to be taken and transcribed by a master or commissioner.

If the Supreme Court refuses, as it may under the provisions of the Act, to accept as final the evidence before the Court of Industrial Relations and re-opens the case to new evidence, the history of the experience of the Interstate Commerce Commission with the United States courts prior to 1906 may be repeated, wherein both shipper and railroad "came to regard the proceedings before the Commission as merely a formality to be observed prior to conclusive adjudication of the matter by the courts," and the Commission, compelled to render a decision upon imperfect evidence, was liable to review upon the basis of entirely new testimony. In the end this means not only duplication of effort, but it means that a court of law,

not an administrative body, ill-equipped to secure information on the numerous aspects of industry, becomes the real governing body.

Professor Atkins points out a possible difficulty in determining exactly to what extent certain industries are affected with a public interest. On this point the act reads as follows:

1. The manufacture or preparation of food products whereby, in any stage of the process, substances are being converted either partially or wholly, from their natural state to a condition to be used as food for human beings.
2. The manufacture of clothing and all manner of wearing apparel in common use by the people...
3. The mining or production of any substance or material in common use as fuel...

"It will be noted," he says, "that clothing, wearing apparel, and fuel have the qualification 'common use,' while food has not. By implication, then, it would seem that the doctrine is unrestricted in the field of food manufacture and preparation and that the making of ice cream and salad oil in Kansas is impressed with a public interest. Nor is this all. Clause 2 extends the doctrine to the manufacture of clothing and all manner of wearing apparel in common use by the people. If the people of Kansas wear neckties, the doctrine attaches to neckties also.

"It is commonly recognized, of course, that no state law can interfere arbitrarily with private business, and the mere fact that this law declares such items as have been mentioned to be subject to the supervision of the state for the purpose of guarding relationships 'directly affecting the living conditions of the people of the state' does not close the matter. A reasonable relationship must be shown.

"These illustrations disclose the all-inclusive nature of the Act, which is unfortunate in one respect, at least, that it makes possible appeal on the most trivial of cases. Under the Act it would seem possible to appeal case after case to the Industrial Court on the most flimsy of grounds, although it is true that the court has some discretion in determining

whether it will take the matter up for review and investigation."

Naturally, the writer points out, a law of such extraordinary content has aroused criticism and defence of the most virulent type; and he quotes the adverse criticism of prominent labour men, and adds that "manifestly the Act is contrary to what labour has considered to be its interests. Although the Act permits organization and recognizes it, declares labour has the right to representation in disputes and in court through attorneys or other individuals of its own choosing, and although a declaration is made affirming labour's right to a fair wage and decent conditions, and although the court does not interfere except where disagreements affect production and transportation, still these concessions have not reconciled labour, ordinarily, to the degree that labour has felt it could give up the right to strike. The experience in this country, the history of legislation in England leading up to the British Industrial Disputes Act of 1906, which places no limitation upon the strike, the Canadian Industrial Disputes Act, which makes provision for certain strikes to be called legal and has not prevented many illegal ones, and the checkered history of compulsory arbitration systems, do not suggest that Kansas has a substitute for strikes, or that striking may not be an excellent thing to recognize on certain occasions. These facts, coupled with an unfortunate failure to assure the worker that someone truly represents his interest, do not augur well for the Kansas experiment."

Professor Atkins, however, admits the educational value of such an Act. "At least, if it is in the wrong direction, the experiment will confirm somewhat the views of those who believe that, though the field is a proper one for legislation, the approach ordinarily should not be with the idea of taking away the right to strike from labour or the right to lockout from the employer, but with the idea of equalizing the situation, of removing confusion and uncertainty as to the status of the law, and of placing emphasis upon mediation and conciliation,

through providing machinery for facilitating such achievements."

The above article contains as an addendum the text of the first decision of the Court of Industrial Relations, which has reference to a dispute in which the

complainants were the State of Kansas on the relation of the attorney-general *et al.*, and the respondents; the Topeka Edison Company, which markets electric current for heating, lighting and street-car service.

## PRINCIPLES OF LABOUR RELATIONS

### Declaration of Principles by the Committee on Labour Relations of the Cleveland Chamber of Commerce

A COMMITTEE on Labour Relations appointed by the Chamber of Commerce of Cleveland, Ohio, has drawn up a declaration of principles with the aim of establishing a basis for proper labour relations in their community. The committee recognizes a mutuality of interest between investors, employers and employees, and holds that the interests of these classes, as well as the public interest, must be defined and protected. In view of increased production being required to reduce prices, it is declared that employees should not intentionally restrict industrial output in order to create an artificial scarcity of labour, and should recognize the duty of the employer to adopt new and improved machinery and methods. It is recognized that employers should not restrict production in order to increase prices, or introduce methods of production that are hurtful to the employees. In fixing wages the following factors should be taken into consideration: Cost of living; opportunity to advance standard of living; savings; loyalty; productivity—quality and quantity; initiative and individual skill; nature and hazard of the work; importance of the work performed; punctuality and steadiness; continuity of employment. As a general principle women should receive equal pay with men for equal work, but this must be qualified by the fact that costs of maintenance, overhead, supervision and turnover are generally higher in the case of women

than of men. Hours of work should be fixed at a point consistent with the physical well-being of the worker, providing adequate time for rest, recreation, home life and self-development, consistent with the public's economic requirements. The eight-hour day, or a weekly equivalent, is recognized as a standard. Overtime work should be discouraged, but where necessary, extra compensation for such work should be awarded. One day a week, preferably Sunday, should be provided as a holiday, and Saturday half-holiday should be encouraged. Every effort should be made to perfect the conditions of employment, with special reference to sanitary conditions, heat, light, ventilation, safeguarding the health of workers and providing protection against, and treatment in cases of industrial accidents and occupational diseases; suitable rest periods where necessary; and due warning to the worker if he is undertaking to perform a hazardous operation. Provisions should be made permitting employees to appeal to higher officers in cases of unjust treatment or arbitrary discharge by their foremen or immediate superiors. Adequate advance notice should be given, whenever possible, to employees who must necessarily be laid off; likewise, an employee should give reasonable notice to his employer of his intention to leave. Proper industrial relations between employers and employees should be promoted, where possible, by means of representative negotiation or collective bargaining, though

this should in no way interfere with the right of individual employees to negotiate directly with their employers. Employers and employees should uphold in their integrity all arbitration awards or agreements thus entered into between them. Freedom of contract of employment must never be impaired, but employers should not discriminate in the employment or discharge of employees because of their membership in a trades or labour union; and employees should not arbitrarily insist that employment in any establishment be conditioned on membership or non-membership in a trades or labour union. However, when employers and employees desire it, there should be nothing to prevent the making of an agreement between them for the maintenance of a union or non-union shop or department. Employers should keep their employees informed on the subject of business principles as affecting their mutual interests, especially the relation of wages and expense to costs

and prices, and the necessity for an equitable return on invested capital. Frankness in placing before employees business details necessary to prove these economic facts is advised. Employees should be equally frank in discussing with their employers matters affecting their conditions of employment and the interests of their industry. Violence, intimidation, ostracism, humiliation or blacklisting cannot be tolerated in labour relations on the part either of the employer or of the employees, and the laws respecting these practices should be fearlessly enforced. Since the public's right to service is of primary interest, therefore public opinion should be a potent influence in the settlement of labour disputes, and should be brought to bear before either party resorts to strike or lockout; especially should this apply in cases of disputes in essential industries, government services, and public utilities, where the public's right to uninterrupted service is a primary consideration.

## NEW INDUSTRIAL PLAN FOR CLEVELAND'S GARMENT INDUSTRY

### Piecework Abolished Under "Scientific Management"

A NEW experience in industrial reform is reported from Cleveland, Ohio, one of the chief centres of the United States garment industry, where the six locals of the International Ladies' Garment Workers' Union and the members of the Cleveland Garment Manufacturers' Association recently signed an agreement designed to stabilize the industry by giving the employees a new interest in management, and by raising their status from that of daily wage-earners to that of salaried workers engaged by the week. Thirty-five concerns, and about 6,000 workers, many of them of alien race, are concerned in the scheme. It is the outcome of a joint effort to compose differences which developed last December on the expiration of the war-time agreement of 1918. Instead of the general strike which had

been arranged for December 24, 1919, to enforce union recognition, meetings were held between the Union leaders and the various company officials. These conferences resulted in a rearrangement of the entire industry on a new basis, the principle of the week's work being recognized with the understanding that the new arrangement "shall have due regard to the production value of the individual worker based on fair and accurate standards." The details were to be settled later with the assistance of a board of three independent referees of which board Judge Julian W. Mack, of Chicago, was appointed chairman. These referees are considered by both sides as representing the public. Both sides agreed also to engage a New York firm of industrial engineers to make a special study of conditions existing at Cleve-

land, with instructions to arrange a wage scale on the basis of a protected minimum income, to devise new plans for industrial efficiency and to apportion the responsibilities of production. Half the cost of this enquiry, or \$10,000, was undertaken by the Union and half by the Cleveland Garment Manufacturers' Association. The findings of the engineers are to be presented from time to time in reports for approval by both parties. The agreement assigns to the board of referees as one of its duties the annual revision of the wage scales; it gives new powers to the shop chairman, or shop steward, in the settlement of shop disputes; it abolishes inside subcontracting and regulates outside contracting; and it prohibits strikes or lock-outs. As a substitute for the closed shop, in the general principle of which Meyer Perlstein, vice-president of the Union, declared that he did not believe, the following clause is inserted in the agreement: "This agreement shall be so administered that the position of neither of the parties to it shall be intentionally weakened. On the contrary, it is expressly understood that each party shall assist as far as possible in maintaining the integrity of the other. Any member of either group, guilty of violating this agreement shall be disciplined on order of the referees." Instead however of weakening the Union the agreement so far has had the contrary effect of adding to its strength, the referees interpreting the above article as requiring union workers to continue their membership.

In explaining the scheme, Mr. Perlstein claimed that "we have come to a point where the old woolly words and phrases won't do. We can't get anywhere talking about rights and about a fair day's pay and fair day's work. Nobody knew what a fair day's work was. So we started to find out. Joint control of production standards is what will make it possible for the union to accept a graduated scale based on production. The marginal worker will earn a living wage and the well-trained worker will be paid propor-

tionately for his skill. Joint control within the plant and joint supervision of the time tests and the application of the engineers' findings will prevent speeding up... We don't think so badly of efficiency. Labour union leaders must become more familiar with industrial problems, including those of management and even of selling; especially must they understand works management and how it affects the worker."

Employers operating under the scheme are undertaking as far as possible to spread the work period uniformly throughout the year and to eliminate the slack seasons that aggravate the labour problem in the garment industry. They hope to accomplish this through conferences with retailers and through advertising appeals to the purchasing public.

The plan adopted by the Cleveland operators and workers had a varied reception in labour circles outside the industry; but it is stated that the largest American cloak and suit plant, which has hitherto worked under the Leitch plan of organization, will adopt the new plan if it should prove successful after a trial of six months.

### Report of Industrial Engineers

The industrial engineers mentioned above have presented their first report, in which the principle underlying a fair basis of wages is outlined as follows:

In arriving at a fair basis for the remuneration of employees under your agreement, it is necessary to bear in mind that what we are all about is an attempt to find not only the worker's, but also the employer's fair share in the fruits growing from their co-operation in industry.

The worker's share we call a wage, and our immediate quest is some rule of measurement by which that wage may represent a fair share. The wage is not paid by the employer; he merely markets the product and acts as an agent to pay the worker for the part he has done. Because the employer pays this wage before he sells the product and receives the exact money from which the wage in theory is paid, does not alter the relation, for that is merely the exercise of the banker function of the employer. The wages are paid solely out of production—out of the goods that are turned out.

Since neither wages nor profits can rise to a permanent higher level of buying power unless a larger per unit production is constantly achieved, the wage must be responsive to the production which it helps to cause. Therefore fair wages are not to be considered apart from production but in connection therewith.

If we bear in mind what a wage is, then the problem ceases to be expressed in dollars but in terms of production. If we then get units of production and for each unit determine the contribution of labour in units we have only to multiply the labour units by the dollar value which for the time being is agreed upon for the unit, in order to gain the wage.

Fitting the wage to the work is, therefore, not merely an abstract economic but also a practical human problem in which our experience has taught us to be guided by these general principles:

(1) A plan of wage incentive must be accepted by both employer and employee as the fairest under the circumstances;

(2) It must be based on fair and agreed upon standards of production;

(3) It must be so simple that both workers and employers can figure it out for themselves without expert aid;

(4) It must provide for an increase in reward at least proportional to the increased effort and thought expended in realized production;

(5) It should recognize that the mere attendance of a worker ready to work is worth a wage. The management must pay interest upon idle machinery; by analogy it must pay for those human beings that it requires to be present but for whom it does not provide work;

(6) It must safeguard both the employer and the workman against unfair rates or conditions;

(7) The incentive is largely weakened when payment is deferred. Therefore the reward must quickly follow the effort;

(8) To the extent that the reward is for individual effort it should be paid for individual effort. The real efficiency of an individual depends upon the extent of the co-operation he gives to and receives from others; but to the greatest degree possible his personal reward should be responsive solely to his individual effort;

(9) The incentive should not be such as to stimulate an abnormal effort, for an abnormal effort must, by the law of nature, be succeeded by a subnormal effort, and thus the ends of production are not furthered. It is not necessary to have recourse to the so-called humanitarian arguments to demonstrate the futility of spasmodic, abnormal effort;

(10) Any plan adopted should include the maximum number of elements that have been successfully demonstrated in practice.

The wage plan recommended by the engineers, with specific figures to show its operation, is as follows:

For a week of forty-four hours a skilled tailor, by the provision of Clause A, Code 22, of the award of January 1, 1920, receives a weekly minimum of \$44. Assume that the referee has set a standard of \$50 for the average man working at an average speed. Call the first amount the minimum rate (\$44) and the second standard rate (\$50).

All work will be rated by time study, and a certain value in points assigned to it. This point value is to be such that if the man works throughout the week at an average rate of speed he will make 100 points.

For instance, if we find that it takes at average speed 88/100 of an hour to make a garment, a workman should make at average speed 50 garments in a week of 44 hours. For each garment made he receives 2 points, which is arrived at by dividing 88 by 44. If he produces 50 garments he will receive 50 times 2, or 100 points. These points multiplied by his standard rate (see above) will give \$50 as the wage for the week.

The man, however, will always be sure of getting \$44 for the week—if he is not laid off and is regular in attendance.

On days that a man may be asked to report for work and when no work is assigned to him he shall be given sixteen points for an eight-hour day.

When a man is given work to do he should be paid the points which he makes by accomplishing that work and for the idle time during the day should be credited at two points per hour. In other words the workmen's enforced idle time during attendance at the shop should be paid for at the minimum rate. Thus pay for idleness is guaranteed, but any workman who does rated work earns more than the minimum or idleness rate.

There also should be set a limit to the number of points a man may make in a week. This limit should be high, for the very nature of the work is such that capacity for production is largely dependent on the individual skill of the workman.

The standard rate when set by the referee should be considered as bearing a definite ratio to the minimum now determined in the award, and as that minimum may have to be changed from time to time at the discretion of the referee, the standard rate should be raised or lowered in the same proportion.

In this plan of wage payment we have units of productive effort which bear fixed proportions to production. They form the base of payment and do not have to be revised with every revision of the award as would be the case were they expressed in dollars. But the earnings of the employees automatically in-

crease or decrease according to the award of minimum rates.

The workman should in advance be notified of the rating in points given to each garment. He can then easily keep count of his work and know at the end of each day what his earnings have been. He also has the assurance that if he comes to work on the next day he will earn at least the minimum awarded him by the referee.

No intricate calculating is required by this plan. Any man can do his own figuring. And further, those manufacturers who have methods in accordance with scientific principles need make changes only in minor details fully to comply with the principles. This plan is not experimental. It has been tried and operated successfully—that is, with complete satisfaction to both employers and workmen—in a great many plants.

## A COMMITTEE TO INQUIRE REGARDING INCREASED PRODUCTION IN GREAT BRITAIN

FOR some time past the British Government has had under consideration the urgent need for an inquiry into the question of increased production in industry, and the Ministry of Labour recently issued a statement to the effect that a committee had been appointed by the Government "to consider and advise as to the best means of securing the greatest possible production consistent with the permanent well-being of industry and of the employers and the workpeople engaged therein." It was decided that the committee should consist of an independent chairman and a "permanent" nucleus composed of two Government representatives, two employers and two Labour representatives; and, accordingly, the Committee has been composed as follows: Sir Stephenson Kent, K.C.B.; Mr. I. Haig Mitchell of the Ministry of Labour; Lieutenant-Colonel D. Paul, C.M.G., of the War Office; Sir Thomas Robinson, M.P., di-

rector of the Bradford Dyers' Association, Limited; Sir Allan M. Smith, M.P., chairman of the Management Committee of the Engineering and National Employers' Federations; Mr. G. H. Stuart-Bunning, and Mr. A. A. Purcell, both of the Parliamentary Committee of the Trades Union Congress.

It is also provided that additional representatives are to be appointed, two by the employers and two by the workpeople, to represent any particular trade which may be under consideration by the Committee, but these trade representatives will leave the Committee when the inquiry has been completed so far as regards their particular trade, and representatives of other trades will take their place. The Ministry of Labour is in communication with the National Industrial Council for the Building Trades with a view to the nomination of representatives, it being proposed that matters concerning the building trades should have first consideration.

## ANNUAL REPORT ON THE MINES OF NOVA SCOTIA FOR 1919

ACCORDING to the report on the mines of Nova Scotia for the year ended September 30, 1919, issued by the provincial Department of Public Works and Mines, 12,925 workmen were employed in and about the coal mines during the year. This number is in excess of the number employed in 1918, but the aggregate number of days worked was

considerably less, resulting in a decrease in the total output and the output per man, the output of coal being 5,004,757 tons, a decrease of 260,646 tons as compared with the previous year. Pictou and Victoria counties, however, showed an increase in production of 116,825 tons in the former, and 6,931 tons in the latter, but in Cape Breton, Inverness, Antigonish and Cumberland

there was a falling off of 288,394, 39,408, 280, and 56,320 tons respectively. The production per man in short tons was 523, as against 569 in 1918. There were 20 fatal accidents during the year, or 1.86 per 1,000 men employed, the lowest in any of the past ten years. These fatalities are included in the statement of fatal industrial accidents in Canada during 1919, which appears elsewhere in this issue.

In the gold-mining industry, only three companies are reported as carrying on regular mining operations, in two of which the operating expenses were greatly in excess of the value of the gold received. The report states: "The tremendous rise in the cost-level of labour and materials in the last few years has affected the gold-mining in-

dustry by causing a rising in the cost of production which, due to our monetary system, cannot be balanced by a proportionate rise in the price of the product. In Nova Scotia, where gold-mining has been struggling for a number of years, this added burden has made profitable mining almost impossible. . . A difficulty at present is a scarcity of labour. Mines that are prepared to pay the prevailing wage cannot obtain miners, as only those remain in the district who, due to family ties, could not move out. This of course will right itself eventually."

In the quarries of the province, 587 men were employed during the year. Owing to the falling off in the demand for gypsum and limestone, the production was not so large as in 1918. No accidents were reported.

### AGREEMENT IN BITUMINOUS COAL MINING INDUSTRY OF THE UNITED STATES

THE Coal Commission\* which was appointed by President Wilson last December to investigate conditions in the bituminous mining industry of the United States, and to award a new scale of wages based on the result of their investigations, submitted its report and award in March. A minority report was also submitted by Commissioner J. P. White, representative of the men. A copy of the majority report and award was transmitted by the President to the Coal Operators' Scale Committee of the Central Competitive Field and to the Executive of the United Mine Workers of America, directing them to make arrangements for convening the necessary joint conferences to make such changes in conditions, mining rates and wage schedules as are set forth in the report and award. Following these instructions representatives of operators and mine workers of Western Pennsylvania, Ohio, Indiana and Illinois signed an agreement on March 31. This is an interstate agreement

governing pick and machine mining, day work, hours of labour, dead work and room turning for two years from April 1, 1920, to March 31, 1922.

The agreement provides for an advance of \$1 per day on the wages in effect on October 31, 1919, for all day labour and monthly men except trappers and other boys. These latter would be advanced 53 cents per day when receiving less than men's wages. Payment for dead work, yardage and room turning is advanced 20 per cent. The eight-hour day is continued in effect, the time to be reckoned at the usual working places for all classes of inside day labour, excluding time required going and coming. When men go into a mine in the morning they shall be entitled to two hours' pay whether or not the mine works the full two hours. After the first two hours the men shall be paid by the hour for each hour's work, or fraction thereof. All internal differences are to be referred to the various districts for settlement and only by mutual consent shall anything be done that will increase the cost of production or decrease the earning capacity of the

\*See LABOUR GAZETTE, JANUARY, 1920, p. 45.

men. All rules in existing contracts shall remain in force until changed by agreement between operators' and miners' representatives. The practice of voluntarily paying more than the contract price for the purpose of enticing employees from the mines is condemned, and it will therefore be assumed in future joint conferences convened for scale-making purposes, that all advances in excess of contract wages were paid because of the physical conditions of the mines, and wages so paid shall be considered the base price for such mines. In order to prevent the stoppage of work in violation of the agreement, the Conference instructs the respective district executive boards to meet the operators in their various districts for the purpose of agreeing on a penalty clause where none now exists, and if necessary, to amend and strengthen existing penalty clauses. All fines provided for in all agreements shall be automatically collected by the employer, and any operator failing to collect and forward to proper parties such fine shall pay a penalty of

\$2 for each employee subject to be fined. Where any employee enters suit in the civil courts to recover any fine collected, the miner's district organization shall reimburse the operator for the expense incurred on account of such suit.

The prices at which house coal shall be furnished the mine workers at the tipples shall be determined by adding 27 per cent to the price in effect on October 31, 1919, this addition representing the average percentage allowed as an increase on the wage scale. When coal is delivered to miners' houses, the actual cost of delivery shall be added. The prices charged miners for blacksmithing shall be on the basis of existing contracts, but shall not exceed three-fourths of one per cent of the miners' gross earnings.

It was resolved to hold an Inter-State joint conference prior to April 1, 1922, the time and place of meeting to be fixed by a committee of two operators and two miners from each state represented in this Agreement, together with the international officers of the United Mine Workers' Organization.

#### ANNUAL CONVENTION OF UNITED MINE WORKERS OF AMERICA, DISTRICT No. 26

**T**HE annual convention of District No. 26 of the United Mine Workers of America was held at Truro, N.S., during April 5-13, some 80 delegates representing over 12,000 workers being present. The report of the wage scale committee was adopted, with some amendments. This report as adopted recommended increases of \$1 per day for datal men, and 25 cents extra for night work; 25 per cent on all yardage, timber, dead work, and local contracts, increases of 7 cents per ton on double

shift, 15 cents on third shift, 10 cents on continuous night work, and 10 cents on single shift places double shifted. The clause providing for 24 per cent increase for hand pick and machine cut coal miners was not carried, but the rate for these workers was left in the hands of the executive officers and wage scale committee to adjust to the satisfaction of each locality. Resolutions submitted by the various local branches chiefly referring to local conditions were discussed, and a number of them were approv-

ed and made applicable to the whole district. These included demands of the New Waterford branch for wages of \$7 a day for all datal paid roadmakers, for the provision by the employers of a tool box at each landing, with a boy to deliver and receive the tools, and for continuous service of riding rate after the noon hour. The demand that the shippers at Louisburg and Sydney piers be granted an increase of 27 per cent on contract rates, extra work to be paid by the hour, and overtime at the rate of time and one-half, was approved, and it was resolved that these rates should apply throughout the district and that \$30 per week should be guaranteed for all shippers and trimmers. Recommendations were also adopted that mechanics with three years' service must be paid the highest rates, and that section men, when called to work on wrecks, should receive equal pay with wrecking crews, that the age clause for boys, which provides different rates for boys of different ages doing the same work, should be abolished, and that the Government be urged to assign a part of the royalties for coal to the town councils of mining towns for the purpose of improving sanitary conditions. A petition from Reserve Mines asking the convention to demand a six-hour day and a five-day week was reported on unfavourably. The wage scale committee recommended an eight-hour day from bank to bank, and that all work over eight hours be paid for at the rate of time and one-half, with double time for Sundays and holidays. This was carried.

A resolution was moved declaring against the practice of men pushing boxes and instructing the officers of the convention to take a referendum vote of the membership of the district as to whether they should strike in order to

end this practice. This resolution was opposed by various speakers and an amendment was carried providing that no agreement shall be put into effect unless an understanding is arrived at that the practice of pushing boxes shall be abolished in every place where it is possible to move the boxes by horses or mechanical means, and that, where pushing boxes cannot be abolished, there shall be an extra payment of 5 cents per ton from 200 to 250 feet, and another 5 cents from 250 to 300 feet.

In response to a request of the miners at the Minto Mines for co-operation in case of a strike, by taking steps to prevent coal being shipped there from Nova Scotia and the United States, a resolution was passed declaring the convention in sympathy with these miners, and requesting that some measures be taken, if possible, by the executive to meet the desired result.

A resolution was passed that the coal operators be offered a two-year contract, with the proviso that readjustment of the wage schedule may be made at the end of any four months, should economic conditions warrant.

The convention also decided to ask that a clause be inserted in the next agreement with the operators to the effect that miners are not to be employed unless they belong to the United Mine Workers, or express a willingness to join.

It was resolved to request the provincial government to amend the Compensation Act to provide that the Board should visit each sub-district of the province once every three months to take evidence, and that claimants should have the right to appear personally before the Board, or to be represented by anyone ready to argue their case and question witnesses.

It was resolved to appoint a joint wage committee for the purpose of making settlements with employers, in place of the system of having settlements made by the executive officers and board members from each district, and to report the result of their interviews to the proper officials of the various districts.

A protest was made against the action of the Glace Bay Town Council in collecting the poll tax from the employees of the Dominion Coal Company through the rolls of the Company. A demand was made for a law providing old age pensions of not less than \$3 a day for miners, the pension age to begin at not more than 60 years. A protest was made against coal companies changing conditions after the contract had been drawn up.

The convention expressed the opinion that the co-operative movement was the only solution of the problem of the high cost of living and the district secretary was instructed to ascertain what the expenses would be for the secretary of the Co-operative Union of Canada to make a lecture tour of the mining camps of Nova Scotia with a view of organizing local co-operative stores.

It was resolved that the provincial government be requested to pass legislation compelling all the coal companies to install sewerage systems and to add kitchens to all their houses, and that sanitary inspectors be appointed to see that the premises are kept clean and sanitary.

The convention resolved that the provincial government be asked to set aside a portion of the royalties from coal to provide college education for children of members of industrial unions who

show special aptitude and ability. The working out of the scheme was left to the executive, but it was suggested that competitive examinations be held for applicants for "labour scholarships."

A resolution was adopted endorsing the principle of first-aid instruction as taught by the St. John Ambulance Association and strongly recommending the inclusion in the mining laws of the province of such regulations as would make the possession of a first aid certificate a necessary qualification of all officials holding senior positions in the practical working of coal mines.

A proposal was made that a grant to the Nova Scotia branch of the Independent Labour Party, which had just been organized at Truro, be made out of the district funds. This step was opposed on the ground that part of the fund was contributed by members who were adherents of the old parties. The secretary was instructed to place the matter before the locals. A resolution was passed in favour of petitioning the minister of justice to release on bail the Winnipeg strike leaders until their appeal to a higher court has been heard, and recommending the donation of a sum to the Winnipeg defence committee. A vote of \$500 to the defence committee was then passed.

The next annual convention is to be held at New Glasgow in April, 1921.

On April 16, Robert Baxter, president of the District, J. B. MacLachlan, secretary-treasurer, and nineteen other delegates waited upon the provincial government and presented the requests of the convention for amendments to the Workmen's Compensation Act, and for other legislation.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OF FEBRUARY 29—APRIL 24

Also Review of Work during the Fiscal Year ending March 31, 1920

**R**EPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada show an increase in the number of placements during the two four weeks' periods covered by the present report. The number of regular placements during the four weeks from February 29 to March 27 being 24,895, while the number of such placements during the period ending April 24 was 31,949. The number of placements during the last period reported in the LABOUR GAZETTE (Feb. 1 to 28) was 22,908.

During the period under review (Feb. 29—April 24) regular and casual placements were distributed as follows:

		Regular Place- ments.	Casual Place- ments.
Week ending March 6 ..	5,792	979	
" " " 13 ..	5,707	1,238	
" " " 20 ..	6,194	1,362	
" " " 27 ..	7,202	1,608	
" " April 3 ..	6,747	1,346	
" " " 10 ..	7,883	1,418	
" " " 17 ..	8,630	1,650	
" " " 24 ..	8,689	1,774	

The two tables which follow give in detail the work of the offices for the four weeks ending March 27 and the four weeks ending April 24. At the beginning of the first period 25,036 men and 1,206 women, a total of 26,242 persons, who had registered during the previous weeks remained unplaced at the various offices. On the same date 9,577 vacancies notified by employers still remained unfilled, of these 6,157 were for men and 3,426 for women.

During the period, 34,952 men and 3,062 women applied for employment (or renewed previous applications) while 27,591 new vacancies for men and 6,066 for women were notified by employers. The number of persons placed in regular employment was 24,895, of which 22,942 were men and 1,953 were women.

The Employment Service began the second period with 22,475 men and 1,416 women unplaced on its books, a total of 23,891 persons. This was a decrease of 2,351 as compared with the beginning of the preceding period. The number of unfilled vacancies on the other hand was 11,842, of which 6,793 were for men and 5,049 for women. This represents an increase of 2,265, as compared with the beginning of the preceding period, the bulk of the increase being for unplaced women workers. Of the unfilled vacancies for men 2,730 were in the Prairie provinces and 2,963 in Ontario. During the second period, 39,306 men and 3,474 women applied for employment and the number of new vacancies for men was 35,860 and for women 5,803. Thus, while the increase in supply of labour (applications) exceeded by 4,766 persons the number reported during the previous period, the increase in demand for labour (vacancies) was very much greater than the corresponding increase during the previous period, the total increase amounting to 8,006 vacancies. Regular placements reported were 29,706 men and 2,243 women as compared with 22,942 men and 1,953 women during the previous period, a total increase of 7,054. In addition to the regular placements noted above, the Employment Offices made 5,187 casual placements during the

first period and 6,188 during the second period.

The preceding table presents in summary form, by provinces, the reports of placements from March 1, 1919, to April 24, 1920. Regular placements refer only to those applicants for whom employment found was likely to be of more than one week's duration, while casual placements refer to those applicants for whom employment found was likely to be of less than one week's duration. It will be observed that the number of regular placements from the beginning of the report until April 24 was 369,506, or at the rate of 6,158 per week,

while the number of casual placements for the same period was 58,909, or a weekly average of 982. The number of applications made during the period totalled 530,486, while the number of vacancies notified to the Service amounted to 504,400.

For the fiscal year, April 1, 1919 to March 31, 1920, the number of regular placements made by the Service was 328,937, of which 307,883 were men and 21,054 were women. During the same period the number of casual placements made was 51,663. The number of vacancies reported for the fiscal year was 449,022, and the number of applications made was 470,250.

#### Review of the Work during the Fiscal Year, April 1, 1919—March 31, 1920

The work of the offices for the fiscal year is summarized in another way on the accompanying chart. The three curves show applications and re-applications by weeks since the week ending April 3, 1919, the vacancies notified by employers and the applicants placed in regular employment.

The chart mentioned above indicates that during the first two weeks of April, 1919, applications, vacancies and placements retained a constant relation to each other, increasing at almost the same rate. After that, the vacancies (the demand) approached the applications (the

supply) more closely, and toward the end of April vacancies equalled the applications. This increase in vacancies, however, was largely due to the spring demand for farm help, and as the Service found it difficult to persuade the workers to leave the cities for farm employment, placements, while they were considerably increased, did not maintain the same relation to vacancies as formerly. About the end of May, the demand increased sufficiently to exceed applications, and except for a brief period in June and July, demand continued in excess of supply until the middle of October. In August the demand for harvesters in the West brought the num-

ber of vacancies in one week to 19,250; in that week 13,436 persons applied for employment and 12,039 placements were made. This was the record week of the year. From this peak demand declined until the middle of September when it again recovered, due to the early opening of bush operations in the East. In two weeks of October, the applications for employment slightly outnumbered vacancies, and in the second week of November, on account of the release of numbers of men from railway and construction operations and farm work, supply mounted above demand, where it remained until April 1.

After December 20, the chart indicates a steadily increasing number of applications to have been registered. The number registered during the week ending January 10 being 14,020, representing the largest number of applicants since the harvest period of last autumn. This increase may be attributed largely to registration under the Federal Emergency Appropriation Act, and though

succeeding weeks showed a falling off from this peak the number of applications remained substantially higher than during any preceding period with the exception of the period of active harvest demands. The number of vacancies reported to the Service, on the other hand, showed a marked falling off, especially during the last two weeks of 1919, representing curtailment of activity incident to the holiday season and the usual stock-taking and inventory period. With the close of the inventory period in the middle of January recovery was manifested and the number of vacancies reported to the Service increased, and with the beginning of the normal spring time expansion in demand, vacancies again equalled applications. During the first week of April vacancies exceeded applications and the demand continued in excess of supply until the end of the current period. Indeed, the number of vacancies reported by employers during the week ending April 17 was the largest since the harvest demand of the fall of 1919.

---

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF MARCH, 1920

**T**HE present article on unemployment among the members of local trade unions deals with unemployment as at the end of March, 1920, and is based on returns received from 1,400 labour organizations with a total membership of 171,225. For all occupations reporting, 3.44 per cent of the members were unemployed as compared with 4.33 per cent in February, 1920, and with percentages of 5.62, 1.68 and 2.16, respectively, in March, 1919, 1918, and 1917. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness, or as the direct result of strikes or lockouts, are not considered as unemployed.

The chart following gives the curve of unemployment by quarters for 1916, 1917, and 1918; by months for 1919 to March of this year, and shows the increasing activity year by year during the war period for organized workers. The percentage of unemployment at the end of December, 1915 (the percentage for March, 1916, is not available) stood at 8. From then unemployment, except for seasonal fluctuations, grew gradually less with the more complete organization of labour forces on a war footing, until in June, 1918, the percentage of unemployment was only one-half of one per cent. Following the cessation of hostilities, and consequently of war industries, unemployment showed an upward curve, which was increased by the usual

winter slackness. At the end of February and March of 1919, the percentage of unemployment stood at 5.6 per cent. From then it gradually declined to 2.2 in September. Seasonal unemployment caused the curve to mount slightly with the approach of winter, un-

til it reached nearly 5 per cent at the end of December. The curtailment of operations incident to the holiday and inventory period very probably increased this percentage, as some recovery was manifested in January, February and March.

That the percentage out of work at the end of March was smaller than in both February, 1920, and March, 1919, was due to more activity for workers in all groups of industries. On the other hand, there was, and would be expected, more unemployment in all the groups in March of this year than was reported in the same month in 1918 and 1917.

Tables 1 and 2 on page 570 summarize the returns by provinces and cities. Nova Scotia and Prince Edward Island, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia showed less unemployment than in the preceding month, while the percentages out of work in New Brunswick and Quebec were larger. Nova Scotia and Prince Edward Island, Quebec, Ontario, Saskatchewan and Alberta registered declines in the percentage unemployed as compared with the returns for March

of last year, the other provinces showing increases in that comparison. Quebec was the only province to record a smaller percentage unemployed than in March of 1918, while in Nova Scotia and Prince Edward Island only were conditions better than at the end of March, 1917.

The percentages reported idle in the different groups of industries are indicated on Table III, on page 571.

Unemployment in the manufacturing and mechanical industries as reported by 361 unions having a combined membership of 50,979 was somewhat less prevalent at the end of March than in February, 1920, and March, 1919. The percentage out of work, however, was larger than in March, 1918 and 1917, activity in this group having been very pronounced at that time on account of war orders. The percentage out of work at the end of March was 1.93, as compared

with unemployment percentages of 2.49, 4.18, .91 and 1.22, respectively, in February, 1920, March, 1919, 1918 and 1917. Workers in metals, machinery and conveyances, food, tobacco, and liquors, and pulp, paper and fibre reported smaller percentages of unemployment than in the preceding month and also than in the corresponding month of last year. The two groups first named recorded more unemployment than in March of 1918 and 1917, while in pulp, paper and fibre there were no members reported as idle in March of this year, employment conditions in this group being the same as in March of 1918 and 1917. Textiles, carpets and cordage, woodworking and furniture, and leather, boots, shoes, and rubber goods registered slightly larger percentages of unemployment than in February, but improvement was shown in comparison with March of last year. Textiles showed a nominal decrease in unemployment as compared with both March, 1918, and a similar increase over March, 1917. Woodworking and furniture, and leather, boots, shoes, and rubber goods reported less unemployment than in both years. In clothing and laundry the number unemployed was the same as in the preceding month, while conditions were better than in March of preceding years. On the contrary, the printing, publishing and paper goods group registered slightly less unemployment than at the end of February, but the percentage was somewhat larger than in March of preceding years. Glass workers were not as fully engaged as in any month used in this article for comparative purposes. Jewelry workers, as reported by two unions, registered no unemployment in February 1920, March, 1920, 1918, and 1917. In March of last year, however, there was a small percentage of idleness. Some short time was reported by unions of boilermakers and iron ship builders, sheet metal workers, meat cutters, compositors and boot and shoe workers. In the last named group this slackness is due to seasonal inactivity.

Reports from 597 organizations of transportation workers having a total

membership of 68,022 indicated that 2.61 per cent of the members were unemployed as compared with 2.77 per cent in February, 1920, 4.75 per cent in March, 1919, 1.22 per cent in March, 1918, and 1.26 per cent in March, 1917. There was a nominal increase in the percentage unemployed as recorded by steam railway employees (whose returns constitute over 77 per cent of the entire group membership reporting) in comparison with the returns for the preceding month, and also as compared with March of 1918 and 1917, but the percentage for March, 1919, was considerably larger. While there was some short time reported by unions of trainmen, engineers and firemen and maintenance of way employees, the number working on reduced time was not as large as in the preceding month. Street and electric railway employees were more fully engaged than in February, 1920, and also than in March of previous years. Workers in the navigation sub-group registered more unemployment than in the preceding month and also than in March, 1918, and 1917, but the percentage out of work in March, 1919, was considerably larger. Teamsters and chauffeurs showed more unemployment than in any month used in this article for comparative purposes.

In the mining, quarrying and refining of ores group returns were received from 24 unions with an aggregate membership of 8,269, and show that .65 per cent of the members were out of work as compared with unemployment percentages of 4.78, 1.87, .40 and .80, respectively, in February, 1920, March, 1919, 1918, and 1917. Miners were more fully engaged than in the preceding month and also than in March, 1919, and March, 1917. The percentage unemployed, however, was slightly larger than in March of 1918. Mill and smeltermen reported more members out of work in February, 1920, but fewer than in March, 1918 and 1917. No returns for March of last year were received. There was also some short time reported by workers in this group.

The percentage out of work in the build-

ing and construction group as reported by 218 organizations having a combined membership of 25,418, was 9.88, as compared with percentages of 12.14, 16.45, 7.63, and 7.47, respectively, in February 1920, March, 1919, 1918 and 1917. The decline in the percentage of unemployed as compared with the preceding month is due to the commencement of spring operations in this group. Bricklayers, masons and plasterers were better employed than in February, and also than in March of previous years. Among the carpenters and joiners the percentage out of work showed a nominal increase as compared with the returns for February, but was somewhat smaller than in March of last year. On the other hand, the percentage was considerably larger than in March of 1918 and 1917. Electrical workers and painters, decorators and paperhangers showed less unemployment than in February, 1920, March, 1919 and March, 1917, the percentages being slightly larger than in March of 1918. Granite and stone cutters and plumbers and steamfitters also reported slightly less unemployment than in February, but the percentage was larger than in March of previous years. Conditions among tile layers, lathers, and roofers, bridge and structural iron workers and hod carriers and building labourers were better than in February, 1920 and also than in March, 1919, but the percentages out of work in these groups were larger than in March, 1918, and 1917. Steam shovel and dredgemen recorded slightly more unemployment than in the preceding month, and also than in March of 1918; but the percentage was considerably smaller than in March, 1919 and 1917. Some short time was registered by unions of carpenters and joiners, electrical workers, painters, decorators and paperhangers, plumbers and steamfitters, and wood, wire and metal lathers.

In the public employment group as reported by 71 unions having a total membership of 5,733, the percentage out of work was 1.66 as compared with an unemployment percentage of 1.63 in February, 1920, and with percentages of .09, 0, and .47 in March 1919, 1918 and 1917, respectively. Employment for civic workers showed a nominal increase in comparison with the returns for the preceding month, but there was more idleness than in March of previous years.

Unemployment in the group of miscellaneous trades as indicated by the returns received from 127 unions with 12,514 members, was less prevalent than in February, 1920 and March, 1919; but the percentage was larger than in March, 1918 and 1917. Retail clerks as reported by six organizations showed a small percentage of idleness as compared with no members out of work in February, 1920 and in March, 1918 and 1917. The percentage in March, 1919, however, was considerably larger. Hotel and restaurant employees recorded a slight decline in the percentage out of work as compared with the February returns, and also in comparison with the returns for March, 1917; but the percentage was larger than in March, 1919 and 1918. Barbers, stationary engineers and firemen, and unclassified workers registered less unemployment than in the preceding month and also than in March of last year; but the percentage out of work was larger than in March of 1918 and 1917. Musicians and theatre employees reported a smaller percentage of idleness than in February; the percentage however was somewhat larger than in March of previous years. Retail clerks and hotel and restaurant employees, in addition to the members entirely unemployed at the end of March, also recorded some short time.

The tabular statement on pages 574-5 presents the returns in some detail.

TABLE IV.—UNEMPLOYMENT ON MARCH 31, 1920.

# EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD MARCH 7 TO APRIL 3, AS REPORTED BY EMPLOYERS

Also a Résumé of Conditions as Reported during the Fiscal Year

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from March 7 to April 3 show an improvement in the employment situation, especially during the first two weeks of the period. During the latter half of the period nominal decreases were recorded, the decline during the last week being attributable to the Easter holidays.

The following chart shows weekly the percentage increase or decrease in the volume of employment for the full period of the record of March 30, 1919, until April 3, 1920. As formerly the chart presents a series of percentages, each percentage recording the increase or decrease in the volume of employment dur-

ing the week as compared with the previous week. As the number of firms reporting varies from week to week no attempt should be made to read the chart as a cumulative record. The chart indicates that for the first two weeks of April, 1919, nominal declines in the volume of employment took place, recovery being manifested, however, in the middle of April. Succeeding weeks registered increases in the volume of employment with the exception of slight declines during the weeks ending June 21 and July 5, which declines may be attributed to the mid-summer stocktaking period. Increases in the volume of employment were reported almost invariably from this period until December 1. A temporary setback was registered, however,

in the weeks ending July 26 and August 30, the decline in the latter case being due to the curtailment of railway construction work during the harvest period. The considerable decline manifested during the week ending November 8 represented the curtailment of active railway construction work for the season. Commencing with December 1 further declines were manifested in the building and construction industries, and with the week ending December 20 the annual decline, incident to the holiday and inventory period, took place, which decline continued until the week ending January 10. By January 17 almost complete recovery had taken place from this reduction and more recent returns would indicate slight increases during the remaining weeks of January with little or no change in the volume of employment during the month of February. Increased activity was manifested during the first two weeks of March. Because of unfavourable weather conditions and the curtailment of bush operations, these increases were not maintained, but with the first of April increases in the volume of employment were registered, which would indicate that the springtime expansion in demand was under weigh.

The returns for the week ending January 17, which it is to be noted practically coincides with the close of the annual inventory period, has been taken as a base week, and it is interesting to note that at the end of the period under review 5,000 employers, representing over 700,000 employees, registered an increase of approximately 12,000 persons or 1.7 per cent in their staffs as compared with the base week. The changes recorded during the current period under review were:

Week ending March 13—an increase of .1 per cent.

Week ending March 20—an increase of .2 per cent.

Week ending March 27—a decrease of .03 per cent.

Week ending April 3—a decrease of .01 per cent.

Reports from the various districts indicate that conditions during the current period under review were not the same throughout Canada. The Maritime provinces and British Columbia reported decreases during the first and third weeks with corresponding increases during the second and fourth weeks of the period. Quebec and Ontario registered increases during the first three weeks with a decline during the week ending April 3. The Prairie provinces registered substantial declines during the first three weeks of the period with some recovery during the fourth week.

Summarizing the returns by industrial groups Textiles, Pulp, Paper and Printing; Mineral Products; Iron and Steel Products; Railway Construction; Telephone; Telegraph; Miscellaneous Service (chiefly laundries), and Miscellaneous Industries (chiefly chemicals and tobacco), registered increases during all four weeks of the period. Metallic Ores; Coal; Clay, Glass and Stone Products; Service (Hotels); Furs and Fur Products; Rubber Products and Water Transportation registered increases taking the period as a whole with declines during individual weeks. Non-Metallic Minerals (other than coal); Building and Construction; Retail Trade; Wholesale Trade; Leather and Leather Goods; Local Transportation; Railway Transportation; Edible Plant Products and

Wood Distillates registered decreases taking the period as a whole with increases during individual weeks. Lumbering showed declines during all four weeks of the period, representing the curtailment of active bush operations.

## REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES—MARCH, 1920

**R**EPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the month of March, showed increases of nearly fourteen per cent in the number of workers and over twenty-one per cent in the wages paid as compared with the preceding month. In March 11,868 persons were temporarily employed and payrolls amounted to \$971,723, as compared with 10,444 employees and aggregate payroll of \$800,594 in February. In comparison with the same period in 1919, increases of thirty-one per cent in the number of

workers and over sixty-five per cent in the wages paid are indicated, there having been 9,021 employees with an aggregate payroll of \$588,724 in March, 1919.

Montreal, Ottawa, Toronto, London, Winnipeg, Brandon, Regina and Victoria, recorded increases in the number of employees both as compared with the preceding month and also with March, 1919. St. John, Saskatoon, Calgary and Vancouver, reported declines as compared with the figures for the preceding month, but increases were recorded in comparison with the returns for March of last year. On the other hand Hamil-

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, MARCH 1920, COMPARED WITH FEBRUARY 1920, AND WITH MARCH 1919.

ton and Moose Jaw showed increases in comparison with the returns for February and decreases as compared with the figures for March, 1919, while at Edmonton there were declines in both comparisons.

As to wages, Montreal, Ottawa, Toronto, Hamilton, London, Winnipeg, Brandon, Regina, Moose Jaw, Calgary,

Vancouver and Victoria showed increases both as compared with February, 1920, and with March, 1919. St. John and Saskatoon registered declines as compared with the figures for the preceding month, but both cities reported increases in comparison with the returns for the corresponding month in 1919. Edmonton showed declines in both cases.

---

### EMPLOYMENT IN THE BUILDING TRADES DURING MARCH, 1920, AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities shows an increase during March as compared with the preceding month, the total of building permits rising from \$4,684,934 in February to \$8,258,410 in March, an increase of \$3,573,476 or 76.3 per cent. All the provinces registered increases in this comparison, those in Ontario, Quebec, Alberta and Manitoba being very substantial.

As compared with the corresponding month in 1919, there was an increase of 148.1 per cent, the value for March, 1919, having been \$3,329,050. Nova Scotia and New Brunswick, as during February, were the only provinces to record declines in that comparison. In Ontario and Quebec there were increases of respectively \$1,954,307 and \$1,136,895. The increases in the other provinces were also large.

The returns from 35 cities originally

used in this report (which are distinguished by asterisks) are tabulated separately, and show that the total value of building permits issued by these cities amounted to \$7,395,739, an increase of \$3,069,940 or 71 per cent during March as compared with February. In comparison with the figures for March last year, the considerable increase of \$4,383,684 or 145.5 per cent was registered.

All the larger cities, Montreal, Toronto, Winnipeg, Edmonton, and Vancouver, showed substantial increases both as compared with the returns for February, 1920, and for March, 1919.

Of the smaller centres, Quebec, Sherbrooke, Brantford, Fort William, Guelph, Hamilton, Kingston, Kitchener, London, Oshawa, Peterborough, Stratford, St. Catharines, St. Thomas, Sarnia, Sault Ste. Marie, St. Boniface, Regina, Calgary, Point Grey, and South Vancouver, showed large increases as compared with both February and March, 1919.

# EMPLOYMENT OF WOMEN ON UNITED STATES RAILROADS DURING 1919

THE following information with respect to the number of women employed on January 1 and October 1 of last year, on the Class I railroads formerly under the control of the Director General of United States Railroads, has been obtained from statistics recently published by the late United States Railroad Administration. It will be noticed that there were 99,737 women employed on January 1, as compared with 81,803 on October 1. With but few exceptions all classes recorded a reduction in the number of women employed, the more notable exceptions to this rule being in the classes of cashiers, watchwomen (on day duty), and mail carriers.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Mining—Coal

HALIFAX, N.S.—NOVA SCOTIA STEEL AND COAL CO., LTD., AND COAL HANDLERS' BRANCH, OF THE AMERICAN FEDERATION OF LABOUR. Agreement in effect from October 1, 1919, to March 1, 1920.

Rate of pay shall be 65 cents per hour for day work and 70 cents for night work to eleven p.m. Double time shall be paid for Sundays and the following holidays: Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. Men required to work during meal hours shall be paid double time, meal hours to be as follows: 6 a.m. to 7 a.m., 12 noon to 1 p.m., 6 p.m. to 7 p.m. and 11 p.m. to midnight. Men

compelled to stay in stream without meals shall receive double time for same.

HALIFAX, N.S.—DOMINION COAL CO., LTD., AND NOVA SCOTIA STEEL AND COAL CO., LTD., AND COAL HANDLERS' BRANCH OF THE INDEPENDENT FEDERATION OF LABOUR. Agreement effective from April 15, 1920, to April 15, 1921.

Rate of wages for day work shall be 70 cents and for night work up to 11 p.m. 75 cents.

For work on Sundays and the following holidays, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, double time shall be paid. For work performed during meal hours double time shall also be paid, meal hours being as follows: 6 a.m. to 7 a.m., 12 noon to 1 p.m., 6 p.m. to 7 p.m. and 11 p.m. to midnight. If men are required to work on vessels on fire or wrecks and compelled to labour under abnormal conditions, double time shall also be paid.

### Printing and Publishing

EDMONTON, ALTA.—INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, No. 255, AND LOCAL EMPLOYERS.

Agreement in effect from January 6, 1920, to October 31, 1920.

Forty-eight hours constitute a week's work—eight hours on six days per week. Work shall stop when possible at noon on Saturday, the employee losing four hours. If, however, the work shall require it, the employee must work Saturday afternoon for four hours to complete the week of forty-eight hours.

The minimum scale of wages: Per hour—journeymen pressmen, 82 cents; offset pressmen, 86½ cents; foremen pressmen, 86½ cents; the latter to receive also \$2 per week in addition to above. Said scale to be increased 4 cents per hour from May 1, 1920.

In all offices where a night shift is employed, forty-five hours shall constitute a week's work, and \$2 over the prevailing day scale shall be paid to all men on night shift.

Press feeders' scale: Per hour—First six months, 21 cents; second six months, 23 cents; third six months, 25 cents; fourth six months, 29 cents; fifth six months, 33 cents; sixth six months, 37½ cents; seventh six months, 42 cents.

Apprentice scale: Per hour—Fourth six months, 29 cents; fifth six months, 35 cents; sixth six months, 42 cents; seventh six months, 48 cents; eighth six months, 52 cents; ninth six months, 56 cents; tenth six months, 60 cents.

Overtime shall be paid at the rate of time and one-half for the first three hours only, and from then on at the rate of double time. Overtime shall be paid for the following legal holidays, New Year's Day, Good Friday, May 24, Dominion Day, Thanksgiving Day, Labour Day, Civic Holiday and Christmas Day, and double time for Sundays.

All differences arising over provisions relating to wages and hours shall be submitted to an arbitration committee, consisting of one representative of the employer, one representative of the Union, and a third person mutually agreed on by the two, provided the dispute cannot be settled by conciliation.

ST. JOHN, N.B. — TYPOGRAPHICAL UNION, No. 85, (NEWSPAPER AND BOOK AND JOB SCALE) AND LOCAL JOB AND NEWSPAPER OFFICES. Agreement to be in effect from January 1, 1920, until April 30, 1921, and for such a reasonable time thereafter, not exceeding thirty days, as may be required for the negotiation of a new contract.

A day's work shall consist of eight hours for day work, between 7 a.m. and 6 p.m., and seven and one-half hours for night work, between 7 p.m. and 6 a.m., no overtime in connection with the ordinary work of preparing the regular edition unless more than eight hours are occupied. Overtime and work on holidays shall be paid for at the rate of time and one-half. Holidays to be Dominion Day, Labour Day and Christmas; Sundays to be paid for at double time.

Minimum scale of wages for day work: Per week—Foremen, linotype operators and machinists, \$32; floor hands and monotype keyboard operators, \$30.

Night work: Per week—Foremen, operators and machinists, \$35; floormen, \$33.

Apprentices shall be paid as follows: third year, two-fifths of journeymen's pay; fourth year, one-half of journeymen's pay; fifth year, two-thirds of journeymen's pay.

In case any difference should arise between the interested parties at any time, which cannot be settled between the employer and a committee of two from the office affected, the dispute shall be referred to an arbitration committee of three persons, one of whom shall be selected by the employers, one a member of Typographical Union, No. 85, the third to be selected by these two, and their decision shall be final.

#### Food Products

TORONTO, ONT. — INTERNATIONAL BAKERY AND CONFECTIONERY WORKERS OF AMERICA, LOCAL 181, AND LOCAL EMPLOYERS. Agreement in effect from May 1, 1920.

Eight hours shall constitute a day's work, six days per week. Sponge setting on Friday must be paid not less than \$1, same to be done by jobbers.

Minimum rate of wages: Per week—Foreman, \$49; second hand, \$45; third hand, \$41.

Overtime shall be paid for as time and one-half for the regular journeymen employed, and not less than \$1 per hour for jobbers.

The Union's label must be put on every loaf of bread, and the employer shall pay 15 cents per thousand for the use of them.

#### Construction (other than railway)

OTTAWA, ONT.—UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS OF THE UNITED STATES AND CANADA, LOCAL NO. 71, AND THE OTTAWA MASTER PLUMBERS AND STEAMFITTERS' ASSOCIATION. Agreement effective from January 1, 1920, to April 30, 1921, and from year to year unless notice be given by either party not later than January 2 of each year.

The hours shall be from 8 a.m. to 5 p.m., with one hour for lunch for five days, and on Saturdays from 8 a.m. to noon. All hours worked after 5 p.m. on 8-hour days, and after noon on Saturdays shall be considered overtime, and shall be paid for at the rate of time and one-half until midnight, and double time from midnight until starting time. Sundays and the following holidays, New Year's Day, Victoria Day, Dominion Day, Labour Day and Christmas Day shall be paid for at the rate of double time.

The minimum rate of wages for all journeymen shall be 75 cents per hour until May 1, 1920, on and after that date 80 cents per hour.

Apprentices: Per hour—40 cents in the first twelve months, and 50 cents in the second twelve months.

Any grievance arising which cannot be adjusted by the representatives of both organizations shall be referred to a Joint Arbitration Board composed of three masters and three journeymen mutually agreed upon.

TORONTO, ONT.—GENERAL CONTRACTORS' AND CARPENTERS' SECTIONS OF TORONTO BUILDERS' EXCHANGE AND THE TORONTO DISTRICT COUNCIL OF CARPENTERS OF THE UNITED BROTHERHOOD OF CARPENTERS OF AMERICA. This agreement in effect from April 1, 1920, to December 31, 1920.

Eight hours shall constitute a day's work for the first five days of the week, from 8 a.m. to 5 p.m., and four hours on Saturday from 8 a.m. to noon.

The following shall be observed as holidays, Sundays, Christmas Day, New Year's Day, Empire Day, Dominion Day, Labour Day and Saturday afternoons. No work shall be done on these days unless in case of emergency, in which event all time worked shall be paid for at the rate of double time, except Saturday afternoons until 5 p.m. which shall be paid for at the rate of time and one-half.

Rate of wages: Per hour—Carpenters, 85 cents from April, 1920, until May 31, 1920, and 90 cents from June 1, 1920, to December 31, 1920.

All grievances and disputes shall be settled by a Joint Arbitration Committee.

ST. CATHARINES, ONT. — INTERNATIONAL BROTHERHOOD OF PAINTERS, PAPER HANGERS AND DECORATORS, LOCAL 407, AND THE LOCAL BRANCH OF THE MASTER HOUSE PAINTERS AND DECORATORS' ASSOCIATION OF CANADA. Agreement to become effective April 1, 1920, and until either party desiring to change same shall give six months' notice.

The minimum rate of wages shall be 70 cents per hour.

Hours of labour shall be 8 hours per day for five days from 8 a.m. to noon; 1 p.m. to 5 p.m., and four hours on Saturday from 8 a.m. to noon. Forty-four hours shall constitute a week's work.

All overtime shall be paid for as time and one-half up to midnight; double time for Sundays.

Disputes shall be referred to a joint committee, consisting of three members of the local union and three members of the Master Painters' Association.

**TORONTO, ONT.—LOCAL UNION 151, PAINTERS, DECORATORS AND PAPER HANGERS OF AMERICA, AND MASTER PAINTERS AND EMPLOYING FIRMS AND CONTRACTORS.** Agreement effective from April 23, 1920, to December 31, 1920.

Hours of labour shall be from 8 a.m. to 5 p.m. with one hour for lunch for five days, and for Saturdays from 8 a.m. to noon.

The minimum rate of wages for all journeymen shall be 75 cents per hour.

Overtime shall be paid for at the following rates: Time and one-half for the first four hours worked after regular working hours have elapsed, except Saturday afternoons, all other time Saturdays after noon, Sundays, and the following holidays shall be paid for at the rate of double time: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day and Christmas Day. No work shall be done on Labour Day.

#### **Transportation—Electric Tramways**

**HAMILTON, ONT. — HAMILTON AND DUNDAS STREET RAILWAY CO., THE HAMILTON, RADIAL ELECTRIC RAILWAY CO., HAMILTON, GRIMSBY & BEAMSVILLE ELECTRIC RAILWAY CO., AND THE BRANTFORD AND HAMILTON ELECTRIC RAILWAY CO., AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, DIVISION No. 876.** Agreement effective from April 1, 1920, until April 1, 1921.

The hours of all regular trainmen assigned to regular freight and passenger runs shall be ten hours, to be completed within 11 consecutive hours.

Rate of wages: Per hour—Trainmen, first six months, 35 cents; second six months, 40 cents; second year, 45 cents; third year and after, 52 cents.

Overtime shall be paid at the rate of time and one-half. Passenger trainmen shall receive 25 cents per day in addition to regular pay for training students.

Train despatcher shall receive \$155 per month.

**REGINA, SASK.—STREET RAILWAY DEPARTMENT AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA.** Agreement effective from January 1, 1920, to January 1, 1921.

Scale of wages: Per hour—Conductors and motormen, for the first six months, 40 cents; for the second six months, 46 cents; for the second year, 51 cents; for the third year and after, 55 cents; night foremen, 60 cents; night car repairers, 59 cents; night car cleaners, 50 cents; day car repairers, 60 cents; trimmer, 55 cents; teamster, 50 cents; switchman, 48 cents; track foreman, 60 cents. Per month—Inspectors, \$150; motorman on work train, \$140.

All conductors and motormen operating regular cars shall work not more than nine hours per day and not more than six days per week, and shall be paid at the rate of nine and one-half hours.

Sunday operation shall be paid for at time and one-quarter. Similar rates shall be paid for overtime on the basis of nine and a half hours' pay for nine hours' work.

Time and one-half shall be paid for all work on holidays, New Year's Day, Good Friday, Twenty-fourth of May, Labour Day, Thanksgiving Day, Christmas Day and civic holidays.

Grievances shall be submitted in writing to the superintendent, who shall at all times have an opportunity to adjust a grievance, before it is taken up by the Executive Committee. If the decision of the superintendent is not satisfactory the Executive Committee shall have the right to appeal to the city commissioner.

**TORONTO, ONT.—NIAGARA, ST. CATHARINES AND TORONTO RAILWAY COMPANY AND CERTAIN OF ITS EMPLOYEES, MEMBERS OF DIVISION 846 OF THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA AND ITS OTHER EMPLOYEES.** Agreement in effect from March 1, 1920, to October 31, 1920.

Nine hours shall constitute a day's work for all passenger train men, to be completed within eleven consecutive hours.

Overtime shall be paid for at the rate of 15 cents per hour in addition to the regular rate of wages for the first hour over nine, and at the rate of time and one-half for all time served over ten hours.

Rate of wages for passenger trainmen shall be as follows: Per hour—For the first year, 40 cents; for the second year, 44 cents; for the third year, 46 cents, and 50 cents thereafter. Regular trainmen called for extra work and not assigned shall not be held longer than one hour, and shall receive two hours' pay at their regular rate. Trainmen employed in freight service shall have a minimum of 10 hours per day for week days for each day used, when called and cancelled they shall be paid for time held.

On Sundays and holidays, if required, they will be paid a half day for 5 hours' service or less, or a full day if service beyond 5 hours is required.

The wages of freight conductors and freight engineers during the first, second and third years of their service shall be 50 cents per hour, and thereafter 52 cents.

Brakemen's and polemen's wages: Per hour—For the first year, 41 cents; for the second year, 43 cents; for the third year, 45 cents; for the fourth year and thereafter, 46 cents; linemen, 45 cents to 50 cents; groundmen, 37 cents to 42½ cents. Per month—Baggage-men, \$90; shedmen, \$75; watchmen, \$70; lowermen, first class, \$90; second class, \$80; section foremen, \$100 to \$110; sectionmen, 35 cents to 40 cents per hour.

#### Transportation (Forwarding and Storage)

AMERICAN RAILWAY EXPRESS COMPANY AND THE BROTHERHOOD OF RAILWAY AND STEAMSHIP CLERKS, FREIGHT

HANDLERS, EXPRESS AND STATION EMPLOYEES AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS. Agreement took effect on February 15, 1920, and will remain in effect for thirty days and thereafter until thirty days' notice has been given in writing by either party.

Eight consecutive hours exclusive of the meal period shall constitute a day's work. Meal hours shall not be less than thirty minutes and not more than one hour. For hourly rated employees, except as otherwise provided in these rules, overtime shall be paid at the rate of time and one-half. For monthly rated employees, except as otherwise provided, when the full number of hours per week are worked, overtime shall be paid at the rate of time and one-half.

#### Personal Service

VICTORIA, B.C. — JOURNEYMEN BARBERS' INTERNATIONAL UNION OF AMERICA, LOCAL 372, AND LOCAL EMPLOYERS. Agreement to take effect from March 1, 1920.

Hours of work shall be from 8 a.m. to 6 p.m. on Monday, Tuesday, Thursday and Friday, 8 a.m. to 1 p.m. on Wednesday, 8 a.m. to 9.30 p.m. on Saturday. One hour allowed for dinner and forty-five minutes for supper on Saturday. The day before a statutory holiday to be the same as Saturday.

Regular pay of journeymen shall be \$18.00 and 60 per cent over \$28.00.

Saturday man to be paid \$6.00 and 60 per cent over \$9.00.

Swing shift man, \$12.00 and 60 per cent over \$17.00.

The agreement contains a list of prices to be charged for work performed.

## MINIMUM WAGES FOR WOMEN IN BRITISH COLUMBIA

### New Order for Telephone and Telegraph Employees

**F**OLLOWING the receipt of recommendations from a reconvened conference of representatives of employers and employees and of the public, the Minimum Wage Board of British Columbia has issued a new order superseding a previous order issued on September 23 last, (see LABOUR GAZETTE, October, 1917, p. 1239) with respect to female employees in the telephone and telegraph occupation. The new order was gazetted on March 4, and is in force and effective from April 5, 1920.

Since the telephone and telegraph occupation is one in which apprentices are not usually employed, female employees are divided by the new order into two classes, experienced and inexperienced. An experienced employee is defined as one who has worked in the telephone or telegraph occupation for a period of at least nine months, and an inexperienced employee means one who has worked in the occupation for less than nine months. The minimum wage for experienced employees of whatever age is fixed at \$15 a week. An inexperienced employee shall receive at least \$11 per week for the first three months, \$12 per week for the next three months, and \$13 per week

for the third three months, after which period she shall receive an experienced employee's wage. The total number of inexperienced female employees in any plant or establishment shall not exceed 35 per cent of the total number of females employed. The maximum hours of labour for both classes of workers shall be 8 hours a day, and 48 hours a week, and every employee shall have one full day off duty in every week. In the case of female employees customarily on duty between the hours of 10 o'clock p.m. and 8 o'clock a.m., ten hours on such duty shall be regarded as the equivalent of eight hours of labour as allowed by this order. Where employees reside on the premises of the employer, the latter may arrange with such employees to answer emergency calls between the hours of 10 o'clock p.m. and 8 o'clock a.m. In an emergency period the maximum hours of labour for an employee may be extended, though they must not exceed in any case 56 hours of labour in any one week, in which case the minimum wage for that employee during the time of labour in excess of 48 hours in any week shall be one and one-half times the rate of minimum wage otherwise specified by this order.

### FAIR WAGE CONTRACTS, APRIL, 1920

**D**URING April the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to nine fair wage contracts, of which eight were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides

for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to

supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

#### DEPARTMENT OF PUBLIC WORKS.

Wharf, Shenacadie, N.B. Name of contractor, E. M. Dickson, Louisburg, N.S. Date of contract, April 1, 1920. Amount of contract: schedule of prices.

Extension to mezzanine floor with counters and screens in main post office, Winnipeg, Man. Name of contractor, R. N. Wyatt, Winnipeg, Man. Date of contract, April 5, 1920. Amount of contract, \$5,539.

## PRICES RETAIL AND WHOLESALE IN CANADA, APRIL, 1920

THE prices movement continued upward, seasonal decreases in some foods, particularly eggs, being offset by increases in other lines, sugar and potatoes being prominent among foods, and flax products, hides, coke and petroleum products among materials.

In retail prices the cost of a weekly family food budget in terms of the average prices in some sixty cities was \$15.99 for April as compared with \$15.98 for March, increases in sugar and potatoes being offset by decreases in eggs. For April, 1919, the average cost was \$13.35 and for April, 1914, \$7.51. There were slight increases in meats, but slight de-

creases in butter, cheese, evaporated apples and prunes. Coal, wood and coal oil were slightly higher, while rents were upward in a number of the cities.

In wholesale prices the index number rose to 353.1 for April as compared with 349.0 for March, 279.6 for April, 1919, and 136.7 for April, 1914. The chief increases for the month were in fruits and vegetables, miscellaneous foods, flax products, hides, fuel and light, and miscellaneous building materials, but there were appreciable advances in grain and fodder, animals and meats, cottons, iron and steel, house furnishings and chemicals. Dairy products averaged lower. In

raw furs there was a considerable decline in muskrat skins. As compared with prices a year ago, higher levels appeared in all the groups, except Animals and Meats, Dairy Products and Fish.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by

various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and aver-

aged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

Meats were slightly higher, advances occurring in a number of the cities. Prices of fish also showed little change. Lard decreased slightly. Eggs were down between 15 and 20 cents per dozen, decreases occurring in nearly all of the cities. Butter averaged slightly lower as slight decreases occurred in many of the cities, but in some cases there were increases. Cheese averaged slightly lower. Bread averaged the same per pound, decreases in some cities being offset by increases in others. Rice, tapioca and canned vegetables showed very little change. Potatoes averaged higher, considerable increases occurring in many of the cities. In the Maritime provinces and in Quebec the increases were slight, but in Ontario they were steep in many cases. In the Western Provinces there were also considerable increases. Prunes and raisins were higher in some of the cities, but lower in others. Currants were almost unchanged. Jam and canned fruits showed little change. Marmalade and corn syrup showed increases in some places. Sugar was up in nearly all of the cities, the increases averaging nearly  $1\frac{1}{2}$  cents per pound; 20 cents per pound prevailed in many of the cities and in some the price was as high as 24 cents.

Anthracite coal was higher in most of the cities, the increases amounting to \$1.00 and \$1.50 per ton in some cases. Bituminous coal also showed advances, chiefly east of Winnipeg. Wood was higher in a number of the cities. Coal oil advanced in several of the cities, the increases being from 2 to 5 cents per gallon.

Rents were higher in Sydney, Brockville, Belleville, Peterborough, Brantford, London, Chatham, Windsor, Winnipeg and Calgary.

### Wholesale Prices

GRAINS AND FODDER.—Wheat was unchanged at the prices fixed earlier in the year. Barley rose at Winnipeg from \$1.64 to \$1.80 per bushel and at Toronto from \$1.80 to \$1.87. Oats advanced at Winnipeg from 98c. to \$1.11 and at Toronto from \$1.04 to \$1.07. Corn rose from \$1.93 to \$2.12. Flaxseed fell from \$5.30 per bushel to \$5.14. Rye advanced from \$1.85 to \$2.20. Hay advanced nearly \$4.00 per ton at Toronto and Montreal, reaching \$34. Bran rose to \$51 per ton and shorts to \$58.

ANIMALS AND MEATS.—Cattle rose from \$12.50 per hundred pounds to \$14 at Winnipeg for the best grades, and were also slightly higher at Toronto. Dressed beef advanced \$1.00 per hundred. Veal declined \$1.00 per hundred. Live hogs rose from \$17.75 per hundred to \$19.75. Dressed hogs were firmer. Breakfast bacon advanced 1c. per pound to 43-44c. Ham was up to 38-40c. per pound. Lard rose from 30c. per pound to 31c., but fell off to 28c. Sheep were firmer at \$10-\$16 per hundred pounds. Poultry was steady.

DAIRY PRODUCTS.—Finest creamery butter at Montreal fell to 63c. per pound, but rose to 66c. toward the end of the month. Cheese fell from 27½c. per pound to 26½c., but later rose to 28c. Eggs fell to 51c. per dozen for fresh at Montreal, but later rose to 54c. Similar changes occurred at Toronto. The wholesale price of milk was lowered in many of the cities to take effect at the first of May.

FISH.—Dried cod fell from 10½c. per pound to 10c. on the Atlantic coast. Export markets were reported to be easier, the West Indian markets being well supplied. The market for salt herring was reported quiet, but business in mackerel was active, and stocks were cleared out at \$14.00 per barrel.

FRUITS AND VEGETABLES.—Bananas were easier at 8½c. per pound. Oranges were lower at \$5.00 per box. Prunes were easier. Potatoes rose to \$6.00 per bag at Toronto in small lots and to

\*Preliminary figures. †Nine commodities on the market, fruits, vegetables, etc., one line of spelter was dropped in 1915.

\$5.25 at Montreal in car lots. Beans advanced to \$6.00 per bushel. Onions, turnips and canned vegetables were steady.

**MISCELLANEOUS FOODS.**—Oatmeal and Rangoon rice were easier. Spring wheat flour was slightly higher at \$13.30 per barrel. Chocolate advanced 2c. per pound to 38c. Sugar rose approximately 2c. per pound, reaching \$18.76-\$19.26 per hundred at Toronto in barrels. Molasses rose to \$1.50 per gallon. Maple sugar rose to 32c.-35c. per pound. Cheese salt was higher.

**TEXTILES.**—Raw cotton advanced to 43c. per pound for upland middlings. Coloured cottons averaged 7c. per pound higher. Shirting, Saxony, gingham and ticking advanced. Raw silk was down nearly \$2.00 per pound at New York. Jute was down from 16.23c. to 14.80c. per lb. Hessians were also slightly lower. Flax fibre was up to 85c. per pound and fine tow up to 35c. Flax sewing twine was up to 76c. per pound. Table and floor oilcloth advanced about 5 per cent.

**HIDES, LEATHER, BOOTS AND SHOES.**—Beef hides advanced to 25c. per pound, calfskins to 50c., and horsehides to \$10-\$11 each.

**METALS AND IMPLEMENTS.**—Iron bar, galvanized sheets, and wrought iron scrap were higher. Aluminum, brass, quicksilver and tin were higher, but antimony, lead and solder were lower.

**FUEL AND LIGHTING.**—Connellsville coke advanced at the ovens from \$6.00 per ton to \$12.00. Foundry coke advanced from \$7.00 to \$14.00 per ton. Bituminous coal averaged higher in British Columbia. Gasoline and coal oil were 2c. per gallon higher.

**BUILDING MATERIALS.**—Oak was higher, but birch was lower. Bricks, plaster of Paris, building paper, black iron sheets, nails, sash weights and sash cord were higher. Turpentine, benzine, Paris green and putty advanced.

**HOUSE FURNISHINGS.**—Glassware and crockery advanced 15 per cent at the end of the month. Wooden pails and tubs were about ten per cent higher.

**DRUGS AND CHEMICALS.**—Bleaching powder, caustic soda and soda ash advanced.

**MISCELLANEOUS.**—Muskrat skins declined from \$4.50 to \$4.00 each. Wrapping paper and wood pulp advanced. Raw rubber was up  $\frac{1}{2}$ c. to  $41\frac{1}{2}$ c. per pound. Laundry starch rose  $\frac{1}{2}$ c. to  $10\frac{3}{4}$ c. per pound.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest available statistics as to prices movements in other countries and as compared with Canada.

### United Kingdom

The level of retail food prices at the beginning of April, was reported by the Ministry of Labour, to be slightly higher than at the beginning of March, owing to advances in the prices of sugar

and potatoes, but there were declines in eggs, milk and imported mutton. The prices of foods, therefore, averaged 139 per cent higher than in July, 1914. Rents were estimated to be up about 10 per cent owing to increases in local taxes, as the Increase of Rent Restriction Acts prevented other advances in rents. The increase in clothing was estimated to be up about 310 to 320 per cent, the calculation being based upon prices reported for certain

staple lines. In fuel and light, the increase in coal was found to be 75 per cent, in gas something less, lamp oil and candles were found to have nearly trebled, and matches had risen still more. The average increase for the groups was therefore estimated at between 80 and 85 per cent. Other items were estimated to have advanced 120 per cent. The increase in all items of average household expenditure was, therefore, found to be 132 per cent, taking into consideration the same quantities and qualities of the various items as before the war. In March the average increase was estimated at 130 per cent. In wholesale prices the index numbers of the *Economist* and the *Statist* showed increases at the beginning of April, increases in food prices more than offsetting decreases in some materials. At the end of April, however, the index number of the *Economist* showed a considerable drop, all groups being lower, especially textiles, minerals and miscellaneous. Retail prices at the beginning of May were reported by the Ministry of Labour to have reached a point 146 per cent higher than in July, 1914.

#### France

The General Statistical Department of France reported the level of prices of food, fuel and light at Paris in February to be 14.1 per cent higher than in the preceding month and 239 per cent higher than in 1914.

#### Italy

The Municipal Labour Office at Rome reported the level of food prices in February to be 9 per cent higher than in January and 199 per cent higher than in 1914. If other necessities, clothing, fuel, lighting, rents, etc., were included

the increase since 1914 was 193 per cent. In Milan, the Municipal Labour Office reported the cost of maintaining a family had increased 274 per cent since 1914, food being up 306 per cent, clothing 293 per cent, heat and light 325 per cent and rent 8.3 per cent. March figures, however, were 2 per cent lower than those for February on the average, food having declined 2.9 per cent.

#### Belgium

The Belgian official labour review reported the cost of living index number for Brussels to have reached 445 for February, 1920 as compared with 410 for January and 334 for February, 1919. In April 1914 the index number was equal to 100. The index numbers for all the cities averaged 420 for February as compared with 396 for January.

#### Mexico

The cost of living index number for the federal capital was reported in the official monthly gazette up to 197.49 for December, 1919, as compared with 175.45 in December, 1918, prices in 1910 being equal to 100.

#### South Africa

The Quarterly Abstract of Union Statistics for January, 1920 (No. 1) reports the cost of living index number (including retail prices of foods, fuel, light and rent) to have reached 1,548 for December, 1919, as compared with 1,331 in January, 1919, 1,077 for the year 1913 and 1,000 for the year 1910. Increases for the year 1919 appeared in all the groups. Rents for six-roomed houses were up nearly \$5 per month. In wholesale prices the index number reached 1,170 for the year and 2,079 for the last quarter as compared with 1,799 for January, 1919, 1,663 for January, 1918,

and 1,109 for January, 1915, prices in January, 1914, being equal to 1,000.

### United States

Wholesale prices continued to increase as shown by some index numbers, increases appearing in breadstuffs, meat, metals and miscellaneous materials, while in dairy produce, miscellaneous goods and clothing there were slight decreases. The index number of *Bradstreet*, however, showed a slight decline at the beginning of March and again at the beginning of April. Building materials and naval stores were up, but

there were decreases in provisions, textiles, hides and leather. Foods were 8.3 per cent lower than on December 1, 1918, while materials were 17.2 per cent higher. A slight increase, however, appeared on May 1. In reference to retail prices and cost of living the National Industrial Conference Board, Boston, Mass., an association of employers, reports from time to time the results of calculations based upon retail prices, rents, etc., throughout the United States. The latest report is for prices in March, 1920, bringing up to this date the figures for previous dates.

THE NATIONAL INDUSTRIAL CONFERENCE BOARD'S ESTIMATE OF THE AVERAGE INCREASES IN THE COST OF LIVING IN THE UNITED STATES BETWEEN JULY, 1914, AND THE MIDDLE OF EACH OF THE YEARS 1915, 1916, AND 1917, AND AT SPECIFIED DATES IN 1918 AND 1919.

### FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING 1919

THE Department's record of fatal industrial accidents occurring during the year 1919, shows a decrease of 12.6 per cent in the number of fatalities in that year as compared with the previous year, there being 1,068 deaths recorded in 1919 as against 1,222 in 1918.

This reduction was more than accounted for in the steam railway service and in mining, smelting and quarrying operations, 66 fewer accidents being reported in the former and 126 in the latter group. In the metals, machinery and conveyance group 30 deaths less were

reported; while in railway and harbour construction and in navigation and miscellaneous transport, 28 and 29 fatalities occurred respectively than in 1918. The greatest loss of life due to any one accident in 1919 resulted from an explosion in a grain elevator at Port Colborne, 10 persons being the victims of this catastrophe, whereas in the preceding year an accident due to an explosion at the Stellarton coal mines accounted for 88 deaths.

It should be understood that while the accompanying tables of fatal industrial accidents occurring in Canada during the year have been made as complete as possible, they do not necessarily include all such accidents that may have

occurred. Reports have been received by the Department from all sources available which include the various Workmen's Compensation Boards; the Board of Railway Commissioners of Canada; the Department of Public Works and Mines of Nova Scotia; the Factory Inspector of New Brunswick; the Bureau of Mines of Quebec; the Department of Public Works and Labour, Quebec; the Bureau of Mines and Chief Factories Inspector of Ontario, and the Ontario Railway and Municipal Board; the Bureau of Labour of Manitoba; the Bureau of Labour of Saskatchewan; the Chief Inspector of Mines, Alberta; and the Department of Mines of British Columbia.

## FATAL INDUSTRIAL ACCIDENTS REPORTED DURING THE FIRST QUARTER OF 1920

**A**CCORDING to information received by the Department, the industrial accident record for the first quarter of 1920 shows 263 fatal accidents during that period as compared with 291 during the previous quarter, and 217 in the corresponding quarter of 1919. Of these fatalities, 86 occurred in January, 90 in February and 87 in March as against 87 in January, 73 in February and 57 in March of the preceding year. In addi-

tion to the accidents reported as occurring during the quarter, the Department also received information of 63 additional accidents pertaining to the year 1919, which are noted in the supplementary statement at the end of this article.

The following statement does not necessarily include all the fatal accidents that may have occurred but it has been prepared from information received from all sources available.

### FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1920

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>METALS, MACHINERY AND CONVEYANCES.—</b>				
Employee at steel plant .....	Sault Ste. Marie, Ont...	Jan. 1	40	Struck by engine.
Employee at steel plant .....	Sydney, N.S. ....	" 16	30	Caught between cars.
Employee at steel plant .....	Winnipeg, Man. ....	" 17	67	Blood poison.
Loader at steel plant .....	Sault Ste. Marie, Ont...	" 14	18	Crushed by falling rail.
Engineer at steel plant .....	Hamilton, Ont. ....	" 14	35	Collision.
Iron worker .....	Port Colborne, Ont. ....	" 7	29	Fell off column.
Workman with machinery company	Hull, Que. ....	Feb. 5	54	Electrocuted.
Iron worker .....	Port Colborne, Ont. ....	Feb. 12	35	Struck by cable.
Iron worker .....	Port Colborne, Ont. ....	" 28	31	Fell off wall.
Employee at foundry .....	Chatham, N.B. ....	" 18	69	Internal injuries.
Employee at automobile plant .....	Toronto, Ont. ....	" 25	25	Explosion.
Workman at steel plant .....	Hamilton, Ont. ....	" 27	27	Clothing caught fire.
Employee at shipyard .....	Toronto, Ont. ....	" 22	48	Cut knee-infection.
Carpenters at shipyards (2) .....	Birdgeburg, Ont. ....	" 28	24	Fell from scaffold.
			33	
Labourer at steel plant .....	Montreal, Que. ....	" 30	43	Run over by hand car.
Pipefitter .....	Hamilton, Ont. ....	Mar. 10	.....	Burned.
Machinist .....	Cow Bay, B.C. ....	" 12	38	Struck by shaft.
Stoker at steel plant .....	Hamilton, Ont. ....	" 13	44	Struck by steel.
Boilermaker .....	Galt, Ont. ....	" 17	39	Struck by iron when water pressure forced off joint.
<b>FOOD, TOBACCO AND LIQUOR.—</b>				
Employee at brewery .....	Winnipeg, Man. ....	Jan. 7	50	Crushed internally.
Employee at cigar factory .....	London, Ont. ....	" 16	62	Caught in belt.
Employee at flour mill .....	St. Boniface, Man. ....	" 17	34	Caught in machinery.
Helper at biscuit factory .....	Toronto, Ont. ....	Feb. 13	.....	Fell down elevator shaft.
Labourer at tobacco plant .....	Kingsville, Ont. ....	" 23	52	Electrocuted.
Packing plant employee .....	Edmonton, Alta. ....	" 19	.....	Fell down elevator shaft.
Packing plant employee .....	Chatham, Ont. ....	Mar. 3	20	Fell into vat of boiling water.
Employee at gum factory .....	Toronto, Ont. ....	" 4	60	Caught in elevator.
Miller .....	Medicine Hat, Alta. ....	" 31	48	Fell from ladder.
<b>TEXTILES, CARPETS AND CORDAGE.—</b>				
Warehouseman .....	Peterboro, Ont. ....	Mar. 1	54	Crushed by elevator-believed to have pulled the wrong rope.
Employee of flax fibre plant .....	Cayuga, Ont. ....	" 10	53	Caught in machinery.
Workman at underwear plant .....	Moncton, N.B. ....	" 10	55	Caught in revolving gears.
<b>PULP, PAPER AND FIBRE.—</b>				
Labourer at paper mill .....	Ottawa, Ont. ....	Jan. 5	67	Struck by falling object—Infection.
Oiler at paper mill .....	Thorold, Ont. ....	Feb. 9	.....	Caught in belt.
Millwright at paper mill .....	Sault Ste. Marie, Ont. ....	" 18	44	Caught in shaft wheel.
Helper at paper mill .....	Sault Ste. Marie, Ont. ....	" 24	.....	Asphyxiated.
Employees of pulp and paper mill (5) .....	Iroquois Falls, Ont. ....	" 12	.....	Mill dam broke.
Employee of pulp mill .....	Iroquois Falls, Ont. ....	" 14	23	Asphyxiated.
Employee of pulp mill .....	Bathurst, N.B. ....	" 18	48	Horses ran away.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1920—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>PRINTING AND PUBLISHING.—</b>				
Employee at printing plant.....	Winnipeg, Man.....	Feb. 11	.....	Fell from height.
<b>WOODWORKING AND FURNITURE.—</b>				
Labourer at planing mill.....	Walkerton, Ont.....	Jan. 7	50	(No particulars).
Employee at wood-yard.....	Cornwall, Ont.....	Mar. 1	.....	While operating a circular saw.
Electrician.....	Thorold, Ont.....	" 28	32	Electric burns.
<b>LEATHER, BOOTS, SHOES AND RUBBER.—</b>				
Workman at leather company.....	New Toronto, Ont.....	Jan. 29	19	Burned.
Employee at rubber plant.....	Montreal, Que.....	Mar. 31	41	Fall of elevator.
<b>CLAY, GLASS AND STONE.—</b>				
Watchman at cement plant.....	Port Colborne, Ont.....	Feb. 16	52	Burned by explosion.
Loader with contractor.....	Weston, Ont.....	Mar. 13	33	Crushed by falling gravel.
Marble cutter.....	Winnipeg, Man.....	" 16	.....	Explosion of air tank.
Labourer at cement plant.....	Point Anne, Ont.....	" 29	62	Caught in shafting.
<b>PAINTS, OILS, CHEMICALS AND EXPLOSIVES.—</b>				
Employees at oil works (4).....	Montreal, Que.....	Jan. 7	36 42 61 38	Explosion of stils.
Employee at starch works.....	Port Credit, Ont.....	" 9	27	Struck by train.
Employee at liquid gas factory.....	Hamilton, Ont.....	Feb. 7	21	Crushed under boiler.
Fireman at chemical factory.....	Niagara Falls, Ont.....	" 18	28	Slipped and foot caught in crusher.
Employee at oil well.....	Petrolia, Ont.....	Mar. 4	.....	Electrocuted, connection swivel on derrick broke causing rod to fall on wire.
Employees of chemical plant (2)...	Calgary, Alberta.....	" 16	.....	Explosion of acetylene tanks.
<b>STEAM RAILWAYS.—</b>				
Yardman.....	Coquitlam, B.C.....	Jan. 2	33	Crushed by engine rigging.
Car repairer.....	Cochrane, Ont.....	" 24	24	Struck by engine.
Switch cleaner.....	Toronto, Ont.....	" 15	.....	Run over by train.
Sleeping car employee.....	Corbeil, Ont.....	" 25	.....	Collision.
Snow-plough foreman.....	Iroquois Falls, Ont.....	" 29	44	Hernia.
Snow-plough workman.....	Saskatoon, Sask.....	" 30	32	Plough collided with train.
Brakeman.....	Near DeWinton, Alta.....	" 4	28	Caught between couplers.
Brakeman.....	Windsor, Ont.....	" 19	25	Run over by cars.
Employee.....	St. John, N.B.....	" 16	34	Crushed between cars.
Employee.....	Nouvelle, Que.....	" 22	30	Derailement.
Sectionman.....	Toronto, Ont.....	" 14	.....	Struck by engine.
Sectionman.....	Montrose, Ont.....	" 21	40	Stepped in front of train.
Sectionman.....	Laidlaw, B.C.....	" 24	58	Struck by train.
Sectionman.....	Mitford, Alta.....	" 29	.....	Struck by train.
Sectionman.....	Megantic, Que.....	" 31	45	Struck by engine.
Section foreman.....	Midland, Ont.....	" 14	.....	Collision.
Engineer.....	Deux Rivières, Ont.....	Feb. 1	.....	Collision.
Fireman.....	Hespeler, Ont.....	" 5	21	Derailement.
Fireman.....	Ridgeway, Ont.....	" 16	.....	Collision.
Fireman.....	Ebenezer, Sask.....	" 25	32	Spread rails caused engine to turn over.
Brake inspector.....	Chaudière, Que.....	" 7	21	Fell under cars.
Carman.....	Capreol, Ont.....	" 8	25	Crushed between cars.
Call boy.....	Belleville, Ont.....	" 15	.....	Struck by engine.
Operator.....	Glen Tay, Ont.....	" 16	26	Run over by engine.
Yard foreman.....	Winnipeg, Man.....	" 9	40	Struck by train.
Yardman.....	Toronto, Ont.....	" 6	26	Fell under engine.
Yardman.....	Aylth, Alta.....	" 25	21	Fell from car.
Switchman.....	West Toronto, Ont.....	" 12	32	Fell in attempt to board moving engine.
Snow shoveller.....	Moncton, N.B.....	" 17	46	Struck by shunting engine.
Snow shoveller.....	Cobden, Ont.....	" 17	61	Struck by engine.
Section foreman.....	Moncton, N.B.....	" 7	38	Struck by train.
Section foreman.....	Regina, Sask.....	" 11	40	Struck by engine.
Sectionmen (2).....	Gouin Station, Que.....	" 3	21	Locomotive collided with hand car.

Miner.....	New Waterford, N.S.....	" 29	44	Struck on head by timber.
Coal miner.....	Dominion, C.B.....	" 3	19	Crushed between box and beam.
Coal miner.....	Caledonia Mine, N.S.....	" 5	.....	Fall of roof, coal.
Coal miner.....	New Aberdeen, N.S.....	" 17	24	Fall of coal.
Coal miner.....	Coal Creek, B.C.....	" 26	32	Fall of coal.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1920—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>MINES, SMELTERS &amp; QUARRIES.—Con.</b>				
Coal miner	Glacé Bay, N.S.	Feb. 19	24	Fall of coal.
Asbestos miner	Thetford Mines, Que.	Mar. 1	30	Fell into pit.
Miner	New Waterford, N.S.	" 2	44	Falling stone dislodged by runaway box.
Miner	Drumheller, Alta.	" 12	27	Fall of rock.
Miner	Florence, N.S.	" 20	45	Fall of stone.
			Over	
Miner	Surf Inlet, B.C.	" 23	21	Struck by bucket.
Electrician at smelter	Trail, B.C.	" 14	19	Flying steel while blasting.
Fire boss	Coal Creek, B.C.	" 15	21	Cave in.
Loader	Stellarton, N.S.	" 16	48	Fall of coal.
Paving cutter	Nictaux West, N.S.	" 20	27	Premature explosion.
Coal miner	Nanaimo, B.C.	" 30	52	Fall of rock.
Machine runner	Drumheller, Alta.	" 31	29	Fall of rock.
			Under	
Winchboy	Wakesiah Mine, B.C.	" 29	21	Struck by car.
Trip runner	Joggins mine, N.S.	" 30		Runaway box.
<b>BUILDING AND CONSTRUCTION.—</b>				
Railway employees (2)	Canora, Sask.	Jan. 1	37-20	Struck by shunting cars.
Helper at building	Montreal, Que.	" 6	32	Fell from scaffold.
Carpenter	Toronto, Ont.	" 10	60	Fall.
Carpenter	Bathurst, N.B.	" 10	43	Staging gave way causing fall.
Carpenter	Nelson, B.C.	" 21	52	Fell from scaffold.
Carpenter	Estcourt, Que.	" 22	22	Fell from roof.
Painters (3)	Montreal, Que.	Feb. 14		Burned in fire at building.
Workman at elevator	Port Arthur, Ont.	" 11	55	Fell through an uncovered hole in tank roof.
Workman at elevator	Port Colborne, Ont.	" 16	38	Struck by falling beam.
Plumber	Kingsville, Ont.	" 23	55	Iron pipe being lifted touched trolley wire.
Foreman at canal work	Queenston, Ont.	" 28		Snatch-block broke causing fall.
Carpenter	Hamilton, Ont.	Mar. 2		Fell from a scaffold.
Workman at store	St. John, N.B.	" 2	30	Crushed by falling pillar.
			48	
Workmen at machine plant (3)	St. John's, Que.	" 17	30	Collapse of building.
			24	
Employees with contractor (2)	Ducks, B.C.	" 18	38-39	Buried under earth slide.
Carpenter at canal work	Queenston, Ont.	" 22	25	Struck by lumber falling from sling.
<b>LUMBERING.—</b>				
Surveyor	Amherst, N.S.	Jan. 2	64	Floor collapsed.
Lumberman	Tennecape, N.S.	" 7	41	Struck by falling tree.
Gangman	Squamish, B.C.	" 10	18	Fell over bridge with tie.
Woodsmen	Rosevear, Alta.	" 23		Struck by falling tree.
Employee	Nairn Centre, Ont.	" 2		Struck by tree.
Employee	North Bay, Ont.	" 3		Struck by tree.
Employee	Otter, B.C.	" 20	34	Thrown against saw when tie rebounded.
Employee	Sechelt, B.C.	" 26	26	Crushed against tree by swinging boom stick.
Employee	Jacksonboro, Ont.	" 27	28	Struck by tree.
Sawyer	Chase, B.C.	" 26	29	Struck by falling tree.
Employee	Toronto, Ont.	Feb. 2	62	Fell off trestle.
Employee	Novar, Ont.	" 3	24	Hand bruised; infection.
Employee	Wickham, N.B.	" 3	24	Struck by limb of tree.
Foreman	Broughton Island, B.C.	" 14	39	Fell while removing chunk between logs in chute.
Setter at sawmill	Chisholm, Alta.	" 16	31	Collapse of falling burner.
Log skidder	Near Waldo, B.C.	" 23		Struck by falling log.
Logger	Nimkish Lake, B.C.	" 7	30	Struck by falling tree.
Logger	Courtenay, B.C.	" 18		Struck by falling tree.
Logger	Hardwich Island, B.C.	" 23	50	Struck by sliver from log.
Fireman	Arnprior, Ont.	" 11	30	Lifting machinery; strain.
Teamster	Toronto, Ont.	" 23	36	Infection.
Lumberman	Harmony, N.S.	" 26		Shuck by falling limb.
Chokerman	Thompson Sound, B.C.	" 24	32	Struck by falling tree.
Employee	Vegreville, Alta.	Mar. 5		Struck by falling tree.
Employee	Haliburton, Ont.	" 9	24	Struck by cant-hook.
Employee	The Pas, Man.	" 31		Frozen.
Employee at saw mill	St. Gervais, Que.	" 10	40	Struck by a deal projecting from a saw.
Employee at saw mill	Broad Valley, Man.	" 12		Saw broke away.
Teamster at saw mill	New Hamburg, Ont.	" 15	21	Caught in chain.
Teamster	Windy Lake, Ont.	" 18	45	Fell off load.

## FATAL INDUSTRIAL ACCIDENTS DURING THE FIRST QUARTER OF 1920—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>PUBLIC AND MUNICIPAL EMPLOYMENT.—</b>				
Labourer.....	Huntsville, Ont.....	Jan. 12	19	Crushed by gravel.
Labourer at road work.....	Tisdale, Sask.....	Feb. 23	.....	Struck by falling tree.
Elevator operator.....	Winnipeg, Man.....	" 3	.....	(No particulars).
Teamster.....	Matheson, Ont.....	" 25	15	Crushed by gravel.
Employee of power plant.....	Weyburn, Sask.....	Mar. 27	40	Electrocuted.
<b>PUBLIC UTILITIES.—</b>				
Foreman with power commission.....	Stamford, Ont.....	Jan. 9	32	.....
Lineman.....	Chatsworth, Ont.....	" 20	33	Electrocuted.
Lineman.....	Toronto, Ont.....	Mar. 11	55	Electrocuted.
Labourer with power commission.....	Stamford, Ont.....	" 8	29	Fell under car.
Employee with power commission.....	Stamford, Ont.....	" 19	27	Stumbled over wire and fell under train.
Lineman.....	Princeton, B.C.....	" 27	45	Car ran over bank.
<b>AGRICULTURE.—</b>				
Farm hand.....	Salmon Arm, B.C.....	Jan. 10	18	Crushed by rolling log.
Farm instructor.....	Barstow, Alta.....	" 12	43	Thrown from horse.
Farmer.....	Cornwall, Ont.....	" 15	.....	Struck by falling tree.
Farmer.....	Vernon, B.C.....	" 22	70	Butted by ram.
Farmer.....	Young, Sask.....	Feb. 7	.....	Kicked by horse.
Farmer.....	Merville, B.C.....	" 7	40	Struck by falling tree.
Farmer.....	St. Frederic, Que.....	" 28	21	Fall of earth while excavating.
Employee.....	Fernie, B.C.....	Mar. 3	30	Engine fly wheel burst.
Farmer.....	St. Jude, Que.....	" 24	45	Load of logs capsized.
Farmer.....	Near Brockville, Ont.....	" 26	61	Struck by falling tree.
<b>MISCELLANEOUS.—</b>				
Labourer.....	Calgary, Alta.....	Jan. 2	59	Injury to foot.
Labourer.....	Vernon, B.C.....	" 6	28	Dragged by horses.
Labourer.....	Bathurst Mines, N.B.....	" 13	.....	Fell over bank.
Labourer.....	Thorburn, N.S.....	" 17	.....	Struck by cars lowered down on screen
Labourer.....	Rambler Siding, B.C.....	" 18	37	Buried in snow-slide.
Stock detective.....	Calgary, Alta.....	" 18	42	Suffocated in burning building.
Foreman.....	Campbell River, B.C.....	" 23	42	Thrown off when gravel truck became disconnected.
Storekeeper.....	Grafton, Ont.....	" 31	60	Smothered by fumes.
Helper at electric plant.....	Peterboro, Ont.....	Feb. 8	18	Needle entered thumb; infection.
Engineer.....	Fraser Mills, B.C.....	" 10	66	While replacing bolt placed head in shaft trough.
Labourer with merchant.....	Levis, Que.....	" 28	70	Fall of frozen coal.
Watchman at concrete plant.....	Hamilton, Ont.....	" 28	.....	Murdered.
Brakeman.....	Hernando Island, B.C.....	Mar. 3	35	Struck by log when unloading.
Labourer.....	Lake Buntzen, B.C.....	" 11	50	Fell over railing.
Labourer.....	Jasper, Alta.....	" 4	24	Struck by engine.
Labourer.....	Yank, B.C.....	" 9	32	Struck by falling tree.
Electrician.....	Trail, B.C.....	" 14	19	Struck by flying steel.
Workman with electric company.....	Windsor, Ont.....	" 15	.....	Struck by auto.
Engineer.....	Nanaimo, B.C.....	" 17	42	Drowned.
Ashman.....	Edmonton, Alta.....	" 18	67	Bloodpoison.
Janitor.....	Montreal, Que.....	" 24	.....	Caught between elevator door and floor.
Watchman for furrier company.....	Montreal, Que.....	" 30	55	Fell against object.
Labourer.....	Montreal, Que.....	" 29	42	Hoist.

## SUPPLEMENTARY STATEMENT OF FATALITIES THAT OCCURRED IN 1919.

<b>METALS, MACHINERY AND CONVEYANCES.—</b>				
Workman at plough works.....	Brantford, Ont.....	Nov. 24	57	Knee bruised by fall; infection.
Millwright.....	Ocean Falls, B.C.....	Dec. 2	44	Hit by spoke of pulley.
Plater.....	Vancouver, B.C.....	" 8	55	Knocked from scaffold by swinging plate.
<b>WOODWORKING AND FURNITURE.—</b>				
Planer feeder.....	Sidney, B.C.....	Nov. 4	28	Caught in machine.
<b>STEAM RAILWAY SERVICE.—</b>				
Brakeman.....	Nr. Headquarters, B.C.....	Oct. 3	22	Caught between logs.
Engineer.....	Ladysmith, B.C.....	" 22	29	Derailment.
Track watchman.....	White Rock, B.C.....	Nov. 17	78	Buried in mud slide.
Labourer.....	Sarnia, Ont.....	Dec. 19	62	Fell off turntable.

## SUPPLEMENTARY STATEMENT OF FATALITIES THAT OCCURRED IN 1919,—Continued.

Trade or Industry.	Locality.	Date.	Age.	Cause of fatality.
<b>MISCELLANEOUS TRANSPORT.—</b>				
Deckhand.....	Cape Keppel, B.C.....	Aug. 1	19	Fell overboard.
Longshoreman.....	Vancouver, B.C.....	Nov. 3	40	Fall.
Engineer on steamer.....	Steamer Georgia.....	" 5	39	Crushed between tug and scow.
Donkey engineer.....	North of Stave Falls, B.C.....	" 7	48	Cable broke.
Donkey engineer.....	Port Alberni, B.C.....	" 24	35	Struck by falling machine hood.
Teamster.....	South Vancouver, B.C.....	Dec. 6	60	Struck by wagon pole when horses bolted.
Seaman.....	Vancouver, B.C.....	" 19	38	Fell when boarding steamer.
Teamster.....	East Mountain, N.S.....	" 28	71	Fell from wagon seat,
<b>MINES AND SMELTERS.—</b>				
Employee at cement plant.....	Edmonton, Alta.....	Sept. 16	..	Fall of rock.
Miner.....	Nanaimo, B.C.....	Dec. 26	37	Fall of coal.
<b>BUILDING AND CONSTRUCTION.—</b>				
Bridgeman.....	Rock Creek, B.C.....	Apr. 28	43	Internal strain.
Hoist engineer.....	Calgary Alta.....	July 30	40	Fell from scaffold.
Carpenter.....	Calgary, Alta.....	Oct. 18	30	Fell from roof of elevator.
Carpenter.....	Vancouver, B.C.....	Nov. 13	28	Fall.
Contractor.....	Duncan Bay, B.C.....	Dec. 22	45	Premature explosion.
Bricklayer.....	Calgary, Alta.....	Sept. 25	62	Fell from scaffold.
<b>AGRICULTURAL.—</b>				
Farmer.....	Swalwell, Alta.....	Sept. 26	32	Injured while threshing.
<b>LUMBERING.—</b>				
Tie-maker.....	Moyie, B.C.....	Apr. 21	25	Fell on branch.
Log skidder.....	Tanglefoot, B.C.....	July 24	34	Caught between logs.
Labourer.....	Fraser Mills, B.C.....	Oct. 20	49	Fell when pulling lumber.
Labourer.....	Ruskin, B.C.....	" 20	41	Struck by falling tree.
Hooktender.....	Ladysmith, B.C.....	" 31	28	Struck head when pulling log.
Logger.....	Hardwich Island, B.C.....	" 29	45	Crushed by log
Logger.....	Wyatt Bay, B.C.....	Nov. 13	33	Struck by snag.
Logger.....	Wellboro Channel, B.C.....	" 19	60	Buried under stump; bucking wind falls.
Feeder.....	Fraser Mills, B.C.....	" 19	17	Clothes caught on shaft.
Employee.....	Jordan River, B.C.....	" 18	38	Fell from cliff; drowned.
Sectionman.....	Rock Bay, B.C.....	" 20	36	Run over by logging train.
Cutter.....	Swanson Bay, B.C.....	Dec. 5	36	Struck on head by wood; drowned.
Tie-maker.....	Otter Creek, B.C.....	" 10	45	Struck by falling timber.
Tie-maker.....	Near Tanglefoot, B.C.....	" 16	29	Slipped cut leg with axe.
Camp foreman.....	Chase, B.C.....	" 11	43	Struck by logs coming down chute.
Employee.....	Chase, B.C.....	" 11	35	Struck by logs coming down chute.
Logger.....	Coal Creek, B.C.....	" 12	35	Crushed by rolling logs.
Log skidder.....	Near Creston, B.C.....	" 16	25	Hit by rolling logs.
Labourer.....	Near Smithers, B.C.....	" 28	22	Struck by falling timber.
<b>PUBLIC AND MUNICIPAL EMPLOYMENT—</b>				
Lighthouse keeper.....	Langarra, B.C.....	June 20	48	Strained back when lifting.
Constable.....	Edmonton, Alta.....	Aug. 30	32	Murdered while on duty.
Roadmaster.....	Spuzzum, B.C.....	Nov. 16	57	Struck by boulder slide.
Labourer.....	Mile 10.3 Cascade S.....	" 16	38	Struck by boulder slide.
Waterworks employee.....	St. John, N.B.....	Dec. 21	49	Hand cut; developed tetanus.
<b>PUBLIC UTILITIES.—</b>				
Electrician.....	Armstrong, B.C.....	Nov. 18	44	Electrocuted.
Employee.....	Wainwright, Alta.....	Dec. 23	17	Electrocuted.
<b>MISCELLANEOUS.—</b>				
Fireboss.....	Calgary, Alta.....	Sept. 4	52	Strain.
Rodman on survey.....	Muskeg River, Alta.....	" 26	48	Exposure.
Labourer.....	Vancouver, B.C.....	" 29	35	Struck by falling boom.
Labourer.....	Redcliffe, Alta.....	Oct. 8	42	Fall of rock.
Stationman.....	Vernon, B.C.....	Nov. 15	22	Fall of rock when drilling.
Fireman.....	Edmonton, Alta.....	" 9	62	Fall.
Labourer.....	Crescent Valley, B.C.....	" 56		Struck by falling plank.
Labourer.....	Near Armstrong, B.C.....	Dec. 11	30	Explosion when blasting stumps.
Wheelman.....	James Island, B.C.....	" 11	48	Explosion of mill-powder.
Watchman.....	Nash, B.C.....	" 19	50	Bursting of steam pipe.
Skating rink employee.....	Bathurst, N.B.....	" 17	43	Fell from staging.
Labourer.....	Sawridge, Alta.....	" 19		Fall of tree.

## REPORT OF THE WORKMEN'S COMPENSATION BOARD OF MANITOBA FOR 1919

ACCORDING to the 1919 report of the Workmen's Compensation Board of Manitoba, there were 2,829 accidents reported during the year as against 2,695 during 1918, an increase of about 5 per cent, notwithstanding the general strike which paralyzed industry in many lines of work during six weeks of the busiest season of the year. Of the 2,829 accidents reported, 47 terminated fatally as compared with 42 in 1918. There were 1,684 claims filed, 33 of which were for fatal accidents, 70 for permanent disability and 1,581 for temporary disability; in 1918 there were 1,731 claims. Fourteen fatal accidents occurred for which no claim was made. In five of these cases there were no dependants, and in one case the dependants were resident in an enemy country and consequently not entitled to compensation.\*

Total pensions in fatal and permanent disability cases amounting to \$402,236 were ordered by the Board during the year, as against \$408,817 for 1918. The total actual cash payments to workmen, or their dependants, amounted to \$197,357.

The total premium income for the year, based on estimated payrolls of employers, was \$722,972, made up as follows: Premiums paid to insurance companies, \$262,484; premiums chargeable self-insurers, \$460,488. Earned premiums in 1918 amounted to \$690,178. The contribution to the Board's Administration Fund amounted to \$54,222, being 7½ per cent of estimated premiums. The administration expenses

for 1919 were \$45,547, or 6.3 per cent of the estimated premium income. The administration expenses for the previous year amounted to \$37,318, or 5.69 per cent of the actual total premium income.

During 1919 employers in classified industries to the number of 2,700 filed policies with the Board, whilst two employers were given permission to carry their own insurance. In cases of flagrant violation and evasion of the Act by employers, in failing to carry insurance for the protection of their employees, it was found necessary to prosecute the delinquents, some 19 employers being summoned in this way, and in every case a conviction was obtained and a fine imposed.

During the year some 2,400 examinations of injured workmen were made by the Board's medical officer.

The report states that owing to the increased cost of living the allowances provided for women and children were insufficient and that the Board recommended that the Act should be amended to increase the monthly payments to widows from \$20 to \$30, and to children from \$5 to \$7.50. The report also states that both employers and employees have consistently commended the principles of the Act; and that twenty employers in industries not classified under the Act have voluntarily availed themselves of the 1919 amendment which permits that "An employer of labour in an industry under Part Two of the Act may elect and on approval by the Board may be brought within the purview of Part One of the Act."

\*See LABOUR GAZETTE, June, 1919, p. 745.

## MINING FATALITIES IN ONTARIO DURING 1919

ACCORDING to the 1919 report of the Bureau of Mines of Ontario, 34 fatal accidents causing the death of 39 workmen occurred during the year in the mines, metallurgical works, quarries, clay and gravel pits regulated by the Mining Act of Ontario, as compared with 32 fatalities in 1918. Of these accidents, 19 occurred underground and resulted in 21 deaths, 6 men were killed above ground at the mines, 10 at metallurgical works and 2 in quarries and clay pits. The analysis of fatalities for the years 1918 and 1919 were given as follows:

	1918. Per cent.	1919. Per cent.
Falls of ground .. . . .	20.0	22.2
Shaft accidents.. . . .	0.0	29.6
Explosives.. . . .	40.0	7.4
Miscellaneous, under- ground.. . . .	26.6	18.5
Surface.. . . .	13.3	22.2

The death-rate per 1,000 workers was 3 in 1919 as against 2.1 in the previous year. Eighteen of the men killed were English-speaking and 21 were of foreign nationalities. A large proportion of the deceased workers were men between the ages of 41 and 45, there being 10 in this group. The above fatalities are included in the statement of fatal industrial accidents in Canada during 1919, which appears elsewhere in this issue.

## EFFECT OF SAFETY ORGANIZATION IN MACHINE BUILDING PLANTS

### Reduction in Accident Frequency and Severity

THE result of the industrial safety movement in machine building factories in the United States is shown in a recent bulletin of the United States Bureau of Labour Statistics (No. 256, "Accidents and Accident Prevention in Machine Building"). It appears from a comparison of accident rates in plants with and without well organized systems of accident prevention that accident frequency rates are three or four times higher where the safety organization is absent or defective. The report summarizes observations in 194 plants, and the activity of these plants is ex-

pressed in terms of "man-hours," 347,109,000 being the total of the man-hours worked during the year 1912. Calculations are based upon the definition of a full time worker as one who is employed 10 hours a day for 300 days, or 3,000 hours in the year, the number of full-time "workers" in the year above mentioned being thus 115,703. Consistency in observations in various plants is further secured by the use not only of frequency rates, but also of "severity rates", a statistical method of measuring the seriousness of accidents. By the severity rate is meant the proportion of days lost per thousand workers, or the

average number of 10-hour days lost by each worker out of the 300-day year.

The frequency rate by no means corresponds to the severity rate, though a comparison of the two sets of figures given in the report shows at a glance the improvements effected in recent years both in lessening the total number of accidents and in reducing their severity.

Accurate comparisons are difficult owing to the absence of reliable accident records in earlier years. Such information, however, was obtainable over a period of years in two groups of plants. The first group covers the years 1907 to 1912 and shows no significant change in accident occurrence during that time. The second group, covering the years 1910 to 1913, shows no decrease in frequency rates, but the severity rate dropped steadily from 5.2 days in 1910 and 6.2 days in 1911 to 2.7 days in 1913, this marked improvement being due, it is stated, to new safety organization introduced during 1912. The study of accident rates by occupations aids preventive measures by locating hazards in the

various groups. Thus the high severity rate noted among cranemen—19.6 days—led to improvement in the construction of cranes through the use of safety appliances. Among other facts brought out by this inquiry are an excess of accidents, especially minor accidents, among foreign born employees, due to ignorance of English or lack of previous experience; an excess of accidents, amounting to 50 per cent, among night workers, as compared with the day staff in the same plant; an excess of accidents during the hottest season of the year. "Experience has everywhere shown," says the report, "that the most effective work for the prevention of accidents must come from a proper safety organization within the plant itself. Such an organization involves some form of safety committee system, with representatives of both employer and employee working together to develop the best safety methods, not only in the field of mechanical safeguards, but also in the education of the employees in the observance of proper precautions and the maintenance of the safety spirit."

## MIGRATION AND SETTLEMENT DURING THE FIRST QUARTER OF 1920

**IMMIGRATION.**—The following statements compiled from information furnished by the Department of Immigration and Colonization give details as to the total immigration into Canada during the first quarter of 1920. For purposes of comparison the figures for the previous quarter and for the corresponding quarter in 1919 are also given:

STATEMENT OF IMMIGRATION TO CANADA DURING THE FIRST QUARTER OF 1920.

The table on page 619 gives the nationality, sex and destination of all immigrants entering Canada during the first quarter of 1920.

**HOMESTEAD ENTRIES.**—During the first quarter of 1920 there were 815 homestead entries recorded in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, as compared with 1,328 for the fourth quarter of 1919, and 706 for the corresponding quarter of 1919. The opposite statement shows the number and nationality of those who took up homesteads in the various provinces during the first quarter of 1920.

**LANDS PATENTED.**—According to information supplied by the Department of the Interior with respect to letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, the number of patents issued during the first quarter of 1920 was 5,326, and the number of acres was 817,542, as compared with 4,115 patents and 647,374 acres in the last quarter of 1919, and 5,227 patents and 1,086,230 acres in the corresponding quarter of 1919.

## RECENT LABOUR LEGISLATION IN QUEBEC, MANITOBA AND SASKATCHEWAN

**T**HE present article summarizes those laws of labour interest that were enacted at the late sessions of the provincial legislatures of Quebec, Manitoba and Saskatchewan. Similar laws enacted at the previous sessions of these legislatures were reviewed in the April, 1919, issue of the LABOUR GAZETTE, pages 490-498.

### Quebec

At the recent session of the Quebec legislature, which commenced on December 10, 1919, and terminated on February 14 last, enactments of particular interest to labour relate to workmen's compensation, examination and licensing of workmen, child labour in reformatories, technical education and housing.

The Workmen's Compensation Act was amended in several important respects. The amendment provides that whenever a municipal corporation undertakes or executes public works itself under such conditions as would render a contractor liable under the provisions of this act, such corporation shall itself become liable. The law was amended as regards the amount of compensation payable under the act, the maximum amount in case of death or disability being raised from \$2,500 to \$3,000. A third amendment raises from \$800 to \$1,000 the amount of yearly wages which may be taken into account in computing the amount of compensation payable; and provides that any surplus up to \$1,500, instead of \$1,200 as formerly, shall give a right to one-fourth the usual compensation. The amount of compensation allowed by law for funeral expenses has been increased to \$50.

The main effect of the amendment in regard to child labour in reformatories or industrial schools is that it shall no longer be possible for reformatory labour to be exploited for the benefit of manufacturers or of reformatory authorities. The amendment provides as its most important clause that every contract made or entered into between the manager or proprietor of any reformatory or industrial school and any person or corporation with respect to the work of the children kept and maintained in such reformatory or industrial school must be submitted to the provincial secretary for approval. A second clause provides that the manager or proprietor of every reformatory or industrial school shall keep a book of accounts showing the amount produced by the work of each child kept and maintained in such institution, and the manager shall account to the provincial secretary from time to time for the money so collected. The balance of the money as between what the child earns and the amount of his maintenance shall be given to him when he leaves the institution. The provincial secretary is authorized to retain the amount due for the cost of main-

tenance of any child until the institution has complied with conditions.

An amendment to the Technical Education Act provides for the appointment of a director of technical education to look after the increasing number of technical schools of the province. Under the original act, technical education was in charge of an inspector-general of industrial education.

In 1918 the Revised Statutes, 1909, respecting the protection of public buildings against fire, were amended to provide that electrical installations should be made or altered only by or under the immediate supervision of a person duly authorized and holding a license to that effect. An amendment passed at the recent session provides for the appointment by the Lieutenant-Governor in Council of two or more examiners with special technical knowledge of electricity whose duty it shall be to test the qualification of applicants for license under the act as amended in 1918.

An amendment to the act of 1914 to assist in the construction of dwelling-houses in cities, towns and villages provides that the guarantee of loans to companies by any municipality for the building of houses must be made by by-law approved by the majority of electors who are proprietors and by the Lieutenant-Governor in Council. Formerly, the approval of the Lieutenant-Governor in Council was not necessary and a guarantee could be made upon a resolution to that effect as well as by bylaw.

The act to provide for the construction of workmen's dwellings and for advances to municipalities, which was passed in 1919, was amended at the recent session to provide that the powers granted to municipalities by the original act may be delegated to the municipal housing commissions which may be maintained in existence for such length of time as the various municipalities desire. The city of Montreal, in the event of a commission being appointed under the act, is exempted from the provision that all building schemes of municipalities must be approved by the

Provincial Director of Housing. Apartment houses containing not more than three apartments are included in the word "dwelling" as used in the act.

### Manitoba

The Manitoba legislature opened on January 22, and was prorogued on March 27. Enactments of interest to labour relate to workmen's compensation, shops' regulation, mothers' pensions, industrial conditions and housing.

The new Workmen's Compensation Act practically recasts the legislation of 1916. Under the original act, employers were required to insure in private casualty companies or provide self-insurance. Assessments were made by the provincial Workmen's Compensation Board on such insurance companies and underwriters insuring employers and on employers carrying their own insurance. The enactment of the recent session abolishes insurance through companies and provides for a direct assessment upon the payrolls of all employers within the scope of the Act; that is to say, a system of exclusive state insurance such as that already enforced by law in Alberta, British Columbia, New Brunswick, Nova Scotia and Ontario. The monthly pensions to widows and children were raised from \$20 to \$30 and from \$5.00 to \$7.50 respectively, and where dependents are orphan children pensions have been increased from \$10 to \$15 for each child. The maximum amount payable to any one family has been increased from \$40 to \$60. Furthermore, the amount of compensation payable is increased from 55 per cent to 66 $\frac{2}{3}$  per cent of the wages paid in case of the person injured. Under the new Act the Board has authority to provide for an injured workman such medical, surgical and hospital treatment, transportation, nursing, medicines, crutches and appliances, including artificial limbs, as are believed necessary at the time of the injury and thereafter during disability. The Board is also given full power to adopt rules and regulations with respect to furnishing

medical aid to workmen, and may authorize employers to furnish or provide medical aid at the expense of the Board and upon terms fixed by it. The Board may also require employers in any industry to maintain such first-aid appliances and service as directed, and may make orders respecting the expense for such appliances and service. The Act, which will go into effect on January 1, 1921, also provides that compensation will be payable from three days after disability instead of six days as under the present law. A new industry has been added to those coming within the scope of the Act, viz., auto garages including sale of gasoline, oil, accessories and storage of cars (not including manufacture of cars.)

An amendment to the Shops Regulation Act empowers the councils of rural municipalities and incorporated towns and villages to pass bylaws providing for a half-holiday every Thursday between the hours of 12 o'clock noon and 6 o'clock in the afternoon during the whole or any part of the year. The amendment empowers city councils to pass bylaws providing for a weekly half-holiday during the whole or any part of the year in the afternoon of such day of every week as the council may determine.

The Mothers' Allowance Act was amended in respect of the property qualifications of persons receiving pensions under the Act. The amendment provides that a beneficiary under the Act, who is the owner of property, may be prevented from disposing of such property if there is registered over the signature of the Attorney-General in any registry or land titles office, a statement certifying that such beneficiary has received or is in receipt of money under the provisions of the Act, and such statement from the time of registration shall bind and form a lien against the property of beneficiary.

An amendment to the Industrial Conditions Act recognizes the right of employers and employees to organize for any lawful purpose. It is also provided

that employers and employees shall have the right to bargain with one another individually or collectively through their organizations or representatives, provided that in case of dispute between employers and any such organization of employees or its representatives as to the method or manner or the terms and conditions of collective bargaining, such dispute shall be submitted to the Joint Council of Industry and dealt with by it in the manner prescribed by the Act.

The Electricians' License Act was amended to the effect that no person other than a journeyman licensed under the act shall perform any electrical work or instal any electrical material or appliances within the meaning of the Act.

An amendment to the Housing Act provides that the Lieutenant-Governor may raise, by way of loan, money for housing purposes and such money may be lent to municipalities subject to certain conditions.

#### Saskatchewan

During the recent session of the Saskatchewan legislature, which opened on November 27 and terminated on February 4, several laws of interest to labour were enacted, including measures relating to minimum wages, factories, mothers' pensions, the Bureau of Labour, compulsory school attendance, vocational education, and housing.

An amendment to the Minimum Wage Act extended the jurisdiction of the Minimum Wage Board to girls and women employed in restaurants and hotels. The amendment also gives the Board power to determine what number or proportion of the employees in a shop or factory may be apprentices.

The Factories Act was amended in three important respects. Considerable confusion had resulted from a conflict between the number of hours established by the Factories Act for women and children and that established by the Minimum Wage Board. The Factories Act established a maximum of fifty hours a week, and the Board a maximum of forty-eight. The amendment brought

the Factories Act into agreement with the orders of the Board by ordering that no youth, young girl or woman should be employed in any factory for more than forty-eight hours in any one week. A second amendment extended the scope of the Factories Act to include grain elevators, notwithstanding that less than four persons might be employed therein. The Lieutenant-Governor is empowered by this section to make regulations specifying the buildings, machinery, bins or other things, or the parts thereof, which shall be kept guarded, and the nature of the guards which shall be used. A third amendment classified as factories all those buildings containing elevators. Provision is made for stringent inspection of elevators, and no person under sixteen years of age is allowed to operate any passenger elevator in or about a factory.

The Mothers' Pensions Act was amended in one important respect. Prior to the passage of the amendment assistance under the act was given only to mothers who were widows. By the amendment, mothers, whose husbands are inmates of institutions for the insane or incurable are also eligible for allowances.

By an important enactment, the status of the Bureau of Labour has been changed from a branch of the Department of Agriculture, responsible to that Department, to the status of a separate bureau in charge of a commissioner responsible directly to a Minister. This amendment adds the Minimum Wage Act to the list of acts administered by the Bureau.

An amendment to the School Attendance Act requires full school attendance from every child between the ages of seven and fifteen years. Children under fifteen may not be employed during school hours and any person employing such a child shall incur a penalty not exceeding fifty dollars. Provision is made, however, for exemption of children over thirteen years of age who, in the opinion of the Board of Trustees, are urgently needed in husbandry or

household duties, but such exemption period shall not exceed thirty teaching days in any one year.

The Vocational Education Act passed at the recent session is an act enabling boards of trustees in towns or high school districts to determine whether they wish to maintain vocational schools, and providing for provincial aid in such event. Provision is made for the establishment and management of any school or department organized under this Act, by a local vocational educational committee, composed of ten members, of whom four shall be appointed by the school board, three representing employers of labour shall be appointed by the

municipal council, and three representing employees shall be appointed by local organizations. For the proper administration of the act the Minister of Education is empowered to make rules and regulations governing the character of accommodation and equipment, the qualifications of instructors, the course of study and the fees charged to pupils. The Vocational Education Act was brought into force by proclamation of the Lieutenant-Governor in Council on April 15.

An amendment to the Housing Act confers additional powers on town and city councils for carrying out the provincial housing scheme.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**A** BRIDGE and building foreman was killed when riding on a train of the company that employed him, the car that he occupied being wrecked and set on fire. His widow brought action at common law against the company on behalf of herself and infant child. She alleged that the accident was due to the negligence of the company in loading a car in such a way that it could not pass under a bridge. A slab of concrete and stone on the car had struck the coping of the bridge, wrecking the car and causing the fire from which her husband lost his life. This negligence was in violation of an order of the Board of Railway Commissioners which required the defendant company in loading its cars to be governed by clearance limits. Three days after the widow had commenced action, she received notice from the company that under the Workmen's Compensation Act, 1916, of Manitoba, an application would be made to the Workmen's Compensation Board for a determination as to the plaintiff's right to compensation under the Act, and as to whether the right of

**Dominion Railway Act superior to provincial compensation acts when clauses conflict**

action which the plaintiff had taken was one that was taken away by the Act. The plaintiff then sought for an injunction in the Court of King's Bench, restraining the defendant from making this application to the Workmen's Compensation Board. A temporary injunction was granted, and later on a motion was made by the plaintiff to continue the injunction. It was held by the Court that the object of the Workmen's Compensation Act was doubtless to afford prompt financial aid to injured workmen to a limited amount. There seemed to be no special reason why a workman should not be at liberty to secure his legal rights apart from the Act, unless such rights were wholly taken away. It was argued on behalf of the plaintiff that although sections 11 and 13 of the Act purported to take away any right to compensation apart from the Act, she was not asserting a right to compensation but to damages, and that this right had not been taken away by the Act. It was pointed out, however, by the Court that the working of Section 13 was very strong, and it appeared that the Legislature in this section intended to take away all rights of action other than the right to compensation under the Act.

The second branch of the plaintiff's claim depended upon Section 385 of the Railway Act, 1919, which reads as follows: "Any company which, or any person who, being a director or officer thereof, or a receiver, trustee, lessee, agent, or otherwise acting for or employed by such company, does causes or permits to be done, any matter, act or thing contrary to the provisions of this or the Special Act, or to the orders, regulations or directions of the Governor in Council, or of the Minister, or of the Board, made under this Act. . . shall be liable to any person injured by any such act or omission for the full amount of damages sustained thereby, and such damages shall not be subject to any special limitation except as expressly provided for by this or any other Act."

It was the opinion of the Court that this provision of the Dominion Railway Act could not be overridden by any Act of the local legislature, and that the plaintiff was therefore entitled to assert her rights by action.

Accordingly, an order was granted, making an injunction to restrain the defendant company from applying to the Board. The plaintiff was also declared entitled to costs as against the defendant. (*Manitoba—McCull vs. Canadian Pacific Railway.*)

On March 23, The Canmore Coal Company at Canmore, B.C., locked out its employees who had refused to sign the check-off of the United Mine Workers of America. Information was laid against the General Manager of the Company by one of the men who had been employed in the mines on a charge of a violation of the Industrial Disputes Investigation Act in locking out the miners without having first made application for a board of conciliation under the Act. The case came up in the police court at Calgary on April 7. On behalf of the defence it was claimed that the action taken by the Company was in obedience to Order No. 141

of the Director of Coal Operations, and that the Director had the right under order in council to issue this order, if in his opinion such action would help in the coal situation and clear up any disputes which had curtailed the production. The mine manager admitted that he had not taken any steps to secure a board of conciliation, not deeming it necessary, as there was no dispute between the operators and the men, and it was simply a matter of following out the orders of the director. On April 19, the magistrate delivered a written decision dismissing the case. He declared his opinion that the management of the mines were liable to prosecution if they refused to comply with the orders of the director of coal operations, and the action which they took in refusing work to the men was only in pursuance of their obligations as coal operators under the control of government officials. (*Alberta—Rex vs. Canmore Coal Company, Limited.*)

On April 3, 1919, two men were hired for the season to work on a farm in Saskatchewan at \$80 a month for eight months. When hiring is at a monthly rate, wages are due at the end of each month Up to July 8, however, one of them had only been paid \$41.90, and the other \$33.80. When they asked for \$100 and \$150 respectively, their employer offered them only \$25 each. This offer not being satisfactory, they quit work on July 14, and brought action against their employer for wages. The latter then brought a counterclaim against them for breach of contract. He claimed that after they had arrived at his place he told them they should get whatever they needed for spending money but the biggest part of their pay would be due at the end of the season, and claimed further that the men were satisfied with this arrangement. The plaintiffs denied that this conversation had taken place. The action of both the plaintiffs was dismissed by the district court judge, and judgment for \$30 was given in favour of the defendant.

The case was appealed by the plain-

tiffs, and the Court of Appeal held that the trial judge was in error, and that as the hiring was \$80 a month for eight months, they were entitled to wages earned up to July 3, the end of the third month of service. As to whether they were entitled to wages between July 3 and the day they left, that depended upon whether or not they were justified in leaving their employment. The plaintiffs gave evidence, which was not denied, that on July 14 the employer said that he had brought a man to take the place of one of them and that the other

could stay by the day, but not by the month, and he refused to pay them \$80 a month for wages due, only offering \$70. The Court held that this showed a clear intention on the part of the employer defendant to be no longer bound by his contract, and the men were therefore justified in considering the contract at an end, and were entitled to be paid for all the time they worked. Judgment was accordingly given in favour of the plaintiffs, together with the costs of action. (*Saskatchewan—Abramoff vs. Podratz; Feodoroff vs. Podratz.*)

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. AGLAND.

Volume 20

JUNE, 1920

Number 6

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

The fortieth annual convention of the American Federation of Labour convened in Montreal on June 7. A full summary of the proceedings will appear in the next issue.

The cost of the weekly family budget of staple foods averaged \$16.65 at the middle of May as compared with \$15.99 in April, and \$7.42 in May, 1914. The index number of wholesale prices reached 356.6 for May as compared with 353.1 for April, 284.1 for May, 1919, and 136.3 for May, 1914.

At the beginning of May the percentage of unemployment among members of trade unions was 2.83, as compared with 3.44 at the beginning of April.

According to returns received from nearly 4,900 firms, the increase in employment reported for the latter half of April was continued during May. This was largely accounted for by increased activity in building and in railway construction.

The time loss during May due to industrial disputes was greater than during April, 1920, but much less than during May, 1919. There were in existence during the month 73 strikes, involving about 12,005 workpeople, and resulting in a time loss of 145,168 working days. At the end of the month there were on record 27 strikes involving about 4,502 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During May the Department received reports from seven Boards established to deal with disputes between (1) the Ottawa Gas Company and certain of its employees, being gas workers, members of Federal Union No. 16517; (2) the Ottawa Electric Railway Company and certain of its employees, members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America; (3) the Ottawa Branch of the Association of Canadian Building and Construction Industries and certain of their employees, being carpenters, electrical workers, painters and roofers; (4) the Dominion Power and Transmission Company, Hamilton, and certain of its employees, being linemen, operators, motormen, maintenance men, armature winders, pitmen and air brake workers, members of Local Union No. 105, International Brotherhood of Electrical Workers; (5) the Dominion Power and Transmission Company, Hamilton, and certain of its employees, being shop and yard men, members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America; (6) the Hamilton Street Railway Company and its motormen and conductors, being members of Local Division No. 107, Amalgamated Association of Street and

Eléctric Railway Employees of America; and (7) the London Railway Commission and certain employees of the London and Port Stanley Railway, being members of Division No. 745, Amalgamated Association of Street and Electric Railway Employees of America.

Thirteen applications were received for the establishment of Boards and further appointments were made in connection with applications which had been received during the previous month.

**Proposed National Research Bureau** The Select Parliamentary Committee appointed a year ago to investigate the question of scientific industrial research has recommended that a National Research Institute be established in the vicinity of Ottawa and that \$500,000 be appropriated for the site and the first building, \$100,000 for the scientific equipment of the Institute, and \$50,000 for salaries and maintenance during the first year of operation. The functions of the Institute would be the standardization of measures throughout the country and of the quality of materials required for public works and the public service; the direction and supervision of researches into technical processes and methods to promote the scientific development of the natural resources of Canada; and the discovery of new resources and industries. These recommendations were unanimously commended to the consideration of the Government by the House of Commons on the motion of Mr. Cronyn, chairman of the Committee.

**Labour conditions on Canadian Railways** In his annual statement in the House of Commons, on March 30, the Honourable J. D. Reid, Minister of Railways and Canals, stated that the position of the 55,000 employees of the Canadian National Railways had improved materially during the year 1919. "They worked on the average a shorter day," he said, "and capital expenditures for the year included large items for the

improvement of their housing and working conditions. In 1914 the average wage per year of railway employees of Canada was \$700; in 1919 on the national system it was \$1,447. The relations between the management and the employees have been very satisfactory. Since the Canadian Railway Board of Adjustment No. 1 was established in September, 1918, Canadian railways have been remarkably free from serious labour trouble, and although the national system then comprised 35 per cent of the mileage in Canada the grievances arising therefrom amounted to only about 16 per cent of the cases before the board. It is hoped that this board, which is comprised of six representatives of the large railway labour brotherhoods and six railway officers, will be maintained, so that differences of opinion may continue to be settled by round table conference rather than by more expensive, uneconomic and inconvenient methods."

**Joint Industrial Councils in the Building Trades in Canada** On April 8, a Joint Industrial Council of the Building Trades was formed in London, Ontario, similar to that formed in Toronto in March, 1919, a full description of which appeared in the April, 1919, issue of the LABOUR GAZETTE. The Toronto constitution was adopted, with the exception of Clause 3, which was changed to read as follows: "The Council shall consist of ten members, with power to add to their numbers. Representation shall be as follows: five members from Builders' Exchange and five members from Building Trades Council." The Council holds its regular meetings in the Builders' Exchange room on the first Friday of each month, and special meetings when necessary.

A joint meeting of representatives of the International Unions of the Building Trades, members of the Standing Labour Committee of the Association of Canadian Building and Construction Industries and representatives from special branches of the building indus-

try was held at Hamilton, Ontario, on May 26. With a view of eliminating losses through industrial disputes, resolutions were unanimously carried recommending the establishment of a National Joint Conference Board composed of five representatives of the Association of Canadian Building and Construction Industries and five representatives of the Building Trades international unions. It was resolved to ask the Dominion government to appoint an independent chairman and convenor. The objects of the proposed national joint conference board would be to encourage the organization of both employers and employees into the groups represented by the National Joint Conference board and the establishment of joint industrial councils in the larger centres. Affiliated organizations and established industrial councils would be encouraged to refer for settlement to the National Joint Conference Board such disputes as they were unable to adjust before a strike or lockout occurred. The Board would undertake to present to the government on behalf of the building and construction industries such measures as might be requested by both parties to the Board. The Board would also advise with affiliated organizations on measures for the improvement of the building and construction industries such as technical education, the apprenticeship system, the movement of labour, etc.

**Joint Industrial Councils in Great Britain**

The first annual report of the Joint Industrial Council for the Wool and Allied Textile Industry of Great Britain shows that the 48-hour week was adopted in March, 1919, and that details had been settled with respect to its application in the several districts and branches of the industry. A scheme of renewing apprenticeships and for absorbing discharged service men was arranged, and wages were standardized on basic rates to August, 1920, with a system of advances in accordance with changes in the cost of living. Nineteen prospective labour disputes were noti-

fied to the Council, of which five were referred to arbitration, eleven were settled, and three were outstanding. The report concludes: "This record of what has been done in a short time is in the view of the Council a vindication of the policy of establishing industrial councils."

The National Federation of General Workers met in conference in London recently to discuss in camera the methods employed in obtaining wage decisions by means of Whitley Councils. At the conclusion of the conference the president, Mr. J. R. Clynes, M.P., stated that the discussion showed that the representatives were on the whole favourable to the continuance of the joint industrial councils, and that complaints were limited to a few particular councils, dealing with certain trades.

A report of the United States Department of Labour on "Joint Industrial Councils in Great Britain," issued in July last, contains a number of informative reports dealing with individual works committees that have been established in some of the larger industrial and engineering establishments in Great Britain. A section of the report deals with the relations between works committees and trade union organizations. Other United States' official reports on Works Committees were reviewed in the LABOUR GAZETTE, September, 1919, pages 1067-9.

**Societies for rendering public aid during strikes**

A civic aid society has been formed in Denmark, the object of which is to place labour, materials, etc., at the disposal of the authorities in the event of industrial disputes, lockouts, and strikes involving the cessation of activities which are essential to the community. It aims at neutrality in all disputes, intending merely to act in emergency so as to lessen the evils suffered by large sections of the population not directly concerned in the stoppage of work. It is non-political and its members are from all ranks of society. There are two classes of members, one com-

prising those who are prepared to work under the orders of the society who may only be employed as long as the authorities require them, and the other subscribes to the funds of the society.

A similar organization, called the "Union Civique," has been formed in France for the purpose of assuring the continuance of the public services during strikes in which the general interest is disregarded by those immediately interested. In Belgium, Italy, and parts of Germany, voluntary measures of a similar kind are also reported.

**Building guild movement in England** The building trades guild movement in England, an account of which appeared in the April issue of the LABOUR GAZETTE, has largely extended its activities. According to the *London Times*, by the end of April, branches of the Building Guild had been formed in more than twenty towns, in twelve of which definite building schemes were under consideration. These provide for the erection of 15,000 houses, at a total estimated cost of about £12,000,000. In order to make it a legal entity, capable of entering into binding contracts, the guild has been registered under the "no profits" clause of the Joint Stock Companies Act, and there has been appointed a board of directors, representative of the trade unions composing the guild. The company's 15 or 20 shares will all be held by the directors, under a provision that when a director retires, either voluntarily or by the decision of his union, his share must be transferred to his successor. If not so transferred the board is empowered to cancel the share and issue another.

**Grants for private building in Great Britain** The issue of *Housing*, for April 12 (published by the Housing Department of the British Ministry of Health), describes the provisions of the Housing (Additional Powers) Act, 1919, under which government grants varying in amount from £130 to £160 are made to

private persons who prefer to build their own homes rather than participate in the housing scheme of a local authority. A grant will not be paid until the house is completed, and the date of completion must be before December 23, next. Applicants must obtain from the local authority a certificate first approving the plans and estimated cost of the proposed building and, later, approving the construction and workmanship. A certificate must also be obtained from a building society, insurance company, or bank, that they will advance the additional capital required. On presentation of these two certificates to the Ministry of Health, the grant will be paid to the applicant direct.

**Medical care of smeltermen at Trail, B.C.** The Consolidated Mining and Smelting Company of Canada have entered into an agreement with three physicians of Trail, B.C., subject to the approval of the British Columbia Workmen's Compensation Board, providing for the medical treatment and care of their employees in the Tadanac Reduction Works, and their families. The Company agrees to deduct 65 cents each half month from the wages of every employee who has worked more than three and a half shifts in that period, and to pay this money to the doctors. In return the doctors agree to give the workmen at all times proper medical and surgical treatment, and to provide them with all necessary medical and surgical supplies and medicines, and if deemed necessary by the Workmen's Compensation Board, they are to provide, equip and maintain a hospital for the benefit of the workmen, and to pay for the transportation of sick or injured workmen to the hospital, and for treatment by specialists when required, including dental work rendered necessary from accidents. Infectious and contagious diseases do not come under the agreement, and for surgical operations of choice, or to remedy conditions present when the workman entered the employ of the Company, the doctors may charge a fee at half the

current rate. In the case of married men an additional amount of fifty cents per half month will be deducted from their wages and paid to the doctors, which will entitle members of their families to similar terms for medical and surgical treatment. The agreement was submitted to the employees for ratification and the ballot showed a large majority in favour of it, both among the unmarried and married men.

#### **Reform of Employment Bureaus in Germany**

A bill is being drafted in the German Ministry of Labour with respect to the regulation of employment bureaus. The local labour bureaus established by municipalities and districts are to be the media for registering labour requirements. Existing registries for special interests will be attached to the public labour bureaus, which will be formed into larger bureau unions. At the head of all these unions will be a National Unemployment Office, subordinate to the Ministry of Labour. This office will endeavour, in conjunction with the provincial central authorities, to find when labour is needed at any particular time. Emergency relief labour schemes will gradually be abolished. The right of abolishing private employment agencies is conceded in the bill to the public labour offices in the various districts after they have investigated all the circumstances. The existing local communal bureaus will, with the passing of the bill, come under the control of the State, and the Communes will be relieved of all financial burdens.

#### **Teachers' unions in affiliation with labour.**

Public school teachers in the United States and Canada are among the latest workers to organize internationally in affiliation with the American Federation of Labour. The movement began in Chicago eighteen or nineteen years ago, with the formation of the Chicago Teachers' Federation, composed mostly of women teachers from the public schools. Several years later two other teachers'

organizations, composed mostly of men and women high school teachers, were formed in Chicago, while various other similar organizations were established throughout the country, all of which received charters from the American Federation of Labour. In 1916 eight of these remained in existence, and at a meeting representative of these various bodies in Chicago, there was formed the American Federation of Teachers, which became affiliated with the American Federation of Labour. Although organized as a national union, the American Federation of Teachers is international in character, though, until recently, no effort has been made to develop its work in Canada. Last year, however, a local was formed at Montreal, Que., and several other Canadian groups of teachers are said to be contemplating taking similar steps.

#### **Proposed Alien Assimilation Board in United States**

The serious labour shortage resulting in the United States from the return of foreign-born residents in large numbers to their own countries, and also from the present negligible rate of immigration, was noted in the February issue of the LABOUR GAZETTE, page 110. The reason for the apparent distaste on the part of foreigners for American life were discussed at the first National Conference on Immigration held in April under the auspices of the Inter-Racial Council. At the conference some five hundred delegates attended, including representatives of thirty racial groups, together with national leaders in industry, finance, agriculture, labour and education. The actual labour shortage was estimated by the Council at five million persons, this estimate being based apparently on a comparison of the actual migration figures with the hypothetical growth in population at the pre-war rate of immigration. Governmental authorities were said to regard this estimate as somewhat exaggerated; but it was admitted that the shortage was sufficient to suggest the necessity for careful revision of existing

immigration laws, and full consideration of the new policies underlying some 200 bills pending in Washington, which, if passed, would further reduce the volume of immigration. For the recent exodus of aliens blame was given to indiscriminate denunciation of the foreign born, mainly on "patriotic" grounds, and also to the opposition of native-born Labour to the foreigner, as shown by the spirit of the bill recently put forward by the American Federation of Labour to bar all immigration for the next two years. The Conference adopted a resolution urging the abolition of the literary test, as being "not only without merit, but as a direct injury to the interests of commerce, industry and agriculture." It has been suggested that the Conference passed this resolution mainly for the purpose of counteracting to some extent the additional restrictive policies now being urged in many quarters. The Conference further proposed the creation of a Federal Board of Assimilation "charged with the duty of co-ordinating all existing governmental activities relating to immigration, of facilitating the safe and expeditious distribution of immigrants arriving here to their several destinations, of supplying them with information and assistance in respect to the securing of employment in those industries for which they are best adapted, of affording them instruction in the English language and in the history, customs and institutions of our country, of protecting them against fraud, extortion and exploitation, of making them feel that they are not strangers in a strange land, and of providing for co-operation by the several branches of the federal, state and municipal governments, and by appropriate civic agencies for inducting them into the life of the nation."

**International Co-operative Alliance** The first post-war meeting of the Central Committee of the International Co-operative Alliance was held at Geneva, Switzerland, on April 12-14. There were present representatives of co-operative

societies of fifteen countries comprising Great Britain, Holland, France, Belgium, Switzerland, Russia, Italy, Norway, Austria, Hungary, Finland, Sweden, Czecho-Slovakia, Georgia and Armenia. The delegates from Denmark and Germany were not present. Lithuania and Poland had also been admitted to the alliance, but no representatives had been appointed from these countries. Sir William Maxwell, K.B.E., president of the International Alliance, presided. The meeting was addressed by Mr. E. F. Wise, C.B., representative of the British government on the Supreme Economic Council, who spoke on the present economic state of Europe and suggested means by which the International Co-operative Alliance might help in the solution of the problems for the restoration of international trade. He pointed to the state of the international money exchange as evidence of the disorganization of international finance and trade. He declared that the most important factor was the breakdown in the exchange of goods between country and country, the machinery necessary for rebuilding devastated areas having ceased to work. He said, "There are three countries in which trade must take place on the basis of barter. By that means production can be got going, and thus put the nations in the position to again become self-supporting. There is great hope of the re-opening of trade with Russia; and I know representatives of Russians in London have already appealed to their colleagues in the co-operative movement in all other countries to come to give all assistance, material and moral. . . . The only organization by which trade can possibly be done by barter is the co-operative organization." The speaker laid particular stress on the fact that the only system by which trade could be possibly carried on under present circumstances was by the system of barter organized on an European scale, and for that the international co-operative movement was better equipped than any other trade organization. One of the difficulties, he said, of the present international situa-

tion was the disorganization caused by speculation in profits, whereas in co-operative organizations no such difficulty could arise.

Last August a special sub-committee had been appointed to consider the formation of an international wholesale society, and a meeting of representatives of co-operative wholesale societies present was held to consider its report. The memorandum of suggestions made by the sub-committee was adopted. These suggestions were as follows: "(1) That, as a preliminary towards the realization of an International Wholesale Society, the first step should be the concentration of all co-operative effort in each country, so as to form one body with which the Co-operative Wholesale Societies in other countries may communicate and arrange direct business. (2) That each Co-operative Wholesale Society be invited to form an expert department in order that, by specialization, they would become conversant with the requirements of co-operators in other countries through enquiries made, and, therefore, in due course would be able to anticipate their desires by sending patterns, samples and prices of what surplus productions they had to offer, or could obtain and ship to advantage. (3) That invitations be extended to the Co-operative Wholesale Societies to associate themselves with this scheme, and to supply any information which may be mutually beneficial. (4) That where experience indicates that an article could be jointly purchased with advantage, arrangements shall be made by the committee to focus orders through one buyer. (5) That a central bureau be organized for the collection of statistics and the circulation of information and details, which would assist in developing and carrying out these arrangements; and that we suggest it be established under the C.W.S. in Manchester."

The special sub-committee was re-appointed until the next meeting of the Central Committee. It was decided to hold an international congress at Basle, Switzerland, in August, 1921. In the meantime regular meetings of the Cen-

tral Committee will be held every six months, the next one to take place at the Hague in October.

#### **Jottings**

The organization formerly known as the Employment Managers' Association, the formation of which was mentioned in the January issue of the LABOUR GAZETTE, has recently changed its name to "The Industrial Relations Association of Toronto." It was felt that the former name did not adequately convey the purposes of the organization.

The coal operators of Alberta and eastern British Columbia have recently formed what is known as "The Western Canada Coal Operators' Association." This association is an amalgamation of the Western Coal Operators' Association, the Red Deer Valley Coal Operators' Association, and a number of operators who did not belong to either organization.

The Manitoba Government is taking active steps in the prevention of factory accidents. A room has been fitted up in the parliament buildings in which classes in accident prevention and care of the injured are being conducted by the St. John's Ambulance Corps. At present the inspectors and staff of the Bureau of Labour are taking the lessons, but these classes will be continued until representatives from every large factory or warehouse in the province have come under such instruction.

The East Kootenay Mine Safety Association was recently formed at Fernie, B.C., to promote safety in mines by active and regular education in safety work.

Following a recent conference in Calgary between the Workmen's Compensation Board of Alberta and representative employers and workers in the province, the Compensation Board is making every effort to secure the establishment of safety committees in all factories and plants in Alberta where more than 50 men are employed. It is an-

nounced that a safety officer will be appointed by the Board.

One hundred and seventeen awards were recently presented to employees of the Grand Trunk Railway, at Montreal, who had successfully passed their First Aid examinations. At Kingston, 28 employees of the Canadian Pacific Railway were successful in passing these examinations. Instruction in both cases was given according to the St. John's Ambulance Association methods.

On April 19, the United States House of Representatives passed a bill providing for the creation of a Women's Bureau in the Department of Labour.

It is announced that the Factory Department of the British Home Office will shortly open a museum of safety and health appliances in London. The exhibits will demonstrate the best methods of insuring safety in the working of various types of machinery, methods of ventilation, etc.

On December 31, 1919, there were 912 persons on the Canadian Pacific Railway pension list, of whom 456 were over 70 years of age; 420 between 60 and 70, and 36 under 60. Pension allowances for the year totalled \$387,434.

The Council of Manchester University, England, have decided that for every donation of £5,000 to the University Fund a free studentship should be thrown open to the town or organization subscribing. A trade union assisting the fund to this extent would, therefore, have a studentship in its name for competition among the sons and daughters of its members.

Two royal decrees have recently been issued in Spain, one creating a ministry of labour, the other providing for the establishment of a commission composed of employers and workers for the hearing of future labour disputes.

The present membership of German trade unions, not including organized workers belonging to the Catholic Trade Unions, is stated to be 7,500,000 members as compared with 2,500,000 in 1914, and 1,000,000 when the armistice was signed in 1918. The three strongest unions are the metal workers', the agricultural workers' and the factory workers' unions.

A federation of thirty-six associations of professional men and administrative workers has been formed in England under the name of the National Federation of Professional, Technical, Administrative and Supervisory Workers. Among the societies concerned are the National Union of Journalists, the Actors' Association, and the National Federation of Law Clerks. The federated societies consist only of those whose members work for private employers.

A campaign to abolish the "chain gang" and "reprehensible contract system" in prisons is now being waged throughout the United States by the Committee on Prisons and Prison Labour. It is being urged that prisons be industrialized and that prisoners be placed in useful occupations turning out marketable products, and that the Federal market be thrown open to prison-made goods. Wage scales would be fixed by union wage standards prevailing in the vicinity of prisons. It is reported that the American Federation of Labour has endorsed the project.

## INDUSTRIAL CONDITIONS DURING MAY, 1920

## I.—General Review

The increase recorded during April in the total volume of employment in Canada was continued in May, activity in building and railway construction being again a large contributing factor. Gains were steadily maintained in Ontario, Quebec, and the Prairie provinces; the Maritime provinces noted fluctuations, while British Columbia registered a slight average decline.

The metals, machinery and conveyances group was still affected considerably by a shortage of material resulting from the disorganization of traffic by the American switchmen's strike, but a recovery was apparent in Ontario in the second week; a decline in British Columbia was attributed to the completion of work in the iron-shipbuilding yards. In the food group increases were recorded in the staffs of abattoirs and meat packing plants and dairies, but sugar refineries showed less activity owing to shortage of raw material. Employment in the textile and clothing industries continued the usual seasonal decline, with local variations due to special causes. General activity was maintained in the pulp and paper mills, and in the wood-working trades. As usual at this season, leather workers were somewhat less active. A decline in the clay, glass and stone group at the beginning of the month was followed by a gain, while in the paint, oil, chemical and explosives factories conditions remained stationary. Railway and water transportation began the month with a slight decline, but showed average gains after the first week in the railway section. Activity in mining (other than coal) was well maintained throughout the month, but coal mining registered a slight fall, due partly to unforeseen causes, recovery being

anticipated. Railway construction continued to make marked and steady gains in every province. Logging operations declined as the river driving was completed, but the sawmills made corresponding gains in the numbers employed.

The loss of time on account of industrial disputes during May was greater than during April, 1920, but much less than during May, 1919.

There were in existence at some time or other during the month 73 strikes, involving about 12,005 workpeople, and resulting in a time loss of 145,168 working days, as compared with 44 strikes, 6,249 workpeople and 84,099 working days in April, 1920; and 96 strikes, 74,252 workpeople and 849,676 working days in May, 1919. On May 1 there were on record 20 strikes, affecting 7,311 workpeople. Fifty-three strikes were reported as having commenced during May, as compared with 28 in April. Eleven of the strikes commencing prior to May and thirty-five of those commencing during May were reported terminated, leaving 27 strikes, involving about 4,502 workpeople, on record at the end of the month.

In prices the general movement continued upward, increases in grain, fodder, livestock, fuel, building materials, and furnishings slightly more than offsetting decreases in eggs, milk, hides, textiles, and in raw furs. There were decreases in some metals and metal products, but there were increases in others. The Departmental index number of wholesale prices rose to 356.6 for May as compared with 353.1 for April, 284.1 in May, 1919, and 136.3 in May, 1914. In retail prices the average

cost of a family budget of staple foods in sixty cities was higher, rising to \$16.65 at the middle of May as compared with \$15.99 at the middle of April, and \$7.42 in May, 1914. The chief increase was in potatoes, which averaged \$6.15 per bag as compared with \$4.78 in April. Sugar also advanced substan-

tially, averaging 21.7 cents per pound for granulated as compared with 19.5 cents in April. There were slight increases in some meats and in several of the other lines, with decreases in eggs and milk. Coal and coal oil were also upward, and rent averaged considerably higher.

## II.—Industries and Trades.

Increased activity was shown in the SYDNEY district during May; the output of the Dominion steel plant was as follows: pig iron, 24,400 tons; ingots, 27,500; blooms and billets, 18,700; rods, 9,300; plates, 3,484; light rails, 700; wire, 1,100; nails, 860; three blast furnaces were in operation; all departments were working with the exception of the rail mill; upwards of 4,000 men were employed; stove, furnace and metal roofing plants continued active. The output of the steel plant at SYDNEY MINES was 7,500 tons of iron and 10,000 tons of steel; all metallurgical plants operated to capacity, with labour conditions normal. WESTVILLE reported the Nova Scotia Steel plants running steady double shifts during the month with all the mills busy; farm implement and tractor factories had plenty of work; sheet metal plants were fairly active and the electrical trades were normal. Some shortage of skilled labour was noted at HALIFAX in the bolt, nut and skate departments, and production was somewhat hampered by delayed material from the United States; conditions were fairly steady in the stationary engine, boiler and stove and furnace plants, but the smaller firms were delayed by difficulty in obtaining plate. At CHARLOTTETOWN employment was good in foundries and machine shops. The rolling mill at St. JOHN which re-opened in April continued running steadily with good prospects; tin and sheet metal workers were well employed. At MONCTON about 120 men were thrown temporarily out of work by a disastrous fire

which partly destroyed a large foundry. Machine shops were in active operation. Foundries and machine shops at FREDERICTON were very busy. MONTREAL reported busy conditions in the structural steel, engine, farm implement and tractor factories; electrical workers were busy; and sheet metal plants fairly active; moulders and iron workers, however, were on strike. At QUEBEC structural steel and stationary engine workers had a very busy month; metal roofing and sheet metal plants were active, but stove and furnace factories were quiet. Continued activity was reported at SHEERBROOKE and St. HYACINTHE in the machine shops and foundries, the structural steel workers at the former place being very busy. At THREE RIVERS the foundries took on additional help, one plant employing over 500 hands. Active conditions continued at St. JOHN'S and IBERVILLE and an improvement was noted at SOREL. At OTTAWA and HULL the foundries continued to give steady employment, being active on old orders, but the volume of new business offering showed signs of slackening. The metal and machinery industries at TORONTO were greatly handicapped by the shortage of steel and coal, receipts of which were very light; many plants laid off men or were working on short time and a number of machinists were temporarily out of employment; recent arrivals from Great Britain included many belonging to the metal trades; farm implement plants were active; construction at a large steel plant was suspended owing to failure to secure a contract from the Provincial Hydro-

Electric Commission guaranteeing 20,000 h.p. required for its operation. The site, it was said, may be abandoned. HAMILTON reported continued activity throughout the metal and machinery group, though some unemployment was caused through a strike of operating engineers. At NIAGARA FALLS the metal working trades continued active with a demand for machinists and other skilled workmen for the chain, metal can and other factories. Fair conditions were reported from BROCKVILLE in the stove and furnace, sheet metal and tool and hardware factories. At BELLEVILLE busy conditions were noted in general foundries, engine and machine and farm implement factories. At BRANTFORD marked activity was noted in machine shops, overtime being worked in the milling machinery plants; stove and radiator workers were busy, also electrical appliances and farm implement makers. PETERBOROUGH reported foundries hampered by coke shortage due to the strike in the United States and also by a strike at the local power-house, many workers leaving town; machine shops were active. At GALT moulders and machinists were in demand; very active conditions were reported in pig iron and rolling mills, also in the architectural iron and steel, machinery, tools and cutlery trades; pig iron and steel furnaces and converters were active, and electrical and sheet metal workers were well employed. BRANTFORD reported a demand for men, both skilled and unskilled. At CHATHAM additional help was taken on in the structural steel industry; sheet metal and electrical trades were very busy. KITCHENER reported a shortage of moulders and machinists, also of clock workers; sheet metal and tin-smiths, farm implement, tractor and electrical fixture workers were all very busy. Activity continued at GUELPH in the metal and machinery group, with a demand for labourers in the moulding shops; stove and furnace workers were very active. Similar active conditions prevailed at STRATFORD in the machinery, metal and electrical appliance factories. WOODSTOCK reported a constant

demand for moulders, stove and furnace makers being very busy. Moulders were also in demand for the stove and furnace plants at LONDON; rolling mill workers were well employed, and threshing machine factories were also very busy on orders for the west; tin and enamel plants were hampered by shortage of material. ST. THOMAS reported the foundries as normally active. At WINDSOR structural steel workers were very busy, some plants working day and night shifts; die-makers and expert machinists were in great demand in the machinery industry; stove plants were rather slack; metal roofing workers were active. The stove and farm implement industries at ORILLIA were normally active, and there was an occasional demand for machinists and pattern makers. Men were laid off at SAULT STE. MARIE in some departments of the steel industry, and the iron workers on the steel plant extension were also thrown out of work on the cessation of the undertaking. Continued activity was noted at BRANDON throughout the group. The rolling mill at MEDICINE HAT still continued closed, but the REDCLIFFE mill was fairly active; machine shops and foundry workers were fairly well employed. LETHBRIDGE, CALGARY and EDMONTON reported conditions fairly good throughout the group. VANCOUVER reported fair activity in the rolling mills; structural iron and steel trades were rather slack, but more work was expected; stove and furnace work was slack and electrical apparatus and fixtures, metal roofing and sheet metal plants were not very busy. VICTORIA reported the iron foundries somewhat quiet with reduced staffs working; stove foundries were fairly active.

Boat and ship building and repairing were very active at SYDNEY during May.

Vehicles (land and water) At WESTVILLE the car factory took on all available extra help, skilled and unskilled, in order to cope with new orders; engine, boiler and automobile shops and boat and shipbuilding plants were very ac-

tive. The shipyard at TRENTON worked steadily, another steamer being on the ways. At HALIFAX portable engine and boiler shops were fairly active; shipyards were brisk, especially in repairs, but no new orders were being received. MONCTON reported very active conditions in the locomotive and car repair shops of the Canadian National Railways, many additional workers of different grades being taken on to cope with heavy orders for repairs and re-modelling. MONTREAL reported busy conditions in the shipbuilding yards and in the engine and boiler shops and automobile factories. At QUEBEC the shipbuilding and repairing yards and engine shops had a very busy month. At the shipbuilding yards at THREE RIVERS work was interrupted by wage disputes, but was resumed before the end of the month. The Government shipyards at SOREL were rather slack, a number of hands being laid off; other yards were fairly active. At OTTAWA and HULL normal activity was still shown in car construction. The automobile and tractor industries at TORONTO were much affected by the shortage of material. HAMILTON reported activity in locomotive and car shops and in carriage, cycle and motor factories. More help was required for the automobile accessories plant at NIAGARA FALLS. BRANTFORD reported great activity in the engine shops; wagon and carriage factories were also very busy. At BROCKVILLE motor boat and automobile factories were fairly active. The locomotive shops at KINGSTON were fairly active, though material was somewhat scarce, shipyard workers were well employed, with improvement likely in the next two weeks. At BELLEVILLE engine and boiler shops and automobile parts factories were busy. GALT reported much activity in engine and boiler shops; cycle and motor engine workers were also well employed. Automobile plants at CHATHAM were very busy, running part overtime. KITCHENER reported a shortage of help in the bicycle factory. At WOODSTOCK the wagon factories continued very busy, with some demand

for skilled men. The Ford motor factory at LONDON worked at full capacity assembling cars, and an extension of plant was projected. The automobile industry at WINDSOR was tied up in some departments by shortage of material, some men being laid off; these, however, were taken on by other firms; foundries were busy on auto parts. Work at the shipyards at PORT ARTHUR and FORT WILLIAM was hampered by a strike of carpenters, joiners and moulders, supported by other trades. VANCOUVER reported fair activity in locomotive repair work; boat and ship building was not so good as in the previous month, a number of men being laid off, and work delayed by lack of steel; boat repairing was fairly active; automobile, cycle and motor engine workers were fairly busy. The iron shipyards at VICTORIA were moderately active, some men being laid off.

Steady activity continued in the food group throughout May at SYDNEY and

WESTVILLE. At HALIFAX employment was reported unusually good.

Meat workers at CHARLOTTETOWN were quiet, but other departments were fairly busy. St. JOHN reported brisk conditions throughout the group. Increased employment was noted at MONCTON in the confectionery trades, food workers being generally busy. Activity was also reported from FREDERICTON and BATHURST. MONTREAL reported steady activity in flour and feed plants; bakers and confectioners and cigar makers were normally active; soft drink and brewery workers were well employed. At QUEBEC the meat packing houses had a quiet month; bakers and confectioners were busy and creamery workers were active; tobacco factories and breweries also gave steady employment. Conditions at SHERBROOKE, St. HYACINTHE and THREE RIVERS were reported as generally busy, particularly in the soft drink and brewery departments. Activity was also reported at St. JOHN'S, IBERVILLE and SOREL. OTTAWA and HULL reported increased activity in

dairies owing to reduced prices; abattoirs, bakeries and confectioneries were busy. At TORONTO the flour, feed and cereal plants were working steadily; abattoirs and meat packing houses were quiet, but showed improvement towards the end of the month; bakers and biscuit workers had steady employment; fruit and vegetable canners were preparing for a busy season; candy makers and confectioners were busy, with large export orders; creameries and dairies were active though business was somewhat retarded by backward weather; cigar makers were well employed; soft drink establishments and breweries were seasonably busy and tobacco workers were steadily active. Continued activity throughout the food group was reported from HAMILTON, NIAGARA FALLS, ST. CATHARINES, BRÖCKVILLE, KINGSTON and BELLEVILLE. Increased activity was reported at PETERBOROUGH in the butter and cheese factories, but the flour, feed and cereal mills were less active. At GALT active conditions continued to prevail. BRANTFORD reported female help in demand for fruit preserving; other departments of the group were steadily active, but the mills ceased milling flour and were producing chop. At KITCHENER also more female help was required for the biscuit and candy factories, and boys were in demand at the soft drink plants; the flour mills ran steadily; abattoirs were busy, and creameries and dairies had a good month; the local brewery quit making beer, but continued to produce ice. The WATERLOO brewery continued very busy. At GUELPH general activity prevailed except among brewery workers. Female help was in demand at STRATFORD and WOODSTOCK for the candy and confectionery trade. LONDON reported the flour mills, creameries and confectioneries working to capacity; but cigar-makers were very slack, a large number leaving the city. Normal activity continued in the flour mills at ST. THOMAS, and at CHATHAM the flour and feed mills, abattoirs and packing houses were taking on new men. At WINDSOR increased activity was noted among bakers

due to the access of residents in the border cities; but confectioners were less active on account, it was claimed, of the higher prices of products; creameries were exceptionally busy, though milk was rather scarce, one creamery enlarging its plant, breweries increased their staffs, and soft drink plants were very busy. WINNIPEG reported a quiet month in confectionery plants, one firm closing for two weeks for alterations; vegetable canners had satisfactory employment, but without any shortage of help. At BRANDON all departments were busy except brewery workers and cigar-makers, who were slack. REGINA reported conditions generally good. At MOOSE JAW the meat packing plant ran with reduced staff owing to shortage of hogs and cattle; creameries were more active owing to reduced prices of butter. The flour mills at MEDICINE HAT continued 16 hours per day; brewery workers were rather slack, but other departments of the food group were active. Brewery workers at LETHBRIDGE had a very busy month, working with full staff and some overtime; the flour mills re-opened during the month. At CALGARY the flour and feed plants were quiet and abattoirs and meat packing houses slack; soft drink and brewery workers were also rather slack, but bakers and confectioners were busy. EDMONTON reported increased employment in the confectionery trade. At FERNIE dairy workers were exceptionally active; and brewery and soft drink workers were very busy. VANCOUVER reported that the flour, feed and cereal plants were busy; the sugar refinery was not very busy, owing to shortage of sugar; abattoirs and meat packing workers were fairly active; bakers and confectioners were affected throughout the month by a strike of bakers; fair conditions prevailed in the creamery, confectionery and soft drink trades; tobacco workers were busy; fruit and vegetable canning had not yet begun. At VICTORIA the feed and cereal mills, bakeries and confectioneries operated steadily; cigar-makers were fairly active, and brewery workers were well employed; fruit and

vegetable canners commenced operations for the season.

During May activity in the rope and twine industry at HALIFAX fell off

**Textiles,  
cordage and  
carpets**

slightly from the maximum employment of the preceding month; the supply of tar and oil from the United States was somewhat slow, but prospects were good for summer. The cotton mills at St. JOHN gave steady employment, production showing a marked advance over the preceding year. The woollen mills, underwear and cap factories at MONCTON continued in steady operation. Cotton mill operatives at FREDERICTON had steady work. MONTREAL reported the woollen and knitting factories busy, with good prospects ahead; tent and sail makers were well employed, as usual at this season. At QUEBEC the cotton textile mills were very busy, working overtime; sail and awning makers and riggers had a busy month. SHERBROOKE reported busy conditions in the cotton, woollen, bleaching, dyeing, finishing and textile printing plants. At St. HYACINTHE, woollen, knitting, hosiery and underwear workers were well employed, some plants running day and night. Over 1,400 workers had regular employment at THREE RIVERS in the cotton mills. TORONTO reported a strong demand for help in the hosiery and knitted goods factories; tent and awning firms were active and the carpet factory worked to capacity. At HAMILTON active conditions continued to prevail throughout the textile group. Knitting operatives at NIAGARA FALLS were busy. At St. CATHARINES the silk, woollen and knitting factories were steadily active. Tent, awning and sail makers were active at BROCKVILLE. The textile mills at KINGSTON and the woollen and underwear and carpet factories at PETERBOROUGH were very active. A shortage of help was reported at GALT in the cotton, woollen and silk mills and in the bleaching and dyeing plants. Help was also required for the glove, hosiery and underwear plants at BRANTFORD, and un-

skilled male and female workers were in demand for the cordage factory. KITCHENER reported help wanted for the twine factory, and the felt factory was also rushed with work. Female help was in demand for the cotton and linen mills at GUELPH, for the hosiery and knitted goods factories, and for the carpet and worsted spinning mills. The woollen and knitting factories at STRATFORD were very busy, with good prospects. Help, especially female help, was in demand at WOODSTOCK for the textile and knitting factories, though a shortage of raw material in the knitting factories hampered operations. A similar shortage of help was reported from LONDON for the woollen and underwear factories. The knitting factory at St. THOMAS had a busy month. At CHATHAM the textile, woollens and knitting and bag factories ran full time. The tent and awning factory at WINDSOR re-opened with good prospects. WINNIPEG reported fair conditions in the bag factories without change in staffs; additional workers were taken on at the knitting and tent and awning plants. At VANCOUVER the knitted goods, tent, awning and sail factories had a busy month.

SYDNEY reported continued activity among steam laundry workers. Decreased public demand for clothing at HALIFAX affected the tailoring trade; laundries were very busy there and at WESTVILLE. At CHARLOTTETOWN tailors, garment workers, laundries, dyeing and cleaning establishments were exceptionally busy; boot and shoe workers were fairly well employed. St. JOHN reported improved conditions in the clothing trades; laundries and cleaning plants were unusually active. At MONCTON tailors were busy, and dress-makers, seamstresses and milliners were in strong demand; laundries were very busy. Female help was required for the tailor shops at FREDERICTON. MONTREAL reported activity in the ready-made clothing factories, and hat, cap and whitewear workers with plenty of em-

**Clothing,  
boots, shoes  
and laundering**

ployment; laundries were fairly active. At QUEBEC overtime work was the rule in the clothing trades. SHERBROOKE reported activity in the clothing, boot and shoe and laundry trades. At ST. HYACINTHE ready-made clothing and overall makers were very busy. The three glove factories at THREE RIVERS were very active with good prospects; laundries were very busy; boot and shoe workers were well employed. At SOREL clothing, shirt and boot and shoe makers were active. Makers of ready-made clothing at OTTAWA and HULL were busy to capacity. TORONTO reported a strong demand for operators on women's wear, but in the clothing industry a tendency to slacken was noted towards the end of the month when the spring rush ceased; overall, shirt, cap and glove factories and laundries continued busy, but furriers had a quiet month; boot and shoe workers were already busy on fall orders. Help was in demand at HAMILTON in ready-made clothing, shirt and collar, hat, cap, glove and fur, and women's white-wear trades, and in steam laundries. The corset and suspender factories were busy at NIAGARA FALLS and help was required for the shoe parts factory. Rubber footwear workers at ST. CATHARINES had a good month and laundries were very busy. Hat, glove and laundry workers were active at BROCKVILLE, but fur workers were less active. Clothing workers at KINGSTON were only fairly busy. The shirt industry at BELLEVILLE gave steady employment and a new factory was started for felt and other hats; dyers and cleaners were exceptionally busy owing to high clothing prices. At PETERBOROUGH women's whitewear and children's clothing and boot and shoe workers were well employed. A shortage of help was reported at GALT in the ready-made clothing and shirt and collar and boot and shoe factories. At BRANTFORD women's whitewear workers were very busy, and shirt and overall factories worked full handed; cleaning plants and laundries had a busy month. KITCHENER reported a shortage of female help in the shirt and collar factories and in the steam laundries; glove

factories worked full time and rubber footwear factories were very busy, an additional plant preparing to start operations. Activity was noted at GUELPH in the women's whitewear, hat and cap, and rubber footwear factories. At STRATFORD ready-made clothing and laundry workers, dressmakers and milliners had a busy month. LONDON reported great activity in men's and boy's ready-to-wear clothing factories; cap makers and steam laundry workers were also very busy. The shoe factories at ST. THOMAS had a busy month. A shortage of help was reported at WINDSOR, a bonus being offered to machine hands in the overall and shirt trades; more laundry workers also were required. Some shortage of help was noted at WINNIPEG for the shirt and glove factories; ready-to-wear and whitewear plants had a rather quiet month but staffs were unchanged; cap workers were well employed, and laundry workers and cleaners had a good month. The garment factory at EDMONTON kept about 275 workers in steady employment. At VANCOUVER the ready-made clothing trades were active in all lines of men's and women's wear; overall, shirt and women's whitewear factories were busy; boot and shoe factories and steam laundries were fairly active. VICTORIA reported increasing activity in the shirt and overall factories; laundries and cleaning establishments were normally busy.

The pulp mill at St. JOHN continued running steadily. At the BATHURST pulp mill an average decrease of between five and seven tons in the daily output of pulp was attributed to accidental difficulties of operation. The pulp and paper mills at SHERBROOKE continued very active; the local industry at THREE RIVERS was extended by a new pulp and paper mill and by the enlarging of existing plants. At SHAWINIGAN FALLS, LA TUQUE and CAP MAGDELEINE, staffs were increased during the month; steady conditions were maintained at SHERBROOKE, THREE

**Pulp, paper  
and fibre**

RIVERS, WINDSOR MILLS, CHICOUTIMI and KENOGAMI; while slight declines were recorded at USINES ST. LAURENT and EAST ANGUS. Pulp and paper workers at HULL were normally employed, but at Ottawa some reduction was reported. Felt and tarred paper makers at HAMILTON continued active. ST. CATHARINES reported steady employment in the production of pulp, and its products, paper, beaver board, etc. Increased employment was recorded during the month in the pulp and paper mills at IROQUOIS FALLS, STURGEON FALLS and SAULT STE. MARIE; slight declines were reported at ESPANOLA, HAWKESBURY and SMOOTH ROCK FALLS. VANCOUVER reported busy conditions in the pulp and paper mills at OCEAN FALLS, POWELL RIVER and other places along the coast. At VICTORIA the rubber roofing, felt and tarred paper plants were active, and a new factory was under construction.

The publishing and printing trades continued active during May at SYD-

**Printing,  
publishing  
and paper  
goods**

NEY and HALIFAX. Job printers at CHARLOTTETOWN were rather slack, but at ST. JOHN they were in demand, overtime being required to fill orders. At FREDERICTON printers and bookbinders had steady employment. At MONTREAL employment continued good in the printing, bookbinding and lithographing trades. QUEBEC also reported activity throughout the group, including paper box and bag factory workers. Printers and builders had an active month at SHERBROOKE, THREE RIVERS, SOREL, HULL and OTTAWA. TORONTO reported activity among printers, bookbinders and allied trades; paper bag and box makers were well employed in spite of difficulty in obtaining material. Printers and binders were reported in active employment at HAMILTON, NIAGARA FALLS, ST. CATHARINES, BROCKVILLE, KINGSTON and BELLEVILLE. At PETERBOROUGH printers continued active, but one of the city newspapers stopped publication at the end of the

month, on account, it was said, of the high cost of paper and materials; a job office and bindery will be substituted. A shortage of help was reported for the paper box factory at GALT, and printers were also very busy. The printing, paper box and allied trades were normally busy at BRANTFORD. KITCHENER reported paper box workers in demand; printers were busy there, and at WATERLOO. Similar active conditions were noted at GUELPH, STRATFORD and WOODSTOCK. At LONDON both newspapers enlarged their printing staffs; the lithographing plant was doubling its capacity; paper box workers were busy. Printers worked steadily at CHATHAM and WINDSOR. Experienced bookbinders were reported in demand at WINNIPEG; box factories were rather slack, but without change in staffs. Activity was noted among printers and binders at BRANDON, REGINA, MEDICINE HAT, LETHBRIDGE, CALGARY and EDMONTON. VANCOUVER reported fair conditions among newspaper and job printers, but publishing houses were not very busy. All branches of the printing industry at VICTORIA were busy, but paper box workers were less active.

At SYDNEY the sash, door and planing mills continued to show increased activity during May, and at

**Woodworking  
and furniture**

HALIFAX a similar improvement was noted, with sufficient orders in hand to keep plants going all summer. In WESTVILLE district employment was good in the woodworking and furniture trades. CHARLOTTETOWN reported activity in the planing mills and broom factories but some slackness in other departments. Overtime work was required at ST. JOHN to fill milling orders; wooden box and brush and broom makers were busy. Building operations in MONCTON and FREDERICTON caused great activity in the planing mills; co-operation workers were also busy. At MONTREAL wooden box and furniture workers had a fair month and the piano industry was good. QUEBEC reported busy conditions in the sash, door and planing

mills, and in wooden box and broom factories. The planing mills and chair factories at SHERBROOKE and St. HYACINTHE were active, though occasionally hampered by shortage of material. THREE RIVERS had a rush of business in the planing mills; chair and toy makers were well employed. Woodworkers at St. JOHN's and IBERVILLE were reported active throughout the month. At OTTAWA and HULL normal activity prevailed in the sash, door and planing mills, and wooden box factories. Woodworkers at SOREL were reported quiet. At TORONTO the woodworking trades, including piano and phonograph makers, were all reported busy. Activity was noted among woodworkers at HAMILTON, and at NIAGARA FALLS the planing mills and sporting goods factory were very busy. The planing mills at St. CATHARINES had a good month. Good conditions prevailed in the office furniture plants at BROCKVILLE, the broom and piano factories at KINGSTON, the furniture and chair factories at BELLEVILLE, and the box factories at PETERBOROUGH, the sash and door factories at all these points being kept busy by building trade requirements. Furniture makers were in demand at GALT, and the planing mills were also busy. The planing mills at BRANTFORD ran to capacity, and piano and victrola case workers were very busy, the plant being enlarged. Machine hands and finishers were in demand at KITCHENER at several furniture plants, some of which worked overtime; sash, door and planing mills were rushed with work, and wooden box, cooperage, piano and organ, and wooden toy workers were all busy; broom makers were fairly active. At GUELPH planing mill workers and piano makers were well employed, also the planing mill and furniture trades at STRATFORD. A considerable shortage of labour, especially skilled labour was reported in the furniture industry at WOODSTOCK; organ makers were well employed, but not so busy as a few months ago. LONDON reported the planing mills and piano and organ factories busy to capacity, the former being somewhat hampered by

shortage of material. Building trade demands at WINDSOR caused great activity in all woodworking plants; piano workers were occupied almost entirely on repairs. The planing mills at Orillia had an active month, and at SAULT STE. MARIE increased activity was noted. The planing mills at BRANDON and REGINA had a good month, but at MEDICINE HAT they were rather slack. At CALGARY the sash, door and planing mills were very busy. FERNIE reported a marked improvement at the beginning of the month, but later the conditions of the lumber market affected the outlook unfavourably. At VANCOUVER the sash, door and planing mills, and wooden box factories were reported busy. At VICTORIA the mills were rather quiet, while box factories and cooperages were moderately active.

Trunk, harness and leather bag makers at HALIFAX continued in steady employment. Tannery workers were in demand at St. JOHN. At FREDERICTON harness makers and other leather workers were busy. MONTREAL reported tanneries busy, and trunk, bag and harness makers fairly well employed. Harness makers at St. HYACINTHE and tannery workers at SOREL were very busy. TORONTO reported the trunk, bag and harness makers active and rubber factories in steady operation. The harness makers at BROCKVILLE and the tannery workers at KINGSTON were busy. KITCHENER reported tannery workers well employed; rubber tire makers were in demand, two and three shifts being worked in some departments. At GUELPH employment in the rubber tire plant was affected by a strike. The tannery at STRATFORD was active and harness repairers were well employed. LONDON and WOODSTOCK also reported activity in the tanneries, but without demand for help. The tanneries and leather trades at BRANDON and CALGARY had a good month.

Leather and  
rubber (other  
than clothing)

The demands of the building trades caused activity in the industries producing construction materials.

**Clay, glass, stone, cement, etc.** WESTVILLE reported active conditions during the month among

stone cutters and granite, brickyard and clay product workers. Glass factories at MONTREAL were in steady operation. QUEBEC reported stone cutters very slack, but brick workers began a period of activity. SHERBROOKE stone and granite cutters and brick workers were busy. The glass industry at TORONTO was short of skilled help, the employers trying to obtain skilled foreign workers; brickyards worked overtime. HAMILTON reported activity throughout the group. At BROCKVILLE stone and granite cutters were well employed, and brick workers were active, the city corporation running the yards. KINGSTON reported the cut stone and granite trades busy. At BELLEVILLE the brickyards, cement and pottery plants were kept busy, the latter turning out tiles as well as pottery. Brick and tile yards at BRANTFORD had a busy month. KITCHENER reported a demand for help in the cement plants; brick, tile and sewer pipe workers were steadily employed, and stone, marble and granite cutters fairly active. Brick and tile workers at STRATFORD were busy, and at LONDON there was more activity than for years past. Cement workers at WINDSOR had a very busy month. The brickyard at BRANDON closed down. At REGINA stone and granite cutters were fairly busy. MEDICINE HAT reported brisk conditions in the brick, tile, stoneware and glass workers. Brick and tile plants at VICTORIA were active but cement works were quiet.

Continued activity was reported at SYDNEY in the tar, naphtha, carbolic acid, creosote and dead oil, naphthaline and pitch plants. HALIFAX reported good employment in the paint and oil plants, but with labour sufficient for requirements. The paint and varnish industry at MONTREAL was fairly active,

and the chemical, drug and medicine plants had a busy month. Cartridge and ammunition work at QUEBEC was rather slack. SHERBROOKE reported activity in the gunpowder, acid, extract, drug and medicine plants. The paint and ochre industry at THREE RIVERS had a busy month. TORONTO reported the paint and varnish, soap, chemical and varnish industries all active. HAMILTON reported the soap and drug industries active and powder and ammunition workers fairly well employed. The electro-chemical works at NIAGARA FALLS were busy. At BRANTFORD varnish and paint makers had a good month. The oil and grease factories at KITCHENER were active. Increased employment was reported in the extract and pharmaceutical trade at WINDSOR; the salt industry was hampered by lack of coal; the soap and perfume industry fell off considerably, but female help was in demand in the bottling rooms; paint and varnish workers had an extra good spring season. The oil plant at REGINA ran full time; the soap factory resumed operations during the month. The linseed oil plant at MEDICINE HAT was fairly active. VANCOUVER reported activity in the paint and varnish factories and in the oil refinery.

The earnings of the Canadian Pacific Railway during April were \$15,929,416 as compared with \$13,108,904 in April, 1919. The number of persons employed during May by the C.P.R., G.T.R.

**Railways, shipping and 'longshore work**

and C.N.R. on railway operation, including general office, train and engine crews, station forces, sleeping, dining and parlour car employees, showed slight change during the month of May, the figures at the end of the month being 66,400 as compared with 65,900 at the end of April. This increase was nearly all accounted for by increased payrolls reported by the C.P.R. SYDNEY reported continued activity in the steam and electric railways, and in general transport; shipping and 'longshore workers were very busy. Normal activity was reported at HALIFAX among transportation

workers. Railwaymen were busy at WESTVILLE; the street railway was again running steadily. Railway work was active at TRURO, double shifts being worked. At CHARLOTTETOWN railway and general transport gave steady employment. Heavy traffic was reported on the railways at ST. JOHN; on the street railway some cars were fitted upon the one-man system; navigation was fair for the season, but 'longshore work was reported dull; transfers showed increased activity. Very heavy traffic was reported at FREDERICTON. MONTREAL reported the railways busy and well-manned; 'longshore men were busy, with much shipping in port, an increase in inland as compared with coastwise shipping being noted. At QUEBEC the railways started extra summer services. Navigation opened but the number of ocean liners transferring cargoes was small and gave little work, but 'longshore men were active on coastwise shipping. General activity in the transportation group was reported at SHERBROOKE, THREE RIVERS, ST. JOHN, IBERVILLE and SOREL. TORONTO reported steam railways busy with heavy freight and passenger traffic; street railwaymen were well employed; navigation had fairly started, with plenty of employment for sailors and 'longshore men; garages were increasingly busy. At HAMILTON the electric and steam railways were busy with passenger traffic, but freight was rather light; 'longshore men were active, steamship lines, except those to the upper lakes, being busy; a shortage of teamsters was noted. Railway traffic at NIAGARA FALLS was heavier than in April. Some railway employees at BRIDGEBURG were on part time, a strike in the Buffalo yards interfering with freight movements. ST. CATHARINES reported good employment among railway workers. 'Longshore work at BROCKVILLE was affected by a decline in coal movements; railways were active, and tourist traffic by rail and steamer created employment. Active conditions were reported among transportation employees at KINGSTON, and at BELLEVILLE land traffic was heavy, but water freight

was mostly limited to coal for home consumption. Transport agencies were active at GALT, BRANTFORD, STRATFORD and KITCHENER, motor mechanics being in demand at the latter point. The G.T.R. and C.P.R. at LONDON reinstated most of the employees recently laid off in consequence of slackness due to the switchmen's strike in the United States; new men were taken on for the summer traffic on the radial railway. Freight movement at ST. THOMAS, which was almost at a standstill in April owing to the American strike, had become almost normal at the end of May. CHATHAM reported a considerable falling off in shipping owing to the railway strike, but no unemployment was apparent. WINDSOR reported improved conditions in the street railway since the Hydro Electric Commission took over control. 'Longshore work at PORT ARTHUR and FORT WILLIAM was normal for the season of the year, but there was no marked activity at the grain elevators or coal docks. Transport workers were reported active at BRANDON, REGINA, MOOSE JAW, MEDICINE HAT, LETHBRIDGE and CALGARY. VANCOUVER reported 'longshore men busy only on deep sea traffic, coast navigation being upset by a strike of firemen, oilers, sailors and deck hands; railways (steam and electric) and transfers were busy. An improvement was recorded at VICTORIA in 'longshore work, some boats which had been tied up being placed on service.

QUEBEC reported activity in stone quarrying. At SHERBROOKE, in the

metallic group, chrome iron workers were busy, but those in copper production were quiet; in

non-metallic mining, the asbestos industry was very active; granite quarry men were active and gravel pits very busy. At THETFORD MINES asbestos production was maintained, no change in staffs being recorded. Shipments from the silver mines at COBALT during May totalled 37 cars containing approximately 2,749,170 pounds of ore, as compared with April shipments of

27 cars with 2,164,491 pounds of ore; bullion shipments were the heaviest of the current year: a total of 373 bars containing 451,896 fine ounces of silver were shipped; this compares with 125 bars containing 150,788 fine ounces in the previous month; every camp was reported short of men for extension of operations; underground workers were hard to obtain, the men preferring work on the surface at this season. A shortage of labour was also felt at the camps at PORCUPINE and KIRKLAND LAKE owing to the exodus of skilled miners to the Sudbury district, where the International Nickel Company, it was reported, offered higher wages than were paid in the gold camps; to offset this some gold companies raised the wages of their employees, setting a new standard wage scale for the Northern Ontario mines. WINNIPEG reported a demand for quarrymen in Manitoba. At THE PAS late ice on the lakes still prevented communication with the mines. FERNIE reported activity in the metalliferous mines, much improvement work being in progress. Only one of the ROSSLAND mines was shipping ore, other mines doing development work until the new concentrator at TRAIL is ready to handle Rossland ores. The smelter at TRAIL had only two lead furnaces operating; copper furnaces were awaiting completion of the electrolytic copper refinery which is being enlarged to double capacity; the electrolytic lead refinery turned out about 40 tons of pure lead per day refined from the bullion of the two lead furnaces; the concentrator also turned out concentrates from the mines of Kimberley; the electrolytic zinc plant turned out its usual quota of refined zinc; a great shortage of labour, both skilled and unskilled, was reported. CRANBROOK also reported a demand for men for gold placer mining; the demand continued for muckers, carpenters, axemen and surface labourers for the Sullivan Mines.

SYDNEY reported the output of the Dominion collieries during May at 254,000 tons of coal, against the previous month's revised figure of 261,152 tons; the production of coke was 35,900 tons, compared with 33,000 tons in April, 120 ovens being in operation. The output of Nova Scotia collieries at SYDNEY MINES was 51,500 tons of coal compared with 51,000 tons in April, while production of coke was 10,300 tons, an increase for the month of 700 tons; 190 ovens were in operation. The mines at WESTVILLE were all busy. Mining conditions at MINTO were reported as somewhat improved with prospect of increased output. The coal mines of Saskatchewan and Alberta were active, with a general demand for experienced miners; a fire at a pit head at ESTEVAN threw about 100 men out of work, but they were absorbed by neighbouring mines. LETHBRIDGE reported the two chief coal mines working full time during the month, while the smaller mines were fairly steady. In the CALGARY district the mines were fairly busy, arrangements being made for storage and shipment for full trade to Manitoba and Saskatchewan. EDMONTON noted a demand for men for the northern mines. FERNIE reported the local mines in steady operation throughout the month. NANAIMO reported the VANCOUVER ISLAND coal mines working full time, with good prospects of steady employment.

The value of building permits issued in 55 cities during April amounted to \$16,382,543, as compared with \$8,258,150 in March, and \$7,059,641 in April, 1919.

During May building operations started actively at SYDNEY, having been delayed by the late spring. HALIFAX reported all buildings well under way and sufficient work in sight to keep house mechanics busy all summer. At TRURO carpenters worked full time. CHARLOTTETOWN reported the building trades active with painters in demand. At St.

**JOHN** industrial and residential building was very active; railway construction gangs were busy on a new bridge. Operations at **MONCTON** included new school buildings and banks, stores and dwellings; construction was retarded in the first half of the month by industrial disputes involving carpenters, bricklayers, masons and plumbers. Labour was in demand for the building trades at **FREDERICTON**. **MONTREAL** reported good conditions in the building trades, with large contracts to be completed. Activity was noted at **QUEBEC**, with plenty of employment on new dwellings and stores, and on repairs. Similar conditions were reported from **SHERBROOKE** and **THREE RIVERS**. At **St. HYACINTHE** building construction was active, with good prospects, as the Government building scheme was applied to the city. Conditions at **SOREL** were reported quiet. **OTTAWA** and **HULL** reported activity in the erection of dwellings and commercial buildings; work on the new Parliament buildings is suspended during the Parliamentary session. **TORONTO** reported the building trades all active, mainly in connection with the erection of small houses for which there was a continually increasing demand; larger construction work, although considerable, was not so active as was anticipated earlier in the season, the cost of materials being excessive; work began on the harbour head wall which is to be completed this season; the contract was awarded for a new Island sea wall. The building trades very active at **HAMILTON**. At **NIAGARA FALLS** employment was good, though material was short early in the month. Fair conditions were reported at **St. CATHARINES**. Building and construction were active at **BROCKVILLE**, **KINGSTON** and **BELLEVILLE**. At **PETERBOROUGH** very

few residences were started owing to the cost of materials, but employment was good on the other departments of building. **GALT** reported busy conditions in construction of public and commercial buildings. Employment was also good at **BRANTFORD**, **KITCHENER** and **GUELPH**. Painters were in demand at **STRATFORD**. Little building was reported at **WOODSTOCK** and many carpenters and bricklayers found employment elsewhere. **LONDON** reported very little large construction work in progress, but many private dwellings going-up; the Housing Commission let contracts for sixty houses in one survey. Very little building was in progress at **St. THOMAS**, but painters, paperhangers, plumbers and house carpenters were well employed on repair work. At **CHATHAM** it was expected that the Housing Commission would carry out a building scheme this season. **WINDSOR** reported great building activity in the three "border cities"; about 600 carpenters belong to the local union, and employment was good in all construction trades. Very little building was in progress in **PORT ARTHUR** and **FORT WILLIAM**. At **WINNIPEG** a good demand was noted for building mechanics and for workers on railway construction in the Province. Similar conditions existed at **BRANDON**, **REGINA**, **MOOSE JAW**, **MEDICINE HAT**, **LETHBRIDGE**, **CALGARY** and **EDMONTON**, but the building programme was not very heavy at some of these places. Construction at **FERNIE** and **NELSON** was quiet, the high cost of lumber and labour being given as the cause of this slackness. **VANCOUVER** reported that building operations were affected by a general cessation of the progress that had been anticipated; delays occurred in contracts and building permits decreased. At **NANAIMO** carpenters,

painters, paperhangers were well employed. VICTORIA reported activity in railway construction, tracklaying having re-started in the Canadian National Railways.

The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and Canadian National Railways, on railway construction, including maintenance of way, showed an increase of 4,500 persons during the month of May, the total at the end of the month being 40,600, as compared with 36,100 at the end of April. This increase was made up in steady gains each week by all three companies, but more than half of the additions were shown on the Canadian National Railway's payrolls.

CHARLOTTETOWN reported some slackening in lumbering activity towards the end of May, but a large quantity of lumber was sawn during the month.

#### Lumbering

The saw and shingle mills in St. JOHN and district ran steadily. The lumbermen in FREDERICTON district had a successful spring drive, with good prospects of bringing the entire cut to the booms; saw mills workers were steadily employed. BATHURST reported the drives progressing favourably with most of the smaller streams cleaned up, but in some the logs were held up for want of water. Round QUEBEC river driving was nearly completed, but few saw mills had started operations at the close of the month. SHEBRROOKE reported the drives continuing and great activity in the saw and shingle mills. At OTTAWA and HULL the saw mills were busy but the burning of some lumber yards affected the

local labour situation. The two saw-mills at PEMBROKE were very busy, more men being required. PETERBOROUGH reported lumbermen very busy rafting and river-driving, and the sawmills were already very busy. At SAULT STE. MARIE bush work was opening up again, and many men were required also for loading ties and pulp wood on cars. There was some demand at PORT ARTHUR for river drivers. WINNIPEG reported some falling off in the demand for lumbermen in Manitoba. Many of the men who worked in the woods of northern Saskatchewan during winter and spring found employment on farms. EDMONTON reported a demand for men for the mills in northern Alberta. At FERNIE lumbering activity was at its height, but prospects were stated to be somewhat unsettled owing to market conditions, some companies at this point and also at CRANBROOK, after running double shifts for two months, having accumulated large stocks; it was expected, however, that active conditions would be maintained until next fall; the post and pole industry was rather slack, the prairie farmers, who are the chief buyers of this product, being engaged on seeding. NELSON reported the supply of common labour as fair, but skilled labour was scarce and some overtime work was necessary. VANCOUVER and NEW WESTMINSTER reported the saw and shingle mills working to capacity; loggers were well employed. VICTORIA and NANAIMO reported lumbering and milling operations active on Vancouver Island, but hampered by shortage of shipping facilities; several new saw and shingle mills started during the month.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

## PROCEEDINGS FOR THE MONTH OF MAY, 1920, WITH TEXT OF BOARDS' REPORTS

**D**URING the month of May the Department received reports from seven Boards established to deal with disputes between (1) the Ottawa Gas Company and certain of its employees, being gas workers, members of Federal Union No. 16517; (2) the Ottawa Electric Railway Company and certain of its employees, members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America; (3) the Ottawa Branch of the Association of Canadian Building and Construction Industries and certain of their employees, being carpenters, electrical workers, painters and roofers; (4) the Dominion Power and Transmission Company, Hamilton, and certain of its employees, being linemen, operators, motormen, maintenance men, armature winders, pitmen and air brake workers, members of Local Union No. 105, International Brotherhood of Electrical Workers; (5) the Dominion Power and Transmission Company, Hamilton, and certain of its employees, being shop and yard men, members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America; (6) the Hamilton Street Railway Company and its motormen and conductors, being members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America; and (7) the London Railway Commission and certain employees of the London and Port Stanley Railway, being members of Division No. 745, Amalgamated Association of Street and Electric Railway Employees of America.

Thirteen applications were received for the establishment of Boards, and further appointments were made in connection with applications which had been received during the previous month.

**Applications Received.**

During the month of May applications for Boards were received as follows:—

(1) From the employees of the Ottawa Gas Company, being gas workers, members of Federal Union No. 16517. The personnel of the Board and the text of the Board's report appear in the present article.

(2) From the employees of the Ottawa Electric Railway Company, members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America. The personnel of the Board and the text of the Board's report appear in the present article.

(3) From the employees of the Toronto Hydro Electric Commissioners, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers. A Board was established composed as follows: Messrs. Frank R. Ewart and Fred Bancroft, Toronto, nominees of the company and employees respectively. The chairman had not been appointed at the close of the month.

(4) From the employees of the Great Lakes Power Company, Limited, Sault Ste. Marie, Ont., members of Local Union No. 726, International Brotherhood of Electrical Workers. A special officer of the Department of Labour visited the locality, and, through his mediation, negotiations between the parties were renewed and a settlement was effected without reference to a Board.

(5) From the Ottawa Branch of the Association of Canadian Building and Construction Industries and certain of their employees, being carpenters, electrical workers, painters and roofers. The personnel of the Board and the text of the Board's report appear in the present article.

(6) From the employees of various contractors of the City of Lethbridge, Alta., being carpenters, members of Local Union No. 846, United Brotherhood of Carpenters and Joiners of America. This dispute not being one falling within the scope of the I.D.I. Act a Board could be established only upon the joint consent of all the employers as well as the employees. At the close of the month this consent had not been arranged, although mediation looking towards the adjustment of the dispute was being rendered by a departmental officer in the locality.

(7) From the employees of the Montreal Tramways Company, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America. At the close of the month this application was under consideration.

(8) From the civic employees of the Corporation of Moose Jaw, Sask., members of Civic Employees' Union No. 9. The employer in this case being a municipality a Board could be established only upon the joint consent of the disputants. A special officer of the Department was sent to Moose Jaw to render assistance in bringing about a settlement. The municipal authorities definitely refused consent to the establishment of a Board but later rescinded this decision and shortly after the close of the month a Board was in the course of establishment.

(9) From the employees of various mine owners in the Minto district, members of District No. 26, United Mine Workers of America. A question arose as to whether the parties who made the application for a Board were justified in doing so. An officer of the Department visited the locality, and at the close of the month negotiations looking towards a settlement of the dispute were in progress.

(10) From the employees of the British Columbia Telephone Company, Limited, Vancouver and Victoria, being electrical workers, members of Local Unions Nos. 213, 230 and 77a, International Brotherhood of Electrical

Workers. At the close of the month the matter was receiving consideration.

(11) From the Corporation of the City of Peterborough, concerning a dispute between the Canadian General Electric Company and certain of its employees at Peterborough, being electrical workers. The employees in this case had gone on strike on May 18, and the application was made by the city under the authority of section 63a of the I.D.I. Act. At the close of the month a Board was in the course of establishment.

(12) From the employees of the Canadian Pacific Railway Company, Grand Trunk Railway and Canadian National Railways, being clerks, timekeepers, railway checkers, freight handlers, truckers, coopers, etc. At the close of the month this dispute was receiving the attention of a special officer of the Department, looking towards an adjustment of the dispute without reference to a Board.

(13) From the Toronto Railway Company in connection with a dispute with certain of its employees, being motor-men, conductors, shedmen, motor and truck repairmen, compressor and fender room men and trackmen. A Board was established, composed as follows: The Honourable Mr. Justice F. S. MacLennan, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. W. H. Moore and John T. Vick, Toronto, nominees of the company and employees respectively.

#### Other Proceedings under the Act.

During the month of May other proceedings under the Act took place as follows:—

(1) The jurisdiction of the Board composed of His Honour Judge J. H. Denton, chairman, J. G. Merrick and Jas. T. Gunn, established to deal with the dispute between the Dominion Transport Company and certain of its employees at Toronto, being teamsters, chauffeurs, stablemen and helpers, members of Local Union No. 191, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of Amer-

ica, was extended to deal with a dispute between the same employer and the same class of workers at London.

(2) Consent was received from the Nova Scotia Steel and Coal Company to the establishment of a Board to deal with a dispute with certain of their employees, members of the three organizations, viz., (1) the Amalgamated Association of Iron, Steel and Tin Workers of America, (2) the International Brotherhood of Electrical Workers, and (3) the International Association of Machinists, for which application had been made during April. A Board was established composed as follows: His Honour Judge G. Patterson, New Glasgow, N.S., chairman, appointed on the joint recommendation of the other two members, Prof. Howard Murray, Halifax, and Mr. J. C. Watters, Glace Bay, N.S., nominees of the company and employees respectively.

(3) The Board established to deal with the dispute between the Canadian National Express Company and certain of its employees, being members of the Canadian Brotherhood of Railway Employees, was completed by the appointment of the Honourable Mr. Justice T. G. Mathers, Winnipeg, as chairman, the appointment being made by the Minister

of Labour in the absence of a joint recommendation from the other two members, Messrs. W. J. Christie, Winnipeg, and Fred. Bancroft, Toronto, nominees of the Company and employees respectively.

(4) The Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers' Union, was completed by the appointment of His Honour Judge R. H. Myers, Winnipeg, as chairman, the appointment being made by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. Chas. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively.

(5) The Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being members of the Street Railway Union, was completed by the appointment of His Honour Judge R. H. Myers, Winnipeg, as chairman, the appointment being made by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. Chas. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively.

### Report of Board in dispute between the Ottawa Gas Company and its gas workers

**A** REPORT was received from the Board established to deal with the dispute between the Ottawa Gas Company and certain of its employees, being gas workers, members of Federal Union No. 16517. The Board was composed as follows: Mr. E. McG. Quirk, Montreal, chairman, and Messrs. Geo. D. Kelley and William Lodge, Ottawa. His Honour Judge R. D. Gunn, Ottawa, had been appointed chairman of the Board on the joint recommendation of Messrs. Kelley and Lodge, but later resigned, and Mr. Quirk was appointed by the

Minister in his stead. The report was signed by the chairman and Mr. Kelley and was accompanied by a proposed agreement covering wages and conditions. Mr. Lodge presented a minority report.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between The Ottawa Gas Company, employer, and certain of its employees being Gas Workers of Federal Union No. 16517, employees.

The Honourable,  
G. D. Robertson,  
Minister of Labour, Ottawa.  
Sir,—

The Board appointed to investigate the dispute between the above parties as set out in the application to your Department under date of May 1st., 1920, was convened May 12th and 13th. The chairman, Judge R. D. Gunn, forwarding his resignation as chairman and member of the Board on May 14th., Mr. E. McG. Quirk, of Montreal, was appointed as chairman on May 15th. Under the chairmanship of Mr. Quirk the Board held session twice daily May 17th, 18th, 19th, 20th and 21st., hearing witnesses, receiving statements bearing on the issue, and made one visit to the company's plant.

The Board heard evidence from Mr. W. Russell, President, Mr. P. Peebles, Secretary of the Union, and from other employees representing various sections, who spoke in regard to the increasing cost of living and general conditions of employment in the company's service. Also from Mr. F. Lafortune, President of the Allied Trade and Labour Association, Mr. J. A. P. Haydon of the Trade Council and Mr. C. W. Lewis, Business Agent of the Stationary Engineers.

It was gratifying to learn from the employees, many of whom had long years of service, of the friendly and harmonious relations existing at all times between the company and its employees.

The Board visited the company's plant and was impressed with the operation, efficiency and provisions for its employees' safety and comfort.

The company in presenting its case through Mr. A. A. Dion, its General Manager, laid considerable stress on its inability to meet any material increases in general wages, due, as shown from figures quoted, to the continual increasing cost of material, particularly coal, its basic requirement.

Mr. Dion pertinently asked, that, in the event of the Board recommending material increases in wages, it should, at

the same time, suggest to the company a means by which its revenue could be augmented to meet the increased wages. The Board was of the opinion that any indication or suggestion as to how the company may add to its revenue was not within its scope. It appears from Mr. Dion's testimony that an increase in rates will be asked by the company.

After hearing what was to be said from both sides, and taking fully into consideration the general conditions of the company's employment service, the general working conditions in the vicinity, as well as the prevailing rates paid, the Board recommends the following agreement and schedule of wages. (Attached.)

The Chairman desires to express his very sincere appreciation of the excellent and friendly feeling existing and evidenced throughout the sittings of the Board, and regrets that Mr. Lodge is unable to agree with the majority decision.

Respectfully submitted,

(Sgd.) E. McG. QUIRK,  
Chairman.

(Sgd.) GEO. D. KELLEY,  
Member of Board.

Ottawa, Ontario,

May 21st., 1920.

AGREEMENT to be entered into between The Ottawa Gas Company, hereinafter called "The Company", and its employees through Local Union No. 15617, hereinafter called "The Union."

1. That eight hours shall constitute a day's work to be performed, as much as possible between the hours of 8 a.m. and 5 p.m., but the eight hours may be worked during any part of the day or night at the option of the Company in order to suit the operations of the Company.

2. All time after eight hours worked in one day or twenty-four hours shall be counted and paid for as time and one-half. After fourteen hours' work has been performed in twenty-four hours, any work done in excess of this shall be counted and paid for as double time.

3. Work performed on Sundays and the following holidays, namely, Christmas Day, New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day, shall be counted and paid for as double time in all cases where the

regular work of the men does not cover Sundays and holidays. No other civic holidays to be recognized by men or the Company, but where the regular work covers Sundays or holidays, or both, the men shall not be entitled to double time.

4. The Company shall not discriminate against members of the Union but shall also be at liberty to employ any man whether belonging to the Union or not.

5. The changes in wages and hours provided herein shall be retroactive to May 15th 1920.

6. A week's work to consist of 44 hours; 5 days at 8 hours and 1 day at 4 hours from 15th May to September 15th, but this shall not apply to men engaged in continuous operation or such necessary work on Saturday afternoon as may be required from "trouble men."

7. Any man not regularly employed on Sunday, called out on Sunday, shall be paid at least for 3 hours.

The wages to be paid by the Company to its employees under this Agreement shall be as follows:

(See Schedule attached.)

Any man engaged in such work considered dangerous must have another man along with him; the work claimed by this Clause to be arranged by the Superintendent and the man doing such work.

This Agreement does not cover labourers and other trades employed by Mr. B. O'Connor, Construction Foreman or other foremen on temporary construction work on the premises of the Gas Company, such men not being regular employees of the Company.

The Company, through its General Manager shall meet by arrangement at any time a Committee of three representing the employees, classified in this Schedule, for the purpose of discussing any grievances, or matters of mutual interest.

This Agreement shall continue until the 15th day of May 1921, and thereafter from year to year for 12 months' period, unless cancelled by either party to it after giving to the other party notice of his intention to so cancel it, at least sixty days previous to the expiration date which is the 15th day of May in any year.

It is recommended that "continuous" men shall not be employed three consecutive Sundays.

(Sgd.) E. McG. QUIRK,  
GEO. D. KELLEY.

# IN THE MATTER OF THE OTTAWA GAS COMPANY AND ITS EMPLOYEES

## SCHEDULE OF WAGES AWARDED BY BOARD

Classification.	Present rate.	Rate asked.	Rate established by board.
	cents.	cents.	cents.
Stokers.....	48	63	58
Conveyors attendants.....	45	58	54
Scurfers.....	44	58	53

Coke drivers.....	43	55	52
All other drivers.....		20% increase	

### Stove and Meter Department.

All men at present paid 50 cents and over be granted 20% increase.

All men at present paid 45 to 50 cents and over be granted 20% increase.

All men at present paid 40 to 45 cents and over be granted 20% increase.

The wages established in the above schedule shall be considered as the wages to be paid throughout the year ending May 15th, 1921.

With reference to employees classified as Boiler Attendants, it is recommended that these men be classified in accordance with the Provincial regulations governing steam plants, and shall be paid the prevailing rate of wages applicable to such classification.

(Sgd.) E. McG. QUIRK,  
GEO. D. KELLEY.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Ottawa Gas Company and their employees, members of Federal Union No. 16517.

Ottawa, Ont., May 20, 1920.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour.

In the report submitted by the Chairman, Mr. E. McG. Quirk, and signed by the representative of the Company, Mr. G. D. Kelley, in the general terms of agreement, these were mutually reached. I find myself strongly at variance in the matter of rates of wages recommended therein, reached from the evidence presented. I accept the statement of one of the witnesses as almost evidence of fact that the requests of the men were of too moderate a nature and the claims presented should have been acceded to. Having knowledge that recent awards for labourers were for a rate of fifty-eight (58) and sixty cents per hour, the latter by mutual agreement between the contractors of this city and the General Labourers' Union, it appeared to me that the grading in rates should have been from this figure upwards.

An example of the moderate requests may be cited where the requests for the conveyor attendants and scurfers (being skilled or semi-skilled work) a rate of fifty-eight (58) cents per hour was asked, the same as is now being paid to civic labourers, or two (2) cents below that of the building labourers. By this

instance it is seen that if a city or a civic rate had been awarded it would only meet the requests of these skilled branches.

The term specified is for one year; under the abnormal conditions at present evident, it does appear to me that with what I consider the low award made by the majority of the Board, that in the event of decided upward tendency of commodity prices, the utilization of the grievance committee for a review of the wage schedule with the General Manager may be undertaken.

I regret that this may not be a majority award through my deflection, but my duty is too plain in the disagreement as to wages and thus may not be avoided. I desire to express appreciation of the readiness of the Company to present pertinent information, especially the General Manager, Mr. A. A. Dion, and the facilities afforded the Board for observation and investigation.

In reaching my conclusion I was guided largely by the evidence of local conditions and the wage standard prevalent here. This should, in my opinion, have been the determining factor to reach an equitable basis.

Respectfully submitted,

(Sgd.) WM. LODGE,  
Representing the Employees.

#### Report of Board in dispute between the Ottawa Electric Railway Company and certain of its employees

**A** REPORT was received from the Board established to deal with the dispute between the Ottawa Electric Railway Company and certain of its employees, members of Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: The Honourable Mr. Justice F. S. MacLennan, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two

members, Messrs. Geo. D. Kelley and A. E. Fripp, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by a proposed schedule of wages and conditions. This schedule was taken up for consideration as between the employing company and the workmen concerned and an agreement effected which embodies substantially the recommendations of the Board, although varying in details.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Ottawa Electric Railway Company and its employees, members of Division 279, Amalgamated Association of Street and Electric Railway Employees of America.

Ottawa, May 28th, 1920.

The Honourable G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

Sir,—

The Board of Conciliation appointed in this matter and consisting of George D. Kelley, Barrister, of the City of Ottawa, representing the company; Alfred E. Fripp, K.C., M.P., representing the employees; and the Honourable Mr. Justice F. S. MacLennan, Chairman, met in the City of Ottawa on the 25th May instant and has been in daily session since. The Company was represented by Major F. D. Burpee and Mr. A. J. Tobin, and Messrs. William P. Jennings, International Officer, F. W. McRae, E. O'Connor, W. J. Deevy and W. F. Page appeared for the employees.

The outstanding features of the matter in dispute between the company and the employees were with reference to the demands made by the employees for: (1) closed shop, or, in other words, that all employees should be compelled to join the Association; (2) that eight hours should constitute a day's work; (3) that increased rates of pay should be granted by the Company.

After having heard what was said by the representatives of both parties, with reference to the demand that the employees should be obliged to join the Association, the Board has come to the conclusion that it is not desirable that this request should be granted. The Company has no objection to its employees joining the Union, but desires to leave them free to join or to remain out of the Union, and it has not in the past and will not in the future discrim-

inate against any employee who does not desire to become a member of the Association.

The Company is now working on the basis of nine hours per day, paying at overtime rates for all work done in excess of that time. The services rendered by the Company to the public are between six a.m. and midnight, covering a period of eighteen hours, and it does not appear to the Board that it would be practicable to introduce the eight-hour day under these circumstances.

On the question of wages, a number of motormen and conductors appeared before the Board and were given full liberty to express their views. The Board has given full consideration to all information placed before it on behalf of the Company as well as on behalf of the employees, and in a Schedule annexed hereto has made its recommendations for working conditions and as to the rates of pay which, in the opinion of the Board, should be accepted by both parties.

The whole respectfully submitted.

(Sgd.) F. S. MACLENNAN,  
Chairman.

(Sgd.) GEORGE D. KELLEY,  
Member of Board.

(Sgd.) A. E. FRIPP.

### Text of Working Agreement

The following is the text of the agreement as received by the Department from the management of the employing company:

AGREEMENT made (in duplicate) this twentieth day of May, 1920, between the Ottawa Electric Railway Company, hereinafter called the "Company," party of the first part, and the Ottawa Electric Railway Employees' Union, being Division No. 279, Amalgamated Association of Street and Electric Railway Employees of America, hereinafter called the "Association," party of the second part.

*Witnesseth* that the following wage schedule and working conditions shall be in effect and binding upon the parties hereto for one year from the first day of May, 1920, to the first day

of May, 1921, and thereafter from year to year. If either party to this agreement desires a change in any of its provisions, said party shall notify the other in writing not less than thirty days prior to the first day of May in each year. On such notification in writing being received, the changes desired shall be open for discussion.

#### GENERAL CLAUSES APPLYING TO ALL DEPARTMENTS.

SECTION 1. The Company agrees that all employees affected by this agreement, if they so desire, may become and remain members of the Association during the life of this agreement, and that the standing of employees with the Company shall not be affected by the fact of their membership in the Association.

SECTION 2. The Company agrees to meet and treat through their properly accredited officers with the officers and representatives of the Association, upon questions and differences that may arise during the term of this agreement, including dismissal after suspension.

SECTION 3. Employees who are members of any committee or officers of the Association, or delegates to conventions of the Association, shall be entitled to leave of absence, and shall retain their full seniority rights, and upon retirement from such office, committee, or delegation, shall have their place in the Company's employ that they would have occupied if no leave had been granted.

SECTION 4. The Company agrees that employees shall not be censured in public for disobedience of rules. If the offence is a serious one, the employee at fault will be placed under suspension, and a careful investigation of the case made by the Company. If after an investigation the said employee is found not guilty of the charge against him, he shall be reinstated to his former position and paid for all lost time. Incompetency, drunkenness, dishonesty and repeated violation of the rules of the Company will be sufficient cause for dismissal from the service, but no employee shall be dismissed at any time without a full investigation and the removal of all doubt as to his guilt. No dismissal shall take place till one week after suspension.

SECTION 5. All promotions or transfers in all departments shall be based upon merit and seniority and without discrimination, but the Company must be the sole judge as to an employee's fitness for such promotion or transfer.

SECTION 6. When through slackness of work a reduction of staff becomes necessary in any department, men shall be laid off in the following order, last on, first off; last off, first on. Employees being laid off under this clause shall leave an address with the Company, and notice of resumption of work shall be given by the Company to the men by mailing advice to such

address. If the men do not appear to resume their positions within seven (7) days, the same shall be deemed to be vacant.

SECTION 7. No employee other than those covered by Section 3 shall be granted leave of absence exceeding thirty (30) days in any one year without loss of seniority, unless agreed to by both parties.

SECTION 8. All employees shall be given free transportation at all times on all lines of the Company.

SECTION 9. The Association shall be allowed to post notices of meetings, bulletins or any other matter that may be of interest to the members of the Association at all car barns, power stations, and in the motormen and conductors' waiting room.

SECTION 10. Nine hours shall constitute a day's work in all departments with the exception of the Water Power Plant governed by Section 37. No employee shall be compelled to do extra work beyond his regular day's work except as provided in Section 11.

SECTION 11. All employees, except conductors and motormen, will be available for emergency work whenever called upon. All special calls for men when off duty shall be paid at the overtime rate, such calls to pay not less than one-half day's pay at regular rates.

SECTION 12. Work performed in excess of nine hours on all days except Sundays and the legal holidays mentioned in Section 13, shall be paid for at the rate of time and one-half.

SECTION 13. Time and one-quarter shall be paid for all work performed on Sundays and the following legal holidays: New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Thanksgiving Day, Labour Day and Christmas Day.

SECTION 14. The present regulations governing the conditions of work and the general conduct of the Company's business are permanent, and will not be changed without due notice, permitting the Association an opportunity to discuss them with the Company before any change goes into effect.

#### CONDUCTORS AND MOTORMEN.

SECTION 15. The Company shall post a list of the conductors and motormen in order of seniority in the conductors' and motormen's waiting room, together with a Run Guide on which shall be stated the regular day, relief and swing runs, and the time paid for each. No run on the Run Guide shall pay less than nine (9) hours.

Conductors and motormen shall have the right to choose such runs as they may prefer in order of seniority, the senior man on the list to have the first choice, and so on until all have chosen. Motormen to choose first in order

of seniority. Run Board to be filled as runs are chosen. Motormen to so book until Board is filled. Conductors then by seniority in turn will book and Run Board shall be filled as runs are chosen until all have chosen.

This rule shall apply to all regular, day, relief, and swing runs that are listed on the Run Guide. Booking shall be conducted by an official appointed by the Company. Choosing of runs shall take place every three months, or at such other times as the operating conditions make it necessary for another selection of runs. Any man refusing or failing to select a run in the time given shall be assigned to one by the official in charge of the booking in accordance with his seniority.

SECTION 16. When motormen and conductors have selected or have been assigned to runs regularly scheduled, and a portion of such runs is cancelled they shall be paid the full time such runs would have paid had full runs been completed, for one day, or until notified by the Company that the schedule is changed.

SECTION 17. All runs shall be classified and listed upon the Run Guide, and shall be known as Regular Day Runs, Regular Relief Runs, Swing Runs, Trippers and Extras.

(a) All regular day runs shall be completed within twelve and one-half consecutive hours.

(b) All regular relief runs shall be completed within fourteen and one-half consecutive hours whenever practicable.

(c) All regular swing runs shall have not more than three periods of work. All three-period swing runs shall be completed within thirteen and one-half consecutive hours whenever practicable. Two-period swing runs shall be completed within fourteen consecutive hours.

(d) Tripper runs shall not exceed four hours pay time, and may be coupled to the regular day runs, and shall pay double time rate for time worked.

(e) Extra runs shall be service not regularly scheduled on the Run Guide, and such other runs as cannot be foreseen, and cannot be provided for by the regular time table. No extra run shall pay less than four hours.

SECTION 18. Conductors and motormen will report at places and time appointed by the Company. All conductors and motormen who fail so to report will have a miss marked against them, except in cases where they report sick, or have arranged with the Company to be away from duty. No miss will be marked against any man for not reporting at 6 a.m. who has worked a late run the night before.

Whenever the cars are delayed so that a motorman or conductor cannot reach his reporting place on time, no miss shall be marked against him, but if he arrives before his car goes out he shall be allowed to take it.

SECTION 19. All spare men who have no misses marked against them, or who are not

away on account of sickness, or who are not on leave of absence (except the weekly day off) will be guaranteed \$42.50 for each pay period of one half month, as a minimum wage. If the time that has been credited to them does not amount to \$42.50, the difference will be paid on the regular pay days.

SECTION 20. Uniform clothing for motormen and conductors shall consist as follows:

Summer: Full suit (coat, vest and trousers).

Winter: Trousers every year; overcoat every second year.

All motormen and conductors shall be so provided; the Company to pay full cost of such clothing for all men in their service over one year, and half the cost for those in the service the first year. Said uniforms are to be supplied not later than the first of May and the first of October each year if possible. After any article of clothing has been in the possession of a motorman or conductor for a period of thirty (30) days it shall become his absolute property, providing he has been in the employment of the Company for one year. All caps and badges to be supplied by the Company free of charge. In the event of an employee damaging or destroying his uniform in the execution of his duties through no fault of his own, the Company shall make good the damage or supply, free of charge, an extra uniform if the case warrants it. All winter caps supplied by the Company to be subject to the approval of the Association.

SECTION 21. Cars shall be sent out each morning and night for the purpose of conveying employees to and from their work. Said cars to be run on Somerset, Bank, Hull, St. Patrick, Sussex, Gladstone Avenue and Preston Lines.

SECTION 22. Suitable seats shall be provided for both motormen and conductors on all cars. Said seats shall be placed in a position where convenient for motormen and conductors in the proper discharge of their duty.

SECTION 23. All cars shall be properly heated to a reasonable temperature.

SECTION 24. Conductors and motormen shall be paid one-half hour at regular rates for making accident reports.

SECTION 25. The Company will supply all conductors with tickets and change to the extent of thirty-five dollars, students to be supplied with change by the Company. The employees in accepting this amount agree to use it for the purpose of their work on the cars only, and to have the full amount of thirty-five dollars on their person whenever reporting for work.

SECTION 26. The schedule of running time shall be so arranged as to provide for a lay-up of two minutes at the end of the line on each round trip. Sufficient running time shall be allowed at all time.

SECTION 27. After a student conductor or motorman has passed his preliminary examination and been accepted for employment, he will be known as a spare man, and will be considered as on probation for a period of four months. At the end of this period he will be subject to a final examination by the Superintendent, and, if satisfactory, he will be taken on as a permanent employee.

#### SHOP AND SHED MEN.

SECTION 28. The repair shop and all sheds shall be heated during the winter months to a reasonable temperature. Wrecking cars shall be equipped with proper protection from inclement weather, and men shall be supplied with rubber coats and boots when working with wrecking car.

SECTION 29. When an employee is engaged in any two or more classes of work for two days or longer, he shall be paid the maximum rate for the work performed. This does not apply to apprentices.

SECTION 30. When vacancies occur in shop or shed (day staff) these shall be filled on probation by senior night employees engaged in similar work, but the Company must be the judge as to the employee's fitness for the vacancy.

SECTION 31. The employees in shop and sheds shall be classified as follows: Air Brake and Fare Box Repairer, Machinist, Carpenter, Painter, Glazier, Armature Winder, Armature Winder's Assistant, Electrical Trouble and Bench Workers, Pitmen, Pit Helpers, Oilers and Greasers, Car Inspectors, Car Cleaners, Car Changers, Shop Hands, Apprentices.

A common rate of wage will be paid all men employed in each of the above classes, except shop hands and apprentices. When not sufficient work to keep any man employed in the work belonging to his class, he will be assigned other work of a similar nature by the foreman.

#### LINE DEPARTMENT.

SECTION 32. When temporary promotions occur on any shift, men filling those positions shall receive the rate of pay that said position calls for.

SECTION 33. All regular linemen and truck drivers to be furnished with rubber boots, rubber coats, rubber gloves and pliers when needed.

#### TRACK DEPARTMENT.

SECTION 34. Track maintenance men shall mean employees whose duties are to maintain the track in a safe condition, and switchmen employed at switch points. When such em-

ployees report and owing to weather conditions are unable to work, they shall be paid for all time held on foreman's orders. This section shall not apply to extra men taken on for emergency work in connection with the removal of snow, or to construction gangs.

SECTION 35. In the event of day gangs being required to do night work for a period of two nights or less, they shall not, on that account, be compelled to lose a day prior to the commencement of that night work, and they shall be paid time and one-half for all work in excess of nine (9) hours.

SECTION 36. When trackmen are employed at drain work during the spring and fall of the year, and conditions demand such, rubber boots shall be supplied by the Company to all men so employed.

#### POWER PLANT.

SECTION 37. Eight (8) hours shall constitute a day's work to be completed in eight (8) consecutive hours for employees in the water power plant.

SECTION 38. Wood mats and proper insulation shall be supplied at all power houses and sub-stations. Rubber gloves, rubber boots and aprons shall be supplied to men working in the battery room.

#### WAGE RATES.

SECTION 39. The following rates of wages shall be paid from and after May first, 1920, until the termination of this agreement, in place of the rates provided by the agreement entered into and dated from August first, 1919:

#### CONDUCTORS AND MOTORMEN.

First year, 49c. per hour; second year, 51c. per hour; third year, 53c. per hour; fourth year and thereafter, 55c. per-hour.

#### REPAIR SHOP AND SHED MEN.

### Report of Board in dispute between the Ottawa Branch of the Association of Canadian Building and Construction Industries and their carpenters, electrical workers, painters and roofers

**A** REPORT was received from the Board established to deal with the dispute between the Ottawa Branch of the Association of Canadian Building and Construction Industries and certain of their employees, being carpenters, electrical workers, painters and roofers. The application in this instance was made jointly by the employers and employees, and a Board was established composed as follows: Mr. T. A. Beament, Ottawa, chairman, appointed on the joint recommendation of the other two members, Messrs. Chas. Hopewell and Tom Moore, nominees of the employers and employees respectively. The report of the Board was unanimous and contained recommendations as to settlement of the dispute. Advice was later received from both parties that these recommendations were acceptable to them.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between various firms, members of the Ottawa Branch of the Association of Canadian Building and Construction Industries, employers, and certain of their employees, being carpenters, electrical workers, painters and roofers, em-

To the Honourable G. D. Robertson,  
Minister of Labour,  
Ottawa.

The report of Thomas Arthur Beament, Tom Moore and Charles Hopewell, members of the Board of Conciliation and Investigation herein.

The Board of Conciliation herein have the honour to report as follows:

Pursuant to appointment arranged by the members, the Board met at 139½ Sparks street, in the City of Ottawa, at 11 o'clock in the forenoon of Monday, the 17th day of May, 1920, at which meeting all members were present. The parties to the dispute also attended by their representatives, Messrs. G. D. Greene, S. S. Smith, P. Ackroyd and J. R. Douglas, acting on behalf of the employers, and Messrs. P. Leekey, Ernest Inglis, Patrick Greene and Phillip Daly, acting for the employees.

We took evidence submitted by both the employers and the employees, being engaged continuously on the 17th, 18th and 19th days of May, 1920, and heard such argument as either side saw fit to make. Outside of certain working conditions in dispute between Local Union No. 64 and their employers hereinafter referred to, the whole question to be determined is the amount of wages to be paid.

The Board recommends the following rate of wages, namely: carpenters, eighty-five cents (85c.) per hour; electricians (journeymen), eighty cents (80c.) per hour; electricians (improvers), fifty-five cents (55c.) per hour; painters, seventy-five cents (75c.) per hour; roofers, seventy cents (70c.) per hour; roofers' labourers, fifty-five cents (55c.) per hour, as being the rate which the Board thinks ought to be accepted by both parties to this dispute, and should come into effect as of the first day of May, 1920.

It having been reported to the Board that certain working conditions in respect to the roofing trade were in dispute between the employers and employees, we induced the parties to such dispute, namely, Local Union No. 64 of the United Slate, Tile and Composition Roofers, Damp and Water Proof Workers' Association, and the Ottawa Branch of the Association of the Canadian Building and Construction Industries to execute an agreement whereby it was agreed that all such questions should be submitted to the Joint Industrial Council of the Ottawa Building Trades for decision, the decision of which Council should be final and binding upon the

parties, and we enclose herewith the original Agreement covering such matter.

All of which is respectfully submitted.

(Sgd.) T. A. BEAMENT,  
Chairman.

(Sgd.) TOM MOORE.

(Sgd.) CHAS. HOPEWELL.

Dated Ottawa, May 20th, 1920.

MEMORANDUM OF AGREEMENT made this eighteenth day of May, 1920, between Local Union, No. 64, of the United Slate, Tile and Composition Roofers, Damp and Waterproof Workers' Association, Ottawa and District, and the Roofing Employers' Branch (Ottawa) of the Association of Canadian Building and Construction Industries.

The parties hereto hereby agree that all working conditions now in dispute between the parties (other than wages) shall be submitted to the Joint Industrial Council of the Ottawa Building Trades for decision, whose decision on such matters shall be final and binding on both parties.

Local Union No. 64, per  
PHIL DALY,  
President.  
J. R. DOUGLAS.  
H. W. SANDERSON.

### **Report of Board in dispute between the Dominion Power and Transmission Company, Hamilton, and its linemen, operators, metermen, maintenance men, armature winders, pitmen and air brake workers**

**A** REPORT was received from the Board established to deal with the dispute between the Dominion Power and Transmission Company, of Hamilton, Ont., and certain of its employees, being linemen, operators, metermen, maintenance men, armature winders, pitmen and air brake workers, members of Local Union No. 105, International Brotherhood of Electrical Workers. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamil-

ton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. S. Kerr, Hamilton, and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Kerr and contained recommendations as to means of settlement of the dispute. Advice was later received that these recommendations were acceptable to both parties concerned. Mr. Bancroft presented a minority report.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Power and Transmission Company and its Subsidiary Companies, employer, and certain of its employees being members of Local Union No. 105 of the Amalgamated Brotherhood of Electrical Workers of America, employees.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation established by you in this dispute has the honour to report as follows:—

The Board met in Hamilton at the Court House by appointment on the 13th day of May, 1920. All the members were present,—George S. Kerr, K.C., named by the employer; Fred Brancroft, named by the employees, and Colin G. Snider, the chairman.

The Board continued in session on the 14th, 15th, 20th and 21st days of May, 1920. All the members were present at each session and were attended by the representatives of the employer and of the employees. The meetings were all held at the Court House at Hamilton.

The new agreement submitted by the employees was gone over section by section, and conferences were held by the parties at the Board's suggestion on the contested sections, and after evidence, documents and arguments had been presented and considered, an agreement was come to between the representatives of the employer and of the employees on all the sections of the agreement hereto attached, excepting section 30 as to wages, and as to the hours of service on Saturday for linemen, metermen and maintenance men not included in Car Barn Employees, which were left for the decision of the Board as an agreement by the parties could not be secured thereon.

The Board after consideration and discussion of all the material placed

before it failed to arrive at a unanimous conclusion. George S. Kerr and Colin G. Snider agree in recommending the scale of wages set out in Section 30 and the rule as to hours of service on Saturday for linemen, metermen and maintenance men not included in Car Barn Employees set out in the suggested agreement hereto annexed for acceptance by the employer and by the employees as being in their opinion fair and reasonable. The agreement recommended to take effect as of the First of April 1920.

In this majority recommendation as to section 30, scale of wages, and Saturday time Fred Brancroft does not concur and will make a minority report thereon.

All of which the Board has the honour to submit. Dated at Hamilton this 21st day of May, 1920.

(Sgd.) COLIN G. SNIDER,  
(Sgd.) GEO. S. KERR.

### AGREEMENT.

Entered into in duplicate this First day of April, 1920, between Dominion Power and Transmission Co., and its Subsidiary Companies, hereinafter called the Company, of the first part, and certain of its employees, being members of Local Union No. 105, of the International Brotherhood of Electrical Workers of America, as hereinafter specified, Local Union 105, of the second part.

WITNESSETH that on and after the first day of April, nineteen hundred and twenty, the following wage schedule and working conditions arrangements shall take effect and be binding upon the parties hereto and their successors.

### WORKING CONDITIONS.

SECTION 1. It is recognized that the business of this Company is continuous to the extent that they must be ready to serve their customers at any and all hours of each and every day, also that this continuous service requires the attention of certain employees, who relieve each other in such a way that there will at all times be on hand one or more employees to deal with these features of continuous service, requiring attention from time to time. These employees are called "Shift Employees."

SECTION 2. It is also recognized that there are other employees whose work can only be performed during the hours corresponding with shop hours of manufacturing establishments. These employees are named "Other Employees."

## SHIFT EMPLOYEES.

SECTION 3. All Shift employees shall work eight hours per day, and six days per week, except at Stations B. F. S. & St. Catharines, in which hours and days shall remain as at present.

SECTION 4. All branches where three shifts are worked, shifts shall be worked by what is known as The Revolving Watch, 7-15, 15-23, 23-7, two weeks to be the maximum period of shifts.

SECTION 5. When Shift employees are requested by the Company to work longer than the regular time, the Company shall pay overtime at the following rates:—First four hours after the normal stopping time, time and one-half. After four hours, double time shall be paid until relieved.

SECTION 6. Employees late for their work which may prevent others from leaving their posts at the regular shift hours for changing will not be a cause for overtime pay. Overtime pay will only be paid when the Superintendent specially requests the employee to remain longer than shift hours, to assist or relieve other operators or assistant operators.

SECTION 7. Relief operators shall be paid travelling time to be figured from the time train is due to leave or arrive at Terminal Station.

SECTION 8. Relief operators must be journey-men and be paid not less than six days per week.

## OTHER EMPLOYEES.

SECTION 9. Car Barn Employees. During the continuance of this agreement 55 hours per week shall be the working hours for the following employees:—Pitmen, Armature Winders, and Field Makers, Air Brake men, Electric wire and maintenance men at car barns, and their overtime rates shall be time and one-half for all overtime and also for legal holidays. Work on Sundays, which is not overtime, shall be paid at seven cents per hour extra.

SECTION 10. Other employees not included in Section 9. The hours of labour shall be nine hours on every day except Saturdays and Sundays, and Statutory holidays, to be worked between the hours of 7 a.m. and 5 p.m. Saturday hours of labour shall be worked from 7 a.m. till 12 o'clock noon.

SECTION 11. All time worked after the normal stopping time shall be accounted as overtime. Overtime to be paid at the following rate:—Time and one-half up till ten o'clock p.m., and double time after ten o'clock p.m. until relieved. Also double time for all legal holidays and Sundays.

## AGE OF EMPLOYEES.

SECTION 12. No man under the age of 21 years shall be in charge of a shift.

## SENIORITY.

SECTION 13. For Seniority see Section 18.

## REDRESS.

SECTION 14. All differences between the Company and its employees shall be adjusted as follows—Any and all differences or disputes arising between them shall be submitted through the properly accredited representatives of the Association to the General Superintendent of the Company, and if they cannot agree the General Manager may be called into conference.

SECTION 15. In case any member of the Association is suspended or discharged for any cause whatsoever, the Company through its proper officials shall grant an interview to the Grievance Committee, and if upon investigation it is found that the man is not at fault, he shall be reinstated in his former position and paid for all time lost. It is also agreed that when a man is called in to the office for investigation or discipline, he may have the privilege of seeing the Superintendent or other official without the presence of a third party.

## RECOGNITION OF ASSOCIATION.

SECTION 16. The Company shall recognize the employees herein stated as members of Local Union No. 105, and will not discriminate against any employee because of their connection with same.

## LEAVE OF MEMBERS.

SECTION 17. Any member of the Union who might be elected to an office or assigned to any duty by the Union effecting this agreement shall require his or their temporary leave of absence, said leave of absence shall be granted without pay in so far as the regular operation of the plant will permit, and provided a day's notice has been given beforehand to the Superintendent or Foreman, and upon their return they shall be entitled to their respective positions. Leave of absence not to exceed one year.

## SENIORITY AND PROMOTIONS.

SECTION 18. Seniority according to length of service in the Company with efficiency shall be the basis of promotion for shift employees. When it becomes necessary to reduce the number of employees the last man employed shall be the first man laid off. When additions are made to the staff the men laid off shall, if they so desire, be re-employed according to seniority and shall enjoy seniority rights unimpaired because of lay-off.

Any employee voluntarily leaving one Department to go to another Department shall lose his seniority in the Department he has left.

SECTION 19. Time spent in war service of employees shall count as service for promotion, where such men upon their return immediately resume their work with the Company.

SECTION 20. Assistant Operators:—If no promotions after three years' service at Sub-Station A, the rate of pay shall be that of a third year assistant operator. Promotion to operators to take precedence from Sub-Station A. The

senior assistant operator to have preference if he so desires. If he wishes to stay at Sub-Station A. he will revert to the lowest rate of pay in accordance with the rate at Sub-Station A., it being understood that the junior assistant operators will always be at Sub-Station C., and their promotions to Sub-Station A., shall be governed by the seniority clause in this agreement.

#### HOLIDAYS.

SECTION 21. All shift employees shall be allowed one full week's holidays with pay in each year, but no employee shall be entitled to holidays until he has been in Company's service six full months.

#### CLASSIFICATION OF OPERATORS.

SECTION 22. A journeyman operator is an employee having not less than three years' practical experience in the operation of an electrical generating station, or sub-station.

SECTION 23. An apprentice operator is an employee having less than three years' experience in the operation of an electrical generating station, or sub-station.

#### CLASSIFICATION OF LINEMEN.

SECTION 24. All linemen having three years or more experience shall be classed as first-class linemen.

SECTION 25. All linemen receiving first-class linemen's pay must be capable of working on lines carrying from 2,000 to 4,000 volts.

#### CLASSIFICATION OF METERMEN.

SECTION 26. All journeymen must have at least three years' experience in the Meter Department.

#### SPECIAL AGREEMENTS.

SECTION 27. Nothing in this agreement shall be construed to lower the pay of any employee now receiving a higher rate.

SECTION 28. That all employees shall be paid semi-monthly as herein specified.

SECTION 29. Not less than two first-class linemen shall be assigned to work on any line carrying over 600 volts excepting in case of emergency.

SECTION 30. Rates of pay shall be as follows:

#### LINEMEN AND PATROLMEN.

First class.....	66 cents per hour.
Second class.....	60 " "

#### METER DEPARTMENT.

Foreman.....	\$143.75 per month.
Man in charge of Meter Testing.....	138.00 " "
Chief Installer.....	54 cents per hour.
Installer.....	48 " "
Inspector.....	48 " "

#### SUB-STATION DEPARTMENT.

##### MAINTENANCE MEN.

Foreman.....	75 cents "r hour.
4th year men.....	69 " "
3rd year men.....	60 " "
1st and 2nd year men.....	48 " "

##### OPERATORS.

<i>Sub. A.—</i>	
Chief Operator.....	\$138.00 per month.
Second operator.....	132.50 " "
Third Operator.....	126.50 " "
1st assistant.....	120.00 " "
2nd assistant.....	114.00 " "
3rd assistant.....	108.00 " "
Spare assistant.....	96.00 " "
<i>Sub. C.—</i>	
First operator.....	\$126.50 " "
Second operator.....	126.00 " "
1st assistant.....	90.00 " "
2nd assistant.....	90.00 " "
3rd assistant.....	(None). " "
<i>All other Sub-Stations—</i>	
First operator.....	\$126.50 " "
Second operator.....	126.00 " "

##### RELIEF OPERATORS.

Each Relief Operator.....	\$132.50 " "
<i>Operators at DeCew Falls Power House—</i>	
Operators in charge, each...	\$155.25 per month.
1st Wheelmen, each.....	132.25 " "
2nd Wheelmen, each.....	120.00 " "
3rd Wheelmen, each.....	108.00 " "
<i>East End Power Station.—</i>	
First operator.....	\$138.00 per month.
Second operator.....	132.50 " "
Third operator.....	126.50 " "
1st assistant.....	120.00 " "
2nd assistant.....	114.00 " "
3rd assistant.....	108.00 " "
Electrician.....	74 cents per hour.
Journeymen operators.....	126.00 per month.

##### PITMEN.

First year.....	47 cents per hour.
Second year.....	51½ " "

##### ARMATURE WINDERS & FIELD MAKERS.

Each.....	58 cents per hour.
Armature helpers.....	49 " "
Wild, special case, Company to deal with this.	

##### AIR BRAKE MEN.

Each.....	54 cents per hour.
-----------	--------------------

##### ELECTRIC WIRE AND MAINTENANCE MEN IN CAR BARN.

Each.....	58 cents per hour
-----------	-------------------

#### CHANGE OF AGREEMENT.

SECTION 31. This agreement and provisions thereof shall continue in force and be binding upon the respective parties hereto until the first day of April, A.D. 1921.

SECTION 32. In case of failure to adjust any matter of difference under this agreement no cessation of labour shall take place until the highest officials of both parties have met in an endeavour to arrive at a settlement.

(Sgd.) COLIN G. SNIDER.

(Sgd.) GEO. S. KERR.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Power and Transmission Company, employer, and certain of its employees, being linemen, operators, metermen, maintenance men, armature winders, pitmen and air brake workers, members of Local Union No. 105, International Brotherhood of Electrical Workers, employees.

To the Honourable

Senator G. D. Robertson,

Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation and Investigation appointed to consider the differences between the parties to this reference failed to arrive at an agreement in making recommendations on the points left to them by the contending parties.

The representatives of the Company and the employees arrived at a settlement on all points in the schedule, except the parts relating to the rates of wages for all the employees involved, and the hours of labour for maintenance men—who are not included in the car barn employees—and linemen, and metermen. None of the foregoing are included in the car barn employees.

The schedule of working conditions agreed to, either through direct negotiations between the parties or during the proceedings of the Board are attached to the majority report. These have been witnessed, arranged and verified at the subsequent sittings of the Board, and as in the other two cases it is not necessary to repeat them in this report as the three members were present when they were agreed upon by the parties.

The representatives of the Company and the employees agreed upon the following classification for operators, as set out in Sections 22 and 23 of the agreement attached to the majority report as follows:

“A journeyman operator is an employee having not less than three years’ practical experience in the operation of an electrical generating station or sub-station.”

“An apprentice operator is an employee having less than three years’ experience in the operation of an electrical generating station or sub-station.”

The men’s representatives argued that after three years’ service an operator should be classed as a journeyman, and a minimum wage set for a journeyman. To this the Company’s representatives agreed.

The majority members recommend that the monthly rate for a journeyman operator shall be \$126.

The men’s representatives submitted evidence to show that for similar service in Hamilton and vicinity, as near as comparable—and they state the heavier responsibility is on the operators working for this company—the journeyman’s rate is \$135 a month with two weeks’ holiday each year with pay and a forty-eight hour week. The operators in the employ of the Dominion Power and Transmission Company according to the agreement entered into between the two parties, are to have one week’s holidays each year with pay, and in all the stations except B.F.S. and St. Catharines, the operators and all shift employees are to have an eight-hour day for six days a week.

In addition, the majority members’ recommendations for shift employees amount to approximately twenty per cent increase where the monthly rate is under \$100 and fifteen per cent where it is over \$100 a month.

Taking into consideration rates for such work in Hamilton and vicinity, I recommend:

That the journeymen operators’ monthly minimum rate shall be \$150 and all other shift employees to have an increase of \$37.50 a month over present rates.

In regard to the car barn employees in this reference, it was agreed between

the parties that the same hours, overtime rates, legal holiday pay and Sunday rates should prevail as in the case of the shopmen and yardmen. The terms governing these items are set out in the agreement attached to the majority report.

The car barn employees in this reference include pitmen, armature winders and field makers, air brake men, electric wire and maintenance men, and the terms mentioned are set out in Section nine of the agreement.

The majority members dealt with these men in a similar manner as they dealt with the shopmen and yardmen, with a slight variation. Where the wage rate is under 50 cents an hour they added between 15 and 20 per cent in wages per hour, and where the rate is over 50 cents per hour, 15 per cent on the rate per hour.

These employees also worked a ten-hour day, and 60 hours a week as a rule, according to the evidence, and by agreement they obtain a 55-hour week. Therefore, their wages would need to be increased approximately ten per cent before they can receive as much for a regular week's wage as formerly, if the agreement goes into effect. Narrowed down, the increase per week awarded by the majority members to all those who were getting over 50 cents per hour is about five per cent, and those under 50 cents nearly ten per cent advance on a regular week's wages.

The same objection I have raised in the other two reports is raised here. The statement asked for from the company by the chairman, showing the earnings of each employee for one year, according to the evidence, included all the time worked during the year, including extra time and overtime. It is not a fair statement to base regular earnings on. It might fairly be asked if the employees had worked seven days a week for every week in the year, and overtime at night, would the majority have reduced their wages because of the total shown for the year? It would be as logical as the course they did pursue.

These employees accepted similar hours and extra and overtime rates as the yardmen and shopmen, and they are employed in the shops and barns with them.

Taking into consideration the evidence, and the long hours they have worked and the comparative low rates of pay, I therefore recommend:

An increase of pay of sixteen cents per hour over the present hourly rates for these employees, similar to the recommendation made by me in the case of the yardmen and shopmen.

The maintenance men, linemen, and metermen are not included in the car barn employees, and their hours of labour and overtime rates are included in Sections 10 and 11 in the agreement attached to the majority report. The overtime rates were agreed upon, and the men's representatives suggested a nine-hour day, with time and a half overtime rates for Saturday afternoon as a settlement of this point. The majority members, I am pleased to report, agreed to recommend a time and one half rate for Saturday afternoon, and a nine-hour day, and it is so stated in Section 10.

The majority members recommend hourly rates for linemen and patrolmen as follows:

First class . . . . . 66 cents per hour.  
Second class . . . . 60 cents per hour.

The men's representatives produced evidence to show that in similar service in Hamilton and vicinity, linemen receive 65 and 70 cents respectively, and in other places as much, or higher, rates. I therefore recommend for a journeyman lineman or a first class lineman an hourly rate of 80 cents, and for a second class lineman 70 cents per hour.

In regard to the metermen and the maintenance men I recommend an increase to each of eighteen cents per hour over the present hourly rates.

It should also be pointed out that, according to the evidence, the linemen,

metermen and maintenance men also worked as a rule a ten-hour day, and the reduction to a nine-hour day agreed upon will also deduct from their weekly earnings approximately ten per cent.

Where any of the linemen, metermen, or maintenance men are on a monthly basis, their monthly earnings should be increased to correspond with the eighteen cents per hour increase for regular working hours, and it is so recommended.

As all the terms of the schedule agreed upon are to date back to April 1st, 1920, and it was agreed by both parties to this effect, it is recommended that these recommendations date back to April 1st, 1920, in conformity with the agreement.

All of which I have the honour to submit.

(Sgd.) FRED BANCROFT.

Dated May 24th, 1920.

### **Report of Board in dispute between the Dominion Power and Transmission Company, Hamilton, and its shop and yardmen**

**A** REPORT was received from the Board established to deal with the dispute between the Dominion Power and Transmission Company, of Hamilton, Ont., and certain of its employees, being shop and yard men, members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. S. Kerr, Hamilton, and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Kerr and contained recommendations as to means of settlement of the dispute. Advice was later received that these recommendations were acceptable to both parties concerned. Mr. Bancroft presented a minority report.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Dominion Power and Transmission Company, Limited, employer, and certain of its employees being shop and yardmen members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

George S. Kerr, K.C., and Colin G. Snider, two of the members of the Board of Conciliation herein, being the majority of the Board appointed by you, have the honour to report as follows:—

Fred Bancroft, the third member of the Board of Conciliation, does not concur in this report.

The Board met by appointment at the Court House in the City of Hamilton with the representatives of the employer and the representatives of the employees and proceeded to hear evidence, statements and arguments, and succeeded with the representatives in making an agreement upon all the terms of the contract, a copy of which is hereto annexed, except the wages section, being section No. 8, as to which the parties could not agree.

The Board remained in session three days. Having heard the evidence, arguments and statements of the representatives and witnesses of both parties, we, George S. Kerr, and Colin G. Snider, recommend the schedule of wages set out in Section No. 8 of the proposed agreement hereunto annexed for acceptance by the employer and by the employees as being fair and reasonable, having regard to all the facts and statements in evidence before us.

All of which we have the honour to submit.

Hamilton, 19th day of May, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) GEO. S. KERR.

THIS AGREEMENT made this first day of April, 1920, between The Dominion Power and Transmission Company of Hamilton, Ont., its Assignees, Lessees or Successors, (hereinafter called the Company) party of the first part, and The Amalgamated Association of Street and Electric Railway Employees of America, Division No. 107, of Hamilton, Ontario, (hereinafter called the Association), party of the second part.

SECTION 1. That the company through its properly accredited officers will continue to treat with its employees who are members of the Association through the properly accredited officers or representatives of the Association.

SECTION 2. That during the continuance of this agreement the wage scale and hours shall apply to all shop and yard men.

SECTION 3. Fifty-five (55) hours per week shall be the working hours for the following, viz:—Machinists, Machinist Helpers, Blacksmiths, Blacksmith's helpers, Painters, Controller Men, Car Placers, Car Cleaners, Store Men, Pitmen, Carpenters.

SECTION 4. Time and one-half shall be paid for all overtime and also for legal holidays. Work on Sunday which is not overtime shall be paid seven cents per hour extra.

SECTION 5. Any member elected or appointed to an office in the Association shall be permitted to serve in such official capacity without prejudice to his service or line of promotion in the employment of the Company.

SECTION 6. All differences between the Company and the Association shall be adjusted as follows: Any and all differences or disputes arising between them shall be submitted through the properly accredited representatives of the Association to the General Superintendent of the Company, and if they cannot agree the General Manager may be called into conference.

SECTION 7. In case any member of the Association is suspended or discharged for any cause whatsoever, the Company through its proper officials shall grant an interview to the Grievance Committee, and if upon investigation it is found that the man is not at fault, he shall be reinstated in his former position and paid for all time lost. It is also agreed that when a man is called into the office for investigation or discipline, he may have the privilege of seeing the Superintendent or other official without the presence of a third party.

SECTION 8. Schedule of wages recommended.			
Machinists.....	57	cents per hour.	
Machinists' helpers ...	48½	"	"
Blacksmiths.....	56	"	"
Blacksmiths' helpers ...	48½	"	"
Painters.....	48½	"	"
Carpenters.....	57	"	"
Pitmen.....	47	"	" 1st year
Pitmen.....	51½	"	" 2nd year
Controller men.....	51½	"	"
Car placers.....	42½	"	" 1st year
Car placers.....	48½	"	" 2nd year
Car cleaners.....	41½	"	" 1st year
Car cleaners.....	46	"	" 2nd year
Store men.....	48½	"	"

SECTION 9. This agreement and the provisions thereof shall continue in force and be binding on the respective parties hereto for a term of one year from the first day of April, 1920.

In Witness Whereof, the parties have hereunto set their hands.

Signed on behalf of the employer:

.....

Signed on behalf of the employees:

.....

(Sgd.) COLIN G. SNIDER,  
Chairman.  
(Sgd.) GEO. S. KERR.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Power and Transmission Company, employer, and certain of its employees, being shop and yard men, members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable

Senator G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation and Investigation appointed to enquire into the differences between the employees of the Dominion Power and Transmission Company under this reference had to make recommendations covering the wages in the schedule. The wage scale was dealt with in Section 2 of the original pre-

sentation by the employees, and is numbered Section 8 in the majority report, although reference to wages is made in Section 2 of the agreement reached.

Attached to the majority report is the schedule of working conditions agreed to by the parties, either in negotiation, or during the proceedings before the Board. As this agreement was witnessed by the three members and arranged and verified at subsequent sittings, it is needless to repeat it here.

The only question left for the Board to deal with was the rates of wages to be paid to the employees named in the agreement.

This minority report is made for the purpose of taking issue with His Honour Judge Colin G. Snider, Chairman, and George Kerr, K.C., regarding the rates of wages they recommend for the employees. The employees concerned in this reference were, according to the evidence, working ten hours a day, or as a general rule 60 hours a week on an average. Both parties agreed upon a 55-hour week under the new schedule. Approximately this will work out at nearly a ten per cent reduction in the regular weekly wage. It was stated before the Board that the company offered a ten per cent increase. With a slight variation, the increase of ten per cent offered with the reduction in hours would practically give the employees about the same money for a regular week's work, not counting any extra hours worked.

The same objection is raised here as in the street railway case to the method of the majority members in ascertaining the amount of wages earned in a year by these employees. The chairman obtained a statement from the company of the amount each man earned in one year. This is the amount he actually received in a year in wages. This included all time worked. This is an unfair method of computing earnings, because if a man works overtime due to the requirements of the company, his earnings are not regular weekly earnings, no employee can be sure of overtime. It can be cut off at any minute by a change in ar-

rangements, and, in any case, employees have a right to a knowledge of what is a regular day's working hours, and the wages based upon this, but the report of yearly wages including all time worked was used by the majority members, and it was not because of lack of information about it, as the evidence was clearly given about this.

The majority recommendations amount to about fifteen per cent over the present rates per hour paid by the company, and by the agreement about hours, which are set at 55 a week, it means about five per cent increase in the regular weekly wage.

An illustration of this is the lowest paid class of men, the car cleaners:

Present wages.	Majority award.
First year, 36c. per hr.	41½c. per hr.
Second year, 40c. per hr.	46c. per hr.

Sixty hours at 36 cents per hour is \$21.60.

Fifty-five hours at 41.5 cents per hour is \$22.82.

This shows an increase of \$1.22 a week.

The higher skilled mechanics were treated in the same manner, as a glance at the majority recommendations will show.

The majority members didn't allow the fact that the mechanics in these shops did the work for the subsidiary companies of the Dominion Power and Transmission Company as well as the street railway system, to influence them at all, judging by their award. The company's representatives gave this point in evidence too.

The evidence in this case showed that the shopmen and yardmen worked long hours and for comparatively low wages, and for another year the majority members award them about five per cent increase in weekly wages, or thereabouts, to cope with the unprecedented increases in the cost of living.

In my opinion, the majority award is not based upon the increased cost of living since these men last had an increase in pay; it is not based upon the

prevailing rates of pay for similar service in Hamilton, or elsewhere, and has no logical basis in which consideration of the men and their families have a part.

I therefore recommend that the Dominion Power and Transmission Company pay to its machinists and machinists' helpers, blacksmiths and blacksmiths' helpers, painters and carpenters, the union rates per hour being paid to such mechanics in the city of Hamilton, and recognized as such rates by the various international trades unions whose members are mechanics such as are named, and where the union rates are changing, the mechanics involved in this reference shall be paid the new increased rate when it is set, so that the

present union rates will be adjusted to the change.

With regard to the rest of the employees in this reference, who are controller men, car placers, car cleaners and store men, I recommend an increase to each of 16 cents per hour over present rates.

The schedule of working conditions agreed to by both parties provides that the agreement shall date back to April 1st, 1920, and in conformity with that, it is recommended that these recommendations take effect as of April 1st, 1920.

All of which I have the honour to submit.

(Sgd.) FRED BANCROFT.

Dated May 24th, 1920.

#### **Report of Board in dispute between the Hamilton Street Railway Company and its motormen and conductors**

**A** REPORT was received from the Board established to deal with the dispute between the Hamilton Street Railway Company and its motormen and conductors, being members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. S. Kerr, Hamilton, and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Kerr and contained recommendations as to means of settlement of the dispute. Advice was later received that these recommendations were acceptable to both parties concerned. Mr. Bancroft presented a minority report.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Hamilton Street Railway Company, employer, and its motormen and conductors, being members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, employees.

The Honourable

Senator G. D. Robertson,

Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation established by you in this dispute has the honour to report as follows:

The Board met in Hamilton at the Court House by appointment on Thursday, the 29th day of April, 1920, at 10 a.m. All the members were present,

George S. Kerr, K.C., named by the employer; Fred Bancroft, named by the employees, and Colin G. Snider, the Chairman.

The members organized the work in this and two other disputes which were referred to the same Board and filed their oaths of office in each case. Consultation was had as to the order in which the cases should be taken up to suit the convenience of all the parties and it was agreed to proceed with the Street Railway case first.

After considering the proposed agreement, and the parties not being prepared to present their case further, the Board adjourned to Tuesday, the 11th day of May, 1920, at 10 a.m.

On Tuesday, the 11th day of May, 1920, at 10 a.m., the Board again met and continued in session on the 12th and 17th and 18th days of May. All the members were present at each session and were attended by the representatives of the employer and of the employees. The meetings were all held in the Court House at Hamilton.

The new agreement submitted by the employees was gone over section by section and conferences were held by the parties at the Board's suggestion on the contested sections, and after evidence, documents and arguments had been presented and considered, an agreement was come to between the representatives of the employer and of the employees on all the sections of the agreement hereto attached, excepting sections two, as to wages, and three, as to overtime, which two sections were left for the decision of the Board, as an agreement by the parties could not be secured thereon.

The Board after consideration and discussion of all the material placed before it failed to arrive at a unanimous

conclusion. George S. Kerr and Colin G. Snider agreed in recommending the scale of wages set out in section two and the terms as to overtime set out in section three of the suggested agreement hereto annexed for acceptance by the employer and by the employees as being in their opinion fair and reasonable, the agreement recommended to take effect as of 1st April, 1920.

In this majority recommendation as to sections two and three, wages and overtime, Fred Bancroft does not concur and will make a minority report thereon.

All of which the Board has the honour to submit.

Dated at Hamilton, this 18th day of May, 1920.

(Sgd.) COLIN G. SNIDER.

(Sgd.) GEO. S. KERR.

THIS AGREEMENT, made this first day of April, in the year of Our Lord One Thousand Nine Hundred and Twenty, between the Hamilton Street Railway Company (hereinafter called the Company), party of the first part, and the Amalgamated Association of Street and Electric Railway Employees of America, Division Number 107, of Hamilton, Ont. (hereinafter called the Association), parties of the second part.

*Witnesseth*, that in the operation of the line of the party of the first part, both parties hereto mutually agree as follows:

SECTION 1. That the Company, through its properly accredited officers, will continue to treat with its employees who are members of the Association through the properly accredited officers or representatives of the Association.

SECTION 2. That during the continuance of this Agreement the wages scales shall be as follows, for motormen and conductors:

	Per hour.
For the first six months' service....	38 cents.
For the second six months' service..	40 cents.
For the second year .....	45 cents.
For the third year and thereafter...	52 cents.

SECTION 3. Time and one-half for all overtime and also for legal holidays and for work

on Sundays, which is not overtime, 7c. extra is to be paid per hour.

(b) Two hours shall be the minimum amount of time to be allowed for any one run.

(c) A minimum of eight (8) hours and a maximum of nine and one-half (9½) hours, to be completed in the least number of hours possible, shall constitute a day's work in train service.

The party of the first part agrees to make as many straight runs as possible consistent with the necessary service to the public.

All regular men shall as far as possible be allowed at least eight hours' rest before commencing work on the following day.

SECTION 4. When any authorized schedule run is not completed on account of failure or shortage of car equipment, the crew shall be allowed full schedule time for that day.

If time claimed by any motorman or conductor is not allowed, he shall be notified as soon as possible.

SECTION 5. Motormen and conductors shall be paid five cents (5c.) per hour extra for snow ploughs, sweepers, and sand-cars, and shall be supplied with overalls for use on such work.

SECTION 6. Motormen and conductors shall be paid twenty-five cents (25c.) per day or part of day extra for training students.

SECTION 7. All extra motormen and conductors who report at car barn and for relief changes shall be given work or allowed two hours for that day for so reporting.

SECTION 8. All work for extra men shall be divided as nearly as practicable equally among them.

SECTION 9. Each motorman and conductor to hold his promotion in accordance with his continuous age in the service, and to have the right to select his run in accordance with his age in the service of the Company in the following manner:

(a) All runs must be posted for motormen and conductors to make their selection as to the runs they may desire, once in each three months, commencing the first day of January, April, July and October of each year. Should a vacancy occur between the periods of selection, the run will be filled by the first senior man on the extra list during the absence of the regular man. The spare man operating runs of this class shall have the same conditions as the regular men.

(b) As many runs as possible shall be scheduled and divided in runs to be known as "nights off or day runs" and the balance of runs to be known as "nights on runs."

(c) When any change in schedule is made between the period of selection which materially alters the conditions of service, an opportunity will be given to those affected to make a new selection from the schedules that are changed.

(d) Ten minutes at regular schedule rates in addition to their regular schedule time will be allowed the members of each crew reporting for the initial trip of each day on bringing in their car on the last trip of each day to cover the time necessary to inspect cars and make reports.

(e) The Company shall post the quarterly boards in the James Street Office one month before the change takes place. The "nights off" men to sign up for their runs on a day during the second week, to be specified by either the Superintendent or the Association, and the "nights on" men to sign up for their new run on a day during the third week, to be specified by either the Superintendent or officials of the Association, the Superintendent or officials of the Association to have the power to sign up a man that fails to sign on the day specified. Any member who is unable to sign on the specified day to leave a list with the Superintendent or officials of the Association of any runs he may prefer.

SECTION 10. No regular man shall be compelled to do extra work after finishing his day's run if spare men are available, and the Superintendent shall do his best at all times to provide a sufficient list so that regular men will not be required to work extra time.

SECTION 11. Any motorman or conductor wishing to exchange positions shall get permission from the Superintendent, who may allow such exchange.

SECTION 12. Every motorman and conductor who has been continuously in the Company's service for a period of one year shall be supplied with a uniform suit. Material to be selected by the Company and Division 107, upon the following conditions:

(a) The Company agrees to pay one-half the cost of a uniform for each motorman and conductor who has been in the Company's service for a period of not less than one year, and not more than two years, and to provide one uniform per year free to motormen and conductors who have been in the Company's employ for more than two years.

(b) It is further agreed that in case any employee leaves the service of the Company within one month after receiving his uniform, the Company may retain from his wages one-half the cost of the said uniform, and any employee leaving the service of the Company within three months of the time of receiving his uniform, the Company may retain from his wages one-quarter of the cost of said uniform.

(c) Such uniform overcoats as may be necessary will be furnished under the general provisions of the preceding clauses of this Section, except that the Company will not be required in any case to furnish an overcoat oftener than one in two years.

SECTION 13. Conductors to be supplied by the Company with a sufficient quantity of tickets to run their cars. All conductors with

over 2 years' service shall be exempted from being charged interest on bond money.

SECTION 14. In case any member of the Association is suspended or discharged for any cause whatsoever, the Company through its proper officials shall grant an interview to the Grievance Committee, and if upon investigation it is found that the man is not at fault he shall be reinstated in his former position and paid for all time lost. It is also agreed that when a man is called into the office for investigation or discipline, he may have the privilege of seeing the Superintendent or other official without the presence of a third party.

SECTION 15. In cases where an employee is required by the Company to secure evidence in connection with accidents, collisions or for any other cause, or is taken off duty by the Company to give evidence in legal or other matters, the said employee shall be paid for loss of time the same pay he would have received had he been working at his regular employment.

SECTION 16. Any member elected or appointed to an office in the Association shall be permitted to serve in such official capacity without prejudice to his service or line of promotion in the employment of the Company.

SECTION 17. All differences between the Company and the Association shall be adjusted as follows: Any and all differences or disputes arising between them shall be submitted through the properly accredited representatives of the Association to the General Superintendent of the Company, and if they cannot agree the General Manager may be called into conference.

SECTION 18. This agreement and the provisions thereof shall continue in force and be binding on the respective parties thereto for a term of one year from the first day of April, 1920.

*In witness whereof* the parties hereto have hereunto set their hands and seals the day and year first above written.

(Sgd.) COLIN G. SNIDER.

(Sgd.) GEO. S. KERR.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Hamilton Street Railway Company, employer, and its motormen and conductors, being members of Local Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable

Senator G. D. Robertson,

Minister of Labour, Ottawa, Ont.

Sir,

The Board of Conciliation and Investigation appointed to enquire into the differences between the Hamilton Street Railway Company and its motormen and conductors—as set out in their schedule—had the duty of making recommendations regarding two sections of the schedule, namely, Sections two and three. The first covers rates of wages, and the latter, rates for overtime, legal holidays and Sunday work. As indicated in the majority report all other conditions were agreed upon either by negotiations between the representatives of the parties to the dispute, or during the proceedings before the Board. The schedule of conditions agreed to is part of the majority report, and as it has been witnessed by the three members of the Board and verified by them at subsequent sittings, it is unnecessary to repeat the same here.

In making the minority report it is for the purpose of taking issue with His Honour Judge Colin G. Snider, chairman, and George Kerr, K.C., regarding the recommendations they have made.

The rates of pay of the motormen and conductors of the Hamilton Street Railway in April, 1918, were as follows:

First year .....	30 cents per hour.
Second year .....	34 cents per hour.
Third year .....	37 cents per hour.

The foregoing rates commenced on April 1st, 1918, as a result of proceedings before a Board of Conciliation.

It was *eighteen months after this date* before the employees in question received another increase, and in October, 1919,—according to the evidence—the rates were advanced to the following:

First year .....	34 cents per hour.
Second year .....	38 cents per hour.
Third year .....	41 cents per hour.

The increase quoted above, of 4 cents per hour, is the total increase the motormen and conductors in question have received during the last two years.

In addition to this the evidence showed that they worked long hours, comparatively speaking, and these hours were spread over a long period in the day. They have been working—as a general rule—it is declared, ten hours a day at least. It is quite obvious that, at the foregoing rates of wages, it would be necessary for such employees to work long hours to get sufficient money to cope with the increased cost of living. Sixty hours a week at the maximum rate of 41 cents would amount to \$24.60 a week.

In considering the amount of wages earned, in my opinion, the majority members pursued a most unusual course and, in my opinion, a most unfair method. The chairman asked the officials of the company for a statement of the earnings per year for each motorman and conductor, that is, the amount each man drew in actual wages for last year while in the employ of the company. The statement was filed. This statement showed how much each man drew in wages from the company for a year. It indicated in some cases the time several of the men had been absent from duty for some cause or another, but the total amount included all overtime worked by the men, and the overtime, etc., was used to swell the yearly earnings. Of course, it is quite evident that if a man worked 24 hours a day his weekly wages might amount to a considerable sum, even at the low wages paid by the Hamilton Street Railway Company.

The evidence shows, in my opinion, that the conductors and motormen in Hamilton, particularly during 1919, worked long hours for low wages compared with other cities. It is well known that in Toronto, the maximum for the same class of employee was and is, until the agreement expires, 55 cents per hour, and that in Montreal the maximum was and is, until the agreement

expires, 48 cents per hour. In both these places and many other places in Ontario new schedules are being negotiated and the present rates are in a state of change.

In the new schedule of conditions agreed to by both parties, it provides that the working day for a motorman and conductor shall not be less than eight hours and not more than nine and one-half. It was conceded by all that the present hours with the long spreads were too long. Therefore, the employees are to get a shorter work-day. If the car schedules are made for nine hours, the change from (10) ten hours to nine will cut ten per cent, approximately, off the men's wages. It will be necessary, therefore, to add ten per cent to the wages before the men receive as much for a week's wages as they did before.

It was stated before the Board that an offer had been made to the men of about ten per cent, or in round figures, to bring the wages to the following:

First year .....	38 cents per hour.
Second year .....	43 cents per hour.
Third year .....	46 cents per hour.

It will be noticed that if the car schedules are arranged to give the men a nine-hour day, or 54-hour week, this, at the maximum rate of 46 cents per hour offered, would amount to \$24.84.

Therefore, for a 60 hour week at 41 cents per hour (conditions arranged in Oct., 1919), the week's wages would amount to \$24.60. According to the evidence, the foregoing are the conditions until the new schedule changes them.

For a 54 hour week, the company's offer of a maximum of 46 cents would amount to \$24.84, or 24 cents per week more. And these men have only had ten per cent increase in wages in *two years*.

The majority members of the Board recommend the following, and, placed side by side with the company's offer, may be compared:

## Majority award:

First six months ....	38 cents per hour.
Second six months ..	40 cents per hour.
Second year .....	45 cents per hour.
Third year .....	52 cents per hour.

## Company's offer:

First year .....	38 cents per hour.
Second year .....	43 cents per hour.
Third year .....	46 cents per hour.

Apparently, the majority members of the Board decided to give to the motormen and conductors the rates agreed upon between the Dominion Power and Transmission Company (or Hamilton Radial, etc.) and its radial employees, motormen and conductors. The steps from first six months to three years are similar periods, and the rates named are the same in both cases. The majority members here missed out one very important consideration, or failed to understand it, although it was pointed out to them. The agreement of the radial employees provides that, it does not matter how much less than ten hours a day they work, they are guaranteed ten hours' pay. They are guaranteed \$5.20 for every regular day they work, notwithstanding the hours of the scheduled run. Where a run is nine hours and fifteen minutes a day, or less than ten, the conductor and motorman are guaranteed \$5.20 each for it. This agreement was made by the company and the men by direct negotiations between them. It is well known that the schedules of the radial are such as to bring the wages of the conductors and motormen quite a considerable amount above 52 cents per hour for the time worked. The majority thought they were giving the same amounts in wages to the street car men in Hamilton (that is per hour) as the men on the radials, but they didn't. It is well known that a schedule has to be taken as a whole to find out just what amounts in wages are to be paid to the employees.

*The minimum regular day's pay for a conductor or motorman on the Radials is \$5.20. (Third year man.)*

*The maximum regular day's pay for a*

*street car motorman and conductor under the award is \$4.68. (Third year man.) Based on nine hours.*

It was admitted before the Board that the company has a loyal staff of employees, that the relations between them and the company have been good and that the employees had carried out their agreement to the letter, although it had worked adversely against them, due to the unprecedented increases in the cost of living.

*In two years the employees in question had a total increase of ten per cent, according to the evidence.*

The maximum wage for the third year man, awarded by the majority, is 52 cents per hour. It was brought out in the evidence that the city of Hamilton is paying a minimum wage to its labourers of 55 cents per hour, the city of Ottawa 58 cents per hour to its labourers, and the minimum rate for civic employees in Toronto is much higher than either of those two mentioned.

Therefore the majority award does not give the motormen and conductors on the Hamilton Street Railway as much per hour as the city gives its labourers, or as much per hour as the city of Ottawa pays its labourers, and they certainly have not awarded the amount being paid to the radial employees, if it was their intention to do so.

The evidence about the cost of living for a married man and his family in Hamilton evidently failed to impress the majority, judging by the award, although plenty of it was tendered. In my opinion, the majority members were most indifferent to the evidence submitted by the men's representatives, judging by their report. They do not attempt to justify their recommendations in their report.

Taking into consideration comparative wages in various places, the small increase that the men have had in the last two years, the long hours they have worked, and the greatly increased cost of living in that time, I believe the award of the majority altogether insufficient.

I therefore recommend the rates asked for in the schedule presented by the employees, to be included in Section two of the agreement, and which are as follows:

First year ..... 50 cents per hour.  
Second year ..... 55 cents per hour.  
Third year ..... 65 cents per hour.

Regarding Section 3, I recommend that a rate of time and one-half be paid for all overtime, legal holidays, and Sunday work.

It was agreed by both parties that the schedule of wages and conditions were to date back to April 1st, 1920, and it is recommended that these recommendations shall be in conformity with the agreement and date back to April 1st, 1920.

All of which I have the honour to submit.

(Sgd.) FRED BANCROFT.

Dated this day at Oakville, May 22nd, 1920.

### **Report of Board in dispute between the London Railway Commission and certain of its employees engaged on the London and Port Stanley Railway**

**A** REPORT was received from the Board established to deal with the dispute between the London Railway Commission and certain of its employees engaged on the London and Port Stanley Railway, being members of Division No. 745, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. J. M. Campbell, Kingston, and B. W. Bennett, Sarnia, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Campbell, and was accompanied by a proposed schedule covering rates, hours, etc., which the company advised was acceptable to them and that adjustments would be made accordingly. The award was, however, rejected by the men and a strike occurred on May 13. Through the mediation of a departmental officer an adjustment was effected, the men returning to work on May 24. A minority report was presented by Mr. Bancroft.

### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The London Railway Commission, employer, and certain employees of the London and Port Stanley Railway, being members of Division 745 Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable,  
The Minister of Labour,  
Ottawa.

Sir,—

John M. Campbell and Colin G. Snider two of the members of the Board of Conciliation herein, being a majority of the Board appointed by you herein have the honour to report as follows:

Burley W. Bennett the third member of the Board is unable to concur in this report. On Tuesday the 4th day of May, 1920, the Board met in the Public Utilities Building in London and continued in session on the 4th, 5th and 6th days of May, 1920.

The employer and the employees stated to the Board that the only question which the Board is to deal with and report upon is the rate of wages and the date from which the scale recommended by the Board is to commence.

Having heard the evidence, arguments and statements of the representatives and witnesses of both employer and employees, we, John M. Campbell and Colin G. Snider, recommend the scale of wages offered by the employer to the employees, before the application for a Board of Conciliation herein was made, for acceptance by the employer and employees as being in our opinion fair and reasonable having regard to all the facts in evidence before us. The scale of wages now recommended for acceptance is set out in the schedule hereto annexed, marked "A", and we further recommend that this scale of wages shall be retroactive and take effect as of the first day of February 1920.

All of which we have the honour to submit. London, 6th May, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) JOHN M. CAMPBELL,  
for employer.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and the dispute between The London Railway Commission, employer, and certain employees of the London and Port Stanley Railway, being members of Division 745, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To The Hon. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir,—

I cannot agree with the report and recommendation of the Chairman, His Honour Judge Colin G. Snider, and Mr. J. M. Campbell, majority members of the Board of Conciliation appointed by you to inquire into the dispute between the Amalgamated Association of Street and Electric Railway Employees of America being members of Division No. 745, and the London Railway Commission of the London and Port Stanley Railway.

Wages were the only question in dispute between employees and employers, all other questions being settled amicably.

The Board having heard the arguments and compared schedules of employers and employees, I was unable to concur in the report with the majority

members of the Board for the following reasons:

The rate of pay exhibited by the London and Port Stanley Board, in my judgment, was not a fair comparison, being an electrical system, operating single cars with trailers where it required a conductor with each car.

On the other hand those submitted by the employees were mostly identical.

The London and Port Stanley having previously been a steam operated system and paying standard pay, there is no good reason why it should now, with a greatly increased passenger business, pay less than 50 per cent below the trainmen's passenger rates on steam roads, where motive power is practically the only difference, as these trainmen are required to pass rules, inspection, and all other examinations that are required of trainmen. I also consider the comparison submitted by the Employees' Committee of freight train work with that of other roads who are doing identically the same work, fair and just, i.e., car ferry work at Port Stanley with that at Rondeau, and the handling of this traffic over the Division with the exception of the motive power which is steam. It is just as hazardous and requires the same caution and experience.

The linemen's pay is very low compared with that of the Hydro and other companies.

All other employees are equally low with the exception of the clerical department which the representatives of the London and Port Stanley Board admitted were paid standard railway pay and they are not included in the application for the Board.

I cannot, from the evidence received and in consideration of the cost of living, understand how any fair tribunal can report a salary of \$75 per month for a man, no matter what his occupation is, to support a family on, as being fair and reasonable. I consider it unfair and extremely unjust.

I therefore, submit the following scale of wages, to apply to the different departments, which in my opinion are more fair and reasonable having regard for all the facts and practical knowledge

submitted, which is fifteen cents per hour increase over the old rates, and I further recommend that these rates of pay should be retroactive and take effect from Feb. 1st., 1920.

To which I have the honour to submit.

Sarnia, May 8, 1920.

(Sgd.) BURLEY W. BENNETT.

# SUMMARY OF PROCEEDINGS UNDER THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

THE tables presented below summarize the proceedings under the Industrial Disputes Investigation Act, 1907, for the fiscal year ending March 31, 1920, and from March 22, 1907, to March 31, 1920.

I.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM APRIL 1, 1919, TO MARCH 31, 1920.

Industries affected.	No of Applications for Boards received.	No. of Boards established.	No. of strikes not averted or ended.
<b>I.—Disputes affecting Mines, Transportation and Communication and other Public Utilities:—</b>			
(1) Mines:—			
(a) Coal.....	9	8	1
(b) Metal.....	1	1	0
Total Mines.....	10	9	1
(2) Transportation and Communication:—			
(a) Railways.....	10	6	0
(b) Street Railways.....	19	16	1*
(c) Express.....	2	2	1*
(d) Shipping.....	4	1	0
(e) Telegraphs.....	3	2	0
(f) Telephones.....	2	1	0
Total, Transportation and Communication.....	40	28	2
(3) Miscellaneous:—			
Light and power.....	2	1	0
Total Mines, Transportation and Communications and Public Utilities.....	52	38	3
<b>II. Disputes not falling clearly within the direct scope of the Act:—</b>			
(1) Public Utilities under Provincial or Municipal Control:—			
(a) Street Railways.....	3	2	0
(b) Other civic employees.....	6	4	0
(c) Light and power.....	3	1	0
Total Public Utilities under Provincial or Municipal control.....	12	7	0
(2) Miscellaneous.....	13	6	0
Total Disputes not falling clearly within the direct scope of the Act.....	25	13	0
Total all classes.....	77	51	3

\*Reference to Board procedure in these cases appears in the report of proceedings for the fiscal year ending March 31, 1919, the industries concerned being the Sandwich, Windsor and Amherstburg Railway Company, and the Canadian Express Company, respectively.

The proceedings under the Act during the year include five cases in which certain proceedings had taken place during the preceding year, namely, dispute between (1) the Montreal Light, Heat and Power Company and certain of its employees; (2) the Canadian National Railways and certain employees in the cartage service at Winnipeg; (3) the

Montreal Tramways Company and certain of its employees; (4) the Sandwich, Windsor and Amherstburg Railway Company and certain of its employees, and (5) the Dominion Power and Transmission Company, Hamilton, Ont., and certain of its employees.

At the close of March, 1920, results were still pending in connection with six

applications concerning disputes between (1) the Canadian National Railway and certain of its employees at Halifax, N.S.; (2) the Grand Trunk Railway Company and its clerks, etc.; (3) the Corporation of Ottawa and its civic employees; (4) the Canadian Fish and

Cold Storage Company, Prince Rupert, B.C., and its fish packers; (5) the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, and certain of its employees, and (6) the Inverness Coal and Railway Company, Inverness, N.S., and certain of its employees.

II.—TABLE SHOWING PROCEEDINGS BY INDUSTRIES FROM MARCH 22, 1907, TO MARCH 31, 1920.

Industries affected.	No. of applications for Boards received.	No. of strikes not averted or ended.
I.—Disputes affecting Mines, Transportation and Communication, Other Public Utilities and War Work:—		
(1) Mines:—		
(a) Coal.....	58	7
(b) Metal.....	18	5
(c) Asbestos.....	1	0
Total Mines.....	77	12
(2) Transportation and Communication:—		
(a) Railways.....	135	7
(b) Street Railways.....	71	4
(c) Express.....	9	1
(d) Shipping.....	20	0
(e) Telegraphs.....	12	1
(f) Telephones.....	6	0
Total Transportation and Communication.....	253	13
(3) Miscellaneous:—		
(a) Light and Power.....	9	0
(b) Elevators.....	1	0
Total Miscellaneous.....	10	0
(4) War work.....	30	1
Total Mines, Transportation and Communication, other Public Utilities and War Work.....	370	26
II.—Disputes not falling clearly within the direct scope of the Act:—		
(1) Public Utilities under Provincial or Municipal Control.....	40	1
(2) Miscellaneous.....	36	0
Total disputes not falling clearly within the direct scope of the Act.....	76	1
Total all classes.....	446	27

The figures contained in the above table may be thought to show discrepancies as compared with those appearing in the yearly summary. A closer examination will, however, show the statements of both classes to be in agreement. A complete statement of proceedings for a year must show all disputes dealt with during the fiscal year. The figures of the yearly statement include, therefore, disputes carried over from the previous

year and which are counted in the summary of that year's proceedings. Thus the same dispute may properly figure in the annual statement for each of two years. In the statistical recapitulation covering several years, as above, it is necessary that no dispute shall be counted more than once, and account is taken of the number of applications received during the year and thus brought within the purview of the statute.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**T**HE Department has received three new decisions of the Canadian Railway Board of Adjustment No. 1. Case No. 77 has reference to a claim of a passenger crew of the Toronto, Hamilton and Buffalo Railway for payment for certain work at yard rates. Case No. 78 relates to a claim of a freight pool crew of the Toronto, Hamilton and Buffalo Railway for a run-around. Case No. 79 arose from the placing of demerit marks against the record of an engineer on the Canadian Pacific Railway for alleged failure to make a proper inspection of his engine.

**Case No. 77.—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors, and the Brotherhood of Railroad Trainmen.**

A conductor and his train crew, of the Toronto, Hamilton and Buffalo Railway, who were in assigned passenger service, handled a special passenger train between their regular runs, from the interchange track of the Grand Trunk Railway into the station at Hamilton, and back to the interchange point. The time consumed in this work was two hours and forty-five minutes, which was applied against the monthly guarantee for the various members of the crew. The crew presented a claim for two hours and forty-five minutes at yard rates under Article 20 of their wage schedule, but this was declined. The employees contended that this was purely yard service performed between one yard and another at Hamilton, and that according to Article 20, "For train service performed between one yard and

another at Hamilton trainmen will be paid yard rates per hour for the time occupied, and the minimum shall be one hour. The application of this Article is limited to the movement of rush cars within the terminals, after arrival of the crew at Hamilton. Road crews on duty 9½ hours or more will not be required to handle such cars." The Company contended that the service performed by this conductor and crew was strictly passenger service, and that Article 20 quoted above was strictly applicable to freight train crews and had no bearing whatever on the question at issue, and that this article was put in the contract to limit the use which could be made of freight crews after their arrival at Hamilton on completion of their road trip.

The Board declared its opinion that the particular service referred to was special passenger service, and under the application of the provisions of Supplement No. 16 to General Order No. 27, of the Director General, United States Railroad Administration, such extra service may be required sufficient to make up the guarantees named in the Supplement.

The Board gave the following decision: "The contention of the Company is sustained, in so far as it applies to the case in question."

**Case No. 78.—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

A train crew running in freight pool on the Toronto, Hamilton and Buffalo

Railway completed their trip at Hamilton at 5.30 a.m., on November 19 last, and stood first pool crew out. An extra was ordered for 10.30 a.m. on that day, the crew being required to report at 10 a.m. A spare crew was called to handle this train, and the other crew claimed a run-around for failure to use them. The Company declined to give the run-around and stated that the spare crew was used on account of the other crew not having had sufficient rest. The men of this crew, however, claimed that as they did not work at all on November 17, and only worked nine hours altogether on November 18 and 19, their physical condition would have allowed them to perform this service. It was contended that this claim was in accordance with clause 28 of the Schedule which provides that "The regular pool will be kept at a point where crews can make all the mileage consistent with safety and good service, with a minimum of 2,600 miles per month." The crew did not book rest on arrival, and from November 1 to 18 they had only made 1,675 miles, and should therefore be paid a run-around in accordance with Clause 21 which reads: "When unassigned crews are available and are run-around at terminals, they will be paid 50 miles for each run-around and hold their turn out." The case for the Company was set forth as follows: "The practice of allowing pool crews an interval of 8 hours between trips was first brought about by the chairman of the Trainmen's Committee making protest that the pool crews were being allowed to turn in and out of Hamilton on short rest to the detriment of spare board crews who are available and had their proper rest. Consideration was given to this protest, and it was de-

cided that the allowance of 8 hours, whenever possible, "would be consistent with safety and good service," as provided in Article 28, and this practice has been followed since the spring of 1919. This question arose during the negotiations incident to the adoption of Supplement No. 16 in June, 1919, the record of that Conference indicating that the chairmen of the Conductors and the Trainmen differed on the question, and they were asked to confer, and make their desires known to the Trainmaster at a later date, so that some arrangement agreeable to all parties might be made. Nothing further was heard on this question until the run-around claim above mentioned was presented. Conductor H— earned 2,983 miles during the month of November; he booked off one day, November 17, on his own account." The Company further contended that it was never the intention to turn crews out after completion of a road trip without reasonable rest when spare crews were available who have had proper rest, and that this contention was supported by that portion of Article 28 reading as follows: "There may be a regular pool maintained and an extra list. The regular pool will be kept at a point where crews can make all the mileage consistent with safety and good service with a minimum of 2,600 miles per month."

The Board declared that it fully appreciated the importance, in the interest of safe and efficient performance, of employees having sufficient rest before being called upon to perform service. However, in the absence of any specific rule to govern, and in view of the fact that Conductor H— and his crew did not work on November 17, that they performed only nine hours' service dur-

ing November 18 and 19, and were off duty for four and one-half hours previous to the time they would have been required to again report for duty at 10.00 a.m., November 19, it is believed they could consistently be regarded as subject to call for further duty at the time specified.

The claim of the employees was therefore sustained.

**Case No. 79.—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Locomotive Engineers, and the Brotherhood of Locomotive Firemen and Enginemmen.**

Five demerit marks were placed against the record of an engineer of the Canadian Pacific Railway for failure to detect a pin working out of the cross equalizer on his engine when inspecting it on February 4, 1919, at North Bend. After leaving the shop track he detected the pin working out, and the engine had to go back to the shop. The contention of the Company was stated as follows: "Rule No. 1. 'Duties of Locomotive Engineers,' Enginemmen's Schedule, calls for engineers to make a careful outside inspection of their engine on arrival at terminal, and when opportunity offers on the run; also Article 33, Clause A, covers inspection outgoing. The defect in the case of engine 3539 was not discovered by Engineer C—in his inspection after arrival at terminal or in his inspection prior to leaving shop tracks on outgoing trip. The pin in question can be readily seen and inspected by outside inspection, it not being necessary to get underneath the engine to make the inspection; in fact, this particular part can be seen better from the outside than the inside."

The employees contended that the cross equalizer pin was inside inspection, and Rule No. 1, defining the duties of engineers, only required outside inspec-

tion. The understanding of the men in regard to outside inspection was that they were only required to inspect outside the frame of the locomotive, and that inside the frame and underneath would be inspected by the shop staff when the engine was on the pit. When the engine arrived at North Bend it was dark and frosty, and steam was blowing from the relief valve. Under these conditions in an engine of this class it would be almost impossible to see the pin by torchlight on account of the valve stem crosshead guides. The men expressed the opinion that instead of having demerit marks placed against his record the engineer should be commended for his alertness in detecting a defect that should have been noticed and repaired when the engine was in the roundhouse.

In its general statement the Board declared that in the presentation of additional evidence and information, it developed that the real point at issue was not so much as to the discipline applied, but rather the proper interpretation of schedule conditions with respect to inspection of locomotives by engineers.

The decision of the Board was as follows:

The Board decides that, under the Schedule Rules, engineers should properly be held responsible for inspection of such parts of engines as can be seen by inspection made on going around engines. The application of discipline for failure to detect defective parts on such inspection should, of course, be governed by the consideration of all the conditions affecting each specific case, such as weather conditions, impossibility of proper view of defective parts in certain positions of engines, time available for inspection, etc. Neither of the parties having argued specifically with respect to the matter of discipline applied in Engineer C's case, it is suggested by the Board that, with its decision as rendered on the general question at issue, it should be possible for the parties to dispose of this matter between themselves, giving full consideration to all the conditions affecting it.

## STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1920

**FIFTY-THREE** strikes, involving about 9,196 employees, were reported as having commenced during May. There were in existence at some time or other during the month 73 strikes, involving about 12,005 workpeople. The total time loss on account of industrial disputes was estimated at 145,168 working days, as compared with 84,099 in April and 849,676 in May, 1919. The time loss occasioned by the 53 strikes which began in May was 114,698 working days, while a loss of 30,470 is charged to the 20 strikes that commenced prior to May. Termination was reported in the case of 11 disputes which commenced prior to May. Thirty five of the disputes commencing during May terminated during the month,

leaving the following 27 strikes affecting approximately 4,502 workpeople on record on May 31: Loggers, North Vancouver and Union Bay; miners, South Minto; pottery workers, St. Johns; carpenters, Campbellton, N.B.; plumbers and steamfitters, Stratford; electric workers and machinists and toolmakers, Peterborough; labourers and helpers and moulders, Montreal; machinists, St. John, Owen Sound, and Sydney; moulders, Brantford, Dundas and Hamilton; moulders and patternmakers, Toronto; shipbuilders, Port Arthur; garment workers, Montreal; bakers, New Westminster, Ottawa, Vancouver and Victoria; cigarmakers, Toronto; sugar refinery workers, Montreal; glass workers, Toronto; and tire builders, Guelph.

## Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—There were three loggers' strikes in this group during the month. Two of these—at Union Bay and North Vancouver—because of alleged camp conditions, were untermminated at the end of the month. In all three, there were 153 employees involved with an approximate time loss of 2,973 working days.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The chief strike in this group was that of 400 miners in the metalliferous mines of the Slocan district, B.C. About 25 firms, including producing mines and prospects, were involved. The dispute was caused by the refusal of the companies to meet the demands of the One Big Union for a general increase of \$1 per day. After about a week of strike conditions, one mine effected a settlement with its employees on the basis of an increase of 50 cents per day. On May 12, the operators of the Slocan

field and the representatives of the International Union agreed upon a new wage scale providing an increase of 75 cents per day. The One Big Union was not recognized in this agreement. A two-day strike of 200 miners and shippers because of the discharge of certain employees occurred at Mountain Park, Alta., on May 14. The strike of miners at Alice Arm terminated on May 19, after about a month's duration. The strike situation at South Minto remained unchanged. At the end of the month, the situation in this group was 5 strikes involving 794 employees and a time loss of 8,390 working days.

**BUILDING AND CONSTRUCTION.**—The strike of building trades in Ottawa, commencing on May 1, involved 648 employees in the carpentering, electrical, painting and roofing crafts. It was, primarily, a strike for increased wages, although the enforcement of the closed shop principle to the extent of union foremen determining the necessity of overtime, was also an issue in the early negotiations on working conditions. The above-named crafts resumed work on May 17 when the dispute was re-

ferred by mutual consent to a Conciliation Board, appointed by the Minister of Labour. The award of this Board was unanimous and proved acceptable to the parties in dispute. Particulars of the award appears in the article in this issue on the Industrial Disputes Investigation Act. A strike of the building trades in Moncton, involving 450 employees, lasted a week. Three crafts were involved in the demand for increased wages. A Departmental officer assisted in bringing about a renewal of negotiations and a compromise resulted. Demanding an increase of \$1 per day of eight hours, making a wage of \$9 per day—about 200 bricklayers were on strike for five days at Vancouver. A settlement was reached on the basis of \$8.50 per day from May 1, and \$9 per day from July 15 to January 15, 1921. In lesser degree, there was strike activity in the building trades at Campbellton, Windsor, Sudbury, Kingston, Stratford and Welland. The strike of painters and decorators at Windsor terminated about the middle of the month. The month showed in the group, 15 strikes, involving 2,041 employees with time losses estimated at 24,620 working days.

**METALS, MACHINERY AND CONVEYANCES.**—Under this classification, there were 21 strikes, involving 4,860 employees, with an approximate time loss of 64,597 working days. One of the largest strikes in this group was that of 675 machinists and toolmakers at Peterborough, which commenced on May 6 and which was followed by a strike of 130 electrical workers in the same plant on May 18. The machinists and toolmakers demanded an 80 cents per hour minimum and a 48-hour week. The schedule prevailing prior to the strike ranged from 55 cents to 75 cents per hour for machinists, while some toolmakers were getting 80 cents per hour for a 50-hour week. An officer of the Department visited Peterborough and endeavoured to effect a settlement but without success. Eventually the municipality, acting under Sec. 63a of the Industrial Dis-

pute Investigation Act, made application for a Board of Conciliation and Investigation, and a Board was at the close of the month in course of establishment. As a result of refusal of their demand for increases in wages averaging about 30 per cent and an 8-hour day, 1,000 shipyard employees went on strike at Port Arthur on May 15. Before striking, the employees signified their willingness to have the matter referred to a Conciliation Board. A Board could be, however established only in joint consent, the industry not being a public utility. The company declined, claiming that it would be unable to operate and to make further increases. A representative of the Department visited the scene of this dispute and succeeded in postponing action. A strike finally resulted and was unterminated at the end of the month. Other strikes of machinists and metal workers occurred at Toronto, Hamilton, Montreal, Dundas, Welland and Owen Sound. The strike of shipbuilders at Three Rivers terminated on May 17.

**WOODWORKING.**—A four-day strike of 250 cabinet makers occurred in Montreal over wage demands. The employees demanded an increase of 10 cents per hour over the rate of 65 cents per hour. After negotiations, the firms involved agreed to a rate of 70 cents and 75 cents per hour. About 150 piano workers at Therese, Que., were on strike for union recognition and increased wages. This strike was reported terminated on May 27.

**PULP AND PAPER.**—Employees in a pulp and paper mill at Three Rivers claimed to have been locked out over the principle of union recognition. About 735 were involved in this dispute which terminated on May 25 as a result of departmental intervention. After about a month's duration, the strike of 200 employees of the Bromptonville Pulp plant, terminated on May 24, also, through the intervention of the Department.

**CLOTHING.**—Garment workers in Montreal and shoe workers in Chambly Canton were on strike during the month. In the former case, the cause was an

## STRIKES AND LOCKOUTS DURING MAY, 1920

Industry or Occupation.	Particulars.	No. of employees affected	Time loss in working days.
<b>Strikes commencing prior to May, 1920</b>			
<b>LUMBERING—</b>			
Loggers, North Vancouver, B.C.....	Commenced April 24. Alleged complaints against food and cook. Terminated.	65	1,625
Loggers, Qualicum Beach, B.C.....	Commenced April 26. Against discharge of employee, and for increased wages. Settled by negotiations; work resumed May 3.	18	18
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Miners (Labourers), Alice Arm, B.C.....	Commenced April 22. For increased wages and improved conditions. Settled by negotiations; work resumed May 19.	150	2,250
Miners, South Minto, N.B.....	Commenced December 6, 1919. For increased wages and improved working conditions. Terminated.		
Pottery Workers, St. Johns, Que.....	Commenced November 1913. Against a reduction in wages. Terminated.	34	
<b>BUILDING AND CONSTRUCTION—</b>			
Painters, paperhangers and decorators, London, Ont.	Commenced March 1. For increased wages. Settled by mediation; practically all strikers working about end of May.	4	100
Painters and decorators, Windsor, Ont.....	Commenced April 1. For increased wages. Information received indicates work was resumed about May 14.	87	957
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Labourers, draw bench operators and mill rollers, Lachine, Que.	Commenced April 28. For increased wages. Settled by negotiations; work resumed May 10.	200	1,400
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Terminated.	25	625
Machinists, Sydney, N.S.....	Commenced April 22. For increased wages and shorter hours. Terminated.	150	3,750
Metal polishers and buffers, Peterborough, Ont	Commenced April 10. For increased wages. Settled by negotiations; work resumed May 18.	19	285
Moulders, Brantford, Ont.....	Commenced May 1, 1919. For increased wages. Terminated....	5	125
Moulders, Hamilton, Ont.....	Commenced May 5, 1919. This strike had been removed from the Department's record, but later information indicates it still exists in a few establishments. Terminated.	17	
Moulders and coremakers, Sherbrooke, Que..	Commenced September 23, 1919. For increased wages. Information received in the Department indicates firms involved have succeeded in filling strikers' places.		
Moulders and patternmakers, Toronto, Ont..	Commenced May 1, 1919. For increased wages and shorter hours. Terminated.	22	550
Shipbuilders, Three Rivers, Que.....	Commenced April 19. For increased wages. Settled by negotiations; work resumed May 17.	800	10,400
Shipbuilders, Three Rivers, Que.....	Commenced April 28. A press report states cause to be company's refusal to accede to employees' demands. Firm alleged interference from International headquarters in refusing to authorize signing of schedule. Settled by negotiations; work resumed May 3.	800	800

## STRIKES AND LOCKOUTS DURING MAY, 1920—Continued.

Industry or Occupation.	Particulars.	No. of employees affected.	Time lost in working days.
WOODWORKING— Piano workers, St. Thérèse de Blainville, Que.	Commenced April 21. For increased wages and recognition of the union. Settled May 27.	150	3,450
PULP AND PAPER— Pulp and paper workers, Bromptonville, Que.	Commenced April 19. For improved working conditions. Settled by mediation of Department of Labour; work resumed May 24.	200	4,000
TEXTILES— Weavers, Amherst, N.S.	Commenced April 14. Owing to discharge of employee. Information received would indicate conditions no longer affected		
TRANSPORTATION— Dairy drivers, Toronto, Ont.	Commenced April 29. For increased wages. Settled by mediation of the Department of Labour; work resumed May 3.	60	60
MISCELLANEOUS— Film revisors and shippers, Toronto, Ont.	Commenced February 26. For increased wages. Information received in the Department indicates conditions are no longer affected and the strike was declared off.		
Tire builders, Guelph, Ont.	Commenced April 12. For increased wages on piece work. Un-terminated.	3	75
<b>Strikes commencing during May, 1920</b>			
LUMBERING— Loggers, Union Bay, B.C.	Commenced May 8. For improved camp conditions. Unterminated.	70	1,330

Shoe workers, Chambly Canton, Que.....	Commenced May 3. For increased wages. Settled by mediation; work resumed May 10.	95	523
<b>TEXTILES—</b>			
Corders, Magog, Que.....	Commenced May 3. Against employment of particular persons. Settled by negotiations; work resumed May 11.	71	497
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Bakers, Montreal, Que.....	Commenced May 4. For increased wages. Settled by negotiations; work resumed May 11.	40	240
Bakers, New Westminster, B.C.....	Commenced May 8. For increased wages. Underminated.....	7	133
Bakers, Ottawa, Ont.....	Commenced May 2. Alleged refusal on part of master bakers to sign a closed shop agreement. Underminated.	45	1,125
Bakers, Vancouver, B.C.....	Commenced May 1. For increased wages and a demand that an agreement be signed. Underminated.	110	2,860
Bakers, Victoria, B.C.....	Commenced May 1. For increased wages and a new agreement. Underminated.	28	728
Bakers and cake helpers, Hamilton, Ont....	Commenced May 3. For increased wages. Settled by negotiations; work resumed May 11.	92	736
Bakers and helpers, Halifax, N.S.....	Commenced May 3. For increased wages. Settled by negotiations; work resumed May 25.	90	1,620
Cigar makers, Toronto, Ont.....	Commenced May 12. For increased wages. Underminated.....	100	1,500
General provision store workers, Quebec, Que.	Commenced May 1. Alleged discrimination against union officials. Settled by negotiations; work resumed May 10.	34	255
Meat packers and butcher workmen, Peterborough, Ont.	Commenced May 1. For increased wages. Settled by negotiations; work resumed May 10.	140	980
Sugar refinery workers, Montreal, Que.....	Commenced May 17. For increased wages and shorter hours. Underminated.	1,300	15,600
<b>TRANSPORTATION—</b>			
Street railway employees, London, Ont.....	Commenced May 1. For increased wages. Settled through intervention of Ontario Railway Board; work resumed May 6.	240	1,200
Street railway employees, London, Ont.....	Commenced May 14. For increased wages. Strikers accepted the award of a Board of Conciliation; work resumed May 24.	92	920
Coastal seamen, Vancouver and Victoria, B.C.	Commenced May 7. For increased wages, improved working conditions and recognition of the union. Settled by mediation of Department of Labour; work resumed May 31.		
<b>MUNICIPAL EMPLOYMENT—</b>			
Carters, St. Hyacinthe, Que.....	Commenced May 1. Against a reduction in wages. Settled by negotiations; work resumed May 6.	10	40
Labourers, Quebec, Que.....	Commenced May 1. For increased wages. Settled by negotiations; work resumed May 5.	70	210
<b>MISCELLANEOUS—</b>			
Glass workers, (Bevel), Toronto, Ont.....	Commenced May 1. For increased wages. Underminated.....	52	1,300
Photo engravers, Winnipeg, Man.....	Commenced May 27. For increased wages. Settled by negotiations; work resumed May 31.	50	150

alleged broken contract and in the latter for increased wages.

**TEXTILES.**—A strike of 71 carders in a textile plant at Magog, Que., commenced on May 3 because of the company's refusal to re-employ a discharged foreman. After being a week on strike the employees resumed work under the new foreman. Latest information indicated that the strike of 150 weavers at Amherst which commenced on April 14, was terminated.

**FOODS, LIQUORS AND TOBACCO.**—This group during the month showed a total of 11 strikes, involving 1,986 employees with an approximate time loss of 25,777 working days. The strike involving the greatest time loss was that of 1,300 sugar refinery workers at Montreal. This strike commenced on May 17 and was untermiated at the end of the month. The employees' demands are for a fifty-hour week at a rate of 50 cents per hour. The rate had been 34 cents per hour with a 72-hour week. Seven strikes in the bakery industry commenced during the month at Montreal, New Westminster, Ottawa, Vancouver, Victoria, Hamilton and Halifax. These strikes were for increased wages with the exception of that in Ottawa where the cause was the alleged refusal of the master bakers to sign a closed shop agreement.

**TRANSPORTATION.**—There were during the month at London, two strikes in the street railway industry. Both the London Street railway and the London and Port Stanley street railway employees were involved. On May 1, 290 London street railway employees struck for an increased wage rate of 21 cents per hour. The men resumed work a few days later pending the conciliation award of the Ontario Railway Board. On May 13, 92 employees of the London and Port Stanley road went on strike for a 25 cents per hour increase. Work was resumed on May 24, the employees accepting the award of a Conciliation Board appointed by the Department. Coastal seamen at Victoria and Vancouver were on strike during the month. The strike was settled by Departmental intervention on May 31.

**MUNICIPAL EMPLOYMENT.**—Carters in St. Hyacinthe and labourers in Quebec were on strike, the former against a reduction in wages and the latter for an increase. Both were settled by direct negotiations.

**MISCELLANEOUS.**—A strike of 52 glass workers at Toronto and of 50 photo engravers in Winnipeg, both for increased wages, commenced on May 1 and May 27 respectively. The former was untermiated, but the latter was settled at the close of the month.

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING APRIL, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during April, 1920, based on returns from employers and workpeople are taken from the May issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION**—The number of trade disputes reported to the Department as beginning in April was 134, as compared with 184 in the previous month, and 85 in April, 1919. In these new disputes nearly

88,000 workpeople were directly and over 4,000 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition over 47,000 workpeople were involved, either directly or indirectly, in 84 disputes which began before April, and were still in progress at the beginning of that month. The total number of disputes in progress in April was thus

218, involving about 140,000 workpeople as compared with about 134,000 workpeople involved in disputes in progress in March, 1920, and about 106,000 in April, 1919. Stoppages of work in Ireland and at Liverpool not caused by trade disputes are excluded from these statistics.

The following table classifies the disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during April in all the disputes in progress:—

Groups of trades	Number of Disputes.			Number of workpeople involved in all disputes in April.	Aggregate loss of working days during April.
	Started before 1st April.	Started in April.	Total.		
Building.....	9	13	22	3,000	40,000
Mining and Quarrying....	10	11	21	74,000	293,000
Metal, Engineering and Shipbuilding.....	14	31	45	15,000	97,000
Textile and Clothing.....	8	19	27	9,000	102,000
Transport.....	8	15	23	21,000	127,000
Woodworking and Furnishing.....	13	8	21	10,000	152,000
Other Trades...	22	37	59	8,000	69,000
Total, April, 1920.....	84	134	218	140,000	880,000
Total March, 1920.....	58	184	242	134,000	788,000
Total, April, 1919.....	43	85	128	106,000	473,000

Of the 870,000 working days lost in April by all disputes in progress, nearly 399,000 were lost by disputes which began before April, and were still in progress at the beginning of that month, and nearly 482,000 by disputes which began in the month.

CAUSES.—Of the 134 new disputes, 74, directly involving nearly 32,000 workpeople, arose on demands for advances in wages; 15, directly involving over 13,000 workpeople, on other wages questions, 19, directly involving nearly 5,000 workpeople, on questions respecting the employment of particular classes or persons; 15, directly involving about 3,000 workpeople, on questions of Trade Union principle; 3, directly involving about 31,000 workpeople, in sympathy with other disputes; and 8, directly involving about 4,000 workpeople, on other questions.

RESULTS.—During the month settlements were effected in the case of 61 new disputes, directly involving about 64,000 workpeople, and 35 old disputes, directly involving 5,000 workpeople. Of these new and old disputes, 19, directly involving over 32,000 workpeople, were settled in favour of the workpeople; 22, directly involving about 16,000 workpeople, in favour of the employers; and 55, directly involving over 20,000 workpeople, were compromised. In the case of 29 other disputes directly involving over 7,000 workpeople, work was resumed pending negotiations.

## FRENCH GOVERNMENT OPPOSES DIRECT POLITICAL ACTION BY TRADE UNIONS

**A** GENERAL strike of French labour unions was called on April 29 by the General Federation of Labour, to begin on May 1 with a walk-out of railwaymen, transport workers and seamen, and later to be continued in "waves" as the executive council of the Federation should call out the workers in other trades. The general strike order was issued in support of the Railway Federation, which had in any event decided on a strike of its own workers to begin on May 1, in order to enforce their demand for the nationalization of public utilities, and labour representation on all public commissions and commissions dealing with transportation and other public services. Opinion in the General Federation was divided as to the wisdom of declaring a general strike in support of the railwaymen, but finally the "moderates," including Leon Jouhaux, secretary general of the Federation, were over-ruled by those who held the occasion opportune for a decisive fight for the realization of the general political aims of French labour. From the first the government, which had a new plan in preparation for the control of public utilities, regarded the strike as having political rather than industrial motives and held that the General Federation in ordering a strike for political objects exceeded the limits of the purpose for which it was organized in 1884, namely "to study the economic interests of the unions and syndicates and their defence," and that there could therefore be no compromise between the government of the French people and the General Federation which sought to dictate to the government. "This power [the General Federation]," declared Premier Millerand, "professes to put itself against the public powers and to obtain its objects by stopping the life of the country and by profoundly disturbing

its habits, needs and interests." The Premier, however, stated that "the government does not intend to restrict any of the rights of unionism; moreover, I am convinced of the necessity for labour organization."

Some colour was lent to the "political" theory of the strike by the fact that the General Federation of Labour, as the result of the activities of its more radical members, had established an Economic Labour Council, earlier founded with the avowed purpose of "taking over ultimate control of the whole of French industry and social administration." In the words of M. Jouhaux, secretary of the Federation, this new movement resulted from "the economic crisis let loose upon the world by the war, the impotence and unwillingness of the Government to attempt any remedy, and above all the firm resolution of the workers to approach the problem for themselves and find out the solution despite vicious traditions and selfish interests." He further described the movement as "the replacement of the Government by the workshops." But whatever the underlying motive of the strikers may have been, whether merely to emphasize the failure of the Government to reorganize the country, to secure proper distribution of foodstuffs and raw materials and re-establish industries, or actually to subvert the existing form of government, the contest was generally regarded as a trial of strength between constitutional government and the extreme radical socialists.

The general strike began on May 1, but by May 20 virtually all the men had returned to work and the national council of the General Federation was discussing whether the strike should be called off. Marseilles and other seaports were paralyzed for a time, but railways were kept running and the people were furnished with the necessities of life, partly by voluntary help. The dockers,

coal miners, and street car, electrical, gas, metal and other workers were called on to join the movement, but most of the men appeared unwilling to obey their leaders' instructions to any extent especially after a definite avowal by the socialist journals of political aims. Over 80 per cent of the railwaymen, it was claimed, were still on duty at the end of the first week of the strike. Large railway repair shops at Paris, however, were definitely closed, because they were "hotbeds of radicalism," and their output was low.

The outstanding incident, leading to the virtual termination of the strike, apart from the arrest of several of the radical leaders, was the decision of the Government to institute proceedings against the General Federation of Labour with a view to the complete dissolution of the central labour body because it had departed from its prescribed sphere in the field of economics, and had used the force of its organization to interfere with national life and production by poorly defined demands for radical and revolutionary changes. Before this decision was reached by the council of ministers Premier Millerand declined to receive a delegation of Socialist deputies bearing a message from the General Federation to the effect that it was ready to call off the strike providing the Premier would give an undertaking to appoint a Governmental Commission to meet the Federation's delegates and discuss nationalization of public utilities. The Premier opposed any negotiations with the Federation, and the Cabinet ordered the issuance of judicial information against members of the administrative Council of the General Federation for alleged violation of the articles of the law of 1884, under which the Federation held its charter. In the third week of the strike the police claimed they had evidence that seven "soviets" had been established and were waiting the success of the general strike to become effective as local governments at Orleans, Tours, Brest, Bordeaux, Marseilles, Strasbourg and Paris. Charles

Rappoport, one of the radical leaders, who was a candidate at the elections for the Chamber of Deputies last November, was reported to have declared on May 18 that the aim of the May Day strike was the overthrow of the existing rule in France. He further accused M. Jouhaux, "of having sold us into the hands of the Government. Jouhaux is a reactionary bourgeois. We are revolutionary Socialists." He charged that M. Jouhaux had called strikes which were doomed to failure in order to serve the Government. "We have avowedly espoused Bolshevik opinions. I do not seek to hide them, but rather wish to proclaim them. Revolution must come, but we picked out the wrong time." On May 21 the Chamber of Deputies gave a vote of 526 to 90 in favour of the Government in connection with its handling of the strike. It is of interest in this connection to note that the bill for the reorganization of the French railways, promised during the strike as an alternative to the railwaymen's demand for nationalization, was introduced on May 18 in the Chamber of Deputies. The Government had invited the leaders of the Federation to a conference on the measure, but meeting no response from the labour representatives they announced that owing to this refusal the Federation "would have to defend its ideas through its representatives in Parliament, which is the sole judge of the question." The bill would create a railway directorate composed of delegates representing the technical and administrative personnel of the railways, the employees, the Chamber of Commerce, the Parliament and the Government. This directorate would control railway operation, unification and standardization, and would have power to order improvements carried out at the expense of the respective companies. The bill would further pool the dividends of the railway companies, create a sinking fund to make good any losses sustained by the several companies, and provide for uniform rates on a basis of the profits and losses of all lines.

## A REPORT ON PROFIT-SHARING AND LABOUR CO-PARTNERSHIP IN THE UNITED KINGDOM

THE British Ministry of Labour has recently published a report on "Profit-Sharing and Labour Co-partnership in the United Kingdom.\*" The report, which is not yet to hand, is summarized in the April issue of the *British Labour Gazette*, from which the following is derived.

The terms "Profit-sharing" and "Labour Co-partnership," particularly the former, are often used in a very loose sense; and, accordingly, a section of the Report is devoted to the definition and interpretation of these terms. "Profit-sharing" is explained to involve an agreement between an employer and his employees whereby the latter receive, in addition to their wages or salaries, a share, fixed beforehand, in the profits of the undertaking.

For the term "Labour Co-partnership" the definition adopted by the Labour Co-partnership Association is quoted. Briefly, the definition involves, in addition to ordinary Profit-sharing, (a) the possession of shares in the undertaking by which the workman is employed, and (b) the establishment of a Co-partnership Committee of workers, having a voice in the internal management of the undertaking.

Attention should be called to the prominent position which has come to be occupied by the Co-partnership Committee in many schemes. Detailed particulars are given of the Co-partnership Committee of the South Metropolitan Gas Company, which was established 30 years ago, and is, in the words of its chairman, "a small-scale Parliament of Labour, with business-like habits."

The report states that 380 schemes had been started at some time or other since the year 1865, with an isolated example in 1829. Of the original 380 schemes, 182 had survived and were in existence at the end of October, 1919.

The Report contains an analysis of the causes which have led to the abandonment of the various schemes which have ceased to exist. In a large number of cases, the abandonment is stated to have been due to the inability of the firm to earn sufficient profits to make Profit-sharing a success, or to some other cause independent of the Profit-sharing scheme, rather than to any defects inherent in the system itself.

The longest section of the Report consists of a detailed account of a large number of existing schemes, some long-established and some recent, and of very various types.

The gas industry is the only one that has adopted Profit-sharing (or Co-partnership) on anything approaching a national scale. In all other groups of industries it is only a very small minority of firms that have adopted the system.

The pecuniary results of Profit-sharing, as tested by the amount of bonus paid, are, in many cases, not inconsiderable. Putting together the results of all the schemes it would appear that, while in every year a certain number of firms are unable to pay any bonus at all, the average bonus over a long series of years may be put at about 5 or 6 per cent, the equivalent of two or three weeks' wages. During 1918, the total amount of bonus paid to some 52,000 participants in 105 schemes of which particulars were available, was nearly £300,000.

The Report contains a section dealing with profit-sharing and co-partnership in co-operative societies. In an introductory section an attempt is made to trace, in outline, the inter-action of the two branches, with somewhat divergent ideals, which have been at work in the co-operative movement, viz.: (a) the "consumers'" societies, exemplified in the familiar co-operative stores, and in

the great wholesale societies, which are carried on primarily in the interests of the consumers, as such; and (b) the "productive associations of workers," which held out as their ideal the co-operative ownership of the instruments of production by the producers, who were to divide the profits among themselves. In the co-operative movement, as it has in fact developed in the United Kingdom the first-named influence—"consumers' co-operation"—has become greatly predominant; and on this side of the co-operative movement profit-sharing shows a marked decline in recent years. In the "productive associations of workers," on the other hand,

profit-sharing may be said to be holding its own; and in these associations there is often also, as one would expect, a strong element of co-partnership—that is to say, the employees often have a substantial share in the management of the business, such as they rarely have in the "store" societies.

The Report contains an Appendix giving the rules of a number of schemes of profit-sharing or co-partnership. The rules reproduced in the Report have been chosen so as to present a variety of different types, in order that employers who may be thinking of introducing a scheme may have a wide choice.

### GROUP INSURANCE IN RELATION TO LABOUR TURNOVER

THE January and March, 1920, issues—of the LABOUR GAZETTE contained, at pages 2 and 210 respectively, articles describing various group insurance plans that have been put into effect by Canadian employers, with the names of many employers known to have adopted them. In a recent address before the Manufacturers' Association of British Columbia, Mr. W. H. Leach, of Vancouver, claimed that the introduction of group insurance would necessarily do much to reduce the high percentage of labour turnover in industry. The following notes on this point are taken from Mr. Leach's address.

Group insurance means the protection of a group of employees of one concern by life insurance policies, payable upon the death of the insured in each case to such beneficiary or beneficiaries as he himself has indicated. As a rule the premiums are paid by the employing concern, the insurance remaining in force as long as the employee remains in its employ. At a recent annual meeting in Toronto of the Canadian Fraternal Association, where group insurance was discussed, it was stated that many employees on receiving such insurance did not investigate it sufficiently, often thinking they are fully insured when in

reality the policy only continues in force so long as the insured remains in the service of his employer, and for one month thereafter. But in some, if not all, of the group insurance schemes adopted in Canada, an insured employee on leaving his employment is at liberty to take up the policy. As group policies are only issued in cases in which considerable numbers of individuals are concerned, the average death rate will usually apply, and consequently medical examination is unnecessary.

What will be the effect where such group insurance is put in force? Looking at it in theory first of all, we shall have a list of employees who see that their employers take a human interest in them beyond the immediate result of their exertions in office or factory; that, in case of death, this interest will express itself in a very considerable cash contribution in the shape of the insurance money towards the support of their dependents to enable them to get on their feet again after the death of the breadwinner. By stimulating a sense of loyalty towards such employers, and by removing from their minds the haunting and energy-sapping spectre of a family left in want, this cold cash protection will increase the efficiency of the staff

in general, and, in addition, will tend strongly to check the costly ebb and flow of labour turnover.

So much for the theory of it: let us look at the verdict of actual experience. Group insurance, while still only on the threshold of its development, has already been in operation long enough to enable us to observe the results of its operation in actual practice. As it works out, the general experience of those who have tried it is as follows: At first the employees are prone to look upon the scheme with some degree of doubt, sometimes even suspicion that there must be a catch in it somewhere. Then, one after another, deaths begin to occur—and in every instance the money is paid over as arranged. Then the remaining employees begin to see what the scheme really does, and their jobs look better to them than they did before. Loyalty is enhanced, the serious-minded workers remain with the firm, labour turnover is notably reduced and efficiency is increased.

The proof of the pudding is the eating of it, and it is noteworthy that in every case in which the group insurance idea has been given a real try-out it has been enthusiastically continued.

Thus far we have discussed the matter only on the most general terms. It may be interesting to consider it in figures. In late years heads of large concerns have made rigorous analyses of the actual cost of labour turnover. The per capita cost varies over a wide range, according to size of business concerned, nature of operations and other incidental factors. In some cases the cost of hiring a new employee and "breaking him in" until his efficiency reaches the normal level, figures at \$75 and even higher. The minimum thus far recorded for large concerns is \$40. The proportion of change taking place in a given staff during the year also varies very greatly in accordance with size and nature of business and other factors affecting the labour situation. In a plant of any considerable size a 50 per cent turnover is by no means unusual, and in the larger class of organizations

the proportion frequently reaches a very much larger figure.

Assuming, therefore, for purposes of example, the conservative averages of \$50 per capita cost for "breaking in" a new employee and a 50 per cent turnover of staff, we have an annual overhead of \$25 for each person employed.

If we can reduce the labour turnover from 50 per cent to 25 per cent (an accomplishment quite possible by means of group insurance) we shall have a consequent reduction of overhead from \$25 to \$12.50 per capita.

Against this saving, however, must be charged the group insurance premium, which, in normal cases, on the basis of \$1,000 insurance per employee, will be about 75 cents per capita per month, or \$9 per capita a year. The difference between this and the saving on labour turnover represents a very handsome addition to the credit side of the profit and loss account.

In estimating this cash saving a further factor to be taken into account is that when an employer pays for group insurance on the lives of employees, in favour of beneficiaries named by the latter, all disbursements for premiums on such insurance are exempt from the excess profits tax. Therefore, in striking the balance of profit and loss, credit is to be taken for the sum that would otherwise be payable as tax on the amount expended for premiums.

But this is only part of the story after all. Great as is the direct saving from decrease in labour turnover, there are other advantages quite as important. It takes no philosopher to tell us that the worried man is not up to par as a producer. As you relieve a man of worry, you increase his efficiency, and every employee who receives a life insurance policy is by that fact freed from a very considerable mental strain. The good effect of that relief, multiplied by the number of employees in a whole organization, represents a tremendous increase in efficiency. Besides the relief from worry, every employee becomes more productive also as he becomes more loyal to his organization.

## THE EFFECT OF SHORTER WORKING HOURS ON PRODUCTION

THE effect of shorter working hours on production is the subject of a special study by the United States National Industrial Conference Board (Research Report No. 27: Hours of Work Problem in Five Major Industries.) The investigators reach the conclusion that allowing for variations in managerial efficiency a shorter working day increases the efficiency of workers who are called upon to use intelligence at their occupation; but, in factories where the product results automatically from mechanical processes production is reduced in the same ratio as the working day. From this point of view no uniform schedule of hours, equally adapted to all industries, is recommended; shorter hours are conceded to skilled workers to enable them to concentrate their minds with greater efficiency while at work, but efficiency requires no such consideration for "automatic" workers. For example, in the boot and shoe industry, which calls for the exercise of skill, it was found that maximum production could be maintained on a schedule substantially less than 54 hours per week. In the metal-working group it was found that a 50-hour week could be introduced in some trades with no loss to production, but that no such rule could be applied throughout the entire group. Similarly, output in the silk industry was maintained after a substantial reduction of hours. On the other hand, the cotton textile industry of the northern states showed that reductions of the working week to 56 hours involved a proportional reduction of output; while in the woollen manufacturing industry reduction to a 54-hour week resulted in a similar but less marked decline. No definite relation could be traced in any of the five industries un-

der review between changes in wages and rate of production, but the investigators found some evidence of improved efficiency as the result of payment of a bonus, and in the piece-rate as compared with the day-rate system of wage payment. The information secured by the inquiry was not found sufficient to base upon it general conclusions as to the effect of shorter hours on the health of the workers. As to the frequency of accidents the report states that only 13 per cent of the employers questioned had observed any noticeable decline, while 85 per cent had found none and the remainder had even reported a slight increase, which they attributed to the hiring of new men to make up for reduced production due to shorter hours. In fixing the hours of work, however, the investigators point out that there are many other factors besides output and health to take into account and that their present inquiry does not cover the wider social field.

An inquiry lately made by the United States Health Service resulted in the finding that the output of industry was more steadily maintained under the 8-hour than under the 10-hour shift, the pace of work tending in the latter to be set by the less efficient workers, while under the 8-hour day the output varies more nearly according to the industrial capacity of the worker. In regard to the frequency of accidents, a direct relation was traced between fatigue and risk, as a large number of accidents occur in the last hours of the 10-hour or 12-hour day. If for any reason production was speeded up in the last hours, when the workers were fatigued, the rise in the number of accidents was so rapid as to leave no doubt that the increased rate could only be explained by the decline of working capacity in the employees.

## ANNUAL REPORT OF THE FACTORIES INSPECTOR FOR NOVA SCOTIA

ACCORDING to the twelfth annual report of the factories inspector for Nova Scotia, covering the year ending September 30, 1919, the number of accidents reported during the year was 989, of which 13 were fatal, 396 severe, and 580 slight. This is a decrease of 182 in the total number of accidents reported and of 3 in the number of fatal accidents, as compared with the previous year. This decrease is stated to be partly due to the industrial depression which prevailed in a large number of establishments during a portion of the year. The report states that as usual a large majority of the accidents occurred to hand workers, only 97 of the total number reported having happened through machinery, belts or shafting. Interesting information is given with respect to the cause and nature of each accident and the occupation of the injured workman.

In the matter of reducing accident hazards to a minimum, the factory inspector, in common with the Nova Scotia Workmen's Compensation Board (see later page in this issue), attaches considerable importance to the recent formation of the Nova Scotia Accident Prevention Association, and expresses regret that hitherto very little has been done in the province along the lines of modern safety. "A few years ago," states the report, "what looked like a very promising beginning was noticed in four of the largest establishments. In each of these, safety engineers were appointed, who were to give their whole time to the matter of safety, every dangerous place was to be guarded, and there was reason to anticipate that this great humanitarian movement was going to develop in those establishments. The fact is that after some years, with the exception of one establishment, there is very little evidence of any progress. In the case of the exception, the safety engineer has an assistant; he also is provided with an office where he can keep his records and literature. In this plant

considerable guarding and fencing have been erected, warning signs, and notices have been posted, and the safety engineer is actively engaged to the limit of his capacity. The safety engineer is only the first step in modern safety; there must be progressive development of the movement, if success is to be attained. Unfortunately, the attempt at safety in the industries spoken of has not advanced beyond the first step, and the result has been disappointing. The men appointed as safety engineers were in each case good reliable men, thoroughly in earnest, and at the outset determined to make good on the job. One of the engineers was an expert who had previous experience in the United States, but finding that he did not have the proper support or encouragement from those higher up, he resigned, saying that he could not afford to waste his time. The position of these men was not given sufficient prominence, they had no influence with the heads of departments and even ordinary foremen could ignore their suggestions."

The report contains much interesting information with respect to ventilation, exhaust ventilation, drinking water, heating, closets, lunch rooms, and wash and rest rooms. At present the Factory Act contains regulations concerning these matters, but they apply only to foundries. The inspector, therefore, recommends that the law should be amended so as to make the foundry regulations apply to the other occupations, to which, in his opinion, its application is equally necessary.

With respect to child labour, the inspector states that there is no child labour problem in the factories of Nova Scotia. "After watching this requirement of the Act very particularly, I am satisfied the employers are carefully observing the law. There may be a few small boys working in some isolated mills in the country districts, but in the large industrial centres the menace of child labour does not exist."

## ANNUAL CONVENTION OF THE ONTARIO LABOUR EDUCATIONAL ASSOCIATION

**T**HE eighteenth annual convention of the Ontario Labour Educational Association was held at Brantford, Ontario, on May 21. There were 155 delegates present, among whom were a number of women. J. F. Marsh, of Niagara Falls, president of the association, presided. After the reading of the minutes of the last session, the executive committee reported a successful year's work, noting particularly the work of the Labour Group in the Ontario Legislature. There had been an active propaganda to popularize the use of union-made goods. On the strong recommendation of the executive it was decided to appoint a permanent secretary-treasurer, who should be paid a salary, as by this means the work of the association could be carried on more effectively. The reading of the financial report showed a balance on hand of \$1,873, exclusive of funds to the amount of about \$1,000, which were still outstanding.

A resolution on public ownership was adopted by the association. The resolution stated that as the principle of government ownership is being increasingly applied to public utilities as a means of more equitable administration in the interests of both producer and consumer, there is therefore great need for a clear declaration from the workers as to the fundamental difference between private or corporate ownership and public ownership in principles of administration. It was therefore resolved that the association go on record as favouring the administration of all publicly owned and operated utilities in such a manner as (1) to allow the best of living conditions to the workers involved in their construction, operation, and administration, and (2) to produce the maximum of efficiency of service at a cost based upon these principles and proper provision for reserve necessary to cover depreciations and renewals. It was further resolved that the workers

exert every effort by constitutional means within their power to obtain the appointment of labour men on public service commissions and all public bodies having the power to appoint such commissions. Considerable discussion took place on the subject of prohibition, a resolution finally being passed in favour of stronger beer for the workingman. The matter of the nationalization of the medical profession was next taken up. Dr. Hett, of Toronto, presented a report on this subject and expressed himself as strongly in favour of such a step. After some discussion the report was handed to the executive for consideration. A resolution proposing that all factories provide first-aid classes or attendants for their employees was passed, and the motion ordered to be sent to the Minister of Labour, the Department of Health, and the Ontario Safety League. A resolution declaring the imprisonment of men participating in the Winnipeg strike as unjust was referred to the Trades and Labour Congress of Canada, it being explained by Mr. Draper that such a resolution called for investigation. His advice that no expression of opinion in this matter be given at the conference was complied with. Miss McNab, of Hamilton, was sponsor for a resolution calling for the extension of mothers' pensions to mothers having but one child, and providing that they be not required to appear before any local body to substantiate their applications, as that proposal gave opportunity for the grant being made as a charity. This resolution was passed unanimously. Other resolutions that were carried dealt with the following subjects: The enactment of such legislation as would relieve the distress and inequalities that obtained under the present profit system; the raising of the age of consent from 14 to 18 years; provision for the backward child and mental defective; and the sending out by the executive

of information as to where union-made goods were to be obtained. Other matters brought forward at a late hour and referred to the executive were the unification of education in the schools of the Dominion, with the exception of Quebec, and the exertion of a greater effort to get women workers organized. It was also resolved that the executive evolve a plan for the teaching of industrial economics in the public schools.

The election of officers resulted in the re-election of J. F. Marsh as president; Dr. Hett was elected as vice-president, and Joseph T. Marks as permanent salaried secretary-treasurer. The executive committee were the elected delegates from the various centres sending representatives to the convention, and special instructions were given to the executive to see that women from the various labour organizations were added to their numbers.

It was decided to hold the next convention at Preston.

At the close of the convention, a meeting of the women delegates was held, and a new organization, known as the United Women's Educational Federation of Ontario, was formed, its objects being as follows: The education of women on all social and political questions affecting their interests; investigation and redress of all trade grievances relative to women; free and compulsory education, and free text books; equal pay for equal work; the establishment of a uniform method of teaching in the public schools throughout the Dominion. Membership in this organization is open to all women's organizations willing to uphold the above principles, upon payment of a nominal per capita tax of 50 cents per year. The officers of the new organization were elected, as follows: President, Mrs. W. F. Singer, Toronto; Vice-President, Mrs. J. Inman, Hamilton; Secretary, Mrs. H. G. Foster, Hamilton. The two organizations will work in close co-operation.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OF APRIL 25 TO MAY 22, 1920

**R**EPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada show a slight decrease in the number of placements during the four weeks' period covered by the present report as compared with the period ending April 24, the number of regular placements during the four weeks from April 25 to May 22 being 31,139, while the number of such placements during the period ending April 24 was 31,949. The decrease is due chiefly to the closing of the offices operated by the Dominion Department of Labour in the Maritime Provinces, which have not yet been reopened by the Provincial Governments concerned in conformity with the arrangement prevailing in all other provinces.

During the period under review (April 25 to May 22) regular and casual placements were distributed as follows:

	Regular place- ments.	Casual place- ments.
Week ending May 1..	7,967	1,964
Week ending May 8..	8,130	1,851
Week ending May 15..	7,717	1,937
Week ending May 22..	7,325	1,935

As has been indicated in previous issues of the LABOUR GAZETTE, regular placements refer only to those applicants for whom employment found was likely to be of more than one week's duration, while casual placements refer to those applicants for whom employment found was likely to be of less than one week's duration.

The following table presents in detail the work of the offices for the four weeks ending May 22. At the beginning of the period 8,494 men and 1,014 women, a total of 9,508 persons, who had registered during the previous weeks remain-

ed unplaced at the various offices. This was a decrease of 14,383 persons as compared with the beginning of the preceding period. This sharp decline in the number of unplaced applicants is accounted for to some extent by the decreased registration of soldier applicants with the cessation of the Federal Emergency Appropriation Fund. On the same date 11,564 vacancies notified by employers still remained unfilled. Of these 6,694 were for men and 4,870 for women. This represents a decrease of 278 as compared with the beginning of the preceding period. During the period, 36,176 men and 3,774 women applied for employment (or renewed previous applications) while 38,444 new vacancies for men and 5,640 for women were notified by employers. Thus while there was a decrease in the supply of labour (applications) amounting to 3,330 persons as compared with the preceding period, the increase in demand for labour (vacancies) was very much greater than the corresponding increase during the previous period, the total increase amounting to 2,421 vacancies.

Regular placements reported were 28,951 men and 2,188 women as compared with 29,706 men and 2,243 women during the previous period, a total decrease of 810.

In addition to the regular placements noted above, the employment offices made 7,687 casual placements during the period, representing an increase of 499 as compared with the preceding period. This is the largest number of casual placements yet reported during any period and is due no doubt to demand incident upon the annual municipal clean-up campaigns and to the usual spring house-cleaning and moving.

The accompanying chart shows graphically the number of applications and vacancies registered as well as the number of placements made for the period of the record. The chart indicates that for the period under review there was a decrease in the number of applications registered taking the period as a whole. On the other hand the number of vacancies as previously noted show an increase during the period. There was a slight decrease in the number of placements made.

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF APRIL, 1920

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of April, 1920, and is based on returns received from 1,442 labour organizations with a total membership of 182,436. For all occupations reporting, 2.83 per cent of the members were unemployed as compared with 3.44 per cent in March, 1920, and with 4.38 per cent in April, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness, or as the direct result of strikes or lockouts, are not considered as unemployed.

That the percentage out of work at the end of April was smaller than in both March, 1920, and in April, 1919, was due to there having been greater activity for workers in practically all groups of industries. The improvement in building and construction was particularly marked.

Table 1 on this page summarizes the returns by provinces. Decreases in the percentage of unemployment are reported by all provinces as compared with the returns for March, 1920. As compared with April, 1919, Manitoba, only, reported a larger percentage of unemployment, declines being recorded by all other provinces.

The percentages reported idle in the different groups of industries are indicated on Table 2 on page 704.

Unemployment in the manufacturing and mechanical industries as reported by 374 unions having a combined membership of 50,775, was somewhat more pronounced at the end of April than in March, 2.28 of the members having been unemployed as compared with 1.93 per cent in the preceding month. This

Apr. 1920.....	.61	1.32	2.50	2.42	2.71	3.19	1.71	8.09	2.83

increase in unemployment is largely due to a shortage of material in the metals, machinery, and conveyances group. As compared with the returns for April of last year a considerable improvement was shown, the percentage out of work in that month having been 3.17. Workers in food, tobacco and liquors, and printing, publishing and paper goods were more fully employed than in March, but the percentages were somewhat larger than those reported in the corresponding month of last year. Metals, machinery and conveyances, textiles, carpets and cordage, pulp, paper and fibre, and leather, boots, shoes and rubber goods showed slightly larger percentages of unemployment than at the end of March, but the percentages were considerably smaller than in April of last year. Workers in the clothing and laundering and jewelry groups reported slightly more unemployment than in both March, 1920, and April, 1919. In the woodworking and furniture, and

glass bottle blowing industries, there were declines in the number unemployed in both comparisons. Considerable short time was reported by unions of boiler-makers and iron shipbuilders (who were very largely affected by the shortage of steel), machinists, garment workers, bakers and confectioners, boot and shoe workers, cigar makers, glass bottle workers, and typographers. The unemployment among leather workers is due to between-season dullness in the trades.

Reports from 593 organizations of transportation workers having a total membership of 73,405, indicated that 2.57 per cent of the members were unemployed as compared with 2.61 per cent at the end of March and with 3.48 per cent at the end of April of last year. The slight improvement in employment for workers in this group as compared with the preceding month is due to increased activity in the navigation sub-group, while the decrease in the percentage of unemployment as compared with April, 1919, is due to greater activity of workers on steam railways and of teamsters and chauffeurs. Steam

railway employees (whose returns constitute nearly 77 per cent of the entire group membership reporting) reported a slightly increased percentage of unemployment as compared with the returns for March, due to decreased traffic largely caused by the railroad strike in the United States. Considerable improvement in unemployment, however, was reported by employees in this subgroup over April of last year. Street and electric railway employees reported a nominal decrease in the percentage out of work as compared with both March, 1919, and April, 1920. Workers in the navigation sub-group registered an improvement in employment as compared with the preceding month. There was, however, a slight increase in the percentage of idleness as compared with the returns for April of last year. Teamsters and chauffeurs reported a decline in the number unemployed in both comparisons. Some short time was recorded by unions of engineers and firemen, trainmen and conductors. The decrease in the percentage out of work and also in the number on short time re-

ported by maintenance of way employees is noticeable.

In the mining, quarrying, and refining of ores group, returns were received from 35 organizations with an aggregate membership of 10,644, and show that 1.10 per cent of the members were out of work as compared with .65 per cent in March and with 2.69 per cent in April of last year. Mine workers were not as fully employed as in the preceding month, but the percentage out of work was smaller than in April, 1919. Mill and smeltermen and quarry workers, as reported by one union in each trade, registered no unemployment.

The percentage out of work in the building and construction group as reported by 230 unions with a total membership of 28,253 was 5.92 as compared with unemployed percentages of 9.88 in March, 1920, and 12.05 in April, 1919. Bricklayers, masons, and plasterers, carpenters and joiners, painters, decorators and paperhangers, plumbers and steamfitters, tile layers, lathers and roofers, and steam shovel and dredgemen, reported smaller percentages of unemployment than in the preceding month and also than in April, 1919. On the other hand, electrical workers, granite and stone cutters, and hod carriers and building labourers showed less activity than in either comparison. The percentage out of work among the bridge and structural iron workers was considerably larger than in March, but it was substantially smaller than in the corresponding month of last year. While the short time registered during the month under review was considerably less than during the preceding month, some unions of carpenters, electrical workers, plumbers and steamfitters, painters, decor-

ators, and paperhangers, and hod carriers and building labourers reported that not all their members were working on full time.

In the public employment group as reported by 76 organizations having a combined membership of 7,007, the percentage out of work was .43 as compared with 1.66 per cent in March, 1920, and with .01 per cent in April, 1919. Civic employees were much more fully engaged than in the preceding month. In April of last year, however, no members of these unions were reported as unemployed.

Unemployment in the group of miscellaneous trades as indicated by returns received from 132 unions with 12,062 members was 2.49 per cent as compared with 3.66 per cent in March and with 4.80 per cent in April, 1919. Retail clerks, hotel and restaurant employees, musicians and theatre employees and unclassified workers were better employed than in either March, 1920, or April, 1919. With reference to retail clerks, however, it should be noted that statements were tabulated from five unions only. The unemployment reported among barbers was the same as in the preceding month and was slightly less than in April of last year. Stationary engineers and firemen reported a decline in the number out of work as compared with the returns for March, but the percentage was a little larger than in the corresponding month of last year. Some short time was registered by unions of hotel and restaurant employees, barbers, musicians and theatre employees.

The tabular statement on pages 706-7 presents the returns in some detail.

TABLE III.—UNEMPLOYMENT ON APRIL 30TH, 1920.

# EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD APRIL 4 TO MAY 1, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from April 4 to May 1 show a continued improvement in the employment situation, the increase in the volume of employment being particularly marked during the last two weeks of the period.

The following chart shows weekly the percentage increase or decrease in the volume of employment for the full period of the record of March 31, 1919 until May 1, 1920. As formerly, the chart presents a series of percentages, each percentage recording the increase or decrease in the volume of employment during the week as compared with the previous week. As the number of firms reporting varies from week to

week, no attempt should be made to read the chart as a cumulative record.

The returns for the week ending January 17, which it is to be noted, practically coincides with the close of the inventory period, have been taken as base figures. It is interesting to note that at the end of the period under review, over 5,000 employers representing more than 715,000 employees registered an increase of approximately 31,500 persons or 4.6 per cent in their staffs as compared with the base week.

The changes recorded for each week under review as compared with the preceding week are as follows:

Week ending April 10—an increase of 3,014 persons, or .4 per cent.

Week ending April 17—an increase of 4,781 persons, or .7 per cent.

Week ending April 24—an increase of 5,660 persons, or .8 per cent.

Week ending May 1—an increase of 8,309 persons, or 1.2 per cent.

Reports for the various districts indicate that conditions during the current period under review were very much the same throughout Canada. Substantial increases were reported in all weeks in the Maritime Provinces, Quebec and Ontario, the Western Provinces and British Columbia. In the provinces within the districts, however, slight fluctuations occurred. Prince Edward Island, Quebec, and Manitoba recorded small reductions during the week of April 10, and New Brunswick registered a nominal decline during the week of April 17. In all other provinces increases were shown in each week of the period.

A summary of the returns by industrial groups show that Logging, Building Construction, Railway Construction, Lumber and its Products, Clay, Glass and Stone Products, Mineral Products, N.E.S., Pulp and Paper Products, Rubber Goods, Coal Mining, and Wholesale Trade registered increases during all four weeks of the period. Edible Animal Products, Iron and Steel Products, Wood Distillates, Miscellaneous Manufacturing Industries (chiefly Tobacco and Chemicals), Non-Metallic Minerals other than Coal (Quarrying), Hotels and Restaurants, Miscellaneous Services (largely laundries), Telegraph and Telephone Operation, Local, Railway and Water Transportation registered increases taking the period as a whole, with declines during individual weeks. On the other hand, Edible

Plant Products, Fur and Fur Goods, Non-Ferrous Metal Products, Textiles, Metallic Ores, and Retail Trade reported decreases, taking the period as a whole, with increases during one or more of the weeks under review. In Leather and Leather Goods decreases of a seasonal character were recorded during all four weeks of the period. Curtailment in staffs in Edible Plant Products was largely confined to the sugar industry and may be largely attributed to the shortage of raw sugar. In Iron and Steel Products, where employment for many months has been maintained at a high level, the reduction which occurred during the last two weeks of the period under review was chiefly due to shortage of fuel and material, caused partly by the recent railway strike in the United States. In the Textile group also employment has been well maintained and the declines which were registered during the weeks ending April 10 and May 1 represent, in the first case, curtailment of activity incident to holiday taking at the Easter season and, in the second instance, the commencement of the seasonal slackness in the group, added to the enforced shut-down of one large factory on account of abnormal water conditions, caused the reductions in pay-rolls. The increases in Logging and Lumber and its Products would indicate the enlarged staffs necessary to carry on river driving and sawmilling operations among firms engaged in these industries. As would be expected, pronounced increases during the period under review were registered in the Railway Construction group, where the increases from week to week amounted to 7,337 persons.

## REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, APRIL, 1920

**R**EPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the month of April, showed a reduction of slightly over 13 per cent both in the number of employees and the wages paid as compared with the preceding month. In April, 1920, 10,294 persons were temporarily employed and the payrolls amounted to \$844,868.10, as compared with 11,873 employees and an aggregate payroll of \$971,909.64 in March. Reductions in snow-shovelling and street cleaning staffs during the month largely caused the declines in both cases. In comparison with the same period in 1919, increases of nearly two per cent in the number of employees and of over 26 per cent of the wages paid are indicated, there having been 10,187 employees with an aggregate payroll of \$669,461.73 in April, 1919.

Toronto, Hamilton, London, Winnipeg, Brandon, Regina, Edmonton and Vancouver recorded increases in the number of employees both as compared with the preceding month and also with April,

1919. Ottawa and Victoria registered reductions as compared with the returns for March, but in comparison with the figures for April, 1919, they both reported increases in the number of temporary employees. On the other hand, Moose Jaw recorded an increase over March, 1920, and a slight decline as compared with April, 1919. St. John, Montreal, Saskatoon and Calgary showed reductions in both comparisons.

As to wages, Toronto, Hamilton, London, Winnipeg, Brandon, Moose Jaw and Saskatoon showed increases both as compared with March, 1920, and with April, 1919. Ottawa, Regina and Vancouver registered declines as compared with the figures for the preceding month, but all three cities reported increases in comparison with the returns for the corresponding month in 1919. On the contrary, Edmonton showed an increase in the amount of wages paid to temporary employees in comparison with its payrolls for the preceding month, but as compared with April, 1919, there was a decline. St. John, Montreal, Calgary and Victoria reported decreases in both comparisons.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, APRIL, 1920, COMPARED WITH MARCH, 1920, AND WITH APRIL, 1919.

# **EMPLOYMENT IN THE BUILDING TRADES DURING APRIL, 1920, AS INDICATED BY BUILDING PERMITS**

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 55 cities showed an increase during April as compared with the preceding month, the total value of building permits rising from \$8,258,150 in March to \$16,382,543 in April, an increase of \$8,124,393, or 98.4 per cent. With the exception of Alberta, all provinces showed large increases in this comparison, that of \$3,194,175 registered in Quebec being particularly substantial.

As compared with the corresponding month in 1919, there was an increase of \$9,322,902, or 132.1 per cent, the value for April, 1919, having been \$7,059,641. In this comparison New Brunswick, only, reported a reduction, and in all other provinces the increases were large.

The returns from 35 cities originally used in this report (which are distinguished by asterisks) are tabulated separately, and show that the total value of building permits issued by these cities amounted to \$15,333,183, an increase of \$7,937,444, or 107.3 per cent over March, 1920. In comparison with the figures for April of last year, the substantial increase of \$8,855,627, or 136.8 per cent, was recorded.

Of the larger cities, Montreal, Toronto and Winnipeg reported substantial increases both as compared with the figures for March, 1920, and for April, 1919. Edmonton and Vancouver registered declines as compared with the preceding month, but increases over the corresponding month of last year are reported by both cities.

Of the smaller centres, Halifax, St. John, Sherbrooke, Three Rivers, Westmount, Chatham, Fort William, Hamilton, Oshawa, Ottawa, St. Catharines, Windsor, Moose Jaw, Regina and Point Grey showed large increases as compared with both March, 1920, and April, 1919.

WAGES AND HOURS IN BRITISH COLUMBIA IN 1919

THE annual report of the British Columbia Department of Labour for 1919 furnishes a very complete record of the trades and industries of the province for the twelve months' period from August 1, 1918, to July 31, 1919. The year was one of stress, marked by great industrial unrest and a cleavage in the ranks of labour, and these difficulties were increased by the fact that British Columbia, as compared with the other provinces, was called upon to absorb many thousands more than her due proportion of demobilized soldiers, the excess being estimated at 17,000 men. While the present statistics are not in every detail comparable with those of the preceding year, three facts plainly emerge from the records for 1919, namely, the rise in the general level of industrial wages; the reduction in the number of hours worked; and the marked increase in the number of Canadian and British, as compared with alien employees. The first of these points is shown in the following table; percentage being worked out on a total of 45,110 adult male wage-earners for 1918, and on a total of 56,241 for 1919:

	1918	1919
Class 1 (under \$20 a week).....	16.77	12.68
Class 2 (between \$20 and \$30 a week)....	45.07	45.32
Class 3 (over \$30 a week).....	38.18	41.98

The wages of female workers also showed an upward tendency over and above the operation of the Minimum Wage Act, which almost automatically raised the wages of many of the lowest paid women and girls; the largest group in 1919 being those receiving from \$13 to \$14 a week, as compared with \$10 and

\$11, the wages earned by the largest group in 1918.

45 to 49.99.....	1461				
50 and over.....	1289				

The largest payroll in any individual industry was in shipbuilding, amounting to \$10,223,844, but the payroll of the mineral group, comprising coal and metal mining and smelting, reached the aggregate total of \$14,818,930, while the "forest" group (comprising logging, lumbering, planing, saw and shingle milling, and dealing) paid out in wages \$12,945,501 during the year. These figures are not, however, based on complete returns.

During the year there was a further reduction in the average hours of labour. The total number of employees working 48 hours per week or less increased from 44.03 per cent in 1918 to 49.78 per cent in 1919, while the number of those working over 60 hours per week dropped from 678 in 1918 to 145 in 1919.

The following table shows the numbers of workers as on July 31, 1919, grouped according to the length of the working week:

	Men.
44 hours per week and under.....	11,999
44 to 48 hours per week.....	11,268
48 to 54 hours per week.....	10,037
54 to 60 hours per week.....	13,056
Over 60 hours per week.....	145
Working hours not given.....	143

The change observable in the nationality of workers in the province is attributed to the absorption of returned soldiers into industry, workers from Canada and Newfoundland increasing from 10,990 to 14,225; those from Great Britain and Ireland increasing from 12,517 to 13,537, and from India from 567 to 685; all the other nationalities show a slight decrease. Chinese employees in the province averaged 5,437, and Japanese 2,449.

A marked feature of the year was the free employment service, first established in Vancouver in June, 1918, and extended early in 1919 to offices in all the larger towns of the province. During the army demobilization period 30 per cent of the applicants for employment were shown to belong to other provinces. The industries which absorbed most of the newcomers were lumbering, railroad construction and farming, while large numbers secured employment at building and construction, steel working and shipbuilding.

#### MINIMUM WAGE BOARD.

The various awards of the British Columbia Minimum Wage Board have been noted from time to time in the LABOUR GAZETTE. These are sum-

marized in the second annual report of the Board, appended to the present report. In the mercantile industry 121 firms reported to the Board in 1919 as compared with 91 in 1918. These reports showed that the total number of female employees over and under 18 years of age was 1,428 and 323 respectively, after the minimum wage order became effective, and 1,129 and 207 respectively prior to the order. Replying to the assertion that many girls had lost their positions owing to the Minimum Wage orders, the Board says: "If this be true their places would appear to have been taken by other workers, since there does not seem to be any great number of employers going out of business." In 1918 the average weekly wage in this group was \$12.77, and the average number of hours per week was 49.6. The legal minimum wage of \$12.75 became effective on February 24, 1919. "Despite the fears expressed at the time it was set" states the report, that not only would the working hours be longer, but the minimum would become the maximum, the tabulation of the payrolls made in December, 1919, shows that the present average weekly wage is \$14.67, and the average hours 46.1 per week, or about \$1.92 more than the legal wage for 3.5 hours less." Similar results followed in the laundry industry, though here a decrease was noted in the number of girls under 18 years of age. The public housekeeping group showed a like tendency to rise above the prescribed minimum. In office occupation, for which the minimum was set at the comparatively high figure of \$15, the average actual wage rose to \$18.24; there was, however, a slight decrease in the number of employees. In the Manufacturing group the minimum wage of \$14 appeared to result in a decrease in the employment of young girls, but an increase in the total of female employees, the average wage being well ahead of the legal minimum, namely \$15.13.

## EMPLOYMENT AND WAGES IN THE FISH INDUSTRY OF CANADA IN 1918

THE fisheries statistics of Canada for the year 1918, prepared by the Dominion Bureau of Statistics in collaboration with the Dominion and Provincial Fisheries Departments, have lately been issued as part of the Canadian Census of Industry. A preliminary note points out that Canada possesses perhaps the most extensive fishing waters in the world, their fertility being indicated by the fact that the entire catch of salmon, lobsters, herring, mackerel and sardines, nearly all the haddock and many of the cod, hake and pollock landed are taken within ten or twelve miles from shore. The total number of persons employed in the fisheries industry in 1918 was 87,070, compared with 95,122 in 1917.

The persons employed in the primary occupations of catching and landing fish in the two years under comparison are as follows:—

	1917	1918
Sea fisheries.....	66,029	58,807
Inland fisheries.....	11,111	9,709
	77,140	68,516

The numbers employed in fish canning and curing establishments for the two years are shown by classes in the following table:—

	1917			1918		
	Male	Female	Total	Male	Female	Total
	No.	No.	No.	No.	No.	No.
Persons employed in:						
Lobster canneries....	4,685	3,529	8,214	3,483	3,133	6,616
Sardine canneries....				182	343	525
Clam and other canneries.....	248	205	453	110	144	254
Salmon canneries....				5,251	2,644	7,895
Whale oil and fish oil factories.....	5,395	1,596	6,991	211	1	212
Fish-curing establishments.....	2,079	245	2,324	2,658	394	3,052
	12,407	5,575	17,982	11,895	6,659	18,554*

\*Includes 615 employees on salaries.

Employment during 1918 in all branches of the fisheries industry, by provinces, was as follows:—

Province.	Persons employed.	
	In catching and landing.	In canneries and fish and smoke houses.
Nova Scotia.....	21,598	3,770
Prince Edward Island.....	3,684	2,000
New Brunswick (sea).....	12,315	2,500
New Brunswick (inland).....	897	
Quebec (sea).....	9,971	1,304
Quebec (inland).....	905	
Ontario.....	3,918	62
Manitoba.....	1,425	
Saskatchewan.....	152	
Alberta.....	566	8,918
British Columbia.....	11,841	
Yukon.....	175	
Not located.....	1,069	
	68,516	18,554*

\*Includes 615 employees on salaries.

The report points out that in British Columbia the majority of the workers in the canning factories are employed under the contract system, the contractor engaging and paying his own help and being himself paid by the factory according to the quantity of fish packed; for contract and piece workers no details of employment are available other than the numbers so employed and the sums paid to them. These workers are excluded from the figures given below as to employment of wage earners by month and in the classifications of weekly wage earners, etc. An increase in the average weekly wage is evident from the fact that the largest group in 1918 was that receiving from \$15 to \$20 per week, while in 1917 the largest group was that receiving between \$9 and \$10 a week. Employees (exclusive of contract and piece workers) in fish canning and curing plants in

1917 and 1918 are classified in the following table by weekly wages:—

	1917			1918		
	Male	Female	Total	Male	Female	Total
	No.	No.	No.	No.	No.	No.
Under \$3 per week...	53	83	136	42	80	122
\$3 but under \$4...	381	699	1,080	152	492	644
\$4 but under \$5...	247	720	967	117	579	696
\$5 but under \$6...	272	505	777	280	815	1,095
\$6 but under \$7...	375	487	862	513	887	1,400
\$7 but under \$8...	414	320	734	579	397	976
\$8 but under \$9...	546	265	811	743	297	1,040
\$9 but under \$10...	681	518	1,199	656	88	744
\$10 but under \$12...	1,160	300	1,460	1,033	166	1,199
\$12 but under \$15...	1,539	201	1,740	1,193	216	1,409
\$15 but under \$20...	1,362	84	1,446	1,489	172	1,661
\$20 but under \$25...	773	48	821	989	21	1,010
\$25 and over.....	444	17	461	546	15	562
Total.....	8,247	4,247	12,494	8,332	4,226	12,558

The average day in the canning and curing establishments in 1918 was of nine hours and the week was of 55 hours.

On an average each establishment worked full time 100 days, part time 16 days and was idle 188 days. May and June were the months of largest employment, both in 1917 and 1918, as shown in the following tables of employment by months:—

	1917			1918		
	Male	Female	Total	Male	Female	Total
Month.						
January.....	1,607	338	1,945	1,640	258	1,898
February.....	1,494	212	1,706	1,535	219	1,754
March.....	1,972	286	2,258	1,920	257	2,177
April.....	4,473	1,282	5,755	3,377	648	4,025
May.....	7,283	4,482	11,765	6,875	3,332	10,207
June.....	8,489	4,511	13,000	7,426	3,394	10,820
July.....	6,465	2,315	8,780	5,703	1,769	7,472
August.....	5,812	1,877	7,689	5,108	1,084	6,192
September.....	3,936	1,456	5,422	4,671	879	5,550
October.....	3,903	699	4,609	4,009	765	4,774
November.....	2,814	417	3,231	3,279	694	3,973
December.....	2,073	282	2,355	1,992	306	2,298

### FAIR WAGE CONTRACTS, MAY, 1920

**D**URING May the Department of Labour received for insertion in the LABOUR GAZETTE, the following information relative to six fair wage contracts, of which five were awarded by the Department of Public Works, and one by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

### DEPARTMENT OF PUBLIC WORKS.

Construction of wharf, Stewart, B.C. Name of contractor, William T. Muse, Prince Rupert, B.C. Date of contract, April 22, 1920. Amount of contract: schedule of prices.

Supply and installation of electric passenger elevator car and machinery at Printing Bureau, Ottawa, Ont. Name of contractor, Otis-Fensom Elevator Company, Toronto, Ont. Date of contract, May 7, 1920. Amount of contract, \$6,571.

Repairs to Dredge No. 1, (Quinlan and Robertson). Name of contractor, Montreal Dry Docks & Ship Repairing Company, Limited. Date of contract, May 11, 1920. Amount of contract, \$13,625.

Construction of grain conveyor equipment to Berth 15, St. John Harbour, N.B. Name of contractor, The Fegles Construction Company, Limited, Fort William, Ont. Date of contract, May

12, 1920. Amount of contract: schedule of prices.

Construction of rubble mound stone breakwater off southern shore of Toronto, Island, Ont. Name of contractor, The Randolph Macdonald Company, Limited, Toronto, Ont. Date of contract, May 26, 1920. Amount of contract: schedule of prices.

#### DEPARTMENT OF RAILWAYS AND CANALS.

Construction of ten standard No. 1 section houses at Frederick, Hunta, Moonbeam, Green, Jacobs, Fowler, Superior Junction, Quibell, Dugald and Oscar, Canadian National Railways. Name of contractor, J. H. Simmons, Winnipeg, Man. Date of contract, May 28, 1920. Amount of contracts: schedule rates.

#### POST OFFICE DEPARTMENT.

The following is a statement of payments made in May for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of Orders	Amount of Orders
Making metal dating stamps and type, and other hand stamps and brass crown seals .....	\$ 758.27
Making rubber stamps, etc. ....	247.26
Supplying stamping material, pads and ink. ....	682.48
Supplying mail bag fittings.....	8,668.89
Mail clerks' boxes and letter boxes new and repaired....	2.50
Scales repaired .....	241.00
Motors repaired.....	22.55

#### FAIR WAGES ON PROVINCIAL PUBLIC WORKS IN MANITOBA

THE Minister of Public Works of Manitoba, acting under authority of the Manitoba Fair Wages Act, 1916, has approved the following rates of wages and working hours which are to be effective from May 1, 1920, to April 30, 1921, or until another order may be made.\*

##### FAIR WAGE SCHEDULE FOR WINNIPEG.

The following schedule shall apply to the City of Winnipeg, and a radius of thirty miles therefrom:

	Rate per hour	Hours per week.
1. Labourers, engaged on building construction.....	\$ .60	50
2. Teamsters.....	.60	60
3. Bricklayers.....	1.25	44
4. Stonemasons.....	1.25	44
5. Marble Setters.....	1.20	44
6. Mosaic and Tile Setters.....	1.00	44
7. Terrazo Workers:		
(a) Layers.....	.85	44
(b) Helpers.....	.65	50
8. Stone Cutters:		
(a) Carvers.....	1.12½	44
(b) Journeymen.....	1.00	44
(c) Planermen and Lathemen.....	.90	44

	Rate per hour.	Hour per week.
9. Plasterers.....	1.12½	44
10. Wood, Wire and Metal Lathers.....	1.00	44
11. Plumbers.....	1.00	44
12. Steamfitters.....	1.00	44
13. Operating Engineers on Construction:		
(a) Engineers in charge of machines with three or more drums.....	1.25	50
(b) Engineers in charge of double drum machines.....	1.12½	50
(c) Engineers in charge of single drum machines.....	1.00	50
(d) Firemen.....	.75	50
14. Sheet Metal Workers.....	.90	44
15. Painters, Decorators, Paperhangers and Glaziers.....	.87½	44
16. Blacksmiths.....	.85	44
17. Electrical Workers (Journeymen inside Wiremen).....	.92½	44
18. Bridge and Structural Steel and Iron-workers.....	1.25	44
19. Asbestos Workers:		
(a) Journeymen.....	.90	44
(b) First Class Improvers.....	.80	44
(c) Second Class Improvers.....	.70	44
20. Asphalters:		
(a) Finishers.....	.75	44
(b) Men engaged preparing, mixing and heating materials.....	.60	50
21. Carpenters.....	1.00	44

\*Schedules covering the period September 1, 1919 to April 30, 1920 were printed in the LABOUR GAZETTE, October, 1919, pp. 1236-7.

# FAIR WAGE SCHEDULE FOR PROVINCE OF MANITOBA.

(Exclusive of Winnipeg).

The following schedule shall apply to any portion of the Province of Manitoba other than the City of Winnipeg and a radius of thirty miles therefrom:

	Rate per hour.	Hours per week.
1. Labourers engaged on building construction .....	\$ .55	50
2. Teamsters .....	.55	60
3. Bricklayers .....	1.25	44
4. Stonemasons .....	1.25	44
5. Marble Setters .....	1.20	44
6. Mosaic and Tile Setters .....	1.00	44
7. Terrazo Workers:		
(a) Layers .....	.85	44
(b) Helpers .....	.65	50
8. Stone Cutters:		
(a) Carvers .....	1.12½	44
(b) Journeymen .....	1.00	44
(c) Planermen and Lathemen .....	.90	44
9. Plasterers .....	1.12½	44
10. Wood, Wire and Metal Lathers .....	1.00	44
11. Plumbers .....	1.00	44
12. Steamfitters .....	1.00	44
13. Operating Engineers on Construction:		
(a) Engineers in charge of machines with three or more drums .....	1.25	50
(b) Engineers in charge of double drum machines .....	1.12½	50
(c) Engineers in charge of single drum machines .....	1.00	50
(d) Firemen .....	.75	50
14. Sheet Metal Workers .....	.90	44
15. Painters, Decorators, Paperhangers and Glaziers .....	.87½	44
16. Blacksmiths .....	.85	44
17. Electrical Workers (Journeymen inside Wiremen) .....	.92½	44
18. Bridge and Structural Steel and Iron workers .....	1.25	44
19. Asbestos Workers:		
(a) Journeymen .....	.90	44
(b) First Class Improvers .....	.80	44
(c) Second Class Improvers .....	.70	44
20. Asphalters:		
(a) Finishers .....	.75	44
(b) Men engaged preparing, mixing and heating materials .....	.60	50
21. Carpenters .....	1.00	44

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Pulp and Paper

SAULT STE. MARIE, ONT.—SPANISH RIVER PULP AND PAPER MILLS, LTD., AND THE INTERNATIONAL BROTHERHOOD OF PAPER MAKERS AND THE INTERNATIONAL BROTHERHOOD OF PULP SULPHITE AND PAPER MILL WORKERS. Agreement covering year from May, 1919 to May, 1920 is renewed for one year from May 11, 1920 to May 11, 1921, subject to the following conditions. A 20 per cent increase over the schedule of hourly rates shall be granted

except in cases where increases have been made.

In employing outside common labour where the new schedule is in excess of 50 cents per hour the rate shall be 50 cents per hour for the first 30 days of continuous employment and the schedule rate thereafter. Fractions of hourly rates below one-half cent are to be dropped and one-half a cent or more is to be counted as 1 cent.

### Food Products

VANCOUVER AND NEW WESTMINSTER B.C.—INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL 371 BAKERY SALESMEN, AND LOCAL EMPLOYERS. Agreement effective from May 1, 1920 to May 1, 1921.

Scale of wages. Per week—Bakery salesmen \$30; stablemen (seven days) \$30. Men without previous experience \$25 for the first four weeks.

Six days shall constitute a week's work. A salesman repairing his machine or wagon on Sunday shall receive time and one-half.

Good Friday, May 24, July 1, Labour Day, Thanksgiving, Christmas and New Year's Day shall be observed as holidays. If a salesman is required to work on any of these holidays, he shall receive an extra full day's pay or a day off in the same week following the holiday. A week's work shall consist of fifty hours; week preceding holidays shall be fifty-five hours and week following holidays shall be forty-five hours. All overtime to be paid for at the rate of time and one-half. Every Wednesday shall be considered a half holiday unless preceding or following a public holiday.

In the event of any disputes arising, the drivers of the shop concerned, with the assistance of Union officials, shall endeavor to effect a settlement with the firm. If an agreement is not reached, the dispute shall be referred to an arbitration committee, consisting of two members of the Union and two members of the Association none of whom shall be actual parties to the dispute, nor members nor employees of the firm involved, and this committee shall appoint an independent chairman, not a member of the trade, and the decision reached by this committee shall be accepted as binding on both sides.

EDMONTON, ALTA.—EDMONTON MASTER BAKERS' ASSOCIATION AND INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL 514. Agreement effective from April 5, 1920 to April 5, 1921.

Wages for salesmen in all shops \$28 per week, men without previous experience \$25 for the first four weeks, then to be paid same rate as experienced salesmen. Hours of a working day for bread salesmen shall be from 7 a.m. to 5.30 p.m. Any delivery made after 6 p.m. to be paid at the rate of time and a half, double time for all work done on Sundays and all general holidays. Stablemen in charge to be paid \$28 per week, and when required to reside in barn by employer, comfortable quarters must be provided. Any disputes that cannot be settled with the firm with the assistance of Union officials, shall be referred to an arbitration committee.

### Construction (other than railway)

WELLAND, ONT.—GENERAL CONTRACTORS' SECTION OF BUILDERS' EXCHANGE AND LOCAL UNION, 969 UNITED BROTHERHOOD OF CARPENTERS AND JOINERS. Agreement effective from May 1, 1920 to April 31, 1921.

Eight hours shall constitute a day's work from 8 a.m. to 5 p.m., except Saturdays, when work ceases at 12 noon. No overtime shall be worked except to preserve life or property or other extreme emergency, and double time shall be paid for this work, including Sundays and Holidays.

New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day shall be observed as holidays.

The minimum scale of wages: Per hour—Journeyman carpenter, 85 cents; carpenter foreman, 90 cents. Carpenters working in planing mills or contractor's shops, regularly on supply work, or in factories on maintenance work, (not construction work) may work nine hours a day, except Saturday, when work ceases at 12 noon. The minimum rate of wages shall be 80 cents per hour.

Any grievance of either party shall be submitted to a committee composed of three members of each party to be called immediately upon receiving notice.

OTTAWA, ONT.—DISTRICT COUNCIL OF UNITED BROTHERHOOD OF CARPENTERS AND JOINERS AND LOCAL CONTRACTORS. Agreement effective from May 1, 1920 to April 30, 1921 and thereafter from year to year unless three months' notice of cancellation or change is given by either party.

Eight hours shall constitute a day's work, to be worked between the hours of 8 a.m. and 5 p.m. except Saturday, when four hours shall be worked from 8 a.m. to 12 noon.

Minimum rate of wages shall be 85 cents per hour, foremen 95 cents; but any man incapacitated by old age, accident or other causes, may work for such rate as mutually agreed upon between

himself and his employer, provided same is approved by the District Council.

Overtime shall be worked only where absolutely necessary and shall be paid for at the rate of time and one-half from 5 p.m. to 10 p.m. and double time from 10 p.m. to 8 a.m. starting time; double time on Saturday afternoon, also on the following holidays, New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day including Sundays.

CALGARY, ALTA.—MASTER PAINTER'S ASSOCIATION AND BROTHERHOOD OF PAINTERS, DECORATORS AND PAPER-HANGERS, LOCAL 583. Agreement effective from March 1, 1920 to March 1, 1921.

A day's work shall consist of nine hours the first six months, from 7.30 a.m. to 5.30 p.m. and eight hours the last six months from 8 a.m. to 5 p.m. Four hours on Saturday, ending 12 o'clock noon.

The minimum rate of wage shall be 80 cents per hour. Workmen shall be paid time and one-half from regular quitting time until midnight; after that time, double time. Saturday overtime to commence at noon. Double time is paid after midnight except where a job lasts three nights or more, when time and one-half is paid. Double time to be paid for work on Sundays and Dominion holidays, the latter being New Year's Day, Good Friday, Victoria Day, Dominion Day and Christmas Day. No work is to be performed on Labour Day.

KITCHENER AND WATERLOO, ONT.—UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 527 AND LOCAL MASTER PLUMBERS. Agreement effective from May 1, 1920 to April 30, 1921 and from year to year unless one month's notice in writing is given by either party desiring a change.

Hours of labour shall be from 7 a.m. to 5 p.m. with one hour for lunch for five days. Saturdays from 7 a.m. to 12 noon.

The minimum rate of wages for all journeymen shall be 75 cents per hour.

Overtime shall be paid for at the following rates: to midnight time and one-half and from midnight to 7 a.m. double time, except Sunday and the following holidays, which shall be paid for at the rate of double time: New Year's Day, Good Friday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day. Saturday afternoons shall be time and one-half.

Any grievance arising, which cannot be adjusted by the representatives of both organizations shall be referred to a Joint Arbitration Board. In the event of this Board not being able to settle a dispute the matter must be referred to the General Office of the United Association.

HAMILTON, ONT.—OPERATIVE PLASTERERS AND CEMENT FINISHERS' INTERNATIONAL ASSOCIATION, LOCAL NO. 298 AND LOCAL EMPLOYERS. Agreement effective from May 1, 1920 to April 31, 1921.

The rate of wages per hour were 80 cents from May 1 to May 31 and shall be \$1.00 from June 1.

Eight hours shall constitute a day's work from 8 a.m. until 5 p.m. excepting Saturday when four hours from 8 a.m. shall be worked. Forty-eight hours shall constitute a week's work. The agreement states that no work shall be done on Saturday between 12 noon and 6 p.m.

The following shall be observed as legal holidays. New Year's Day, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving Day and Christmas Day. All work done on these days shall be paid for at the rate of double time. All overtime from 6 p.m. to 10 p.m. shall be paid at time and one-half rate. After 10 p.m. double time shall be paid. Under no circumstances shall any work be done on Labour Day.

All violations of this agreement shall be referred to an arbitration board, composed of three members of the Master Plasterers and three members of the local.

NIAGARA FALLS AND ST. CATHARINES, ONT.—INTERNATIONAL ASSOCIATION OF RIGGERS, MACHINERY MOVERS AND PILE DRIVERS, LOCAL NOS. 182 AND 182-A, AND LOCAL EMPLOYERS. Agreement effective from May 1, 1920 to April 30, 1921.

The rate of wages shall be 75 cents per hour.

Eight a.m. to 5 p.m. shall constitute a day's work, except four hours on Saturday from 8 to 12 noon. All work performed on Saturday after 12 noon shall be paid for at double time, also for work on Sundays, Good Friday, Dominion Day, Thanksgiving, Christmas and New Year's Day and Riggers' Picnic Day. No work shall be performed on Labour Day, except in cases of absolute necessity. Disputes or misunderstandings shall be referred to an arbitration committee composed of three members of the employers and three members of the Union.

NIAGARA FALLS, ONT. — INTERNATIONAL ASSOCIATION OF BRIDGE, STRUCTURAL AND ORNAMENTAL IRON WORKERS, LOCAL NO. 315, AND LOCAL EMPLOYERS. Agreement effective from May 1, 1920 to May 31, 1921.

The rate of wages shall be \$1.00 per hour. Foremen shall receive 15 cents an hour more than the men.

Eight hours shall constitute a day's work except four hours on Saturday from 8 a.m. to 12 noon. All work performed after 12 noon on Saturday shall be paid for at the rate of double time. All other overtime to be paid for at double time rate, such as work performed on Sundays, Good Friday, Thanksgiving and Christmas and New Year's Day. No work shall be performed on Labour Day, except in case of dire necessity.

In case of dispute arising it shall be referred to an arbitration committee composed of three members of the employers and three members of the Union.

BRANTFORD, ONT.—INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 559, AND LOCAL CONTRACTORS. Agreement effective from May 1, 1920 to May 1, 1921.

The minimum wage for journeymen electricians shall be 75 cents per hour.

Eight hours shall constitute a day's work, but four hours only on Saturday.

The rates for overtime shall be as follows: Saturday afternoon, time and a half; nights until midnight, time and a half. After midnight, double time. Sundays and Ontario legal holidays as follows, New Year's Day, Good Friday, Victoria Day, July 1, Labour Day, Thanksgiving and Christmas Days, will be also double time.

Barn janitors and car cleaners; first six months, 51 cents; thereafter, 58 cents. Freight car inspectors, 64 cents; freight car repairers, helpers, 54 cents; painters, 69 cents; freight car painters, 54 cents; brush hands, 54 cents; carpenters, 69 cents; freight car carpenters,  $61\frac{1}{2}$  cents; machinists,  $71\frac{1}{2}$  cents; babbiter,  $63\frac{1}{2}$  cents; trolley retriever repairer, 64 cents; blacksmiths,  $71\frac{1}{2}$  cents; car wire men,  $66\frac{1}{2}$  cents; air brake fitters,  $66\frac{1}{2}$  cents; armature winders, first class,  $71\frac{1}{2}$  cents; second class, 67 cents.

third class, 64 cents. Leading hands while so acting to receive 3 cents per hour extra. Apprentices: first year, 27 cents; second year, 32 cents; third year, 39 cents; fourth year, 44 cents.

Freight shed department: Per hour—checkers, 57 cents; truckers, 54 cents; Per month—auto drivers, \$118.50; rate and chief clerk, \$143.50; cashier, \$138.50; accountant, \$133.50; switching clerk, \$118.50; first abstract clerk, \$118.50; second abstract clerk, \$113.50; billing clerk, \$108.50; demurrage clerk, \$108.50; shedman (Chilliwack), \$113.50.

Track maintenance men: Interurban—Includes all men employed on interurban lines: first three months, 49 cents per hour; thereafter, 54 cents per hour; City—Includes all men employed on city and suburban lines: first three months, 54 cents per hour; thereafter, 59 cents per hour. Foremen: Regular gang foremen, \$123.50 per month; extra gang foremen, \$133.50 per month.

Where section houses are not provided free by the Company, \$5.00 per month extra will be paid in lieu of same.

Track welders, 64 cents per hour; track welders' helpers, 59 cents per hour.

Monthly employees: Baggage-room men (Vancouver), \$118.50 per month, baggage-room men (New Westminster), \$113.50 per month; auto drivers, \$118.50 per month; interlocking tower men, \$108.50 per month; depot master, Carrall Street, \$118.50 per month; ticket clerks, terminal office, \$118.50 per month; train despatchers, \$178.50 per month.

Bridge and Building Master's Maintenance Gang: carpenters, painters and pipe fitters, regularly employed, 69 cents per hour.

Station agents: per month—Cloverdale, \$118.50; Milner, \$118.50; Langley Prairie, \$118.50; Sardis, \$123.50; Clayburn, \$123.50; Abbotsford, \$138.50; Huntingdon, \$123.50; Chilliwack, \$138.50; Steveston, \$123.50; Marpole, \$143.50;

Assistant agents, \$113.50; Steveston assistant agent, \$73.50.

### Transportation-Forwarding and Storage

VANCOUVER, B.C.—GENERAL CART-AGE ASSOCIATION AND INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS, LOCAL 655. Agreement effective from March 27, 1920 to March 27, 1921.

Nine hours shall constitute a day's work from 7 a.m. to 6 p.m. Overtime to be all work performed in excess of the maximum number of hours provided for. Time and one-half for all time in excess of the above, including Sunday, and the following holidays, New Year's Day, Good Friday, May 24, July 1, Labour Day, Thanksgiving Day, Christmas Day.

Minimum scale of wages: Draymen, 6,000 pounds and over, \$5.00; under 6,000 pounds, \$4.75. Furniture drivers, three horses, \$5.25; two horses, \$5.00; autos, 1½ to 3 tons, \$5.00; autos, over 3 tons, \$5.50; piano crew, \$5.50. Baggage wagon drivers, single horses, \$4.00; teams, \$4.50; autos, \$5.00; coal wagon drivers, \$5.25. Autos: Ford parcel delivery, \$4.25; one ton and under 2½ tons, \$4.75; two and one-half tons and under 4 tons, \$5.00; four tons and over, \$5.50. Helpers: coal, \$5.00; furniture, \$5.00; general, \$4.75; casual less than one-half day, per hour, 75 cents; dump wagon drivers, \$5.00; mail drivers (day shift), \$4.50; mail drivers (night shift), \$4.75.

Men without previous experience, 25 cents per day less than above rates for a period of not more than one month. Overtime to be computed as follows: 15 minutes or over, one-half hour shall be allowed; 45 minutes or over, one hour shall be allowed.

Disputes shall be referred to a committee of three and consultation must be had with a like committee of the other party before action is taken.

## PRICES RETAIL AND WHOLESALE IN CANADA, MAY, 1920

THE prices movement continued upward, increases appearing in the wholesale prices index number as well as in the weekly family budget. The feature of the movement, both in wholesale and retail prices, was the steep advance in potatoes and also in onions. Butter recovered slightly from the decrease usual in the spring, but had been fluctuating for some weeks. The same condition appeared in the egg market. Beef advanced appreciably toward the end of the month. There were considerable decreases in hides, textiles and in raw furs, but important increases in lumber and many other lines of building material.

In retail prices the average cost of a weekly budget of staple foods in some sixty cities was \$16.65 at the middle of May as compared with \$15.99 at the middle of April, \$13.53 in May, 1919, and \$7.42 in May, 1914. The chief changes were steep increases in sugar and in potatoes, but there were increases in several of the other lines and decreases in eggs and milk.

In wholesale prices the Departmental index number rose to 356.6 for May as compared with 353.1 for April, 284.1 in May, 1919 and 136.3 in May, 1914. The chief increases for the month were in the groups:—Fruits and Vegetables, Miscellaneous Foods, Lumber, Grains and Fodder, Animals and Meats, Fish, Fuel, Paints, Oils and Glass, with the chief decreases in Dairy Products, Textiles, Hides and in Raw Furs.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workmen. All prices are for delivered goods. The exact quality

for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For instance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft

coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In meats, sirloin steak averaged slightly higher, having risen in several of the cities. In shoulder roast the average increase was less. Mutton and fresh pork averaged slightly higher.

Salt pork and lard were slightly lower but breakfast bacon was slightly up.

Eggs averaged slightly lower, there being increases in some of the cities and decreases in some of the others. Milk was lower at Sherbrooke, St. John's, Thetford Mines, Montreal, Hull, Ottawa, Toronto, Sault Ste. Marie and Nelson. In butter, there were increases in some cities and decreases in others, the averages being practically unchanged. Cheese also showed little change.

Bread advanced at St. Thomas, Owen Sound, Sault Ste. Marie, Port Arthur, Fort William and Winnipeg. Flour was higher at St. John, Fredericton, St. John's, Orillia, Toronto, Guelph, Woodstock, London, Owen Sound, Sault Ste. Marie, Fort William, Winnipeg, Brandon, New Westminster, Vancouver, Victoria and Nanaimo. Canned vegetables were little changed. Onions advanced considerably, rising to 15, 18 or 20 cents per pound in some of the cities. Potatoes again advanced considerably in all the provinces, averaging \$6.15 per bag as compared with \$4.78 in April and \$1.97 in May, 1919. Fresh apples showed considerable increases, but evaporated apples were almost unchanged. Prunes, raisins and currants were steady. Jam and canned fruits were little changed. Marmalade and corn syrup showed a number of increases. Honey was quite steady. Sugar advanced in many of the cities, granulated averaging 21.7 cents per pound as compared with 19.5 in April and 11.9 in May, 1919. Tea and coffee were steady.

Anthracite coal was higher in many of the cities and bituminous coal also advanced in several of the cities east of Winnipeg. Wood was higher in some localities.

Rent advanced considerably in many cities, chiefly in Quebec and Ontario, the greatest increases being at Montreal and Toronto.

### Wholesale Prices

GRAINS AND FODDER.—Wheat was unchanged at the prices fixed early in

\*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc., one of spelter was dropped in 1915.

the year. Barley showed little change, rising from \$1.80 per bushel at Winnipeg to \$1.82 and falling back to \$1.80. Oats advanced slightly rising from \$1.16 to \$1.18 at Winnipeg for No. 2 Western and from \$1.07 to \$1.10 for No. 2 Ontario at Toronto. American Corn advanced considerably, rising from \$2.12 to \$2.40 for No. 3 Yellow. Flaxseed dropped from \$5.11 per bushel to \$4.51 at Winnipeg. Rye and peas were steady. Hay was \$1.00 per ton higher at Montreal and Toronto. Bran rose to \$54.00 per ton and shorts to \$61.00.

**ANIMALS AND MEATS.**—Finest western cattle rose from \$13.00 to \$17.00 per hundred at Winnipeg. Choice butcher cattle at Toronto rose from \$13.50 to \$14.75 per hundred. Beef, dressed, hindquarters, advanced from 28c. per pound to 30c. at the beginning of the month, and in the last week to 32c. Forequarters advanced from 17c. per pound to 20c. in the last week. Veal was \$1.00 lower at \$16.00-24.00 per hundred. Live hogs fell from \$19.25 per hundred to \$18.75 in the second week but recovered in the following week. Breakfast bacon rose from 44c. per pound to 47c. Medium-sized hams advanced from 40c. to 42c. per pound. Sheep were lower at \$10.00-14.50 per hundred. Dressed lamb was lower at \$29.00-30.00 per hundred.

**DAIRY PRODUCTS.**—Finest creamery butter fell from 60c. per pound to 54c. but rose  $\frac{1}{4}$ c. in the last week at Montreal. Dairy butter declined from 48-57c. per pound to 45-53c. Cheese was firmer at 29 $\frac{1}{2}$ c. at Montreal. Eggs rose to 58c. per dozen at Montreal but fell to 57c. Prices at country points rose from 48c. to 49c. at the beginning of the month but fell to 46c., recovering to 48c. in the last week. Milk was down to lower prices for the summer season in a number of the cities.

**FISH.**—Salt mackerel dropped from 10c. per pound to 9c. Canned lobster advanced from 40c. to 45c. per pound. Salmon trout, fresh, was up to 20c. at Toronto and whitefish to 23c.

**FRUITS AND VEGETABLES.**—Bananas rose to \$7.00 per bunch. Lemons were higher at \$5.00 per box and oranges at

\$6.00. Potatoes advanced at Toronto to \$7.75 per bag, in small lots, and at Montreal, the price rose to \$6.25 in car lots. Onions rose to \$12.00 per bag.

**MISCELLANEOUS FOODS.**—Bread at Toronto advanced to 8c. per pound. Spring wheat flour rose from \$13.30 per barrel to \$14.75 at Toronto and winter wheat flour rose to \$13.00. Molasses advanced from \$1.53 per gallon to \$1.78. Sugar was steady at the prices reached in April. Maple sugar fell from 32-35c. per pound to 28-30c. Glucose was higher. Salt advanced about 10 per cent. Cream of tartar rose from 80c. per pound to 85c.

**TEXTILES.**—Ontario wool came on the market at 21-35c. for unwashed grades, as compared with 42-46c. last year. Raw cotton was slightly lower at 41.6c. per pound at New York. Coloured cottons averaged higher. Raw silk, Japan, fell from \$11.95 per pound to \$9.27 per pound. Italian silk, classical, extra, fell from \$14.60 per pound to \$12.75. Jute and hessians declined about 5 per cent. Flax fibre advanced.

**HIDES, LEATHER, BOOTS AND SHOES.**—No. 1 beef hides fell from 25c. per pound to 22c. Calfskins fell from 50c. per pound to 35c. Horsehides fell from \$10.00-11.00 to \$9.00-10.00 each.

**METALS AND IMPLEMENTS.**—Black sheets and galvanized sheets advanced. Antimony, brass, and solder were higher, but lead, quicksilver, sulphur, spelter, and tin declined.

**FUEL AND LIGHTING.**—Bituminous coal at Montreal advanced to \$9.50 per ton and anthracite coal to \$12.90.

**BUILDING MATERIALS.**—New Brunswick spruce deals rose to \$40.00 per M. and shingles to \$7.50-\$8.00. At Ottawa, pine, good sidings, rose to \$150.00 per M., shipping culls to \$75.00, and box boards to \$52.00. Hemlock, log run, advanced to \$45.00-47.00 per M. and spruce to \$50.00-52.00. British Columbia fir fell \$2.00 at Winnipeg as a result of the falling off in the demand for export to the United States. Fire bricks were higher but coal tar, lead pipe and linseed oil were lower. Turpentine

advanced to \$4.25-5.00 per gallon. Glue advanced 10c. per pound.

HOUSE FURNISHINGS.—Iron beds advanced approximately 10 per cent. Glassware and earthenware advanced 15 per cent.

DRUGS, AND CHEMICALS.—Alum, bleaching powder, and copperas were

higher but caustic soda was easier.

MISCELLANEOUS.—Malt advanced slightly. In raw furs there were considerable decreases, especially in muskrat skins. Pulp, groundwood and sulphite, was higher. Rubber, crude, was easier at 14½c. per pound. Laundry starch advanced to 12¼c. per pound.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest statistics available as to prices movements in the United Kingdom and in other countries.

### United Kingdom

In the United Kingdom, a considerable rise in retail prices of food occurred between the beginning of April and the beginning of May, 1920, the increase in the former month being 135 per cent, and in May 146 per cent above the level in July, 1914, as reported in the *Labour Gazette* of the Ministry of Labour. The advance is due to the higher prices for flour and bread resulting from the reduction of the Government subsidy on the 12th of April. Bread prices rose 3d. per 4 lbs., and flour prices 7d. per 7 lbs. There was a decrease of about 10 per cent in the price of milk and fish during the month, but slight increases in the prices of potatoes and bacon. The increase in rents of working-class dwellings is estimated at about 15 per cent of pre-war rents, the advance being due to higher taxes, etc., as the Increase of Rent Restriction Acts limits the rents that may be charged. Further advances occurred in the prices of clothing, the increase in certain staple lines being from 320 to 330 per cent over prices of similar articles in July, 1914. At the first of May there was little increase over the previous month in the prices of fuel and light, the average increase since July, 1914, being estimated at about 85 per cent. The advance of 14s.

2d. per ton in the price of coal on the 12th of May is not included in this figure, which relates to the 1st of May. The increase in the prices of other articles of average household use is estimated at 120 per cent and the advance in all the items included in the calculation, the qualities and quantities being as nearly as possible identical with pre-war consumption, is estimated at about 141 per cent. The similar figure for the 1st of April was 132. In wholesale prices the index number of the *Statist*, London, receded six points as a result of decreases in animal foods, textiles and sundries, although vegetable foods and minerals advanced.

### Holland

In Amsterdam the increase in the cost of food to working-class families at the 1st of March, 1920, was 104.9 per cent above the prices in 1913, but this represented a decrease from the figure for the previous month of .1 per cent.

### Italy

The Municipal Labour Office at Rome reported a decrease in food prices in March as compared with those in February of 0.2 per cent, but advances occurred in the prices of other household necessities with the result that an increase of 0.7 per cent in the general level of prices as compared with February and of 196 per cent over the average prices in the first half of 1914 took place.

## Switzerland

In Switzerland, the Statistical Bureau of the Union of Swiss Co-operative Societies estimates a decrease of 0.2 per cent in retail food prices on the 1st of March as compared with the 1st of December, 1919. "Including the prices of fuel, lighting and soap in the calculation, the level of prices during the same period fell by 0.1 per cent. The increase of food prices since the 1st of June, 1914, is estimated at 136.9 per cent, and that of all items considered 144.4 per cent.

## New Zealand

In the monthly Abstract of Statistics the Government Statistician has published an index number of wholesale prices covering the period 1909 to 1919. As in the case of the index number of retail prices published since 1915 the five-year period 1909-1913 is used as the base and the numbers are weighted according to the aggregate expenditure on each commodity in the country at that time. The accompanying table gives the annual averages for 1909 to 1918 and the figures by months for 1918 and 1919.

THE GOVERNMENT STATISTICIAN'S INDEX NUMBERS OF WHOLESALE PRICES OF COMMODITIES IN THE FOUR CHIEF CENTRES OF NEW ZEALAND, 1909-1919.

(Base: Average Annual Aggregate Expenditures, Four Chief Centres, 1909-1913=1000.)

### United States

In wholesale prices, *Dun's Review*, New York, June 12, reported a decline in its index number for the first of June with the following comment:

"... the change in the index number, slight as it is, may reflect the beginning of a gradual, if irregular, recession to a more natural price basis. It is significant in this connection that a larger decline on June 1 was chiefly prevented by the persistent strength of grain prices, and that market tendencies thus far this month have been mainly in a downward direction, with lower quotations not infrequently named on forward shipments than

are ruling on spot deliveries. While the high costs of production, and losses in output from one cause or another, are cited as reasons for the maintenance of prices at or near present levels, yet consumption of merchandise, as a whole, has diminished perceptibly, with demands now centering more in articles of a staple character, and the fact that the increasing imports from abroad are coming into sharper competition with various domestic commodities, has a bearing on the future price situation. With the phases of extravagant buying and of urgent bidding for goods being steadily modified, and with financial developments necessitating liquidation in not a few quarters, existing conditions would appear to foreshadow further price reaction, although any abrupt decline, except perhaps in isolated instances, seems highly improbable."

## WORKMEN'S COMPENSATION IN NOVA SCOTIA IN 1919

### Formation of Accident Prevention Association by Nova Scotia employers

THE chief feature of the third annual report of the Workmen's Compensation Board of Nova Scotia, is the large reduction in the number of fatal accidents reported during 1919 as compared with the two previous years. The chief reason for this reduction was the absence in 1919 of any disaster, whereas in 1917 there was a coal mine explosion at New Waterford, which accounted for 65 fatalities, while in 1918 an explosion in a coal mine at Stellarton and a fire in a lumber camp in Colchester County accounted for 88 and 17 fatalities respectively. If the disasters above referred to are excluded for the purpose of making a comparison between the apparently normal fatal accidents of the three years, it is found that the number for 1919 is only a little more than half those numbers for the two previous years.

	1917	1918	1919
Fatal accidents.....	146	185	47*
Deduct disasters.....	65	105	....
Ordinary fatal accidents.....	81	80	47

\*Of these fatalities, 28 occurred to minors and 3 to men over 70 years of age.

A further analysis shows that the greatest improve ment must be credited to the coal mining industry, in which not only were disasters avoided but the ordinary fatal accidents were reduced to exactly half what they were in 1918, as follows:

	1917	1918	1919
Fatalities in coal mines.....	97	126	19
Deduct disasters.....	65	88	....
Ordinary fatalities in mines.....	32	38	19

The following statement gives the accidents of all kinds reported to the Board during the three years the Workmen's Compensation Act has been in operation:

	1917	1918	1919
	Revised	Revised	So far Reported
Temporary Disability.....	4,504	4,504	4,277
Permanent Disability.....	186	242	156
Deaths.....	146	185	47
Claims Pending Completion.....	.....	.....	408
Total Compensable.....	4,836	4,931	4,888

Compensation, pensions, etc., paid and estimated for the year were as follows:

Compensation, other than pensions.....	\$ 207,968
Compensation, estimated for reported claims....	307,664
Pension awards.....	410,338
Reserves for pension awards.....	261,235
Special medical treatment.....	491
Paid to Safety Associations.....	1,155
Disaster reserve.....	113,771

During 1919, assessments and estimated adjustments of payrolls amount to approximately \$1,143,000 which was \$207,000 less than the assessment for 1918. The chief reason for the reduction was due to a lowering of the rates in some of the main industries, for example:

	Rates.	
	1918	1919
Coal mining.....	4.40	3.00
Steel and Iron Mfg.....	1.90	1.50
Building.....	2.00	1.50
Stevedoring.....	4.00	3.00
Steam Railways.....	4.50	2.00
Lumbering, etc.....	3.00	2.50

The result justified the reduction in all the cases except lumbering. In the lumbering and woodworking class there is a deficit of about \$35,600 for the year's operations, the larger part of which arose out of the lumbering and saw mill industries.

The administration expenses for the year amounted to \$66,205, being in the ratio of 5.76 to the total amount of assessments. In 1918 the ratio of administration expenses amounted to 3.66 of the assessments; and in 1918, to 2.58. The increase in the expense ratio was due partly to the fact that the assessments in 1919 were over \$200,000 less than in

1918, although the actual work is increasing and must necessarily increase for some years, as in addition to the new accidents each year, the cases of continuing disability from accidents of previous years have to be handled. The staff increased from 38 at the end of 1918 to 45 at the end of 1919, exclusive of the three commissioners.

With respect to accident prevention, the report states that during the year a general accident prevention association was organized under Section 80 of the Act taking in all the industries of the Province. The constitution provides for the organization of sections to deal with particular industries. Two sections were organized, one comprising the iron, steel and metal industries, the other, the lumbering and woodworking industries.\* Enthusiastic meetings were held and capable officers were appointed not only in connection with the general association, but also in the sections that were organized. The expenses of the association are paid by the Compensation Board out of the accident fund.

\*The Nova Scotia Accident Prevention Association has recently opened an office at Halifax, under the direction of Mr. H. R. Thompson, of the Canadian Manufacturers' Association. One of the purposes of the Association is that it shall be a medium through which the views of the employers may be represented to the Workmen's Compensation Board. The metal trades section of the Association has already issued a handbook of Safety Rules and Regulations of the metal trades. These rules have been approved by the Board.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**A**N employee of the Montreal Tramways Company met with an accident in one of the Company's cars when going home from work. When he rose to leave the car he slipped and fell heavily on the floor, and sustained an injury which resulted in a permanent partial incapacity, greatly reducing his capacity for work. The injured man brought action against the

**Street car employee hurt on car when going home awarded compensation under Quebec Industrial Accident Law**

Company for \$14,000 damages, claiming that the accident was due to the inexcusable fault of the Company, as its conductor had neglected to put sand or other material on the planks to prevent them from being slippery.

It was held by the Superior Court that the plaintiff had not proved that the accident was due to the inexcusable fault of the Company or its servants and that it was doubtful whether the

plaintiff's fall was caused by the car stopping too suddenly, or by ice on the floor and the negligence of the conductor in not sanding it. The Court held, however, that inasmuch as the the Company gave its employees the privilege of riding free on its cars to and from work, which was to the advantage of the Company, assuring it of better punctuality on the part of its employees, and of fresher workers, and also to the advantage of the employees as it was equivalent to a kind of bonus, it appeared that the right of going and returning in the Company's cars was a part of the payment for services rendered. Under these circumstances it was held that the accident to the plaintiff took place in the course of his employment, and therefore the provisions of the law of industrial accidents applied in this case. The plaintiff was therefore awarded the sum of \$280 for temporary incapacity while he was being treated and \$2,000 for permanent partial incapacity. This judgment was confirmed on appeal. (*Quebec—Girard v. Montreal Tramways Company.*)

An employee of the Harris Construction Company of Montreal was struck by a wagon and killed.

**Employer liable for accident caused by his driver** The Travellers' Insurance Company, having insured the Harris Construction Company against accidents to its

workmen, paid the damages and then brought action against the owner of the wagon to recover the amount. In the Superior Court it was found that \$1,200 damages had been suffered, but the condemnation against the defendant was reduced to \$600, owing to contributory negligence on the part of the victim. An appeal was made by the defendant and the decision of the Superior Court was reversed by the Court of Review. The insurance company then took the case to the Court of Appeal, which restored the judgment of first instance. In delivering his judgment, the Chief Justice of the Court of Appeal said: "L— must be held liable for damages for two reasons; first, because the driver of his wagon was imprudent (Article 1053, C.C.); and, secondly, because defendant-respondent, as proprietor of the horse and vehicle, is responsible in virtue of Article 1055 of the code." (*Quebec—Travellers' Insurance Company v. Laframboise.*)

# THE LABOUR GAZETTE

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

The present issue contains a report of the Deputy Minister of Labour on his mission to France and England as representative of the Canadian government on the Governing Body of the International Labour Office, at its meetings in January and March. It also contains a summary of the various laws bearing on labour matters which were passed at the recent sessions of the Dominion Parliament and the legislatures of New Brunswick, Ontario, Alberta, and British Columbia, and an account of the proceedings of the fortieth annual convention of the American Federation of Labour, which met at Montreal on June 7 to 12.

The cost of the weekly family budget of staple foods averaged \$16.92 at the middle of June as compared with \$16.66 in May and \$7.35 in June, 1914. The index number of wholesale prices fell considerably, being 349.3 for June, as compared with 356.6 for May, 284.1 for June, 1919, and 135.3 for June, 1914.

At the beginning of June the percentage of unemployment among members of trade unions was 2.88, as compared with 2.83 at the beginning of May, and with 3.83 at the beginning of June, 1919. According to returns received from nearly 5,000 firms, the increase in employment reported during May continued for June with a slight decline toward the end of the month,

owing to a shortage of fuel and raw material in some industries.

The time loss due to industrial disputes during June was greater than during May, 1920, but less than during June, 1919. There were in existence during the month 60 strikes, involving about 12,406 workpeople and resulting in a time loss of 155,502 working days. At the end of the month there were on record 33 strikes, involving about 5,182 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During June the Department received reports from six Boards established to deal with disputes between (1) the Grand Trunk Railway Company and certain of its employees, being clerks, etc.; (2) the Dominion Transport Company, Limited, Toronto, and its employees, being teamsters, chauffeurs, stablemen and helpers, members of Local Union No. 191, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America; also the Dominion Transport Company, Limited, and the same class of employees at London, Ontario, members of Local No. 662, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America; (3) the Canadian General Electric Company and certain of its employees at Peterborough, being

machinists and electrical workers; (4) the Toronto Railway Company and its motormen, conductors, shopmen, motor and truck repairmen, compressor and fender room men and trackmen; (5) the Canadian National Express Company and certain of its employees, being members of the Canadian Brotherhood of Railroad Employees, and (6) the Nova Scotia Steel and Coal Company and certain of its employees, being members of the following organizations: the Amalgamated Association of Iron, Steel and Tin Workers of America, the International Brotherhood of Electrical Workers, and the International Association of Machinists.

Six applications were received for the establishment of Boards and further appointments were made in connection with applications which had been received during the previous month.

**Interesting  
appointments  
to International  
Labour Office**

Two appointments of somewhat unusual interest have been made recently by the International Labour Office. Dr. W. A. Riddell, for several years Deputy Minister of Labour for the Province of Ontario, recently resigned that position to become associated with the Employment and Immigration Section of the International Labour Office which is now in course of establishment at Geneva, Switzerland. It is understood that Dr. Riddell retains a certain connection with the Ontario Government, having been requested to act as advisor to the Agent General for Ontario in London, England, as to matters pertaining to continental labour and immigration.

A second appointment by the International Labour Office is that of Dr. Royal Meeker of Washington, D.C., for several years head of the Bureau of Labour Statistics of the Department of Labour of the United States. Dr. Meeker goes to the International Labour Office, as Editor of the *Daily Bulletin* which has been for some time issued from the International Labour Office, but which up to the present time has appeared only

in French. Dr. Meeker is understood to be leaving the United States for Geneva at the end of July.

**Committee on  
Industrial  
Fatigue**

A Committee on Industrial Fatigue, under the honorary Advisory Council for Scientific and Industrial Research, has recently been established by the Canadian Government. The functions of this committee are purely advisory and investigatory. Its general purpose is to make the knowledge and experience of medical science, as it bears on industrial health and efficiency, available for all industry, thus helping employers to increase production by reducing lost time and labour turnover, and enabling employees to maintain steady wages and employment by reducing preventable illness and hardships of working conditions. Its main objects are: (1) to offer manufacturers the assistance of scientific laboratories in solving the health problems presented by particular processes in their plants; (2) to offer all interested the use of the Committee's intelligence bureau where the most up-to-date information on general and specific problems of industrial hygiene is kept; (3) to co-operate in investigations into the conditions in different industries; into the incidence and causes of sickness, whether occupational or general; and into the actual relation existing between hours of work, working environment, etc., and production. The Committee is composed of the following members: Professor J. J. R. Macleod, Chairman, Mr. R. M. Hutton, Secretary, Mr. E. A. Bott, Honorary Secretary, all of the University of Toronto; Dr. A. B. Macallum, Administrative Chairman, Honorary Advisory Council for Scientific and Industrial Research (ex-officio); Professor Asselin, Laval University, Montreal; Professor Dagneau, Laval University, Quebec; Professor D. Fraser Harris, Dalhousie University, Halifax; Mrs. Geo. Hambleton, representing women's organizations and social work; Mr. John Lowe, Jr., the Montreal Cottons, Limited, Valleyfield, Que.; Mr.

J. A. McClelland, representing the Department of Labour, Ottawa, and Professor John Tait and Professor William Tait, both of McGill University, Montreal. The Committee has established an office in the Medical Building of the University of Toronto, and it is hoped, later, to establish offices in all the chief industrial centres.

**Canadian  
Fisheries  
Association  
Convention**

The fourth annual convention of the Canadian Fisheries Association was held at Vancouver, B.C., on June 2-

5. Among the subjects discussed was that of technical education in relation to the fisheries industry. Professor John Cobb, director of the College of Fisheries, University of Washington, Seattle, gave details of the work carried on at that college and stated that any Canadian or allied soldier was permitted to enter the college without paying any fees. Mr. F. E. Burke, of Vancouver, said that steps had been taken to create a similar college in Vancouver, and the University of British Columbia would be asked to co-operate in the work. A resolution was passed pointing out that in the matter both of industrial education and opportunity the fishing industry had been neglected, and expressing the opinion that the government should establish fishery schools which would be financed by the government and the industry. The officers elected for the ensuing year included Messrs. A. L. Hager, Vancouver, president; J. A. Paulhus, Montreal, first vice-president; A. Boutilier, Halifax, second vice-president, and F. E. Burke, Vancouver, third vice-president.

**Accident pre-  
vention regula-  
tions in Alberta**

As the result of a conference between the Workmen's Compensation Board of Alberta and representatives of employers and employees falling within the scope of the Workmen's Compensation Act, a set of regulations for the prevention of accidents has been issued by the Board to come into effect on July 15. The

Board states that the solution of the problem of accident prevention lies to a large extent in the installation of proper mechanical guards about dangerous machinery and an organized educational campaign among the workmen to secure greater care and better judgment in carrying on their work. These rules contain provisions for the guarding of all machinery in specified ways, the wearing of suitable clothing by the workers, provision for the safe operation of cranes and derricks, and special safety rules for sawmills, lath mills, wood-working, laundries, candy-making, and building construction. The regulations also provide for the formation of a Safety committee of two or more members in every manufacturing plant, work-shop or other industrial undertaking where ten or more workmen are employed. The committee's duties are to make monthly inspections of the entire establishment or place of work, conduct inquiries as to the cause of serious accidents, and generally to educate workmen into safer methods of doing their work. It is the workmen's duty to make suggestions to the committee as to the conditions and methods of work so that the committee may pass on these recommendations, determine their practicability, and make written recommendations to the management. Such recommendations should also be forwarded to the Workmen's Compensation Board.

**Effect of decline  
in number of  
miners on coal  
production**

The average number of tons of coal mined per man per day in the Dominion Coal Company's mines in Nova Scotia was recently stated by the Company to show a downward tendency in recent years, as follows: In 1916, 590 tons; in 1917, 550 tons; in 1918, 500 tons; in 1919, 460 tons. The output of the mines was 7,600,000 tons in 1913; 7,000,000 tons in 1914; 6,600,000 tons in 1915; 6,800,000 tons in 1916; 5,800,000 tons in 1917; 5,600,000 tons in 1918; and 5,100,000 tons in 1919. The *Canadian Mining Journal*, in a recent issue,

claims that this shortage of production is caused not by diminished efficiency but by the reduced proportion of men actually engaged in cutting coal, to the total number of employees at the mines. The apparent decline in production per miner results from the fact that while the number of face-miners has fallen seriously, the shortage at the Nova Scotia collieries alone being estimated at 5,000 men, the number of auxiliary or non-productive workers remains constant. In the Mines Report for 1919 the number of men actually engaged in cutting coal is stated to have averaged 2,874 for the year, or about 500 men less than the number of men in this class employed in the Cape Breton collieries of the Dominion Coal Company alone before the war. "It is the excess of non-producers," concludes the *Canadian Mining Journal*, "brought about by the unremedied shortage among the producers, that causes the apparent inefficiency in production when the total production is divided by the total force of workmen employed." The enlisted miners are said to have sustained heavy losses in the war, and many who returned from overseas were unwilling to resume their places in the mines. "Foreign importations cannot make up for the loss of the native Nova Scotia miner, who is a disappearing asset of this Province." A similar serious shortage is reported from the British Columbia coal fields, where, it is suggested, the general application of the 8-hour day to all other industries has deprived the mining industry of the advantage it formerly enjoyed in hours of labour as compared with other occupations. It is stated that many coal miners who went overseas from British Columbia did not return to their work underground.

#### Principles of industrial pensions

The Industrial Bureau of the Merchants' Association of New York has made a report

on private industrial pensions based on a survey of 142 systems. The following six principles in establishing a pension system are laid down in the report: "No

pension system should be started without competent actuarial guidance. The problem of 'accrued liabilities' should be given careful and special consideration. The legal obligation laid upon the corporation should be carefully considered. The money of the pension fund should be kept entirely separate from all other sources of the corporation. The solvency of the pension fund is not only dependent upon its original foundation, but also upon the administration after it is set up. A pension system should be framed in co-operation with representatives from the employees rather than solely by the employing corporation itself." According to the report, "The fundamental reason underlying almost every pension system is the desire of the employer to assure his employees of independence during their old age, both as a reward for faithfulness and as the best method of performing their duty. A prevalent social theory which the average employer accepts is that an employer should not use the services of an employee during the fruitful period of his life and then heartlessly discard him to the human scrap heap, where he is dependent upon society if he has not been able to accumulate savings from his earnings to care for himself and his dependents during his old age. On the other hand, it is expensive and unsatisfactory to keep an employee who has become inefficient, because of old age, at his regular position, and it is frequently difficult to find sufficient positions suitable to the capability of or satisfactory to all superannuated employees. The only alternative is to pension them in some way. . . . The intelligent interest of employees can be obtained in two ways: In the first place, by obtaining their whole-hearted endorsement before installing a pension system and by co-operating with them in framing the provisions and operating the system after installation and, in the second place, by making it in fact a system of the employees through financial contributions by them. The lack of success of pension systems is due in no small

degree to the fact that they are usually autocratic and paternalistic, rather than democratic and co-operative."

**Federation of agricultural labourers in France**

The four existing federations of agricultural labourers in France recently combined in a single organization under the name of the National Federation of Agricultural Labourers, with headquarters in Paris. The objects of the new Federation, which is stated to be entirely economic and non-political, are as follows: "To unite in a single block all agricultural labourers and specialists, without distinction of trade, sex or nationality, with a view to setting work free and emancipating it from capitalistic exploitation by socializing means of production for the exclusive benefit of producers and contributors to the national wealth; to transform agricultural methods and customs with a view to re-establishing the balance between production and consumption; to regulate working hours, wages and conditions and give to the workers direct control of production and prices; to provide for capable professional labourer inspectors; to establish a retirement fund for its members." The Federation has been admitted as a member of the General Federation of Labour. Besides labourers, small owners, farmers and *métayers*, who work with the help of their families, are admitted to membership.

**Shop steward plan in South Africa**

The South African government has accepted the recommendation of a conciliation board that the "shop steward" plan be extended to the railways of that Dominion. The minister of railways has agreed that the stewards should be elected by the grades concerned and should be regarded as the medium between the Administration and the grade concerned upon matters affecting the grade generally. It is to be understood, however, that their functions cannot overrule or conflict with the general policy existing

between the Administration and the whole staff.

**Jottings**

Between the years 1912 and 1919, inclusive, the Government collected from shipping entering Canadian ports \$736,775 on account of dues to the sick mariners' fund. During the same period expenditures for relief of sick and distressed seamen totalled \$705,259.

The Workmen's Compensation Board of Ontario reports a large increase in industrial accidents during the first six months of 1920, there being 25,940 as against 19,811 in the same period last year. The greatest number of accidents occurred in June, when an average of 183 accidents per day was reported. There were 36 fatal accidents during June. The sum of \$2,451,912 was awarded for compensation and medical aid as compared with \$1,846,509 in the first half of 1919.

On June 11, the Manitoba Safety League was organized along lines similar to those set down by the Ontario Safety League. It is intended that the governing body shall include representatives from the government, the various cities of the province, educational institutions, organized associations and clubs, and the citizens at large.

Under a new schedule compiled by the Workmen's Compensation Board of British Columbia, medical fees for doctors on all cases coming under the scope of the Board are to be increased by from 25 to 30 per cent. This is the first increase in fees allowed by the Board since 1917 and is lower than recognized by the Medical Association.

A royal decree has recently been signed in Italy creating a Ministry of Labour and Public Welfare.

The Employees' Congress of the American Multigraph Company, Cleveland, Ohio, have guaranteed that production will be maintained in quantity

and quality at the nine-hour standard, if the company reduce the hours from nine to eight per day. A similar arrangement entered into last October to reduce the hours from 10 to 9 was successfully carried out. The company have agreed to give the plan a six months' trial.

The Brotherhood of Locomotive Engineers' Co-operative Bank, of Cleveland-Ohio, will soon begin operations with a capital of one million dollars. An official of the Plumb Plan League says that the policy of the bank will be "to lend money to workers and farmers instead of to speculators and manipulators."

## INDUSTRIAL CONDITIONS DURING JUNE, 1920

### I.—General Review

A continued average increase in the total volume of employment in Canada was recorded in June, the more important gains being in the building, saw-milling and pulp and paper industries and in railway construction. Slight declines occurred in Manitoba and Prince Edward Island, while in Ontario and British Columbia a small drop in the first week was more than offset by steady gains during the rest of the month.

The metals and machinery, and vehicles (land and water) groups were still hampered, especially in Ontario, by a shortage of raw materials and of coal; increases were steady in Nova Scotia and New Brunswick; the car building industry in the former being active; but in Quebec the car shops showed a slight decline in the numbers employed. In the food group some slackness was evident in the first week, mostly in the sugar and confectionery industries, but in the third week there was a recovery due to increased activity in the fruit and vegetable canneries, confectionery and starch factories. Employment in the textile and clothing industries still showed the depression usually apparent in the interval between the busy seasons of the year, annual stocktaking causing still further declines. The leather trades were also affected by seasonal slackness

and summer stocktaking; but rubber factories were busy especially in the tire departments. The pulp and paper factories continued to increase their staffs. The printing and publishing trades were somewhat adversely affected by shortage of newsprint. The woodworking and furniture industries were increasingly active as the result of the demands of the building trades. The clay, glass and cement group was fairly steady, though a decline of employment was recorded in the cement plants in Quebec. In the paint, oil and chemical factories some gains were recorded, especially in soap plants. Railway transportation showed steady gains throughout the month, while shipping and longshore activity was fairly well maintained with local fluctuations depending upon movements of ships. In mining (other than coal) some gains resulted from renewed activity in the copper and nickel refineries, and in the coal mines gains were recorded in all except the British Columbia fields, two large mines in Nova Scotia taking on many additional workers. Railway construction (including maintenance of way) continued to record gains in every province, especially Ontario. Logging operations continued to show the usual decline as river drives were completed, though some increases in bush operations were recorded; the re-opening of many sawmills for the season's run resulted in large gains in employment.

#### The Labour Market

The loss of time on account of industrial disputes during June was greater than during May, but less than during June, 1919. There were in

#### Strikes

existence at some time or other during the month 60 strikes, involving about 12,406 workpeople, and resulting in a time loss of 155,502 working days, as compared with 73 strikes, 12,005 workpeople and 145,168 working days in May, 1920; and 93 strikes, 85,052 workpeople and 1,370,601 working days in June, 1919. On June 1, there were on record 33 strikes, affecting 4,559 workpeople. Twenty-seven strikes were reported as having commenced during June, as compared with 53 in May. Fifteen of the strikes commencing prior to June and twelve of those commencing during June were reported terminated, leaving 33 strikes involving about 5,182 workpeople, on record at the end of the month.

The prices movement was again marked by considerable decreases in some articles, with increases in others, many of the changes being seasonal.

#### Prices

In wholesale prices there were declines in hogs, sheep, hay, potatoes, lake fish, butter, eggs, wool, jute, raw silk, hides, some metals, turpentine, raw furs and rubber, but advances in oats, barley, corn, cattle, cheese, sugar, cotton goods, iron products, coal, coke, gasoline, coal oil, bricks, chemicals, and paper. The

Departmental index number, therefore, showed a considerable drop for the month, standing at 349.3 as compared with 356.6 for May, 284.1 for June, 1919, and 135.3 for June, 1914. As compared with June, 1919, there were decreases in the groups Animals and Meats, and Hides, but increases in all the other groups. In retail prices foods were upward owing chiefly to increases in meats, sugar, and potatoes, with slight increases also in eggs, bread, flour, rolled oats, but decreases in milk, butter, and rice. The average cost of a weekly food budget of 29 staple foods at the middle of the month in sixty cities was \$16.92 as compared with \$16.66 at the middle of May, \$13.72 in June, 1919, and \$7.35 in June, 1914. The chief increases as compared with a year before were in potatoes, which averaged \$6.51 per bag as compared with \$2.12 in June, 1919, and \$3.86 in June, 1917, the highest level previously. Reports indicated that consumption was greatly reduced, and as supplies from the new crop came on the market in increasing volume toward the end of the month, the prices for both new and old potatoes were falling rapidly. In meats the greatest increase appeared in sirloin steak, the other lines being little higher, while lard was down. Sugar was nearly twice as high. Eggs, milk, butter, bread, flour, rice, evaporated apples and prunes were substantially higher. In fuel, coal, wood and coal oil were up, while in rent the average was 20 per cent higher.

## II.—Industries and Trades.

The iron and steel industries of Nova Scotia continued active during June, labour being generally well employed; from three blast furnaces at

#### Metals and machinery

SYDNEY 22,600 tons of pig iron were produced; 26,450 tons of ingots were moulded; 4,500 tons were put through the billet mill; at the plate mill 4,100 tons were rolled; the output of rods was 9,450, of light rails 730, of

wire 1,000, and of nails 990 tons; stove, furnace and metal roofing workers continued active. Production from the four blast furnaces at SYDNEY MINES amounted to 7,200 tons of iron and 12,000 tons of steel. HALIFAX reported steady employment in the nut, iron bar and skate industries. WESTVILLE reported skilled and unskilled labour well employed; all the Nova Scotia Company's steel plants still running steady double shifts (ex-

cept on Sundays) with all the mills busy; the structural steel industry was steady; engine and boiler and farm implement workers were busy, sheet metal plants were fairly active and the electrical trade was normal. AMHERST reported a seasonal slowing down in the stove, furnace and enamel-ware plants; the moulders' strike still hampered work at the foundries. Iron workers at CHARLOTTETOWN were well employed. The rolling mills at St. JOHN ran steadily and tin and sheet metal workers were also busy. At MONCTON foundry workers were steadily employed, though raw material and coke were difficult to obtain. FREDERICTON reported the foundries, machine shops and garages very busy. At MONTREAL structural iron and steel workers were well employed, the electrical trades were fairly active, and engine and boiler and sheet metal plants were quiet. Architectural metal, stationary and portable engine and metal roofing workers at QUEBEC had a busy month, but stove and furnace plants were quiet. Similar conditions prevailed at SHERBROOKE and St. HYACINTHE. At THREE RIVERS and SOREL the foundries gave steady employment throughout the month. A slight decline in activity was noted in the foundries at OTTAWA and HULL. At TORONTO the metal and machinery trades were still adversely affected by the shortage of American steel and coal, the scarcity of sheet steel and tin plate being specially pronounced; many of the plants for this reason were working with largely reduced forces, but towards the end of the month some improvement was reported; agricultural implement workers were fairly active, with good orders on hand; iron-workers continued to arrive from Great Britain. At HAMILTON the steel industries were much affected by the shortage of coal, one large firm speaking of closing, which would affect about 2,500 men; activity was noted in other branches of the metal group. At NIAGARA FALLS the metal working industries continued active; a demand for men was said to be met by former employees of the Hydro-Electric

Commission who went on strike on June 16; the chain, small metal-ware and other factories were reported busy, and the metal can factory enlarged its capacity. The metal trades at St. CATHARINES were well employed in all branches; boilermakers and electrical workers were also well employed. Tool makers at BROCKVILLE were unusually busy, stove and furnace workers, tin-smiths and sheet metal workers were active, and hardware plants fairly busy. BELLEVILLE reported steady employment in the rolling mills; portable engine workers were very busy. All moulding shops at PETERBOROUGH worked to full capacity; electrical workers and machinists were in demand, but prospects for the coming weeks were not considered very bright in the machinery and iron industries. A shortage of help was reported at BRANTFORD in the farm implement factories; machinery, electrical appliances and stove factories were also very busy. KITCHENER reported all foundries and machine shops busy, with machinists in demand; work, however, was interrupted for one week by a strike; there was also a demand for tin-smiths; electrical fixture workers were well employed. A shortage of moulders, coremakers and machinists was noted at GUELPH, all the metal trades being very active. At STRATFORD the metal trades continued active with a demand for labourers and moulders in the machine shops; electrical workers were well employed. The rolling mills at LONDON kept their seven furnaces going at full blast; farm implement, stove and furnace workers were very busy and the sheet metal trade was busy on building work. Iron and foundry workers at St. THOMAS were steadily employed. At CHATHAM the structural steel industry showed improvement, night shifts being required at one plant; the electrical trade was above normal. Woodstock reported the usual shortage of moulders and polishers on stoves and furnaces. The machine shops at OWEN SOUND were busy, but an industrial dispute hampered activity in the nut and bolt factory. Structural steel workers

were in strong demand at WINDSOR, owing to building requirements. The stove and farm implement plants at ORILLIA continued active. The REDCLIFF rolling mill was fairly active but the mill at MEDICINE HAT still remained closed. At LETHBRIDGE the iron works worked steadily all month. Metal workers at EDMONTON were fairly active. VANCOUVER reported the rolling mills fairly active; the sheet metal, stove and furnace and iron and steel trades were rather slack. At VICTORIA the iron foundries were rather slack, work being mostly on repairs; stove foundries were fairly active in view of the fall requirements.

The ship yards at SYDNEY continued very active in June. Work in the boat

**Vehicles (land and water)**

and ship building industries at HALIFAX was practically tied up owing to the strike in the marine trades; engine and boiler workers were well employed. WESTVILLE reported the car works going steadily, though hampered occasionally by shortage of material; shipyard workers were actively employed; automobile and tractor plants were busy. AMHERST reported the car works busy in every department. MONTREAL reported quiet conditions in the shipbuilding yards, but automobile and tractor workers were active. The wooden shipyards at QUEBEC experienced a marked decline in activity, no new keels being laid down and staffs being laid off as ships were completed; steel shipyard workers, however, had an active month. At THREE RIVERS one shipyard was fairly busy for part of the month, but many workers were laid off later owing to shortage of materials; the other shipyard was busy throughout the month. The shipyards at SOREL were also active. The automobile industry at TORONTO was rather slack. At HAMILTON the locomotive and car shops were hampered by shortage of materials; boat and carriage builders were active. Shipyard and locomotive trades at KINGSTON had a busy month, but sufficient help was

available. At BELLEVILLE workers on trucks, cabs, motor-bus bodies and similar products were kept very busy. At BRANTFORD the malleable ironworkers were very busy on car parts for the Canadian Pacific Railway; engine and boiler makers were well employed. KITCHENER reported the cycle, motor and truck plants very busy. At WOODSTOCK the wagon factories continued busy, with more help needed. The LONDON plant of the Ford Motor Company worked to capacity. The automobile trades at CHATHAM were slack. At WINDSOR the Ford plant was busy turning out one-ton trucks and tractors, most of the works being turned to this line and tractors; over 5,000 men and women were employed; other motor companies also worked short handed, and several worked overtime, with a strong demand for mechanics; die and tool makers were specially required. Carriage builders at ORILLIA continued active. VANCOUVER reported rather slack conditions in locomotive, boiler and car shops; the shipbuilding yards were hampered by delayed deliveries of steel, automobile, cycle and motor engine and parts factories and repair shops were busy. NANAIMO reported automobile repair mechanics very busy. At VICTORIA the first iron ship was completed for a recent government contract, leaving one boat still on the ways; wooden shipbuilding was delayed by lack of material, not many men being engaged.

General seasonal activity was noted during the month in soft drink plants, creameries, breweries

**Foods, liquors and tobacco**

and other departments of the food group; but tobacco workers were generally slack. Conditions at SYDNEY continued steady. The sugar refinery at HALIFAX continued active; abattoirs and packing houses were somewhat less busy, the farmers bringing their cattle to the city markets; bakers were active but confectioners rather slack. WESTVILLE reported steady employment throughout the group. The milk factory at TRURO worked full time with

capacity help. CHARLOTTETOWN reported general activity, except in the confectionery trade, which showed some slackening. The flour and feed mills at ST. JOHN were active; the sugar refinery worked continuously, and a new warehouse was under construction; the creameries and dairies were slack for one week when the King's County farmers refused to send milk until the Sussex train was put back to Atlantic time. Female help was in demand in the confectionery plants at MONCTON; bakeries and butter and cheese factories were very busy. The flour mills at FREDERICTON were quiet, but other departments showed activity. MONTREAL reported fair activity in the flour and feed plants; abattoirs and packing houses were active; bakers and confectioners were well employed; but cigar makers were slack. Conditions at QUEBEC, SHERBROOKE, THREE RIVERS, SOREL, ST. JOHN'S and IBERVILLE were reported as satisfactory; fruit preserving was also mentioned as giving additional employment. Abattoirs and packing houses at OTTAWA and HULL had a busy month. TORONTO reported the flour, feed and cereal industries in steady operation during the month; abattoirs and meat packing houses were fairly active and bakers had steady work; confectioners had a good domestic trade, but the companies which had been manufacturing for export to Great Britain reported the market overstocked and orders falling off; fruit and vegetable canners had a busy month with female labour much in demand; creameries, dairies and soft drink establishments gave plenty of employment, but cigar makers were rather quiet. In HAMILTON activity continued to be noted throughout the food group. Fruit and vegetable canners were very busy at NIAGARA FALLS. Employment was good during the month at ST. CATHARINES, BROCKVILLE, BELLEVILLE, PETERBOROUGH and GALT. BRANTFORD reported a demand for female help for fruit preserving, and general activity throughout the food group. KITCHENER reported a demand for help in the sausage factories and creameries and for

fruit picking. At GUELPH the flour mills were active and feed mills quiet. STRATFORD reported a very busy month. At WOODSTOCK a constant demand for help was noted in the confectionery trade. Many cigar makers at LONDON quit their trade to take up employment in other departments of the group, especially confectionery and soft drinks. The flour mills and packing houses at ST. THOMAS were busy, and at CHATHAM increased employment was noted in the abattoir and confectionery establishments. WINDSOR also reported improved conditions in the bakery and confectionery trades. At WINNIPEG conditions were fair, but confectioners still worked with limited staffs; vegetable canners had a good month, but without any demand for help. The creameries at BRANDON were very busy, the flour mills were fairly active, and other workers in the group were well employed, excepting cigar makers. Similar conditions prevailed at MEDICINE HAT. The flour mills at LETHBRIDGE worked only about half time. At CALGARY the flour and feed plants were quiet and abattoirs slack; bakers and confectioners were fairly busy. VANCOUVER reported fair activity in the flour, feed and cereal mills; the sugar refinery was rather slack owing to a shortage of raw sugar; abattoirs and packing houses were fairly busy; bakers and confectioners were well employed on the conclusion of a strike of bakers about the middle of the month. At VICTORIA the feed and cereal mills showed steady activity; fruit and vegetable canners were active; creameries, dairies, soft drink plants and breweries were increasingly busy.

HALIFAX reported activity in the rope and twine industry, materials arriving more promptly than formerly. The woollen mills at AMHERST had a busy month, with good prospects. Help was scarce at the woollen mills at TRURO. Both cotton mills at ST. JOHN were steadily active. Woollen and underwear operatives at MONCTON were stead-

**Textiles,  
cordage and  
carpets**

ily active. FREDERICTON reported the local cotton mills running at capacity. At MONTREAL the cotton mills were working to full capacity and the woollen factories were busy on orders for the fall trade; tent and sail makers were fairly well employed. QUEBEC reported busy conditions in the cotton and tent and sail making industries. Activity prevailed at SHEBROOKE in the cotton, woollen, hosiery, underwear and knitted goods industries, and in bleaching, dyeing, finishing and textile printing establishments. St. HYACINTHE reported great activity in the woollen, knitting and underwear factories. Cotton operatives at THREE RIVERS had a busy month, about 1,400 continuing in steady employment. At TORONTO the woollen, hosiery and knitted goods plants were active with experienced workers in some demand, and employees in the carpet, awning and tent works had plenty of work. Textile industries at HAMILTON were all active, with a demand for labour in all branches. Help was also required at St. CATHARINES in the woollen mills, and silk and knitted goods and rubber footwear workers were well employed. The tent and awning trade at BROCKVILLE was active. KINGSTON reported activity in the textile trade, but without demand for help. Textile workers continued active at GALT. The shortage of female help in the woollen industry at BRANTFORD was partly helped by a party of girls arriving from Scotland; more labour was required for the cordage factory; hosiery, underwear and silk workers were very busy. At KITCHENER the felt factory was busy; the twine plant, which had been working short-handed for some time past, employed a number of boys and girls leaving school; a shortage of help in the textile mills at GUELPH was partly met by female workers arriving from Great Britain; hosiery, knitted goods, linen operatives and carpet and rug weavers were all active. Activity was also noted at STRATFORD in the woollen and knitting mills. A shortage of female help and also of raw materials was reported at WOODSTOCK in the knitting

factories. The hosiery, knitting and woollen mills at LONDON were exceptionally busy, taking on extra help. At St. THOMAS knitting operatives were busy, and at CHATHAM the textile and woollen workers were normally active. The tent and awning factory at WINDSOR was rushed with work. WINNIPEG reported improved conditions in the bag factories, but with no increase of staffs; knitting workers were fairly well employed, though the industry was hampered by a shortage of materials; tent and awning workers had a good month, but additional help was not needed. At VANCOUVER underwear and knitted goods and awning and sail trades were busy.

Steam laundries at SYDNEY continued active. Tailors at HALIFAX were decreasingly active; laundries and dye works were exceptionally busy. **Clothing, boots, shoes and laundering** Boot and shoe workers at AMHERST were well employed, though some slackness is usual at this period. Female help was in demand for the cap factory at TRURO. At CHARLOTTETOWN tailors and garment workers had a dull month, but laundry workers and boot and shoe makers were busy. Ready-made clothing and laundry workers at St. JOHN had an active month. At MONCTON hat and cap workers, tailors, dressmakers and milliners were all busy. Tailors were in demand at FREDERICTON; shoe and larrigan factories ran full time; steam laundry workers were well employed. At MONTREAL ready-made clothing makers were fairly active; hat, cap and whitewear workers were well employed; the glove industry was hampered by a dispute, boot and shoe trades were rather slack; steam laundries were active. QUEBEC reported great activity in ready-made clothing, but employment in the glove and fur goods industries was slack; steam laundries were active. Activity was noted at SHEBROOKE in the ready-made clothing, boot and shoe and cleaning and dyeing plants, and especially in steam laundries. St. HYACINTHE reported

ready-made clothing and laundry workers very busy. Glove workers at THREE RIVERS had regular employment. At SOREL boot and shoe and shirt factory workers were active. Clothing industries at OTTAWA and HULL were exceptionally busy, but the output declined toward the end of the month owing to the shortage of help. Clothing industries at TORONTO showed a considerable seasonal falling off in some lines, a large number of orders for ready-made goods for the fall trade having been cancelled, and retailers holding back their orders in anticipation of a drop in prices; makers of men's clothing, women's dresses, suits and coats, hats, caps, gloves, boots and shoes were thus affected, but whitewear, overall, shirt and children's whitewear workers were active. At HAMILTON shoe workers were less active than usual at this season, but other sections of the clothing group were reported active. At NIAGARA FALLS all concerns in the clothing and laundering group were busy, most of them requiring female help. BROCKVILLE reported full time employment in the glove and mitt and hat factories. The shirt industry at BELLEVILLE was busy, and laundry workers were well employed. At PETERBOROUGH some employees were laid off at the shoe factory, which was unusually slack; women's and children's whitewear makers and laundry workers were well employed. Clothing workers continued active at GALT. Overall, shirt, dress and shoe workers at BRANTFORD were very busy. Sewing machine operators were wanted at KITCHENER at the shirt and collar factories; help was also required at the boot and shoe plants; robe, clothing and glove workers were well employed, and laundries and cleaners were busy. At GUELPH the workers in women's whitewear and in hat factories were well employed. Help was wanted at STRATFORD in the ready-made clothing factories and steam laundries. Ready-to-wear clothing makers at LONDON were busy on fall work, and the shoe operatives were working overtime. A strong demand for fe-

male help was reported from WINDSOR for the overall and shirt factories and for the steam laundries. Experienced help was in demand at WINNIPEG in the ready-to-wear and shirt factories; cap makers were fairly well employed; furriers were active on repair work; laundry workers were normally active. About 250 workers continued employed in the garment factory at EDMONTON. At VANCOUVER the ready-to-wear clothing trades were less active, except in overall and shirts; women's whitewear and boot and shoe factories, steam laundries and cleaning plants were busy. VICTORIA reported activity in the shirt and overall factories, and laundry workers were increasingly busy.

Felt and tarred paper factories at HALIFAX were affected by shortage of raw materials. The

#### **Pulp, paper and fibre**

pulp and paper mills at CHATHAM, ST. JOHN, LIVERPOOL and MURRAY ran steadily throughout the month. The pulp mills at BATHURST were hampered by mechanical trouble, production being reduced by 5 to 7 tons per day, but it was expected that the normal output of 110 tons daily would shortly be resumed. In the province of Quebec, increases in employment were recorded at the pulp and paper mills at HULL, THREE RIVERS, SHAWINIGAN FALLS, CHANDLER, CHICOUTIMI, EAST ANGUS, KENOAGAMI; conditions were steady at WINDSOR MILLS, DONNACONA, CAP MAGDELAINE and BAGOTVILLE, while a decline was recorded at LA TUQUE. In the Ontario pulp and paper mills increases occurred at CORNWALL, THOROLD, ESPANOLA and HAWKESBURY; steady conditions were noted at OTTAWA, SAULT STE. MARIE, TORONTO, IROQUOIS FALLS, and SMOOTH ROCK FALLS, while a slight decline was reported at STURGEON FALLS. Workers in the pulp and paper, beaver board and other pulp product mills at ST. CATHARINES had a busy month. VANCOUVER reported active employment in the pulp and paper mills at OCEAN FALLS and POWELL RIVER. VICTORIA also reported great activity in the coast

pulp and paper industry; rubber roofing, felt and tarred paper workers had steady employment.

The printing and publishing trades at SYDNEY and HALIFAX continued active during the month. At WESTVILLE newspaper printers and binders were well employed, but job printers were rather slack. A short-

**Printing,  
publishing  
and paper  
goods**

age of printers was reported from TRURO. Employment was good at CHARLOTTETOWN both in newspaper and job offices. At ST. JOHN overtime job work was required. The printing trades at FREDERICTON had an active month. At MONTREAL printers, bookbinders and lithographers were well employed. QUEBEC reported active conditions among printers, bookbinders and paper box and bag makers. Similar activity was noted at SHERBROOKE, ST. HYACINTHE and THREE RIVERS. At SOREL, both newspapers were obliged to suspend publication temporarily owing to the shortage of paper. At OTTAWA and HULL job printing and publishing plants were unusually active for the season. At TORONTO the publishing and printing trades, binderies and engraving and lithographing firms were in steady operation, with a moderate demand for bindery workers; paper box and bag factories were hampered by shortage of material, but employment continued good. Active conditions also continued at HAMILTON, ST. CATHARINES, BROCKVILLE and BELLEVILLE. Printing plants at PETERBOROUGH were hampered by shortage of material, especially newsprint. Printers and paper box workers at KITCHENER, WATERLOO, BRANTFORD, GUELPH and STRATFORD were steadily employed. Slackness was noted at WOODSTOCK among job printers, but newspaper offices were normal. At LONDON printing plants had a very busy month; paper box factories were also busy, employing school children during the holidays. Active conditions prevailed among printers at ST. THOMAS, CHATHAM and WINDSOR. Printers at

ORILLIA were rather slack. At WINNIPEG a demand was reported for experienced and other help in the binderies; paper box makers were normally employed. At MEDICINE HAT, LETHBRIDGE and EDMONTON printers and binders were fairly active, and at CALGARY these trades were very busy. VANCOUVER reported printers fairly active but binders were rather slack.

At SYDNEY the sash and door factories and planing mills continued active throughout June.

**Woodworking  
and furniture**

Woodworking factories at HALIFAX were steadily active, supplies arriving regularly. WESTVILLE reported steady employment in the planing mills and furniture factories. At CHARLOTTETOWN employment continued good in the woodworking group. The sash, door and planing mills at ST. JOHN worked full time, and the wooden box and broom factories were also very busy. Building requirements at MONCTON kept the planing mills working steadily; and cooperage workers were well employed. Canoe builders and planing mill hands were very busy at FREDERICTON. At MONTREAL wooden box and furniture workers had a fair month and piano makers were active. QUEBEC reported sash and door factories very busy, cooperages active, and wooden box and broom plants quiet. At SHERBROOKE, THREE RIVERS and ST. HYACINTHE the planing mills and chair factories were busy; the organ workers at the latter were also very actively employed. Woodworkers at SOREL had a quiet month. At OTTAWA and HULL the sash and door, box and furniture factories and planing mills were all practically closed on account of a strike of woodworkers. At TORONTO the sash, door and planing mills, furniture factories and other woodworking industries were active; the piano industry was also active. HAMILTON reported continued activity throughout the woodworking group. Woodworking concerns at NIAGARA FALLS and ST. CATHARINES were very busy. At BROCKVILLE the planing mill

workers were rather slack, but office supply and furniture makers were active. BELLEVILLE reported woodworkers busy on the production of building materials. The planing mills and wooden box factories at PETERBOROUGH had an active month. Sash and door factories at KITCHENER were unusually busy; wood turners, planer hands and other workers were in demand in the furniture trades; broom factories were fairly active; coopers, and piano, organ and wooden toy workers were busy. GUELPH reported activity in the sash, door and planing mills and piano factories; sewing machine makers were fairly well employed. Building operations at STRATFORD caused great activity in the planing mills and furniture factories. A serious shortage of workers was noted in the furniture factories at WOODSTOCK, with vacancies for about 200 workers—machinists, bench hands, rubbers, polishers and turners; there was no demand for more help in the organ factory, though employment continued good, with many orders for pipe organs. At LONDON great activity was reported in the sash and door factories and planing mills; the barrel factory was also very busy. Furniture makers at St. THOMAS were well employed. A strong demand for help was noted in the woodworking and furniture trades at WINDSOR; the piano factory was also busy. The planing millwrights were active at ORILLIA, but men were laid off in the furniture factories. The sash and door factory at BRANDON continued busy, and that at MEDICINE HAT was fairly active. The planing mills at CALGARY were very busy. Furniture workers at EDMONTON were fairly active. At VANCOUVER the sash, door and wooden box factories and planing mills were

fairly busy, but in VICTORIA these industries were only moderately active.

HALIFAX reported a falling off in the trunk, leather bag and harness industries owing partly to the slow arrival of supplies. Harness and other leather workers at FREDERICTON had a busy month. At MONTREAL tanneries were normally active, trunk, bag and harness workers were well employed and rubber factories were busy. QUEBEC reported slack conditions among tanners and curriers, and harness and other leather goods workers. The tanneries at St. HYACINTHE and SOREL were busy. At TORONTO trunk, bag and harness makers were fairly well employed, with a demand for suitcase workers; the rubber sheeting and belting industry was active. At BROCKVILLE harness and belting workers were fairly well employed. Leather workers at PETERBOROUGH were fairly busy completing orders, but caution was shown by manufacturers in undertaking new work. Busy conditions prevailed in KITCHENER in the tanneries and in trunk and bag, saddle and harness, tire and rubber factories, with jobs open in the latter for girls. The tannery, harness and other leather workers at STRATFORD were busy. Employment conditions in the tanneries at WOODSTOCK were satisfactory. Tannery, harness and other leather workers at LONDON were very busy. The tannery at ORILLIA worked with its staff unchanged, though activity slackened somewhat. At BRANDON the tannery and trunk factory had a busy month. The trunk, bag, harness and leather goods trades at CALGARY were quiet.

WESTVILLE reported stone and granite workers well employed and brickyards busy. The brickyards at St. JOHN re-opened after several seasons' inactivity. At MONCTON the cement plants were busy meeting increasing building requirements; the glass works were defi-

**Leather and rubber (other than clothing)**

**Clay, glass, stone, cement, etc.**

nately closed. Glass workers at MONTREAL had steady employment. QUEBEC reported slack conditions among stone-cutters, but brick, tile and cement pipe plants and lime burners were active. Stone, granite and brick workers at SHERBROOKE were well employed. The artificial stone and granite factories at THREE RIVERS were busy during the month. At TORONTO brickmakers were unusually active, large supplies being called for all over the province; glass workers had steady employment. HAMILTON reported general activity throughout this group. Cut stone, granite and brickyard workers at BROCKVILLE had a good month. At BELLEVILLE a new brick plant was under construction; cement and pottery workers were rushed with work. Stone and marble, brick and sewer pipe workers at KITCHENER were busy. At STRATFORD and LONDON the brickyards had a very active month. Clay workers at CHATHAM and brickmakers at SAULT STE. MARIE were increasingly active. At MEDICINE HAT the brick and tile plants had a fairly active month and stone masons were well employed. Glass workers at REDCLIFF were working double shifts. At VICTORIA the brick and tile plants were moderately active, but cement and lime workers had a dull month.

SYDNEY reported continued activity in the various chemical industries. At

**Paints, oils,  
chemicals,  
explosives**

HALIFAX activity in the paint and oil industry was somewhat hampered by delay in getting materials, but employment conditions were steady. At MONTREAL the paint and varnish industry was fairly active; drug and medicine plants were busy. The cartridge factory at QUEBEC had a dull month. At SHERBROOKE the gunpowder factory and the acid, extract, drug and medicine plants were all busy. The paint mills at THREE RIVERS had an active month. The paint and varnish, soap and chemical industries at TORONTO were all active. At HAMILTON the soap, acid and drug plants were active, and powder

and cartridge workers fairly well employed. The electro-chemical plants at NIAGARA FALLS were busy. The paint and varnish industry at BRANTFORD was active. At WINDSOR the output of paints and oils was reduced owing to small demand due to high prices; drug factories were short of help, but it was expected that many school girls would be employed in the holidays. The linseed oil plant at MEDICINE HAT worked steadily. The acid plant at TRAIL turned out 25 tons a day of sulphuric acid and 15 tons per month of hydro-fluorsilicic acid, the latter used in refining lead. VANCOUVER reported activity in the oil refinery; paints, varnish and soap workers were fairly busy. At VICTORIA the paint and soap factories were active; explosive plants operated steadily.

The gross earnings of the Canadian Pacific Railway during May were \$16,459,986, as compared

**Railways,** with \$13,569,411 in **shipping and** May, 1919. The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and Canadian National Railways, on railway operation, including general office, trainmen, engine crews, station employees and parlor and dining room employees showed a slight change during the month of June, the figures at the end of the month being 66,700, as compared with 66,400 at the end of May. The Canadian Pacific Railway and Grand Trunk Railway showed an increase, while the Canadian National Railways showed a slight reduction. SYDNEY reported activity during June on steam and electric railways and among transfer and garage workers; longshoremen were very busy. At HALIFAX, longshore work fell off; electric railway and transfer workers were well employed. In the WESTVILLE section the railways, both steam and electric, were well manned and very busy; freight hauling on the Prince Edward Island Railway began to drop during the month, but ballast-

ing operations absorbed the unemployed. ST. JOHN reported great activity in freight and passenger traffic; street railways and transfers were also very busy, but 'longshoremen were affected by the slackness in navigation. Transportation workers at MONCTON were well employed; the Gulf Shore railway from Gloucester junction and Bathurst to Shipigan was taken over by the Canadian National Railways. Railway and steamer transportation at FREDERICTON was brisk. At MONTREAL the railways were not so well manned, but 'longshore work was very active. Railwaymen at QUEBEC were increasingly busy with summer traffic; the street railway also increased its staff; ocean and coasting shipping was brisk; transfers were quiet, but garages were busy. Activity among transport workers was reported from SHERBROOKE, THREE RIVERS and SOREL. At TORONTO railway traffic was heavy and repair-shop workers were busy; as a result of the consolidation of the Grand Trunk and Canadian National Railways extensive alterations were in progress at Leaside Junction, where the mixed commission purchased an additional area of 60 acres, much of the equipment at Rosedale and Don sections being removed to Leaside; navigation was fairly brisk, but 'longshoremen were only partially active; street railways and garages were busy. HAMILTON reported activity among the 'longshoremen, steamship traffic being heavy. Teamsters were in demand at NIAGARA FALLS, and transport workers were generally active. At BROCKVILLE 'longshore and railwaymen were fairly active; transfers were unusually busy transferring passengers from the G. T. R. to the Kingston and Toronto boats. 'Longshoremen at BELLEVILLE were slack, as few vessels plied to this port, chiefly schooners unloading coal; railway and transfer work was plentiful. Active conditions in transportation were reported at PETERBOROUGH. At KITCHENER railway freight traffic was heavy, and electric railways had a very busy month; a section of the Grand River Railway in the East of the city

was being diverted to run through the south ward; a shortage of help was noted in the garages. Railway activity, especially in the freight department, was reported at STRATFORD, but at LONDON freight traffic was still light owing to the tie-up of the roads in Michigan through strikes; passenger traffic was heavy, the Grand Trunk Railway adding several trains for summer; over 700 men were employed in the car shops; a number of men were taken on to work in a new "reclamation yard" started by the Grand Trunk Railway; the street railway was still operated by the Ontario Railway Board. With the exception of the Wabash, railways at ST. THOMAS had a busy month. CHATHAM reported railway shipments above the average, an improvement being shown in freight coming from the United States. The freight tonnage carried through the canal at SAULT STE. MARIE during May was 530,625 tons, compared with 1,473,367 tons in May, 1919. WINNIPEG reported increased activity on railways in June, and at BRANDON busy conditions prevailed among transportation workers. At MEDICINE HAT freight traffic was somewhat lighter on the Canadian Pacific Railway, but passenger traffic was heavy. CALGARY reported normal railway activity, and briskness in other departments of transport. At VANCOUVER navigation and 'longshore work was rather slack at the beginning of the month, but became brisk at the close; steam and electric railways, repair shops, transfers and garages were all busy. VICTORIA reported activity in all kinds of transportation, tourist travel being heavy; 'longshoremen were fairly active.

QUEBEC reported increasing activity in stone quarrying due to demand for crushed rock for concrete. At SHERBROOKE, in the metallic group, chrome iron workers were busy, but copper miners were slack; in non-metallic mining, asbestos workers were busy;

**Mining (other than coal) and quarrying**

granite and gravel-pit quarrymen were also busy. June ore shipments from the silver mines at COBALT amounted to 42 cars containing approximately 3,376,255 pounds of ore, as compared with 37 cars containing 2,749,170 pounds of ore in the previous month; bullion shipments amounted to 124 bars, containing 150,692 fine ounces, compared with 373 bars containing 451,986.51 fine ounces in the previous month; with wages to the mine-workers fixed for the six months beginning with May the supply of labour at the mines shows evidence of becoming both steady and plentiful. Labour was still scarce, however, at the gold camps of PORCUPINE and KIRKLAND LAKE, the exodus of men to their homes in Eastern Europe being said to be largely accountable, but it was hoped that the raising of wages by the mine operators would induce the present workers to remain and attract to the mines men now in other employment. WINNIPEG reported a demand for quarrymen and miners for northern Manitoba. A great scarcity of labour was reported for the smelter at TRAIL; two lead furnaces were running, but no copper furnaces were yet in blast; a new concentrator to handle the Rossland ores was awaiting the completion of the copper refinery; the lead refinery turned out daily 40 tons of refined lead, this being only about half the capacity of the plant; the zinc plant was active throughout the month, 3,437,421 pounds of refined zinc being turned out with 67.3 percentage of the plant working, the efficiency being estimated at 80.7, the best record of the plant to date.

SYDNEY reported the output of the Dominion collieries in June at about 286,000 tons of coal, as

**Mining (Coal)** compared with the revised figure of 255,000 tons in the previous month; 33,000 tons of coke were produced, 120 ovens being in operation. In the Nova Scotia Company's collieries at SYDNEY MINES the output was 56,500 tons of coal compared with 51,500 tons in May; 8,200 tons of coke were produced, 190 ovens being operated. WESTVILLE reported all

the mines in that district working steadily. A slight increase was noted in the MINTO coal mining area. WINNIPEG and REGINA reported a strong demand for experienced miners for the prairie coal fields, but employment agents reported that wages at some mines were not sufficient to attract workers. At LETHBRIDGE both the large mines (C.P.R. No. 3 and No. 6) worked full time, and prospects were good for continued activity; the smaller mines also showed improved employment conditions. CALGARY and EDMONTON reported a demand for experienced miners for Alberta. A demand for men was also reported from FERNIE and MICHEL and the CROW'S NEST PASS mines were active. NANAIMO reported some demand for coal miners and helpers in the Vancouver Island coal fields; the mines worked full time with prospects of steady activity for some time.

The value of building permits issued in 56 cities during May amounted to \$12,160,379 as compared with \$16,385,153 in April, and \$7,776,282 in May, 1919. The

**Building and construction**

building trades at SYDNEY were active during June. At HALIFAX considerable new work was started and should continue all summer; the old car-works were dismantled, the property subdivided and preparations made for the construction of houses. CHARLOTTETOWN reported great activity among carpenters, painters and other building tradesmen. Considerable repair work was in progress at ST. JOHN; alterations were being carried out in the Island yard of the Canadian National Railways; foundations were under construction for a new Canadian Pacific bridge at Reversible Falls. In MONCTON and district a demand for carpenters, masons, plumbers and builders' helpers was reported. At BATHURST about thirty cottages were under construction as part of the scheme undertaken by the Bathurst Lumber Company to provide one hundred homes for their employees. The building trades at

MONTREAL were fairly active. The demand for labour was well maintained in QUEBEC throughout the month, building operations being larger than for several years; the harbour and river improvements which were suspended during the war were not yet resumed; a new railway line from St. Henri to Quebec bridge was planned, and construction was shortly to begin. At SHERBROOKE great activity was evident in residential and commercial building; telephone and telegraph extensions were also numerous. Repair work was plentiful at ST. HYACINTHE, and at THREE RIVERS the building trades were actively employed on new structures of every type. Activity was also reported from ST. JOHN'S and IBERVILLE, but at SOREL employment was not so good. At OTTAWA and HULL the building trades were exceptionally active until a strike of inside workers interfered with operations. At TORONTO employment was good throughout the month in all building lines; many small houses and some important contracts were in progress. The building trades at HAMILTON were busy, notwithstanding the increased cost of labour and materials. To these causes, however, was attributed a falling off in activity at NIAGARA FALLS. Conditions were fair at ST. CATHARINES. BROCKVILLE reported unusual activity on dwellings, together with considerable railway construction work. A shortage of bricklayers was noted at KINGSTON, the demand for all kinds of labour being well maintained. Several public and private buildings were under way at BELLEVILLE. At PETERBOROUGH many industrial and public buildings, but very few dwellings, were under construction. Building trades were well employed at GALT, but at BRANTFORD little work was being carried out. KITCHENER and WATERLOO reported remarkable activity in both residential and industrial building. The construction of a cement bridge over the River Speed at GUELPH employed many men. Fair conditions were reported at STRATFORD and WOODSTOCK. At LONDON, CHATHAM and WINDSOR operations were unusually extensive, all building trades

being well employed. Very little new work was started at ST. THOMAS. WINNIPEG reported an increasing demand for workers in building and construction, employment being good in all lines. Employment was also reported good at BRANDON and REGINA, but at MEDICINE HAT conditions were slack. A strong demand for men was noted at CALGARY, building construction being exceptionally extensive. Much activity was also in evidence at EDMONTON. VANCOUVER reported a continued delay in starting the various works planned early in the year, building activity being disappointing for this season of the year; the new government dock was not yet begun and the new Canadian Pacific pier was only in its preliminary stage. The building trades at NEW WESTMINSTER were well employed. Carpenters were well employed at NANAIMO. At VICTORIA building and construction of all kinds was somewhat quiet.

The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and Canadian National Railways, on railway construction, including maintenance of way, showed an increase of 2,500 persons during month of June. The total at the end of the month being 43,100 as compared with 40,600 at the end of May. This increase was made up in steady gains each week by all three companies, but more than half of the additions were shown on the Canadian National Railways' payrolls.

The lumber mills at CHARLOTTETOWN slowed down during the month, the bulk of the lumber having been sawn during early spring. Large quantities of logs were brought down St. John river for the various mills at Indian-town and Milford, and the saw and shingle mills in ST. JOHN district were all busy. At FREDERICTON the sawmills and rafting booms gave employment to large numbers of men. River driving at BATHURST was disappointing owing to low water level. QUEBEC reported river driving nearly over in that dis-

#### Lumbering

triet, conditions having been fair; outside sawmills all started their season's cut. The saw and shingle mills at SHERBROOKE were busy, and the logging camps were cutting and peeling pulpwood. The sawmills at OTTAWA and HULL continued busy. The lumber mills at PEMBROKE ran full time; extra gangs were required for river driving owing to low water. River drivers were still very busy in PETERBOROUGH district, large quantities of logs being supplied to the sawmills which were running to capacity; shingle and lath mills were also very active. At SAULT STE. MARIE lumber yards and planing mills had a

busy month and bushmen were in demand. EDMONTON reported a scarcity of help in the lumber camps of northern Alberta. VANCOUVER reported lumbering in the coast district rather less active than in the past few months, a few camps closing down temporarily; saw and shingle mills were fairly busy. At NEW WESTMINSTER the saw and shingle mills had a busy month. Experienced loggers were in demand in PRINCE RUPERT district. NANAIMO and VICTORIA reported activity in all branches of the lumbering industry on Vancouver Island, with a shortage of shipping facilities for export.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF JUNE, 1920, WITH TEXTS OF BOARDS' REPORTS

**D**URING the month of June the Department received reports from six Boards of Conciliation and Investigation established to deal with disputes between (1) the Grand Trunk Railway Company and certain of its employees, being clerks, etc.; (2) the Dominion Transport Company, Limited, Toronto, and its employees, being teamsters, chauffeurs, stablemen and helpers, members of local Union No. 191, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America; also the Dominion Transport Company Limited, and the same class of employees at London, Ontario, members of Local No. 662, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America; (3) the Canadian General Electric Company and certain of its employees at Peterborough, being machinists and electrical workers; (4) the Toronto Railway Company and its motormen, conductors, shopmen, motor and truck repairmen, compressor and fender room men and trackmen; (5) the Canadian National Express Company and certain of its employees, being members of the Canadian Brotherhood of Railroad Employees, and (6) the Nova Scotia Steel and Coal Company and certain of its

employees, being members of the following organizations: the Amalgamated Association of Iron, Steel and Tin Workers of America, the International Brotherhood of Electrical Workers, and the International Association of Machinists.

Six applications were received for the establishment of Boards and further appointments were made in connection with applications which had been received during the previous month.

#### Applications Received.

During the month of June applications for Boards were received as follows:

(1) From the employees of the Canadian Pacific Railway Company engaged in the commercial telegraph service, members of the Commercial Telegraphers' Union of America. A Board was established composed as follows; His Honour Judge R. D. Gunn, Ottawa, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. F. H. Phippen, K.C., and Jas. Gunn, nominees of the Company and employees respectively.

(2) From the employees of the Canadian Pacific Railway (Western Lines), being waterfront freight handlers, members of Local No. 38-52, International Longshoremen's Association. A Board was established as follows: the Honourable Mr. Justice Denis Murphy, Vancouver, chairman, appointed on the joint recommendation of the other two members, Messrs. Edwin A. James and Jos. Taylor, Vancouver, nominees of the company and employees respectively.

(3) From the employees of the Toronto Suburban Railway Company, being electrical workers. At the close of the month this dispute was receiving the attention of a departmental officer looking towards an adjustment without Board reference.

(4) From the employees of the following companies: Toronto and Niagara Power Company, Toronto Power Company, Toronto, Toronto Power Company, Niagara Falls, and Toronto Street Railway Company and certain of their employees, being members of the following trade unions, namely, blacksmiths and helpers, members of local 318, International Brotherhood of Blacksmiths and Helpers, electrical workers and helpers, members of Local 353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers, woodworkers, members of Toronto District Council of Carpenters, and machinists and helpers, members of District Lodge No. 46, International Association of Machinists and Lodge 1296, Niagara Falls, Ontario, International Association of Machinists. At the close of the month this dispute was receiving the attention of a departmental officer looking towards an adjustment without Board reference.

(5) From the employees of the Canadian Pacific Railway Company (Western Lines), being conductors etc., members of the Order of Railway Conductors and the Brotherhood of Railroad Employees. This application was under consideration at the close of the month.

(6) From the employees of the Toronto, Hamilton and Buffalo Railway, being freight handlers, members of the

Canadian Brotherhood of Railroad Employees. This application was under consideration at the close of the month.

#### Other Proceedings under the Act.

During the month of June other proceedings under the Act took place as follows:

(1) The Board established to deal with the dispute between the Toronto Hydro-Electric Commission and their employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers, was completed by the appointment of Mr. J. M. Godfrey, of Toronto, as chairman, the appointment being made by the Minister in the absence of a joint recommendation from the other two members, Messrs. Frank R. Ewart and Louis Braithwaite, Toronto, nominees of the Commission and employees respectively. Mr. Fred Bancroft was first appointed a member of the Board on the recommendation of the employees, but later resigned, and Mr. Braithwaite was appointed in his stead.

(2) A Board was established to deal with the dispute between the Montreal Tramways and certain of its employees, being members of Division No. 790, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge J. B. Archambault, Montreal, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. E. W. Villeneuve and J. A. Woodward, Montreal, nominees of the company and employees respectively.

3. A Board was established to deal with the dispute between the Corporation of Moose Jaw and its civic employees, members of Civic Employees' Local Union No. 9. The Board was composed as follows: The Honourable Mr. Justice G. E. Taylor, Moose Jaw, chairman, appointed on the joint recommendation of the other two members, Messrs. Geo. D. Mackie and R. A. Chadwick, nominees of the corporation and employees respectively.

**Report of Board in dispute between the Grand Trunk Railway Company and its clerks, etc.**

---

**A** REPORT was received from the Board established to deal with the dispute between the Grand Trunk Railway and certain of its employees, being clerks, etc. The Board was composed as follows: The Honourable Mr. Justice F. S. Maclellan, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. U. E. Gillen and Fred Bancroft, nominees of the company and employees respectively. Although the original application in this case was received from members of the Canadian Brotherhood of Railroad Employees, it developed that the employees were members in part of three other unions, namely: the International Brotherhood of Stationmen, the Brotherhood of Railway Steamship Clerks, Freight Handlers, Express and Station Employees, and the International Brotherhood of Firemen, Oilers, etc. Representatives of these unions were also given hearing before the Board. The report of the Board was signed by the chairman and Mr. Gillen and contained recommendations for the settlement of the dispute. Mr. Bancroft did not concur in these findings, but did not file a minority report.

**Report of Board.**

In the matter of the Industrial Disputes Investigation Act, 1907, and of differences between the Grand Trunk Railway Company, employer, and certain of its employees, being clerks, etc., members of Canadian Brotherhood of Railroad Employees, International Brotherhood of Railway Stationmen, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, International Brotherhood of Firemen, Oilers, etc., employees.

Montreal, June 8, 1920.

The Honourable G. D. Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir,—

The Board of Conciliation and Investigation established in this matter, consisting of Mr. Fred Bancroft and Mr. U. E. Gillen, of Toronto, Ont., and the Honourable Mr. Justice F. S. Maclellan, of Montreal, Que., Chairman, having taken the oath of office, met at the Court House, at the City of Montreal, on 12th April, 1920; the Canadian Brotherhood of Railroad Employees was represented by Messrs. A. R. Mosher, Geo. S. Gregory and W. Byham; the Grand Trunk Railway Company was represented by Messrs. R. H. Fish, W. H. Sample and C. G. Bowker; the International Brotherhood of Railway Stationmen by Messrs. T. I. Hillock, J. J. Rankin and F. S. Walker; Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees by Messrs. J. D. Caldwell and Francis Foley, and Mr. William Wilson appeared representing employees, clerks in transportation department, who are not affiliated with any Union.

Mr. Hillock, on behalf of the International Brotherhood of Railway Stationmen, filed with the Board the Schedule between his organization and the Railway Company, effective from 1st June, 1919, and a proposed revision thereof.

Mr. Francis Foley, representing the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, filed with the Board a proposed new Schedule between his organization and the Railway Company.

After having heard the representations of the Company and the several organizations, the Board suggested that the parties should meet together and

see how near they could come to an agreement on proposed working conditions and rates of pay, and this suggestion being accepted, the Board adjourned to the following day when it again met the representatives of the Company and the various organizations, and remained in session throughout the whole of that day, and on April 14th, 15th and 16th, endeavouring to come to an agreement on working conditions which would be satisfactory to all parties.

The Board of Conciliation, having been appointed upon the application of the Canadian Brotherhood of Railroad Employees, found it exceedingly difficult to deal with the questions in dispute, inasmuch as the International Brotherhood of Railway Stationmen and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees both claimed to have a large membership among the employees who were affected by the application of the Canadian Brotherhood of Railroad Employees, and they also took the position that they were not parties to the Board and that the Board did not have the right to deal with employees who were not members of the organization upon whose demand the Board had been constituted.

When the Board next met, on April 19th, the Chairman read a telegram which he had received from the Deputy Minister in the following terms:

Ottawa, Ont., April 17th, 1920.

The Honourable Mr. Justice F. S. Maclellan,  
Court House, Montreal, Que.

The Department is in receipt of representations from the Grand Trunk Railway Company to the effect that the International Brotherhood of Railway Stationmen as represented by a Mr. Hillock has a membership of approximately fifteen hundred on the Grand Trunk Railway. It is also further represented that the International Brotherhood of Railway and Steamship Clerks and Freight Handlers represented by a Mr. Foley, has a membership of about two thousand on the Grand Trunk Railway all employed in the same branch of service as are the men represented through the International Brotherhood of Railway Employees. The Railway Company represents to the De-

partment that it is desirable the Board's inquiry and recommendations should extend to all of the employees in the classes of service affected, and that inasmuch as these employees are members of three different labour organizations, the Company asks that the scope of the inquiry be extended to include all of the employees referred to regardless of what organization they may be members of. This application on the part of the Company would seem to be quite in order. The Minister feels it is desirable that rates of wages and working conditions by which all employees on the Grand Trunk Railway in this class of service are to be governed should be determined and adjusted at the one time. The Board is therefore authorized to extend the scope of its inquiry and deal with these questions as they affect all of the employees in the various classes of service involved regardless of what labour organization they may be members of. It is assumed the Board is in touch with the proper representatives of the several organizations and will communicate the decision of the department to all concerned.

F. A. ACLAND,

Deputy Minister Labour and Registrar.

The Chairman explained that in view of the Minister having enlarged the scope of the Board's inquiry so as to include all the employees of the Railway affected, regardless of what organization they belonged to, all these organizations were now before the Board in the same position as if they had themselves applied for the Board. At this meeting the International Brotherhood of Firemen, Oilers, etc., represented by Mr. A. A. Woodward, appeared before the Board and filed a proposed schedule for stationary engineers, firemen, oilers, coal passers, round-house labourers, etc. The Board advised the different organizations to meet in joint committee for the purpose of jointly agreeing upon a schedule, and these efforts were renewed at the meeting of the Board on 20th April. Each of the four organizations had given the Board a separate schedule which it proposed should be put into operation, and the Board concluded that the Department of Labour should be informed fully of the difficulties which the Board was encountering in its efforts to restore harmony between the Railway Company and its employees. It was then decided to adjourn the meeting of the Board to the City of Ottawa, where

the Board met on 21st April, and the Minister of Labour was present upon the invitation of the Board. The Chairman explained the difficulties which the Board had encountered in its efforts to deal with the matters in dispute. Messrs. Mosher, Hillock, Carr, Rankin and Woodward, on behalf of their respective organizations, and Messrs. W. D. Robb, Vice-President, and C. G. Bowker, on behalf of the Railway, submitted their views. The Minister of Labour expressed his views upon the situation and recommended that a joint committee of employees chosen by each of the four organizations should be appointed for the purpose of drafting a new schedule of working conditions and rates of pay to be submitted to the Railway Company, and acting upon the Minister's suggestion, a joint committee was appointed composed of: W. E. Riche, Francis Foley and James D. Caldwell, named by Mr. Carr on behalf of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; T. I. Hillock, F. S. Walker and J. J. Rankin, named by Mr. Hillock on behalf of the International Brotherhood of Stationmen; J. Patwell, T. Thomson and John Cook, named by Mr. Woodward on behalf of the International Brotherhood of Firemen and Oilers, etc.; James McGuire, Karl Corbin and W. Byham, named by Mr. A. R. Mosher. The committee agreed to draft a new schedule of working conditions and rates of pay for submission to the Railway Company, and the Board met the joint committee on the 22nd and 23rd of April, when the Board adjourned to meet in Montreal on the 5th of May, 1920.

The joint committee, after a number of sittings, prepared a new schedule of proposed working conditions and rates of pay which it submitted to the Company, and after examination and consideration by the latter, was the subject of lengthy discussion between the committee and the Company with the result that working conditions, copy of which is attached hereto as "Schedule 'A'",

were agreed to, with the exception of two subsections which the committee asked the Board to amend as follows by striking out of Article 5 (d) the words "yard office clerks" and substituting therefor the words "bill clerks and car checkers, supervisors of crews and call boys"; and by adding to Article 6 (a) the words "freight checkers in charge of gangs." The Board heard all parties on these proposed amendments, has given full consideration to the matter, but the undersigned do not approve of the proposed amendments. The joint committee's schedule proposed the following rates of pay:

## ARTICLE 23.

*Minimum Rates of Pay.—*

A minimum rate of \$100.00 per month for all employees, is hereby established, this is to apply whether hourly, daily or monthly rated. Except that for messenger and office boys minimum shall be \$65.00 per month.

## ARTICLE 24.

*Classification and rates pay for M.P. Dept.—*

Rates of pay for the following classified employees in the M. P. Dept. shall be:—

	Per hour.
(a) Stationary engineers.....	80 cents.
Coal hoisting engineers.....	75 "
Water tenders.....	70 "
Stationary firemen.....	68 "
Power house boiler washers.....	68 "
" " " helpers.....	65 "
Turntable operators.....	65 "
P. H. flue blowers.....	65 "
Ashpitmen.....	65 "
Lighter up men.....	65 "
Engine watchmen.....	65 "
Engine wipers and cleaners.....	65 "
Coal chute men.....	65 "
Oil house men.....	65 "
Shop chain gang.....	65 "
Tool checkers.....	65 "
Coal passers, oil shop and R. H. labourers.....	65 "
Engine preparers.....	65 "
Tender tank fillers.....	65 "
Janitors.....	60 "
Bunk room attendants.....	60 "
Crew callers, night.....	55 "
" " " day.....	50 "

(b) Charge hands and leading hands shall receive at least ten cents per hour over and above the rate of the men who are in their charge.

(c) *Roundhouse Clerical Staffs.*—

	Per month.
Locomotive, foremen's chief clerk	\$175.00
Clerks	155.00
Engine despatchers	165.00
Storemen	155.00
Work order writers	155.00
Stenographers	145.00

(d) *Motive Power Shops.*—

Work order writers and checkers	\$155.00
Shop department clerks	165.00

## ARTICLE 25.

Rates of pay for the following classified employees in Freight Shed Staffs, shall be:—

	Per month
(a) Assistant shed foremen	\$165.00
Gang checkers	155.00
Chief coopers, heating and icing car inspectors and truck machinists	145.00
Door checkers and asst. coopers	145.00
	Per hour.
Loaders, pilers and stevedores	66 cents.
Truckers and porters	63 "
Team track foremen, 40% increase on present wages.	
	Per month.
Team track checkers	\$145.00
	Per hour.
Truckers and loaders on team track	63 cents.
Others, not specifically mentioned, 40% increase on present wages.	

## ARTICLE 26.

Rates for employees not specifically mentioned herein shall be:—

(a) Rates of pay shall be one hundred and twenty (\$120.00) per month, over and above monthly rate in effect Jan. 1918. This to apply whether hourly, daily or monthly rated employees.

(b) All positions and stations shall be classified and rate of pay shown in schedule by the Company.

The Company submitted a counter offer, Schedule "B" attached hereto, of increased rates of pay for the greater number of the monthly paid employees and some hourly paid employees, and said other monthly, hourly and daily rates in effect should continue as at present. This offer was refused by the joint committee and representatives of the organizations; the Board heard all evidence submitted by the Company and

by the employees on the matter of conditions and wages. The evidence establishes that the Company's offer involved an annual increase of \$713,000.00 to its present pay roll. It is to be observed that all employees, including those who are not offered an increase of pay, derive considerable benefit from the working conditions. The evidence before the Board was that working conditions, Schedule "A," involved an annual increase of more than \$325,000.00. The undersigned recommend the rates of pay proposed or recommended by the Company in Schedule "B."

Schedule "C" was presented to the Board to show the present rate of pay for employees paid by the hour or day to whom no increases are proposed or recommended by the Company, but the statement also shows that billers and advisers are paid at the rate of \$1.11 per 100 bills, and that some checkers are paid by the month, while others are paid by the hour and by the day. The undersigned recommend that all hourly rated employees in Schedule "C" be granted an increase of three cents per hour, and that all employees paid by the day and month and all billers and advisers referred to in Schedule "C" be granted an increase of 10 per cent over their present rate of pay.

Schedule "D" was presented to the Board after hearing employees and officers of the Company. The undersigned recommend the maximum monthly rate of pay proposed or recommended on each of the five sheets of Schedule "D."

The undersigned recommend that the proposed or recommended rates, and so far as possible the working conditions, be made to apply on and after April 17th, 1920 (the date all organizations herein referred to became parties to this application), and same to continue in effect until terminated by 30 days' notice.

The following items are representative of the monthly pay in former years, now in force, what is offered and what is asked in several of the departments of the Railway:

	Pay, Jan., 1914	Pay, Jan. 1918	Pay, June, 1920	Pay Offered.	Pay Asked.
Accounting Dept.—					
Book clerks.....	\$70.00	\$80.00	\$120.00	\$130.00	\$200.00
	55.00	65.00	105.00	120.00	185.00
Rate clerks.....	75.00	105.00	135.00	145.00	225.00
	50.00	70.00	105.00	115.00	190.00
	45.00	60.00	90.00	100.00	180.00
Checkers .....	50.00	65.00	110.00	115.00	185.00
	40.00	60.00	95.00	100.00	180.00
	30.00	40.00	87.50	87.50	160.00
	17.50	22.50	87.50	87.50	142.50
General clerks.....	50.00	60.00	95.00	100.00	180.00
	35.00	40.00	87.50	87.50	160.00
Stenographers.....	65.00	80.00	125.00	135.00	200.00
	35.00	40.00	87.50	90.00	160.00
Copyists.....	20.00	35.00	87.50	87.50	155.00
	15.00	25.00	87.50	87.50	145.00
Mailing clerks.....	50.00	65.00	100.00	100.00	185.00
	17.50	30.00	87.50	87.50	150.00
Office boys .....	15.00	20.00	45.00	45.00	140.00
Montreal stores—Supply department—					
Invoice clerk.....	\$65.00	\$85.00	\$135.00	\$145.00	\$205.00
Clerk.....	30.00	40.00	75.00	81.00	160.00
London strs. clerk.....	35.00	50.00	87.50	94.50	170.00
Ottawa strs. shippers.....	50.00	60.00	92.50	99.90	180.00
Mtl. purchas. clerk.....	70.00	90.00	130.00	140.00	210.00

In the Motive Power Department, ash-pitmen were paid 17 cents per hour in 1914 and now receive 43 cents; stationary firemen were paid 18 cents in 1914 and now 46½; coal heavers 17½ cents and now 42, 43 and 48 cents; call boys 10 and 12 cents and now 27 cents per hour.

Further illustrations could be cited from the voluminous statements filed with the Board by the Company showing that the increases in pay now in force or offered in the various classes interested since 1914 are very much in excess of 100 per cent in the large majority of cases. In the Accounting Department alone where there are over 800 employees, 77 per cent of them are now being paid or are offered increases over

the January, 1914, pay of from 100 to 400 per cent, and of the remaining 23 per cent about one-half are paid or offered \$125.00 or upwards per month.

On 1st January, 1920, in the Accounting Department, increases from \$2.50 to \$35.00 per month were given to 374 employees out of 826, and of these over 46 per cent had been receiving less than \$100.00 per month and 13 under \$87.50.

Females and boys to the number of 308 were not given increases, and the balance of the staff consisting of 144 male employees were considered well paid for the work performed, and in accordance with what other firms were paying for the same class of work.

Evidence was submitted by the Company's representatives, that the rates of

pay offered were equal to that paid for similar services by the Canadian Pacific and the Canadian National Railways. The employees submitted no evidence to the contrary, although given an opportunity to do so. An examination of the comparative statements filed by the Company and the rates of pay in force on the Canadian National Railways since 1st September, 1919, substantially bear out the claim of the Railway, the rates offered being in some cases slightly higher and in others slightly lower than what is in force on the other lines.

From the information placed before the Board and the official records of the Department of Labour on the advance in the cost of living since 1914, which was the reason urged by the employees for the increases in pay, the undersigned find that the advances in pay and what is now offered are substantially equal to or greatly exceed the large advance in the cost of living which has taken place since 1914.

Since the adjournment in Ottawa, on 23rd April, the Board has sat in Montreal on May 5th, 6th, 7th, 8th and 31st; June 1st, 2nd, 3rd, 4th, 5th, 7th and 8th.

Representative employees from different points on the Railway in Canada and officers of the four organizations which were parties to the inquiry appeared before the Board and were given opportunity and encouraged to fully state their views and put in evidence on everything that was relevant to the many complex questions involved, and having carefully considered all that was presented by the different parties and their representatives, the undersigned have come to the conclusion that the rates of pay demanded by the employees are not supported by the evidence and are excessive; that the rates approved or recommended in Schedules "B," "C" and "D" are fair, reasonable and adequate, having regard to the present cost of living, the nature, character and importance of the services and the remuneration paid for similar services by other employers in this country.

Exhibits 1 to 12 inclusive are self-explanatory.

Mr. Fred Bancroft does not concur in this report and intends to submit a separate report.

The whole respectfully submitted.

(Sgd.) F. S. MACLENNAN,  
Chairman.

(Sgd.) U. E. GILLEN.

#### SCHEDULE "A."

GRAND TRUNK RAILWAY SYSTEM, (CANADIAN LINES).

#### Schedule of hours of service and working conditions governing Employees herein named

##### ARTICLE 1—Scope.

(a) This schedule shall govern the following employees on Canadian Lines:

- (1) Clerks.
- (2) Other office and station employees, such as office boys, messengers, car sealers, labellers, chore boys, train announcers, supervisors of crews, depot gatemen, checkers, information clerks, baggage and parcel room employees, train and engine crew callers, operators of office or station equipment devices, telephone switchboard operators, elevator operators, office, station and warehouse watchmen and janitors, etc.
- (3) Classified labour employed in and around shops, round-houses, stations, storehouses and warehouses, such as ashpitmen, coal heavers, fire builders, engine wipers, engine watchmen, storemen, turntable operators, stationary engineers, stationary firemen, power house oilers, coopers, stowers, porters, weighmen, lampmen, etc.

(4) Common labourers employed in and around shops, roundhouses, stations, storehouses and warehouses.

(b) This schedule shall not apply to the following:

(1) Special agents and constables under police department, employees of the dining car department, such as conductors, stewards, chefs, cooks and waiters; employees in hotels or restaurants; employees, other than clerks, employed on coal and ore docks, elevators, piers, wharves, or other water front facilities (except freight handlers at Depot Harbour and such other points as may be agreed upon); ferry, tug and boat crews; or to individuals where amounts of less than forty-five (\$45.00) dollars per month are paid for special service which only takes a portion of their time from

outside employment or business; or to individuals performing personal service not a part of the duty of the carrier, such as red caps, travellers' aides, etc., or to any employees covered by other schedules or wage agreements.

(2) Chief clerks of supervisory agents and general foremen at Montreal, Ottawa, Toronto, Hamilton, London, Niagara Falls, Black Rock and Buffalo; depot masters at Montreal, Ottawa, Hamilton, Brantford and London; chief stationary engineers; and to such other supervisory forces as may be agreed upon; personal office forces of such officers as trainmasters or their superior in rank. (Personal office forces to include positions of a direct and confidential nature, such as chief clerks, assistant chief clerks, private secretaries, superintendents' accountants, chief or head timekeepers at motive power and car shops and in offices of general superintendents, and superintendents of motive power at Montreal and Toronto); employees assigned to road service where special training, experience and fitness are necessary; travelling or terminal passenger agents soliciting passenger and freight agents; travelling auditors and inspectors; all office forces of executive officers.

#### ARTICLE 2—*Definition of Clerk.*

Employees who regularly devote not less than four hours per day to the writing and calculating incident to keeping records and accounts, writing and transcribing letters, bills, reports, statements and similar work, and to the operation of office mechanical equipment and devices in connection with such duties and work shall be considered as clerks. The above definition shall not be construed to apply to:

(1) Employees engaged in assorting tickets, waybills, registering letters, etc., nor to employees operating appliances or machines for perforating and addressing envelopes, numbering claims or other papers, copying letters, etc., adjusting dictaphone cylinders and work of a like nature; nor to employees gathering or delivering mail or other similar work not requiring clerical ability.

(2) Office boys, messengers, and chore boys; or to other employees doing similar work.

(3) Employees performing manual work not requiring clerical ability.

#### ARTICLE 3—*Hours of Service and Meal Period.*

(a) Except as otherwise provided in this article, eight (8) consecutive hours, exclusive of meal period, shall constitute a day's work.

(b) It is understood that the present practice will be continued where employees are now working less than eight (8) hours per day, for which they will be paid as for the basic eight (8) hours day.

(c) Where employees can be spared by their superior officer, it shall be permissible for employees who do not wish to work on Saturday afternoons to make arrangements to work the time so lost during the preceding five (5) days.

(d) In computing broken time and overtime for monthly rated employees, the calendar days of the month, exclusive of Sundays, shall constitute a basic month for such employees.

(e) All employees shall be entitled to not less than one hour for meals during each day, except where it will interfere with present practices.

(f) Where employees are working on an eight (8) hour continuous shift, only twenty (20) minutes shall be allowed for lunch and without deduction of pay.

(g) Employees called and cancelled after reporting for duty shall be paid three (3) hours at pro rata rate.

(h) For baggage and parcel room employees, ticket clerks, station porters, the hours of service may be extended to provide for eight (8) hours' service within ten (10) consecutive hours.

#### ARTICLE 4—*Overtime.*

(a) Except as otherwise provided in this schedule, all time worked in excess of eight (8) hours in any one day shall be considered overtime and paid for at time and one-half time.

(b) No overtime will be worked except by direction of proper authority, except in cases of emergency where advance authority is not obtainable.

(c) When called to work outside of established hours after having been relieved, employees will be paid a minimum allowance of two (2) hours at time and one-half time, for which two (2) hours' service shall, if necessary, be performed. If held over two (2) hours, actual time worked will be paid for at overtime rate.

(d) Passenger station employees, when required to attend a regular scheduled passenger or mixed train outside of the regular eight (8) hours' service between the hours of 5.00 a.m. and 9.30 p.m. will receive one hour overtime for the first hour or any portion thereof. If required on duty more than one hour they will be paid overtime thereafter as per clause "A" hereof.

(e) Employees will not be required to suspend work during regular hours to absorb overtime.

#### ARTICLE 5—*Sunday and Holiday Work.*

(a) Only such employees as shall be necessary to perform the business of the company

shall be required to work on Sundays or legal holidays, namely: New Year's Day, Good Friday, Empire Day, May 24th, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, (Washington's Birthday in U.S., Decoration Day in U.S., July 4th in U.S.)

(b) The above named holidays will be granted with pay to employees rated by the month; if necessary to call upon such employees to work on these holidays they will be paid one-half day extra to be added to their monthly pay.

(c) All employees required to work on Sundays will be paid at the rate of time and one-half time, except as provided in Clause (d).

(d) It is understood the following employees are exempted from clauses (b) and (c), namely: Depot masters, train announcers, baggage masters, depot gatemen, baggage and parcel room employees, station porters, ticket clerks, yard office clerks, roundhouse office clerks and hourly rated men in the Motive Power and Car Departments; provided, however, they are allowed one day's rest in seven. If necessary to work a seventh day in any consecutive seven days, they will be paid at rate of time and one-half time for all time so worked.

#### ARTICLE 6—*Vacations.*

(a) Clerks and monthly rated employees will be granted two weeks' (12 consecutive working days) vacation after one or more years' service; this to apply only to clerks in office, shed foremen, assistant shed foremen, depot masters, baggage masters and car checkers.

(b) In the event of the company not being able to relieve the employee and grant leave of absence during the year, such leave of absence will be added to the leave of absence in the following year, or if the employee so desires additional wages at the regular rate will be allowed in lieu thereof.

(c) Officer in charge shall arrange leave of absence, senior employees, to be given preference. The company will, if possible, relieve all applicants during the summer season, if so desired.

#### ARTICLE 7—*Relief Work and Preservation of Rates.*

(a) Employees temporarily or permanently assigned to higher rated positions shall receive

the higher rates while occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced.

A "temporary assignment" contemplates the fulfilment of the duties and responsibilities of the position during the time occupied whether the regular occupant of the position is absent or whether the temporary assignee does the work irrespective of the presence of the regular employee; assisting a higher rated employee due to a temporary increase in the volume of work does not constitute a temporary assignment. This article does not apply when relieving employees for vacations.

(b) Employees when required to leave their home terminal temporarily to act as a relief shall be allowed reasonable expenses while away.

#### ARTICLE 8—*Rates for Extra Duty.*

Freight shed employees called upon to unload coal from a car shall be paid an additional rate of ten (10) cents per hour for all work so performed.

#### ARTICLE 9—*Attending Court.*

Employees taken away from their regular assigned duties, at the request of the management, to attend court or to appear as witnesses for the company, shall be furnished transportation and will be allowed compensation equal to what would have been earned had such interruption not taken place, and, in addition, necessary actual expenses while away from home terminal. Any fee or mileage accruing shall be assigned to the company.

#### ARTICLE 10—*Promotion and Seniority.*

(a) Promotion and seniority of employees will be confined to districts and groups as shown below, namely: Car Service Department, under Superintendent of Car Service; Car Accounting Department, under Car Accountant; Stores Department, under Divisional Storekeepers; Transportation Department, under each Superintendent; Purchasing Department, under General Purchasing Agent; General Auditor and Auditor of Disbursements Departments, as one group; Auditor of Revenues' Department, Passenger Department as one group; Claims Department as one group; Freight Department, Rate Department, Accounts Department, and General Department as one group;

Freight Claims Department, under Freight Claim Agent; Motive Power and Car Departments, locally at such points as Montreal, M. P. Shops, Montreal Car Shops, Ottawa M. P. Shops, Ottawa Car Shops, London Car Shops, Toronto M. P. Shops, Stratford M. P. Shops, each Roundhouse Terminal including Subsidiary Stations.

(b) In filling vacancies and permanent new positions, seniority, merit and ability shall govern.

(c) Employees refusing promotion will become junior to employee accepting same. (This to apply only to the General Offices.)

(d) Employees declining promotion or declining to bid for a bulletined position shall not lose their seniority. (This not to apply to the General Offices.)

(e) Employees awarded bulletined positions will be allowed reasonable time in which to qualify, and, failing, will be returned to their former positions without loss of seniority.

(f) The rules for promotion and seniority do not apply to employees having less than six (6) months' service, nor to persons who do not devote their entire time to the company's service.

(g) New permanent positions or vacancies will be bulletined for five (5) days in their respective groups and at their respective points. Employees desiring such position will file their application with the designated official within that time, and senior applicant (merit and ability being sufficient) shall be given preference in filling the position. (This rule to apply only to clerical forces, shed foremen, assistant shed foremen, depot masters, baggage masters, storemen, stationary engineers, stationary firemen and power house oilers.) All other vacancies and permanent new positions are to be bulletined locally except those mentioned in clauses 3 and 4, rule (a) of Article 1 and not otherwise specifically mentioned herein.

(h) When reducing forces seniority rights shall govern.

(i) Seniority lists of all employees in the service six (6) months or over shall be posted in January of each year and will be open for correction for a period of sixty (60) days from date of posting. These lists shall be posted in a place accessible to all employees affected and

a copy supplied to General Chairman of Employees' Committee.

(j) When a position has been filled, the name of the appointee shall be bulletined.

(k) It shall be permissible for employees to be transferred from one group or department to another or bid for positions outside their own department or group, without loss of seniority.

(l) Employees now filling or accepting excepted or official positions with the company and employees elected as representatives of the employees covered by this agreement (who shall be considered as on leave of absence) shall retain their seniority rights and rank, if same are asserted within thirty (30) days after release from such excepted employment.

#### ARTICLE 11—*Discipline and Grievances*

(a) An employee who has been in service more than thirty (30) days, or whose application has been formally approved, shall not be disciplined or dismissed, except for intoxication, without proper investigation, at which investigation he may be represented by an employee of his choice. He may, however, be held out of service pending such investigation. The investigation shall be held within five days of the date when charged with offence. A decision will be rendered within five days after the completion of the investigation.

(b) An employee dissatisfied with the decision shall have a fair and impartial hearing before the next proper official provided written request is made to such officer and copy furnished to the agent or officer whose decision is appealed, within five (5) days of the date of the advice of the decision. Hearing shall be granted within five (5) days thereafter and the decision rendered within five (5) days of the completion of hearing.

(c) If an appeal is taken from this hearing it must be filed with the next higher official and a copy furnished the official whose decision is appealed, within seven (7) days after the date of the decision. The hearing of this appeal shall be held within seven (7) days and a decision rendered within five (5) days after completion of hearing.

(d) If a further appeal is taken it must be filed as provided in clause (c) of this article within ten days of the date of the decision

appealed from, on such appeals, hearing shall be given a decision rendered within ten days.

(e) An employee who considers himself otherwise unjustly treated shall have the same right of hearing and appeal as provided above if written request is made to his immediate superior within five (5) days of the cause for complaint.

(f) At the hearing or on the appeal the employee may be assisted by one or more employees.

(g) The right of appeal by employees or their representative in the regular order of succession and in the manner prescribed up to and inclusive of the highest official designated by the company to whom appeal may be made, is hereby established.

(h) An employee, on request, will be given a letter stating the cause of discipline; also a copy of his own statements when made a matter of record at the investigation or on the appeal.

(i) If the final decision decrees that the charge against the employee was not sustained, the record shall be cleared of the charge; if suspended or dismissed, the employee shall be reinstated and paid for all time lost.

(j) If an employee is suspended, the suspension shall date from the time he was taken out of the service.

(k) Committees of employees will be granted transportation and necessary leave of absence for investigation, consideration and adjustment of grievances.

(l) No discrimination will be made in the employment, retention or conditions of employment of employees because of membership or non-membership in labour organizations.

(m) Prior to the assertion of grievances as herein provided, and while questions of grievances are pending, there will neither be a shut-down by the employer nor a suspension of work by the employees.

(n) The time limits as provided in this article may be extended by mutual agreement.

#### ARTICLE 12. — *Service Letters.*

(a) When an employee is dismissed from or leaves the service of his own accord, after giving due notice, such employee will, upon request, be given the usual certificate of service.

(b) Employees securing employment with the company, will, upon request, have returned to them all service cards, letters and recommendations, or any other papers which may have been furnished by them to the company.

#### ARTICLE 13.—*Free Transportation and Leave of Absence.*

(a) Employees will be granted free transportation and leave of absence to attend their meetings, such transportation will not extend beyond the next Division adjoining their Superintendent's Division, and leave of absence will not exceed two (2) days and will only be granted when it will not interfere with the requirements of traffic and the service, and provided the company is not put to additional expense.

(b) Employees will be granted free transportation and leave of absence to attend General Committee meetings upon the request of the General Chairman.

#### ARTICLE 14.—*Moving Engines. (Applicable to Motive Power Dept. only.)*

When employees designated in this schedule are required by officer in charge to move engines, they will be paid at the regular hostlers' rate of pay for time so occupied. This will not apply to watchmen at outstations.

#### ARTICLE 15.—*New positions.*

The wages for new positions created shall be in conformity with the wages for positions of similar kind or class.

#### ARTICLE 16.—*General.*

(a) At points or in departments where twenty-five (25) or more employees covered by this schedule are employed, it will be permissible for notices of interest to said employees to be posted. The notice board shall be supplied by the employees and shall be in keeping with the general furnishings.

(b) In handling grievances, employees covered by this agreement will be given the same consideration as those in other organizations.

(c) When an employee is transferred from one point to another upon order of the company's officials, such employee will receive free transportation for himself and dependent family and household goods when not contrary to law and will suffer no loss of time in consequence thereof; such loss of time not to exceed two (2) days.

(d) This schedule of working conditions and rates of pay shall be printed by the company to the same extent as provided other organizations.

(e) Existing practices more favourable to the employees in respect to matters not specifically covered by this schedule, shall so far as possible, be continued.

(Signed) F. S. MACLENNAN,  
Chairman.

F. S. MACLENNAN,  
Chairman.

MONTREAL, June 7th, 1920.

**Reports of Board in dispute between the Dominion Transport Company, Toronto, and Dominion Transport Company, London, and certain of their employees, being teamsters, chauffeurs, etc.**

**R** EPORTS were received from the Board established to deal with the disputes between the Dominion Transport Company and certain of their employees in Toronto and London, Ont., being teamsters, chauffeurs, stablemen and helpers, members of Local Unions 191 and 663, respectively, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America. The Board was composed as follows: His Honour Judge J. H. Denton, Hamilton, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. J. G. Merrick, Toronto, appointed by the Minister in the absence of a recommendation from the Company, and Mr. Jas. T. Gunn, Toronto, nominee of the employees. This Board was originally appointed to deal with the Toronto dispute, but its jurisdiction was later extended to the London case. The reports were unanimous and contained recommendations as to settlement, which the employees expressed their willingness to accept.

**Report of Board**

In the matter of the Industrial Disputes Investigation Act, and of a dispute between the Dominion Transport Co., Ltd., employer, and certain of its teamsters, chauffeurs, stablemen, and helpers, at Toronto, being members of Local Union 191, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America, employees.

To the Honourable  
the Minister of Labour,  
Ottawa.

The Board of Conciliation herein has the honour to report as follows:

On Monday, May 10th, 1920, the Board established by you in this dis-

pute met in the City Hall, Toronto, and continued in session on the 18, 19, 21, 25, 26 and 31st of May, and on June 1st, 2nd and 3rd.

Notice in writing of the time and place of the first sitting of the Board was served on Mr. Walker, the local Manager of the Dominion Transport Company in Toronto, and upon J. S. Jones, the Business Agent of the Brotherhood of Teamsters.

Mr. Jones, together with a number of employees, including Hobert Kirby and William Clark, attended all the meetings at which evidence was heard. Neither Mr. Walker nor any other representative of the Company, appeared at our earlier meetings.

At these early meetings we heard the evidence of the employees. We then caused a subpoena to be served on Mr. Walker, the local Manager in Toronto, and upon other employers of a similar class of labour in Toronto. In response to the subpoena, Mr. Walker, together with Mr. Langton, General Manager of the Dominion Transport Company, in Montreal, attended. Mr. Langton stated that his Company took the same position that they took when the application for a Board was first made, viz., that the Minister of Labour had no jurisdiction to set up a Board of Conciliation in this matter, as the Company was not an agency of transportation within the meaning of the statute, being in no way connected with the Canadian Pacific Railway, and that they attended out of respect only to the wishes of the members of the Board.

We then proceeded to get information from them and hear the statements and evidence of other employing cartage companies in Toronto.

Every effort was made on the part of the members of the Board to have the parties come together and agree upon the matters in dispute, which would

thus have made it unnecessary for this Board to make any recommendation, but our efforts in that direction failed.

The principal points in dispute between the parties are wages and hours of labour.

After hearing the statements and evidence bearing upon the wages paid by other employing cartage companies and upon the cost of living and all other matters that seemed to have a bearing upon the questions before us, and having considered these statements and evidence and the documents and papers submitted, the Board unanimously recommends for acceptance by the employers and employees the following rates of pay and working hours:

First: The normal working day shall be from seven a.m. to five-thirty p.m. on Mondays to Fridays, both inclusive, and from seven a.m. to one-thirty p.m. on Saturdays, with an hour off for the mid-day meal on all working days except Saturdays. This makes a normal working week of fifty-four hours.

Second: Time and a half shall be allowed for all work done after the normal working day on the days specified above until 10 p.m. After ten p.m. and on holidays and Sundays double time shall be allowed. Should the men be called out in the morning before seven a.m. they shall have time and a half until seven a.m.

Third: Chauffeurs shall be paid 47½¢ an hour and their helpers the same rates as teamsters.

Fourth: Teamsters in the employment of the Company one year or more shall be paid 47¢. an hour; in the employment of the Company less than one year but for six months or more, 46¢. an hour; in the employment of the Company less than six months, 45¢. per hour.

Fifth: Head stablemen, including Patterson and Brown, and any others who may occupy similar positions, \$25 per week, and all other stablemen \$24 per week.

Sixth: The proposed rates of pay to become effective from 1st of May, 1920, **and to remain in effect to 31st of December, 1920, and thereafter until either**

party gives thirty days' notice of their desire for a change.

In presenting this Report the members of the Board wish to state that while they may not have been able to get such information and evidence from the Dominion Transport Company as might have been secured had the Company voluntarily appeared before us, yet that the rates above are based not only upon the evidence presented by the employees but also upon such evidence as we were able to procure from the Company under compulsion and from other employers of similar labour.

All of which we have the honour to submit.

Dated at Toronto, this 3rd day of June, 1920.

(Signed) J. H. DENTON,  
Chairman.

(Signed) JAMES J. MERRICK,  
Employers.

(Signed) JAMES T. GUNN,  
Nominee of Employees.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Transport Company, Ltd., employer, and its teamsters at London, being members of Local Union No. 663, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, employees.

To the Honourable  
the Minister of Labour, Ottawa.

The Board of Conciliation herein has the honour to report as follows:

The Board was established on Monday, May 10th, 1920, to deal with the dispute between the Dominion Transport Company, Limited, and its teamsters, chauffeurs, stablemen and helpers in Toronto.

During the progress of the hearing of the evidence bearing upon such dispute the Board received from the Deputy Minister of Labour and Registrar the following communication:

Ottawa, May 26, 1920.

*Re* Industrial Disputes Investigation Act, 1907, and *re* differences between the Dominion Transport Company, Limited, and its teamsters at London, Ontario, being members of Local Union No. 663, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers.

Sir,—

I beg to enclose copies of communications which have been addressed to the representatives of the employer and workmen concerned respectively in this dispute. You will observe that the Minister has decided to refer the dispute to be dealt with by your Board. I enclose also three copies of the application received from the employees and of communications received from the employer. The Minister asks that the Board will extend its enquiry to the London dispute, and will generally deal with the London dispute as if it had been included with the dispute for which the Board was constituted.

The members of the Board proceeded to London, Ont., on Friday, the 4th of June, 1920, and on Saturday heard the evidence tendered on behalf of the employees involved, and also heard the evidence of the local agent of the Dominion Transport Company, Limited, in London and of the representatives of two other employers of similar labour in London.

The principal points in dispute between the parties are wages and hours of labour.

After hearing the statements and evidence bearing upon the wages paid by other employing cartage companies and upon the cost of living and all other matters that seemed to have a bearing upon the questions before us, and having considered these statements and evidence and the documents and papers submitted, the Board unanimously recommends for acceptance by the employers and employees the following rates of pay and working hours:

First: The normal working day shall be from seven a.m. to five-thirty p.m. on Monday to Fridays, both inclusive, and from 6.45 a.m. to 1.15 p.m. on Saturdays, with an hour off for the mid-day meal on all working days except Saturdays. This makes a normal working week of fifty-four hours.

Second: Time and a half shall be allowed for all work done after the nor-

mal working day on the days specified above until 10 p.m. After ten p.m. and on Sundays double time shall be allowed. Work done on holidays shall be paid for at the rate of additional straight time. Should the men be called out in the morning before seven a.m. on Mondays to Fridays, both inclusive, or 6.45 a.m. on Saturdays they shall have time and a half until seven a.m. or 6.45 a.m. respectively.

Third: Teamsters in the employment of the Company one year or more shall be paid \$22.50 per week, and in the employment of the Company less than one year but for six months or more, \$22.00 per week, and in the employment of the Company less than six months, \$21.50 per week.

Fourth: Proposed rates of pay to become effective from Monday, May 17th, 1920, and to remain in effect until the 31st of December, 1920, and thereafter until either party gives thirty days' notice of their desire for a change.

In presenting this report the members of the Board wish to state that while they may not have been able to get such information and evidence from the Dominion Transport Company as might have been secured had the Company voluntarily appeared before us, yet that the rates above are based not only upon the evidence presented by the employees but also upon such evidence as we were able to procure from the Company under compulsion and from other employers of similar labour.

We are glad to be able to report that at our meeting at London the best of feeling seemed to exist between the employers and employees and a strong desire to maintain friendly relations was manifested.

All of which we have the honour to submit.

Dated at Toronto this 9th day of June, 1920.

(Sgd.) J. H. DENTON,  
Chairman.

(Sgd.) JAMES G. MERRICK,  
Nominee of Employers.

(Sgd.) JAMES T. GUNN,  
Nominee of Employees.

## Report of Board in dispute between the Canadian General Electric Company, Peterborough, and certain of its employees

**A** REPORT was received from the Board established to deal with the dispute between the Canadian General Electric Company and certain of its employees at Peterborough, being machinists and electrical workers. The employees in this case had gone on strike on May 18, and the application for a Board of Conciliation and Investigation was made by the City of Peterborough under the authority of Section 62A of the Industrial Disputes Investigation Act. A Board was established composed as follows: His Honour Judge R. D. Gunn, Ottawa, appointed on the joint recommendation of the other two members, His Honour Judge T. A. McGillivray, Whitby, appointed by the Minister in the absence of a recommendation from the company, and Mr. John Munro, named by the city as representing the employees concerned. Mr. Fred Bancroft was first appointed a member of the Board on the recommendation of the city, but later resigned, and Mr. Munro was appointed in his stead. The report was signed by the chairman and Mr. Munro, and contained recommendations as to settlement. Judge McGillivray presented a minority report.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and amendments, and of a dispute between the Canadian General Electric Company, Ltd., employers, and members of the International Association of Machinists and International Brotherhood of Electrical Workers, employees.

To the

Honourable Gideon D. Robertson,  
Minister of Labour, Ottawa.

The Board of Conciliation appointed to investigate the above dispute met at

the Court House in the Town of Peterboro on the 18th day of June, A.D. 1920, and were attended by His Worship A. A. McIntyre, Mayor, and Alderman Whitehouse of the City Council and Mr. H. W. Harper and committee representing the machinists, employees, and Mr. Alexander Morrison and Mr. W. J. Flynn, representing the Electrical Workers, and Mr. E. C. Patterson, Superintendent, and Mr. R. E. Layfield representing the company.

It will be remembered that this Board was granted on application in accordance with a resolution and by-law of the municipal council of the city of Peterboro bearing date the 21st day of May, 1920, and pursuant to the provisions of Section 6 of Chap. 27 of R.S.C. 1918, authorizing the creation of a Board of Conciliation and Investigation for the purposes herein mentioned.

The dispute outlined in the application alleges that "the machinist employees presented schedules asking hours, minimum rates of wages, overtime rates, classification of work and recognition of shop committees to take effect on and after the 1st of April, A.D. 1920."

The machinist employees, numbering about 275, having failed to reach an agreement with the employers, went on strike on or about 6th May, 1920.

The electrical workers presented their schedule of rates and rules to take effect the 16th day of April, 1920, and after negotiation the parties failed to agree, and the electrical workers, about 325, also struck on or about the 16th day of May, 1920.

After much negotiation and conference that brought no satisfactory results the City Council, represented by the Mayor and Aldermen, intervened and continued the negotiations for settlement with the local management of the Company, employers, and also inter-

viewed the chief executive of the Company, in Toronto, with a view to adjustment, and all negotiations having failed, the City Council, by resolution and by-law formally passed in Council, applied on the 21st of May, 1920, pursuant to the powers above mentioned, for a Board and this Board was constituted.

After negotiations had failed, the Company by notice posted at their works withdrew all offers after the 10th day of June, 1920, intending that all employees that remained on strike after that date should be considered out of the Company's employ, and since then it does appear that many of the striking employees have sought other employment in Peterboro and elsewhere and some others have returned to work.

It was further stated to the Board that by a Report of a former Board bearing date the twenty-fourth day of August, A.D. 1918, rates of pay and working rules were recommended and went into force and continued in force until these strikes, except as altered by increases of pay voluntarily granted since by the Company employers to the employees, and as varied by a further report of a Board bearing date 5th day of March, A.D. 1920, affecting only about 32 armature winders—electrical employees—who applied for and were granted such Board, and by the terms of that last report an increase of 15 per cent was recommended for these 32 or more armature winders—electrical workers—with some other recommendations to take effect from the 6th day of January, A.D. 1920, but this report was adopted in its entirety by the employers only, and the evidence before this Board established that the Company employers offered such increased rates and an additional 5 cents per hour to those employees—armature winders, electrical workers.

It would also appear that in the negotiations, prior to and since the strike, upon the schedule lastly presented by the electrical workers that the rates proposed in accordance with the terms of the Report of the 5th of March, 1920, and supplemented as aforesaid, should be extended to the other employees—

electrical workers—but this proposal was not adopted by the Company, who thereafter withdrew all offers as aforesaid.

The Board immediately after appointment desired the employees to offer to return to work pending its investigation and report upon the dispute, and again upon opening up the matter in the presence of the parties, and again after hearing the evidence and representations the Board urged that such course be adopted, but without avail, and the efforts sometimes hopeful ultimately were entirely in vain owing to the attitude of the parties, though, as before stated, some employees had gone back to work, others had found employment in other places, and there are a number in or about 160 still on strike.

The strikingly peculiar feature of the unfortunate situation above fairly outlined is that the material differences are not on rates of pay, but insofar as the machinists employees are affected fall under the head of classification of work and minimum rate and overtime. It being the present and past system of the employers long established that the premium system prevails in their shop, that being a system by which, say, 10 hours is allotted for the production of a piece of work, and if accomplished in eight hours the employee gets one hour's pay as a bonus, or in other words, is allowed nine hours' pay—this system obviously has its advantages, but is strongly opposed by the employees who ask their wages to be measured and paid for by hours, and for overtime at the usual overtime rates, and the proper classification of the machinists' work with a minimum rate for each class.

It does appear that the electrical workers by their proposed schedules had asked increases in rates and overtime rates, but were agreeable to accept the increased rates recommended by last Board whose report you have for the armature winders, plus 5 cents an hour offered by the Company, and submitted their claims for increases for the other electrical workers and working rules to the judgment of the Board, and were willing to abide thereby.

The Company employers are unalterably opposed to any change being made in their long established premium system and any additional pay for overtime on premium work, as they contend that there is no overtime worked (except on great emergency) and the system is fair, reasonable and equitable, as it rewards the efficient and skilful and does not penalize any other employee, and it would, if changed, be very disastrous to their business in the lines to which it applies.

The Company employers took the ground that the notice to the electrical workers posted on the works, dated 8th day of June, 1920, advising the electrical workers who continued on strike after the date set therein would be considered as out of the employment of the Company, and withdrawing all offers of increases, effectually disposed of the striking electrical workers.

It will be found upon a fair examination of the terms of the Report of the Board dated 6th August, A.D. 1918, that the working rules proposed in the machinists' proposed schedule provide very little ground for difference of opinion and offered no excuse for the present serious troubles.

The Company employers have about 1,400 or more employees. They have been established in business for a great many years in Peterboro, enjoy a fixed assessment on their plant, expend a large and increasing pay roll every month in that city and contemplate large expenditures in new buildings and plant. Conditions are fairly well established and the interest of the City Corporation is manifest, and the steps taken by the Council are deserving of commendation in every respect.

The fullest and most careful consideration has been given by the Board to the representations, contentions and statements, both written and oral, placed before us by and on behalf of the several parties, and no material affecting the matters and differences in dispute have been omitted from our consideration, and we have concluded to make the recommendations following:

1. That when and so often as the circumstances arise calling for the application for a Board of Conciliation and Investigation by a municipal corporation, that the most beneficial results will more effectually be reached if the application precedes a strike or lockout.

2. That in the circumstances here established and hereinbefore set out, the Board was prevented and hindered in effecting any satisfactory result by conciliation owing to the conditions created prior to their institution.

3. That the rates recommended by the Report of the former Board bearing date 5th March, 1920, as increased as aforesaid by the Company to the armature workers—electrical employees, are fair and reasonable.

4. That the increased rates offered by the Company to the electrical workers (other than the armature winders) with 45c. per hour lowest hourly wage paid, being in all an increase of from 32½c. to 49½c. per hour in 1918, to 45c. to 68c. per hour in 1920, are fair and reasonable.

We have considered the schedule presented on behalf of the machinists seeking classification of work and increased rates of pay and the undersigned submit the recommendations following:

That all men employed on the following class of work will be considered first class machinists. This classification to include all departments where machinists are employed:

Men operating all lathes, unless hereinafter mentioned, planers, vertical and horizontal boring mills, slotters, milling machines, gish holts, Jones and Lamson tool and die work, repairs on tools and dies, general fitting and floor work, general assembling, assembling in test, assembling field and pole pieces, laying out, assembling D. C. machines, assembling collector rings.

2nd class work:

General maintenance men, fitting on bearings and brackets including solid bearings, repairs in wire department, assembling induction motors, balancing, fitting standards, assembling small motors, small disc, controller switches,

small fuses, auxiliary fuses for oil switch K. 20, oil switches, lightning arrestors, bell alarm switches, overload relays, low voltage releases, armature and rings, assembling in controller department, assisting in assembly, special coil winding and fitting, fitting pulleys and keys, switch board wiring and assembling, old Bullard boring mill, grinding shafts, new assembling in brass department, grinders.

The following work will be designated as special work: Radial drills using boring bars and facing heads, saws, monitors and shapers in brass department, key seaters, hydraulic slotter (Warren Swazie) operators after three months' experience. Libby lathe to be in same class as Warren Swazie, gear cutting where machines are under supervision of machinist and tools are set for operator, screw machines, machine men in transformer department, marking off in transformer, marble drilling and pipe fitting, shipping with air hammer, drilling and tapping name plates, chipping bearing brackets, chipping motor bases.

The following work will be designated as 2nd class specialists' work: Compensator Department, and all other drills not mentioned as 1st class specialist work.

The following are considered as helpers: Men oiling air compressors and tapping.

We would recommend that no more improvers be employed on machinist work in tool room.

When through slackness of work men are employed on a lower grade of work they shall not receive reduction in wages.

Where men employed in any of the above grades were receiving the minimum rate as recommended by this Board they shall receive an increase of 5 cents per hour.

We further recommend for machinists the rates following:

First class machinists, not less than 75c. per hour.

Second class machinists, not less than 70c. per hour.

Specialists, not less than 60c. per hour.  
Second class specialists, not less than 55c. per hour.

Helpers, not less than 50c. per hour.

We further recommend that the working rules and regulations set out in the Report of the 24th day of August, A.D. 1918, be continued in force except as hereby altered or by and with the consent of the parties.

Dated this 25th July, A.D. 1920.

(Sgd.) R. D. GUNN,  
Chairman.

(Sgd.) J. MUNRO,  
For Employees.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and amendments, and in the matter of a dispute between the Canadian General Electric Company, Ltd., employers, and members of the International Association of Machinists and International Brotherhood of Electrical Workers, employees.

To the  
Honourable Gideon D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Report of the Board of Conciliation herein, I am informed, has been made to you. I refrained from signing the Report as I found myself unable to agree with the other members of the Board as to some of the recommendations, and I beg to submit the reasons for same:

Practically the members of the Board agreed upon the findings which were, as I understand, to the effect following:

1. That the rates recommended to be paid the armature winders by the Report of a former Board bearing date the 5th of March, 1920, as increased by the Company by 5c. per hour, were fair and reasonable.

2. That the increased rates offered by the Company to the electrical workers

(other than the armature winders) with 45c. per hour as the lowest hourly wage paid, being in all an increase of from 32½c. to 49½c. per hour in 1918 to from 45c. per hour to 68c. per hour in 1920, are fair and reasonable.

3. That the unfortunate situation was not caused by the rates of pay, but that insofar as machinist employees are concerned the differences between them fall under the heading of classification and minimum rates of wage.

So far as the above are concerned the members of the Board, I may say, were unanimous.

Now I wish to add that I find that the offer made by the Company to the machinist employees to increase the pay they were receiving on the 1st of May, 1920, brought their wages up to where they must be considered as fair and reasonable. This finding of mine is, of course, only in keeping with the Board's finding that the rate of pay received by the employees was not the material matter in difference between them. These differences are, first, classification, and second, minimum rate.

I find that an offer of increased wages made by the Company to the employees was withdrawn on and after the tenth day of June, 1920.

Now I beg to recommend that that offer of increased pay made by the Company and withdrawn on the 10th of

June, 1920, be renewed and published in such a manner that there can be no possibility of misunderstanding by any man engaged with the Company as to what the terms of his engagement were.

Nothing in the evidence submitted to the Board shows where the Company has violated or taken advantage of any of the working rules and regulations established in the Company's works at the time of the present trouble, and I recommend that no change be made in such working rules now in force, except such as may be made by mutual consent of the parties interested.

From the evidence submitted to the Board I find that the Company has during the years 1916-1920, inclusive, voluntarily increased the wages of their employees as the cost of living increased, and were paying as much and in some cases more than the rate of wages paid in similar works in the country.

I beg to recommend that the offer withdrawn by the Company on the 10th June, 1920, be renewed by the Company and accepted by the employees.

All of the above I beg respectfully to submit.

Dated at Ottawa the 26th day of June, A.D. 1920.

(Sgd.) THEO. A. MCGILLIVRAY,  
Member of the Board.

### **Report of Board in dispute between the Toronto Railway Company and its motormen, conductors, etc.**

**A** REPORT was received from the Board established to deal with the dispute between the Toronto Railway Company and its motormen, conductors, shedmen, motor and truck repairmen, compressor and fender room men and trackmen. The Board was composed as follows: The Honourable Mr. Justice F. S. MacLennan, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. W. H. Moore and John T. Vick, Toronto, nomi-

nees of the Company and employees respectively. The report was signed by all three members of the Board and contained recommendations as to settlement of the dispute. Later Mr. Vick advised that he did not concur in all the recommendations contained in the award and presented a minority report. The original report was accepted by the Company, but rejected by the men, and a strike occurred on June 23. The men returned to work on June 27, an amicable adjustment having been reached.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Toronto Railway Company, employer, and its motormen, conductors, shedmen, motor and truck repair men, and other employees, members of Division No. 113, Amalgamated Association of Street and Electric Railway Employees of America, and other employees of same class not connected therewith, employees.

Toronto, June 11, 1920.

The Hon. G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation and Investigation appointed herein, consisting of Mr. William H. Moore, Mr. John T. Vick, of the City of Toronto, Ont., and the Honourable Mr. Justice F. S. MacLennan, of Montreal, Que., chairman, met in the City Hall, in the City of Toronto, on the 9th instant, and the members, having taken the oath of office, proceeded at once with the investigation.

The Company was represented by Messrs. R. J. Fleming, Manager; F. L. Hubbard, Assistant Manager, and Walter McRae, Master Mechanic. The employees were represented by Comptroller Joseph Gibbons, business agent for the Union; W. D. Robbins, Secretary of the Union, and by B. Merson, A. Conn, Joseph Tompkins, and James Davis, members of the Committee of the Union.

The matter in dispute had reference to working conditions and increased rates of pay for the employees of the Company.

The working conditions now in force between the Company and its employees were recommended by a Board of Conciliation in a report dated the 2nd of August, 1919, and have been in force since 4th of July, 1919, and they are set out in full in the LABOUR GAZETTE

of August, 1919, from pages Nos. 883 to 887. The modifications in these working conditions asked for by the employees had reference to a demand for a closed shop, for additional pay for training new men, additional conditions as to uniforms, seats for motormen and conductors, Saturday afternoon holiday for trackmen, some modifications of the clauses dealing with discipline, and some modifications with reference to the hours of work, including a payment for overtime after eight hours' work, instead of after eight and a half hours' work.

The Board has taken into consideration everything that was said on behalf of the employees and on behalf of the Company, with reference to the modifications of working conditions asked for; and has come unanimously to the conclusion that no change should be made in the working conditions.

The principal demand of the employees was on the question of increased rates of pay. The present pay for motormen and conductors, in operation since 4th July, 1919, are: for the first three months, 50c. per hour; for the succeeding nine months, 52½c. per hour; and thereafter 55c. per hour. The demand of the employees is that the wages should be increased to 85c. per hour for all employees mentioned in the application of the Union.

Both the representatives of the Union and of the Company placed before the Board very full evidence with reference to rates of pay prevailing on other street railways in different cities in Canada and in the United States. The pay of motormen and conductors was within the last three weeks fixed by Boards of Conciliation in Brantford, as follows:

1st year .....	46c. per hour.
2nd year .....	48c. per hour.
3rd year .....	50c. per hour.

Hamilton:

1st six months .....	38c. per hour.
2nd six months .....	40c. per hour.
2nd year .....	45c. per hour.
3rd year .....	52c. per hour.

**London and Port Stanley Railway:**

1st year .....	46c. per hour.
2nd year .....	48c. per hour.
3rd year .....	50c. per hour.
4th year .....	52c. per hour.

**Ottawa:**

1st year .....	49c. per hour.
2nd year .....	51c. per hour.
3rd year .....	53c. per hour.
4th year .....	55c. per hour.

The only other street railway in Canada, so far as the evidence shows, where motormen and conductors are paid a higher rate, is in the City of Vancouver, where the rate is 60c. per hour.

In the Toronto Civic Railway, which has twenty-four miles of track, and 239 employees, the wages since the 4th of July, 1919, was 55c. per hour, until a short time ago, when it was increased to 66c. The Board does not consider that the conditions applicable to these lines should govern this case.

Very complete evidence was put before the Board showing the increased cost of living in Canada and in Toronto, which prevails at the present time, compared with conditions when the war broke out and each year since. Evidence was also given that the Company is able to procure all the men it requires at the present rates of pay.

Briefly stated, the result of the evidence on wages and the cost of living shows:

1. The wages now paid are equal to or exceed those paid by any other street railway company in Eastern Canada;

2. The wage increases during the past few years, going back to the commencement of the war, are fully equal to all increases in the cost of living.

3. The amounts actually paid to motormen and conductors as wages during the last six months of 1919 and during the month of May, 1920, show that, on an average, motormen and conductors were paid amounts equal to or averaging more than the skilled trades of the city, without taking into account uniforms and free tickets or other advantages which the employees enjoy in

the Company's service.

The franchise of the Company expires on the 31st of August, 1921, at which date the Board was informed by the Mayor the City would take possession of the road.

The Board having carefully considered all evidence and representations made to it, recommend unanimously as follows:

That the working conditions and rates of pay at present in force since the 4th of July, 1919, should be continued until the 31st of August, 1921, and trust that this recommendation will be accepted by all parties concerned.

The whole respectfully submitted.

(Sgd.) F. S. MACLENNAN,  
Chairman.

(Sgd.) W. H. MOORE.

(Sgd.) JOHN T. VICK.

**Minority Report**

Toronto, June 12th, 1920.

The Hon. G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

*Re* the Industrial Disputes Investigation Act, 1907, and dispute between the Toronto Railway Company and its motormen, conductors, shedmen, motor and truck repair men, and other employees, members of Division No. 113, Amalgamated Association of Street and Electric Railway Employees of America, and other employees of same class not connected therewith.

I have been reading the award carefully and I find that I signed it under a misapprehension. I am agreeable to recommend most of the conditions as they prevailed and which have been recommended. I certainly had no idea that my signature placed me in the position of agreeing with the other two of the Board on the rate of wages. I contended for an increase and am going to recommend the same.

That while the figures and evidence presented show that at the present time

wages paid equal and exceed in some cases that paid other roads in Eastern Canada per hour, but not per day, yet it was shown by the evidence that the wages paid in border cities of a like size exceeded that paid in Toronto both in hourly and daily rates, Cleveland paying 75c. per hour, Detroit 75c. per hour, Chicago 65c. per hour, and the Corporation of the City of Toronto paying their street railway employees from 60c. to 66c. per hour with holidays added.

The amounts actually paid some motormen and conductors show that these men work a great deal of overtime in order to make amounts submitted by the Company, and without working this overtime the men could not earn the rates paid skilled trades.

That for the sake of harmony and everybody concerned, I recommend that the present working conditions be con-

tinued until the 31st day of August, 1921, which is the expiration of the franchise.

And also recommend that in my opinion the men working for the Toronto Railway Company should receive at least the same wages as paid by the Corporation of the City of Toronto, where they made an exhaustive investigation by the heads of the Department and the Board of Control before striking the rates named, namely:

60 cents per hour for the first three months,

63 cents per hour for the next nine months, and

66 cents per hour thereafter.

All of which is humbly submitted.

(Sgd.) JOHN T. VICK,  
Member of Conciliation Board.

### **Report of Board in dispute between the Canadian National Express Company and certain of its employees**

**A** REPORT was received from the Board established to deal with the dispute between the Canadian National Express Company and certain of its employees, being members of the Canadian Brotherhood of Railroad Employees. The Board was composed as follows: The Honourable Mr. Justice T. G. Mathers, Winnipeg, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. W. J. Christie, Winnipeg, and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report was unanimous and was accompanied by a signed agreement between the disputants.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian National Express Company, employer, and certain of its employees

being members of the Canadian Brotherhood of Railroad Employees, employees.

Hon. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

Sir,—

The undersigned Board of Conciliation and Investigation, to whom the above mentioned dispute was referred by your order dated 26th day of April last past, report as follows:

The Chairman held meetings with representatives of the employees and the company on the 23rd and 28th of May and the 1st of June to arrange for the meeting of the Board at Winnipeg on the 9th June and for the release and transportation to Winnipeg of employees of the company which the officers of the Brotherhood desired to have present as witnesses, from Calgary, Edmonton, North Battleford, Saskatoon, Regina, Brandon, Toronto and Montreal.

The Chairman held further meetings of the parties on the 9th and 10th of June, when the date of meeting originally fixed was postponed until the 16th of June, and upon the representation of the company that all the witnesses asked for could not be released without seriously disorganizing its business, arranged for a conditional reduction in the number of witnesses to be brought to Winnipeg from ten to five. Thereafter the full Board held meetings on the 16th, 17th, 21st., 22nd., 23rd., 24th., 25th and 26th days of June.

At the hearings the Company was represented by Mr. W. C. Muir, General Superintendent, and Mr. G. E. Belrose, Superintendent. The Canadian Brotherhood of Railroad Employees was represented by Mr. N. L. Preston, Vice-Chairman, Mr. V. Costello, Second Vice-President, Mr. J. W. Watson, Chairman of the Committee, and by several members of the Committee. The United Railway Express Workers of Canada were represented by Mr. James Robertson, Grand Vice-President.

It appeared that in March last requests for revision of wage schedule had been made to the company on behalf of both these organizations, and a dispute at once arose as to which organization was entitled to conduct negotiations with the company. The company was willing to negotiate with a joint committee representing both organizations, but, as the company claimed, one organization represented approximately fifty per cent and the other thirty per cent of the employees, and the company refused to negotiate with either separately.

It appeared to the Board that as neither organization could be fairly said to represent all the employees a reasonable solution of the difficulty would be for each organization to appoint three representatives upon a joint committee and that such committee should negotiate a schedule on behalf of the members of both organizations. The suggestion of the Board was accepted by all parties, the joint committee was appointed, and the 21st day of June was fixed for the

opening of such negotiations with the company.

The nature of the dispute as set out in the application for the Board was stated to be the "refusal to deal with and recognize the duly authorized committee of the employees of the Canadian National Express Company." At the time the application was made no dispute had arisen as to wages. Requests for revision of schedules had been made and the company had expressed its readiness to discuss the question, but before any negotiations took place the preliminary difficulty arose as to which of the organizations should conduct the negotiations. It appeared to us, therefore, doubtful whether the reference to the Board included the negotiation of a wage schedule.

In order that all doubt as to the scope of the reference should be removed, the Chairman wired you as follows: "Re Canadian National Express and employees. When Board appointed sole dispute was which of two rival organizations of employees should negotiate schedule with company. Board has succeeded in settling that dispute by inducing organizations to appoint joint committee to conduct negotiations. Negotiations of schedule open Monday. Parties do not anticipate disagreement but desire this Board should have authority to deal at once with any dispute as to wages if such should occur. Board doubts whether terms reference covers wages as no dispute as to wages when Board appointed. Please authorize."

To this telegram you replied as follows:—

"Your message nineteenth to Minister received. Jurisdiction of Board was not intended to be expressly limited to question of the manner of negotiating schedule and Minister desires it to be understood that if doubt is entertained as to Board's jurisdiction and disagreement arises as between company and its employees with respect to the determination of a wage schedule, the Board is authorized to extend to such differences its good

"offices by way of conciliation and investigation, and to endeavour to bring about a settlement precisely as if this subject had been expressly included in the matters of difference originally set forth in the application."

The negotiation of a revised wage schedule, which was thereupon proceeded with in accordance with the Board's suggestion, and has continued from day to day since the 21st inst., has, we are pleased to be able to report, resulted in an agreement being arrived at.

A duplicate copy of this agreement is annexed hereto marked A.

All of which is respectfully submitted this 26th day of June, A.D., 1920.

(Sgd.) T. G. MATHERS,  
Chairman of Board.

(Sgd.) FRED BANCROFT,  
Member of Board.

(Sgd.) W. J. CHRISTIE,  
Member of Board.

"A"

#### CANADIAN NATIONAL EXPRESS CO.

Rules and Rates of Pay Governing certain classes of Employees.

##### ARTICLE 1.

For the purpose of this Schedule the word "Employee" shall be understood to mean any employee, male or female, filling any position incorporated in these rules, regulations and rates of pay, irrespective of title by which designated.

##### ARTICLE 2.

Employees governed by this schedule will be required to furnish guarantee bonds in such amount as the company may deem necessary to fully protect its interests. Premium thereon will be paid by the company.

##### ARTICLE 3.

Employees will not be discriminated against for being members of a Union or Brotherhood, nor for service on committees representing employees; members of committee shall be relieved when required for committee work and will be furnished necessary transportation. Sufficient notice must be given Superintendent so that the service will not suffer, but at no time should it be necessary to give more than fifteen days' notice.

##### ARTICLE 4.

Employees called upon to attend Court or investigations at the request of the proper officials of the Express Company will receive pay at their stated rate of salary, and if away from home, will be allowed transportation and reasonable hotel and living expenses when supported by proper vouchers.

##### ARTICLE 5.

(a) Employees off duty on proper leave of absence, or on account of sickness for a reasonable length of time, will not lose their seniority rights. The company, however, reserves the right to determine seniority rights after six months' absence, except that employees on War Leave will retain their seniority.

(b) In the event of the employees desiring to maintain a paid General Chairman, the employee accepting same will not lose his seniority standing while so engaged.

##### ARTICLE 6.

(a) Any qualified employee, except messengers, called on by the proper authority to do relief work will be paid the minimum rate of pay specified for the position filled by the employee he relieves, provided it is not less than his own, and if away from home will be allowed reasonable living and travelling expenses when supported by proper vouchers.

(b) Any qualified employee doing messenger relief work if required to take a route other than from his home terminal, will be allowed reasonable travelling expenses incurred while going to or from terminal out of which relief work is to be done.

##### ARTICLE 7.

(a) Right of promotion will extend over each Superintendent's Division and will be governed by fitness, the senior employee to be given the preference. Promotion rights, however, will not extend to an employee in the service less than six months.

(b) In the case of employees under local agent or claim agent promotion shall be confined to positions under such agent, except where such employee's seniority entitles him to the following positions, namely: Messengers, Agents, Depot or Assistant Agents, Accountants, Cashiers, Chief Clerks and Shed or Depot Foremen.

(c) When a vacancy occurs, or a new position is created to which employees are entitled to promotion as per Clause "b" hereof, it will be bulletined for fifteen days in all Agents' Bulletin Books in each Superintendent's District during which time employees may apply for same.

(d) When a vacancy occurs in any specified position under a local agent, or a similar new position is created, it will be bulletined in the Agent's Bulletin Book for five days during which time employees may apply for same.

(e) When there is a change in train service which materially affects messengers' runs, such runs will be bulletined. All runs, however, will be bulletined when the summer time card is issued. Bulletins covering messengers' routes will state at which end of route the long lay-over will be.

(f) Bulletins will close at the expiration of the time provided in the foregoing clauses, assignments will be made within five days thereafter, and change will take place within ten days from date of assignment. The name of the employee awarded the position shall be immediately bulletined.

(g) It is understood when an employee is promoted to a higher paid position he will, if fully qualified to fill the position, be paid the specified minimum rate for the position. If not fully qualified for the position he will be placed under probation for thirty days. If he qualifies within that time he will be paid the specified minimum rate from the date appointed to the position. If he does not qualify within that time he will be paid only the same rate of pay that he received in former position, and may be removed from the position and revert to his previous one.

(h) Any employee, except Chairman of the General Committee, refusing promotion offered him, where such promotion would take him into another class, shall become junior (within that class only), to the employee accepting the position.

(i) All temporary vacancies in positions mentioned in Clause "b" shall be filled by the company for any period up to thirty days thereafter, said vacancy to be awarded to senior qualified employee making application.

(j) It will be understood that when owing to special qualifications or length of service, etc., increases of pay are granted to an employee which makes his monthly pay higher than the specified minimum for the position occupied by him, it will in no way be construed as establishing the rate of pay for the position.

(k) Bulletin Books shall be supplied at all offices and terminals of the company.

#### ARTICLE 8.

In reducing forces seniority shall govern. When forces are increased employees will be returned to the service and positions formerly occupied in the order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or give satisfactory reason for not doing so within seven days from date of notification will be considered out of the service.

#### ARTICLE 9.

(a) A list showing seniority of all employees (including those on War Leave) governed by this Schedule, and the date of their last entry into the service of the company, will be posted by the company at all offices and terminals in each Divi-

sion within sixty days after the adoption of this Schedule and will be revised and so posted in the month of January, in each succeeding year in which the Schedule remains in effect. Corrections will be made on proper representation by any employee; but if any employee does not avail himself of the privilege within three months the list shall be considered as accurate and closed. This time limit will be extended in the case of employees on leave of absence.

(b) New employees entering the service will be considered as on probation for a period of fifteen (15) days, and, if found unsatisfactory within that time may be retired from the service without question.

(c) The seniority of an employee shall date from the time he last entered the service.

(d) The seniority of a messenger will date from the time he was last appointed as messenger, provided, however, that messengers will retain their seniority standing as employees.

#### ARTICLE 10.

Employees shall, on application, have returned to them all service cards or letters of recommendation that may have been taken up for inspection.

#### ARTICLE 11.

When an employee is dismissed, or leaves the service, he will immediately be paid all money due him and also be given, upon request, the usual certificate of service, showing capacity in which employed and whether discharged or left of his own accord. If discharged, cause of dismissal to be stated if requested.

#### ARTICLE 12.

(a) Motormen or wagonmen in permanent service will be supplied each year with a complete uniform made of material as specified in Clause "b", which shall consist of one three piece suit, with one extra pair of trousers of same material, one winter reefer, one winter and one summer cap; to be supplied as follows: Three piece suit and summer cap on or about May first of each year, one extra pair of trousers, winter reefer and cap, on or about October first of the same year.

In the case of motormen or wagonmen entering the service, if the date falls between April first (1st) and August thirtieth (30th), they will be supplied with one three piece suit and summer cap. If the date falls between September first and April first, they will be supplied with one pair of trousers, winter reefer and cap; it is to be understood, however, that only one complete uniform will be supplied in any one year.

(b) Uniform will be of indigo blue serge, weight to be not less than nineteen ounces per yard. The reefer will be of good Irish frieze cloth, weight to be not less than forty-four ounces per yard. If possible, material supplied will contain not less than sixty per cent wool.

(c) The employees will pay one-third cost of uniform which amount will, if the employee so desires, be deducted from his monthly pay in three equal monthly instalments.

In the event of the employee being dismissed or leaving the service before his proportion is paid, any balance due will be deducted at the time he is paid off and he may retain the uniform.

#### ARTICLE 13.

(a) An employee disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing, provided written request is presented to his immediate superior within five days of the date of the advice of discipline, and the hearing shall be granted within five days thereafter.

(b) A decision will be rendered within seven days after the completion of the hearing. If an appeal is taken it must be filed with the next higher official and a copy furnished the official whose decision is appealed within five days after day of decision. The hearing and decision on the appeal shall be governed by the time limits of the preceding section.

(c) At the hearing or on the appeal the employee may be assisted by a committee of employees or by one or more duly accredited representatives.

(d) The right of appeal by employees or representatives, in regular order of succession and in the manner prescribed up to and inclusive of the highest official designated by the company, to whom appeals may be made, is hereby established.

(e) An employee on request will be given a letter stating the cause of discipline. A transcript of evidence taken at the investigation or on the appeal will be furnished on request to the employee or representative.

(f) If the final decision decrees that charges against the employee were not sustained, the record shall be cleared of the charge; if suspended or dismissed, the employee shall be returned to former position and paid for all time lost.

(g) Committees of employees shall be granted leave of absence and free transportation for the adjustment of differences between the company and employees.

#### ARTICLE 14.

(a) Female employees who have been in the service of the company one or more consecutive years, male employees (except messengers), who have been in the service of the company two or more consecutive years, and messengers who have been in the service of the company three or more consecutive years, will be allowed two weeks' leave of absence each year with full pay.

(b) If the company finds it inconvenient to grant leave of absence during any year to an employee entitled to it under this Article, the employee shall, at his option, receive either extra compensation at his regular salary for the period, or in the next year additional leave of absence for like period.

(c) Applications for holidays filed in January of each year will be given preference in order of seniority of applicant, and applicants will be advised in February of dates allotted to them. January applicants will have preference over later applicants, and applicants after September 30th will not be entitled to salary compensation if the company is unable to relieve them that year. The company will, as far as practicable relieve all applicants during the summer season when so desired.

Holidays or leave of absence, except as provided for in Clause "e" will not be granted in the month of December.

(d) Application received for transfers in the month of December will not be considered or dealt with during that month.

(e) Employees will be granted leave of absence by local Agent or official in charge in special cases such as death, serious illness, or unusual event in employee's family.

(f) All employees governed by this Schedule shall be subject to the regulations governing Canadian National Railway employees as regards transportation for themselves and dependent members of their families.

(g) Employees will be granted transportation of their household goods in accordance with the general regulations of the Canadian National Railway Company.

NOTE:—It is understood that the company's rules in connection with Clause "g" of this Article are that when an employee receives his change through Bulletin, provided that he has not moved within one year, his household goods will be transported free, otherwise one-half rate will be given.

#### ▲ARTICLE 15.

The following holidays will be granted with pay to employees not engaged in messenger service, viz:

New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

When it is necessary to call upon employees to work on the holidays named they will be paid one-half day extra for that day. Employees will not be expected to work on holidays and will not be paid extra unless they are especially instructed by their foreman, or head of department to do so.

Employees, except messengers, called to work on Sundays shall be allowed overtime for actual time required at time and one-half rates, minimum call to three hours.

#### ARTICLE 16.

(a) Monthly rated employees, except messengers, who work less than a full month will be paid *pro rata* on the basis of the actual number of days in the month exclusive of Sundays.

(b) The pay of female employees for the same class of work shall be the same as that of men, and their working conditions must be healthful and fitted to their needs. The laws enacted

for the government of their employment must be observed.

#### ARTICLE 17.

(a) Eight consecutive hours, exclusive of the meal periods, shall constitute a day's work, provided that employees will not be required to take more than one hour and a half for meals.

(b) Overtime shall be computed for the ninth and tenth hour of continuous service, *pro rata* on the actual minute basis, and thereafter at the rate of time and one-half time.

(c) When notified or called to work outside of established hours employees will be paid a minimum allowance of three hours.

(d) Employees will not be required to suspend work during regular hours to absorb overtime.

(e) Generally, employees are expected to have one day's rest in seven.

#### ARTICLE 18.

Where a change of business conditions at an office necessitates an addition to the specified positions the employee appointed will receive the same rate of pay as paid for a similar position at an office of like size and importance.

#### ARTICLE 19.

(a) When a messenger is required to work more than one car containing express matter, he will be supplied with a helper when reasonably necessary.

(b) When a messenger or driver is required to handle heavy shipments either in quantity or weight, he will be supplied with help when reasonably necessary.

#### ARTICLE 20.

(a) Messengers' rates of pay will be \$145.00 per month.

(b) The above rates are for average monthly mileage of 5,000 miles or less on passenger trains and 2,800 miles or less on mixed trains. All excess mileage will be paid *pro rata*.

Messengers on passenger runs making less than 4,500 miles will include detention to make up 4,500 miles. Messengers on mixed trains making less than 2,800 miles will include detention to make up 2,800 miles.

(c) Messengers will be paid for all time required to report for duty before the starting time of their train on the basis of twenty (20) and twelve and a half ( $12\frac{1}{2}$ ) miles an hour respectively.

(d) Messengers delayed at initial terminal, after time set for departure of train, will be allowed detention time *pro rata* in addition to pay for the trip, to the extent of such time as is not made up on the trip. Delays of fifteen minutes or less not to count.

(e) Messengers required to remain on duty after registered arrival of their train at objective terminal will be paid on the basis of twenty (20) and twelve and a half ( $12\frac{1}{2}$ ) miles per hour respectively.

#### ARTICLE 21.

When the combined extra mileage on any regular run exceeds 5,000 miles per month an additional messenger will be appointed thereto.

#### ARTICLE 22.

All messengers will be allowed eight consecutive hours' rest in each twenty-four consecutive hour period except in cases of extreme emergency.

#### ARTICLE 23.

Messengers' helpers will be paid on the basis of eighty per cent of the messengers' rate of pay.

#### ARTICLE 24.

Messengers will not be required to remain in car or unload freight after arrival at objective terminal except where car is taken over by connecting messenger.

#### ARTICLE 25.

When a regular passenger train averages less than twenty miles an hour and a mixed train less than twelve and a half miles per hour, overtime will be allowed *pro rata* on the basis of twenty (20) and twelve and a half ( $12\frac{1}{2}$ ) miles per hour respectively, for the time so occupied from the time train actually leaves initial terminal until arrival at objective terminal.

#### ARTICLE 26.

(a) Unless notified to the contrary, messengers will be required to report for duty at initial terminals in accordance with time as set forth in Bulletin Notice, but not to exceed one hour before departure time of train.

(b) In the event of a train being cancelled, delayed or set back, and in consequence of not having been so notified, a messenger reports for duty at the regular time, he may, if not required, be then set back to actual time required for duty, but will be allowed one hour's pay at regular schedule rates for having so reported.

#### ARTICLE 27.

Messengers will not be required to handle Government Mail.

#### ARTICLE 28.

Messengers covering train between Prince Albert and East Prince Albert will be allowed for actual time necessary for the round trip on the basis of twenty (20) miles per hour, minimum one hour.

#### ARTICLE 29.

(a) Messengers will submit time tickets for each trip to cover their own time and that of helpers, (when helpers are employed on the

route). All time tickets as to terminal detention to be certified by Agents or their accredited representatives at initial and objective terminals.

(b) If for any reason some portion of time claimed by messengers and messengers' helpers is not allowed they will be advised in writing with the reason for same. Time not in dispute will be paid for in the current pay-roll.

#### ARTICLE 30.

(a) Wagonmen, motormen and porters at the following points will be divided into two classes, Junior and Senior, becoming senior after one year's actual service.

Brandon,	Vancouver,
Calgary,	Winnipeg,
Edmonton,	Montreal,
Moose Jaw,	Ottawa,
Prince Albert,	Quebec.
Regina,	Toronto,
Saskatoon,	West Toronto.

## ARTICLE 33.

Any question of interpretation of this schedule which may arise will be adjusted by the General Committee with the Superintendent, or, if necessary, with the General Superintendent.

## ARTICLE 34.

This schedule shall become effective as applying to office positions from May 1st, 1920, and as from June 1st, 1920, to Messengers' rates, and shall constitute an agreement between the Canadian National Express Company and its employees and no portion thereof shall be changed or abrogated without the approval of

the General Superintendent of the Company and employees' General Committee and then not until thirty days' notice in writing by either party.

### Report of Board in dispute between the Nova Scotia Steel and Coal Company and certain of their employees

**A** REPORT was received from the Board established to deal with the dispute between the Nova Scotia Steel and Coal Company and certain of their employees, members of the three organizations, namely: (1) the Amalgamated Association of Iron, Steel and Tin Workers of America, (2) the International Brotherhood of Electrical Workers, and (3) the International Association of Machinists. On account of the nature of the work of the industry involved it was not considered that the dispute was one falling within the scope of the I.D.I. Act and a Board could be established only upon receipt of the joint consent of the disputants. The company granted this consent and a Board was established composed as follows: His Honour Judge G. Patterson, New Glasgow, chairman, appointed on the joint recommendation of the other two members, Prof. Howard Murray, Halifax, and Mr. J. C. Watters, Glace Bay, N.S., nominees of the company and employees respectively. The report was unanimous and contained a proposed schedule and recommendations regarding settlement of the dispute.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, and of a dispute between the Nova Scotia Steel & Coal Company, Limited, hereinafter

called the "Company", and certain of its employees, being members of the Amalgamated Association of Iron, Steel and Tin Workers, and of the International Brotherhood of Electrical Workers and of The International Association of Machinists, hereinafter called the "employees".

The Honourable,  
The Minister of Labour,  
Ottawa.

The Conciliation Board in above held its first meeting in the Town Hall, Trenton, on Tuesday morning, May 25th at ten a.m. That day and the next two following were spent in hearing what was alleged by the representatives of the employees in support of their claim for an increased rate of pay. Friday, May 28th, was devoted to hearing the company's statement.

An effort was made at the first meeting to reopen negotiations between the parties themselves looking to a settlement of the matters in dispute, the services of the Board only to be enlisted when, and on those points on which negotiations failed. But it was at once made clear to us that negotiations had been carried on over a long period with little or no success, and there was no hope that any good result could be obtained by longer

continuing them. That being the case, we at once began to hear evidence.

The employees based their claim to an increase upon two grounds, or rather one class based their claim on one ground, another class upon another. That is to say, the lower paid men upon the ground that their wages were not sufficient to provide them and their families with the actual necessities of life, let alone live with any degree of comfort and provide properly for the education of their children, the higher paid men upon the ground that being of equal skill at least to their fellow employees on other similar plants they were paid at very much lower rates.

The company's attitude was an honest and straightforward one. Briefly stated, it was this—we have been generous with our men in the past—we do not deny their right to an increase, if we were in a position to grant it—business conditions are improving, we have already given a small increase, and when we have to some extent recovered from our losses of last year, we will gladly give a further and larger increase.

Both sides we can say with truth made out their case. The employees proved conclusively that as for the lower paid men, they were not getting sufficient decently to live upon, as for the higher, they were not paid as much as in other steel-working plants. Without going into evidence in any detail, let it suffice to point out in regard to the former that there were men who, working full time, only received \$72.00 for four weeks. In regard to the latter, machinists here receiving 53½ cents per hour would in a neighbouring and competitive company receive 68 cents.

On the other hand, the company proved conclusively that during last year, more particularly during the last months of last year, good business required that the plant be shut down, but that for the sake of its employees it had kept the plant running at great loss—that it continued to operate at a loss through January and February of this year—that it had had a profit in its March operations, but that six months of such profits would not recoup

it for the losses of the previous six months.

In a word, it was established that the employees should be paid higher wages, and at the same time that the company, up to the present at least, had not been in a position to pay higher wages. Under the circumstances, what was the duty of the Board? None of the members has been without experience on questions of wage disputes, but individually we frankly admit that never before have we had so difficult a question to deal with. Rightly or wrongly, we have reached the conclusion that we must give the employees some increases. We have used in fixing the amount of these increases our best endeavours to reach a happy medium—on the one hand giving a fair measure of much needed relief, on the other, not excessively adding to the burden of the company or unduly reducing its profits now in sight, all of which it might legitimately hope to retain. We do not wish that the schedule we are proposing should be considered as a final adjustment of the matters in dispute. We propose that it should go into effect as from May 3rd and continue in force until the end of July. Then if either party desire to resubmit any of the matters dealt with to us, the Board will meet again, have another hearing and then make a final report. Meantime, we hope negotiations will be reopened between the company and the employees, and that the result of these negotiations will be that no further service of ours will be required.

#### SCHEDULE.

(a) On numbers 1, 2, 3 Plate and Blooming Mills, the men will receive an increase of 4½ cents per hour. The guaranteed minimum pay of these men shall be \$3.60 per day.

(b) Common labourers will receive an increase of 5 cents per hour.

(c) Axle makers, helpers and furnace men will receive an increase of 1½ cents per axle. On each axle over the present quota of 36 for the smaller and 30 for the larger axles, the increase will be 2½ cents.

(d) Shippers will receive an increase of 3 cents per ton.

(e) Machinists now paid over 51 cents per hour will receive an increase of  $6\frac{1}{2}$  cents; those now paid 51 or less will receive an increase of 7 cents.

(f) Electricians.

1. Sectionmen, construction men, shop men, power house operators, oilers and line men, will receive an increase of 7 cents per hour.

2. Press forge, and twenty-eight inch mill, crane operators will receive an increase of  $6\frac{1}{2}$  cents per hour.

3. Other crane operators now receiving less than 35 cents an hour will receive an increase of 5 cents, those receiving 35 cents and over, an increase of 4 cents.

(g) All other men.

1. Men receiving under 31 cents per hour to receive such an increase as will bring them up to 35 cents.

2. Men receiving 31 cents per hour or over will receive an increase of 4 cents.

3. Riggers will receive an increase of 7 cents per hour.

All bonuses at present granted are to continue unaffected by above schedule. We desire to recommend that by negotiation between the men and management, wages should be so fixed that these bonuses, where at all practicable, should be absorbed in a tonnage rate.

One of the grounds set out in the employees' application for a Board was, "that the shift of  $12\frac{1}{4}$  hours be reduced to 10 hours until the eight-hour day comes into effect." We may say that to this matter we have given much earnest consideration, but have not reached any satisfactory conclusion. We regard it as axiomatic that a shift of  $12\frac{1}{4}$  hours is too long and should if possible be shortened, but in what way a change can be brought about we are not able to suggest. These shifts are in force only on the mills, and were so arranged in order that the mills might run continuously, as it is most important they should—the hour and three-quarters in the day when they are not running is occupied in cleaning the furnaces, which has to be done four times in the twenty-four hours. In the only other rolling mill plant in Nova Scotia they have gas burning furnaces requiring no cleaning, and there the shifts in the

mills are eleven and thirteen hours. To make three shifts of eight hours has been tried and found not practicable—if the mills were working on large orders of one special size of stuff, three shifts per day would do all right. But where as here the mills are not doing that, but are working on widely different material of many different sizes, involving frequent changes in the mills, with consequent loss of time, the short shift is not yet desired either by the company or the employees. Nor can the difficulty be solved by considering the extra  $2\frac{1}{4}$  hours overtime—it is not more money the men want, it is the opportunity for more rest or leisure, and if left to themselves, they would not work the  $2\frac{1}{4}$  hours even for the extra pay allowed for overtime. Regretfully, we admit that though we have canvassed the matter from every point of view suggested, we have nothing to propose by way of relief, but we do strongly recommend to the company to take the matter up at once with its employees, and see if it be not possible to come to such an arrangement as will alleviate a situation that is becoming, if it has not already become, acute.

In concluding our report, we desire very cordially to thank the representatives both of the company and the employees for their kindness to us during the whole course of the inquiry, and for the fine spirit shown to us and to one another by both sides. It was apparent that men and management mutually respect each other and are willing to go as far as they can without injustice to meet each other's views. We have never seen such friendly relations between naturally opposed interests, and we venture to hope that our findings will tend rather to strengthen than to weaken those relations.

All of which is respectfully submitted.  
New Glasgow, N.S., June 1st., 1920.

(Sgd.) GEORGE PATTERSON,  
Chairman.

(Sgd.) J. C. WATERS.

(Sgd.) HOWARD MURRAY.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**F**IVE new decisions of the Canadian Railway Board of Adjustment No. 1 have been received by the Department. Case No. 80 has reference to a claim of an agent of the Canadian Pacific Railway Company to employment on Sundays. Case No. 81 relates to a dispute between the Canadian National Railways (Western Lines) and railway conductors concerning the interpretation of a clause in the Conductors' Schedule. Case No. 82 has reference to a claim for way freight rates on a passenger train of the Canadian National Railways (Western Lines) made by a conductor and crew. Case No. 83 has reference to a claim of a conductor and crew of the Canadian National Railways (Western Lines) for switching time at Fort Frances, Ont. Case No. 84 relates to a claim of conductors and crews of the Canadian National Railways (Western Lines) for payment for continuous time when employed on wrecking service.

### **Case No. 80.—The Canadian Pacific Railway Company (Western Lines) and The Order of Railroad Telegraphers.**

An agent of the Canadian Pacific Railway Company at Agassiz, B.C., claimed the right of being allowed to work on Sundays meeting passenger trains, a duty which the Company had assigned to the assistant agent. The Company claimed that there was nothing in the Telegraphers' Schedule to prevent it requiring the assistant agent to perform this work. It was further claimed that the Company had agreed to relieve telegraphers so far as possible from Sunday work and overtime work. On behalf of the employees the fourth paragraph of Clause "D," Article 20, of the schedule was quoted, which reads as follows: "The regular hours of duty of telegraphers will be specified by superintendent and will be the same on all

days of the week, provided, however, that telegraphers will not be paid for Sundays or holidays mentioned in Article 15, except for such service as may be rendered on those days. If required for service on any day outside regular hours of duty, telegraphers will be given official order as authority and excused in the same manner". The telegraphers contended that the assigned hours of telegraphers, as outlined above, included Sundays and holidays, that the Sunday train was due at Agassiz during the assigned hours of the agent, and that the meeting of this train was a service which should be performed by him. The assistant agent, on Sundays and holidays, was required to perform all the work of the agent except to telegraph and block trains, and to carry on the duties that he does not perform on other days of the week within the agent's assigned hours. It was held that the fact of the Company paying the assistant agent overtime for this Sunday and holiday service was proof that he did not do this work prior to the operation of the present schedule.

After hearing additional evidence the Board made the following general statement with reference to the matter under dispute:

"It appears evident that since the change was made in having the Assistant Agent, instead of the Agent, perform the Sunday service referred to, there is a change in the conditions in that telegraph service is not required or performed. The service is also performed on Sundays within the limits of the Assistant Agent's regular hours on week days. There does not appear to be any specific provision in the schedule requiring that a Telegrapher shall necessarily be called upon to perform any station service required during any punitive overtime period, even within the limits of the same hours on Sundays

as regularly assigned week day hours. In the particular case in question, however, it appears that the Agent previously performed the Sunday service referred to, and under the Schedule, the Assistant Agent now being required to perform it has been paid a punitive overtime rate".

The decision of the Board was as follows:

"Inasmuch as a punitive overtime rate is paid for the Sunday service specifically referred to, which is performed within the limits of the Agent's regular hours on week days and was previously performed by him, the Board decides, under all the circumstances and the existing conditions, that in this particular case the contention of the employees is sustained to the extent that the Agent should be allowed to perform the service referred to when such service is required. There having been, in the opinion of the Board, reasonable ground for a difference of opinion on the question, the Board also decides that the claim for back time is not sustained, and this decision shall be effective from the date hereof, the Company having already incurred expense for the service performed."

**Case No. 81.—The Canadian National Railways (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

A dispute arose between the Canadian National Railways (Western Lines) and the Order of Railway Conductors and Railroad Trainmen with reference to the interpretation of Rule 9, Clause "B" of the Conductors' Schedule, and Rule 14, Clause "B" of the Trainmen's Schedule. This clause reads as follows:

"Through freight rates on the basis of twelve and one-half ( $12\frac{1}{2}$ ) miles per hour will be paid Conductors in through freight service for all time occupied in switching at Canadian National junction points, and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip, and this switching will not be regarded as constituting switching at an intermediate point under Article 5, Rule 7.

"Interrupted time of thirty (30) consecutive minutes or more preventing continuance of switching operations

will be deducted in computing time for switching at Canadian National junction points."

The Superintendent of the Canadian National Railways issued a bulletin on October 16, 1919, addressed to the agents at Dalmeny, Warman, and Denholm, to the following effect: "I find a number of switching tickets issued to freight trains for time occupied in making straight pick-ups or straight set-outs in connection with trains at your station. The fact that your station being a junction point does not entitle crews to such time unless switching is performed on these movements. Be governed accordingly".

The representatives of the conductors and trainmen appealed against this bulletin to higher officials of the railways but the action of the superintendent was sustained. The representatives of the railways did not dispute the justice of the employees' claim to time for switching at Canadian National junction points, such as Dalmeny, Warman, and Denholm, when such work was performed, but on behalf of the railways it was contended that the picking up of a car standing first out or the setting out of a car on a designated track, without being required to make any additional moves beyond the straight "Pick-up" or "Set-out" did not constitute switching within the meaning of the clause quoted above. The representatives of the Railways quoted a portion of the clause in the existing schedules in which switching is not construed to apply to through trains setting out or picking up cars belonging to their trains unless a switch has to be made to spot cars which are set out. The representatives of the conductors and trainmen contended that under the clauses of the schedule referred to above the men were entitled to payment for all time consumed in switching operations at junction points and that there were no restrictions as to the nature of the switching to be paid for at such a point.

By decision of the Board, the contention of the employees was sustained.

**Case No. 82.—The Canadian National Railways (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen**

A conductor and crew on a passenger train of the Canadian National Railways (Western Lines), which handled way freight en route, made a claim for payment at way freight rates. It appears that it is frequently necessary to handle rush shipments of repair material, boarding car supplies, other stores, etc., on passenger trains, and the conductors and trainmen contended that on such occasions they should be remunerated in accordance with Rule No. 7, Article 5, of the Conductors' Schedule, and Rule No. 12, Article 5, of the Trainmen's Schedule. These rules provide that conductors and trainmen be required to load or unload way freight or switch en route, and be paid overtime at way freight rates for time so occupied, but not in excess of way freight rates for the full trip, the men to be paid way freight rates over the full trip if they load or unload way freight or switch at three or more points, or a combination of three of both.

The railways contended that these rules were not applicable to passenger service and that while conceding the advisability of reducing to the lowest possible minimum, in its own interest, the volume of material of the railways, such as stores, tools, supplies, etc., handled on passenger trains, the management reserved to itself the right to determine the volume or quantity of such materials, supplies, etc., that may be handled in its baggage cars.

The representatives of the employees contended that conductors and trainmen, on any class of train performing way work or switching en route, came under the rule governing the service.

By decision of the Board the claim of the employees was denied.

**Case No. 83.—The Canadian National Railways (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.**

A conductor and crew of the Canadian National Railways (Western Lines)

made a claim for switching time at Fort Frances, Ont. The claim was based on Clause "B", Rule 9, Article 5, of the Conductors' Schedule, and Clause "B", Rule 14, Article 5, of the Trainmen's Agreement. These clauses read as follows:

"Through freight rates on the basis of twelve and one-half ( $12\frac{1}{2}$ ) miles per hour will be paid Conductors (Trainmen) in through freight service for all time occupied in switching at Canadian Northern (National) Railway junction points, and this time will be paid in addition to pay for trip. Such time will be deducted in computing overtime for the trip and this switching will not be regarded as constituting switching at an intermediate point under Article 5, Rule 7."

"Interrupted time of thirty (30) consecutive minutes or more preventing continuance of switching operations will be deducted in computing time for switching at Canadian Northern (National) Railway junction points."

At the station at Fort Frances a connection is made with the Duluth, Winnipeg and Pacific Railway. The Railways contended that as the Duluth, Winnipeg and Pacific Railway is a line separate and distinct entirely from the Canadian National Railways, switching performed at Fort Frances, the junction point between the two lines, cannot properly be considered as coming within the scope of the above clauses of the Conductors' and Trainmen's Schedule. It was further submitted that although the Duluth, Winnipeg and Pacific Railway was placed under the same managerial and executive control as the Canadian National Railways, it was, in all other respects, operated as an entirely separate railway. The representatives of the employees contended that inasmuch as Fort Frances was the point at which the interchange of traffic takes place between the Canadian National Railways and the Duluth, Winnipeg and Pacific Railway, and that inasmuch as the Duluth, Winnipeg and Pacific Railway is a branch line of the Canadian National Railways, the provisions of the rules covering junction

switching should apply. Further evidence produced before the Board showed that the men employed on the Duluth, Winnipeg and Pacific Railway worked under a different schedule to that of employees of the Canadian Northern Railway, and that the Canadian Northern Railway now included in the Canadian National Railways was part owner of the Duluth, Winnipeg and Pacific Railway.

The decision of the Board was as follows:

The Board decides that Fort Frances, within the intent of the rule referred to, shall be regarded as a junction point on the Canadian National Railways.

**Case No. 84.—The Canadian National Railways (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen**

Two conductors with their crews, employed on the western lines of the Canadian National Railways, entered a claim for payment for continuous time while employed on the wrecking service, and a request was made for the interpretation of Clauses "E" and "F", Article 4, of the Conductors' Schedule, and Clauses "C" and "D", Article 4, of the Trainmen's Schedule. These clauses read as follows:

Clause C (E)—"When work trains run forty (40) miles or more to or from loading or unloading point, they will be paid time or mileage, whichever amounts to the most, in addition to actual time loading or unloading.

"In any case where trainmen (conductors) make more actual mileage than hours in any one day, they will be paid on a mileage basis."

Clause D (F)—"Trainmen (conductors) assigned to work train service and held in that service will be paid on the basis of twelve and one-half (12½) miles per hour, computed from the time they come on duty until tied up, and will be paid for not less than one hundred (100) miles or eight (8) consecutive hours at work train rates for every working day so held, not including overtime lapping over from previous day."

One conductor and crew were called for auxiliary service at Rainy River, on August 24, 1919, where they worked at a wreck for three days, being tied up at night at Fort Frances. The crew submitted tickets covering continuous time, that is, sixty-seven hours, or 844 miles. These tickets were reduced by the amount of time they were actually tied up at Fort Frances, bringing their mileage down to 676. The case of the other crew was similar, being tied up for one night on the occasion of a wreck. On behalf of the railways it was contended that a train engaged in wrecking service was properly a "work" train and the employees on such a train were governed by Clause "F", Article 4, of the Trainmen's Agreement, which reads as follows: "Conductors (Trainmen) on wrecking train will be allowed actual mileage to and from wrecks, work train rates while working at same, and will be paid for not less than one day's pay for such combined service."

The representatives of the men contended that unassigned or temporary work trains should not be tied up under the provisions of the schedule.

In its general statement the Board declared that it could not consistently support a contention that men should be permitted to work indefinitely and receive pay for continuous time. On the other hand, the Board had no desire to make a decision that might be regarded as in conflict with provisions of existing agreements in effect, or practices that may have prevailed under such provisions.

The decision of the Board was accordingly as follows:

The Board, therefore, refers the matter back to the parties to the dispute and suggests that they get together and dispose of these questions on the basis of equity.

The Board is of the opinion that no injustice was forced on Conductor W— and crew when they were required to take fourteen hours' rest in a spread of sixty-seven hours.

In the case of Conductor H— and crew the Board is of the opinion that the Railway was within its rights in tying up the crew, but that in discontinuing pay adequate compensation was not allowed.

## STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1920

**T**WENTY-SEVEN strikes, involving about 8,224 employees, were reported as having commenced during June. There were in existence at some time or other during the month 60 strikes, involving about 12,406 workpeople. The total time loss on account of industrial disputes was estimated at 155,502 working days, as compared with 145,168 in May, and 1,370,601 in June, 1919. The time loss occasioned by the 27 strikes which began in June was 111,429 working days, while a loss of 44,073 is charged to the 33 strikes that commenced prior to June. Termination was reported in the case of 15 disputes which commenced prior to June. Twelve of the disputes commencing during June terminated during the month, leaving the following 33 strikes affecting ap-

proximately 5,182 workpeople on record on June 30: Loggers, North Vancouver, Simoon Sound and Union Bay; lumber workers, Fort Frances; miners, South Minto; pottery workers, St. John's; carpenters, Campbellton; hod carriers and labourers, London; painters, Windsor; electrical workers, machinists and toolmakers, Peterborough; engineers, moulders, tinsmiths, garment workers and glass workers, Hamilton; machinists, woodworkers and finishers, Owen Sound; machinists, Lethbridge, St. John and Toronto; moulders, Amherst, Collingwood and Montreal; shipyard employees, Halifax; woodworkers, Ottawa; bakers, New Westminster and Victoria; teamsters, Fernie; 'longshoremen, Prince Rupert, and Hydro electric employees at Queenston and Chippawa.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes:

**LUMBERING.**—This group showed six strikes, involving 1,155 employees with time losses estimated at 24,620 working days. The chief strike in the group was that of 500 lumber workers at Fort Frances, which commenced June 1. The employees demanded an 8-hour day at the 10-hour rate of pay.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—Strike activity was somewhat reduced in this group. Sixty coal miners at Coalspur, Alta., went on strike to enforce a demand for a change in the management of part of the com-

pany's business. After three days they resumed work under previous conditions. There were three strikes involving 95 employees and a time loss of approximately 180 working days.

**BUILDING AND CONSTRUCTION.**—Hod carriers and labourers at London struck for increased wages and an eight-hour day. About 20 firms and 160 employees were involved in the strike which was unteminated. The strike of carpenters at Campbellton was still unteminated, while that of plumbers at Stratford ended on June 29. Four strikes, involving 281 employees with an approximate time loss of 3,542 working days, constituted the summary for this group.

**METALS, MACHINERY AND CONVEYANCES.**—This group indicated the great-

est strike activity, there being 24 strikes, involving 4,309 employees, with time losses estimated at 81,345 working days. There were ten of these strikes which commenced during the month, the largest being that of the Halifax shipyards' employees. This strike, involving 2,000 employees, commenced on June 1, the cause being the refusal of a demand for increases in wages averaging about 25 per cent. The strike continued in existence at the close of the month. Strikes of machinists and moulders existed at Lethbridge, Toronto, Amherst, Collingwood, Kitchener, Ottawa, Owen Sound, Sydney, St. John, Peterborough, Dundas, Hamilton and Montreal.

**WOODWORKING.** — Woodworkers were on strike at Ottawa and Owen Sound. The Ottawa woodworkers presented a new wage schedule with increases averaging about 10 to 15 per cent. The principle of collective bargaining was also an issue. About 450 employees in 14 firms were involved. At Owen Sound the local, with 259 members, demanded wage increases averaging 15 per cent for employees receiving less than \$4 per day and 10 per cent for those receiving over \$4 per day. Both these strikes were unterminated.

**CLOTHING.** — The union local at Hamilton called out 60 garment workers on strike because of an alleged under-payment of wages to twenty-five employees.

**FOODS, LIQUORS AND TOBACCO.** — The strike of bakers at Ottawa and Vancouver, and of sugar refinery workers at Montreal, terminated during the month. Bakers at Victoria and New Westminster were still out.

**TRANSPORTATION.** — The chief strike in this group was that of 2,500 street railway employees at Toronto. The original demands of the employees was for a wage of 85 cents per hour. Later, this was modified to 60, 62½ and 66 cents per hour. The former rate was 50, 52½ and 55 cents per hour. The Board of Conciliation, appointed under the Industrial Disputes Investigation Act, recommended that the former rate was to continue in effect until August 31, 1921. The employees refused to accept the finding and struck on June 23. After four days of strike conditions, the dispute was adjusted by the Ontario Railway Board, which awarded a general increase of 5 cents per hour.

**PUBLIC UTILITIES.** — Employees of several crafts engaged on the Chippawa-Queenston development project of the Hydro-Electric Power Commission went on strike on June 16 in protest against the re-introduction of a 10-hour day, straight time. The Ontario Legislature appointed a Commission to investigate and report on the situation. The result was a divided report. On June 15, notices were posted at the construction camps that the conditions of work would be a 10-hour basis with straight time wages to be paid at 10 cents per hour above last year's rate. Over 1,000 employees struck the next day. A few days later the Hydro-Electric Power Commission completely closed down all construction. This was the situation at the end of the month.

**MISCELLANEOUS.** — Included in this group were strikes of cooks and waiters at Toronto, and glass workers at Toronto and Hamilton.

## STRIKES AND LOCKOUTS DURING JUNE, 1920

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>Strikes commencing prior to June, 1920</b>			
<b>LUMBERING—</b>			
✓ Loggers, Courtenay, B.C.....	Commenced May 25. For increased wages. Settled by negotiations; work resumed June 7.	425	2,125
✓ Loggers, North Vancouver, B.C.....	Commenced April 24. Alleged grievances against food and cook. Unterminated.	65	1,690
Simoon Sound, B.C.....	Commenced May 26. For better living conditions. Unterminated..	65	1,690
✓ Union Bay, B.C.....	Commenced May 8. For improved camp conditions. Unterminated.	70	1,820
Loggers and teamsters, Usk, B.C.....	Commenced May 1. For a reduction in hours. Strikers' places were filled; work resumed June 7.	30	180
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS—</b>			
Etc.—			
Miners, South Minto, N.B.....	Commenced December 6, 1919. For increased wages and improved working conditions. Unterminated.		
Pottery workers, St. Johns, Que.....	Commenced November, 1913. Against a reduction in wages. Unterminated.	35	
<b>BUILDING AND CONSTRUCTION—</b>			
Carpenters, Campbellton, N.B.....	Commenced May 1. For increased wages. Unterminated.....	100	2,600
Painters, Windsor, Ont.....	Commenced April 1. For increased wages. Unterminated.....		
Plumbers and steamfitters, Stratford, Ont..	Commenced May 1. For increased wages. Men returned to work under conditions existing prior to strike. Work resumed June 29.	21	462
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Electrical workers, Peterborough, Ont.....	Commenced May 18. For increased wages and better conditions. Unterminated.	140	3,640
Engineers, Hamilton, Ont.....	Commenced May 1. For increased wages and better working conditions. Unterminated.	24	624
Labourers and helpers, Montreal, Que.....	Commenced May 5. For increased wages and shorter hours. Information received indicates work has been obtained elsewhere by the strikers		
Machinists, Owen Sound.....	Commenced May 17. For increased wages. Unterminated.....	24	624
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Unterminated.	25	650
Machinists, Sydney, N.S.....	Commenced April 22. For increased wages and shorter hours. Settled by negotiations; work resumed June 21.	150	2,550
Machinists, toolmakers, etc., Peterborough, Ont.	Commenced May 6. For increased wages and shorter hours. Unterminated.	92	2,392
Moulders, Dundas, Ont.....	Commenced May 21. For increased wages and shorter hours. Settled by negotiations; work resumed June 3.	27	54
Moulders, Hamilton, Ont.....	Commenced May 5, 1919. For increased wages and shorter hours. This strike still exists in a few shops.	17	442
Moulders, Montreal, Que.....	Commenced May 5. For increased wages and shorter hours. Unterminated.	200	5,200

STRIKES AND LOCKOUTS DURING JUNE, 1920—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
<i>(Continued)</i>			
Moulders, Toronto, Ont.....	Commenced May 1, 1919. For increased wages and shorter hours.....		
Shipbuilders, Port Arthur, Ont.....	Commenced May 15. For increased wages and shorter hours. Settled by negotiations; work resumed June 8.	1,000	6,000
Tinsmiths, Hamilton, Ont.....	Commenced May 1. For increased wages, shorter hours and recognition of the union. Unterminated.	12	312
<b>CLOTHING—</b>			
Garment workers, Montreal, Que.....	Commenced May 15. Alleged broken contract. Information received indicates conditions no longer affected.		
<b>FOODS, LIQUOR AND TOBACCO—</b>			
Bakers, New Westminster, B.C. ....	Commenced May 8. For increased wages. Unterminated.....	7	182
Bakers, Ottawa, Ont.....	Commenced May 2. Alleged refusal of master bakers to sign a closed shop agreement. Settled by negotiations; work resumed June 12.	60	600
Bakers, Vancouver, B.C.....	Commenced May 1. For increased wages and a demand that an agreement be signed. Settled by replacement of strikers and resumption of work on the part of strikers for whom vacancies still existed. Work resumed June 18.	110	1,650
Bakers, Victoria, B.C.....	Commenced May 1. For increased wages and a new agreement. Unterminated.	28	728
Cigarmakers, Toronto, Ont.....	Commenced May 12. For increased wages. Settled by negotiations; work resumed June 7.	100	500
Sugar refinery workers, Montreal, Que... ..	Commenced May 17. For increased wages and shorter hours. Settled by negotiations; work resumed June 5.	1,300	6,500
<b>MISCELLANEOUS—</b>			
Glass workers, (bevel) Toronto, Ont.....	Commenced May 1. For increased wages. Settled through mediation of the Department; work resumed June 18.	52	780
Tire builders, Guelph, Ont.....	Commenced April 12. For increased wages on piece work. Unterminated.	3	72
<b>Strikes commencing during June, 1920</b>			
<b>LUMBERING—</b>			
Lumber workers, Fort Frances, Ont.....	Commenced June 1. Demand for 8-hour day. Unterminated.....	500	13,000
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Coal miners, Coalspur, Alta.....	Commenced June 2. Demand for a change in the management of part of the Company's business. Men resumed work June 5; no change.	60	180
<b>BUILDING AND CONSTRUCTION—</b>			
Hod carriers and labourers, London, Ont....	Commenced June 26. For increased wages. Unterminated.....	160	480
<b>MACHINERY, METALS AND CONVEYANCES—</b>			
Furnace workers and labourers, Welland, Ont.	Commenced June 2. For increased wages. Settled by negotiations; work resumed June 16.	283	3,255
Machinists, Lethbridge, Alta.....	Commenced June 25. For recognition of the union. Unterminated	8	32
Machinists, Toronto, Ont.....	Commenced June 17. For a minimum rate of wages. Unterminated.	30	360
Moulders, Amherst, N.S.,.....	Commenced June 22. For increased wages. Unterminated.....	51	408

STRIKES AND LOCKOUTS DURING JUNE, 1920—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>MACHINERY, METALS AND CONVEYANCES—</b>			
<i>(Continued)</i>			
Moulders, Collingwood, Ont.....	Commenced June 1. For increased wages. Unterminated.....	10	260
Moulders, Kitchener and Waterloo, Ont....	Commenced June 9. For increased wages and shorter hours. Settled by negotiations; work resumed June 17.	40	280
Moulders, Ottawa, Ont.....	Commenced June 1. For increased wages and shorter hours. Settled by negotiations; work resumed June 14.	18	198
Moulders and coremakers, Amherst, N.S....	Commenced June 3. For a minimum wage scale. Unterminated...	30	720
Shipyard employees, Halifax, N.S.....	Commenced June 1. For increased wages and shorter hours. Unterminated.	2,000	52,000
Steel erectors, Montreal, Que.....	Commenced June 3. For increased wages. Settled by negotiations; work resumed June 17.	128	1,344
<b>WOODWORKING—</b>			
Woodworkers, Ottawa, Ont.....	Commenced June 12. Demand for a minimum wage scale and recognition of the union. Unterminated.	450	6,750
Woodworkers and finishers, Owen Sound, Ont	Commenced June 22. For increased wages. Unterminated.....	259	1,943
<b>CLOTHING—</b>			
Garment workers, Hamilton, Ont.....	Commenced June 23. Alleged short payment of a number of employees. Unterminated.	60	420
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Brewery workers, Fernie, B.C.....	Commenced June 1. For increased wages. Settled by negotiations; work resumed June 7.	16	80
<b>TRANSPORTATION—</b>			
Street railway employees, London.....	Commenced June 8. For increased wage. Negotiations between employees and Ontario Railway Board, who have been operating road; work resumed June 16.	262	2,227
Street railway employees, Toronto.....	Commenced June 23. For increased wages. Adjusted by Ontario Railway Board; work resumed June 27.	2,500	10,000
Teamsters, Fernie, B.C.....	Commenced June 12. For increased wages. Unterminated.....	12	180
Teamsters, Medicine Hat, Alta.....	Commenced June 3. For increased wages and shorter hours. Settled by negotiations; work resumed June 5.	30	60
Longshoremen, North Sydney, N.S.....	Commenced June 10. For increased wages. Settled by negotiations; work resumed June 25.	100	1,300
Longshoremen, Prince Rupert, B.C.....	Commenced June 4. For increased wages and better working conditions. Unterminated.	75	1,650
<b>PUBLIC UTILITIES—</b>			
Hydro Electric employees, Chippewa-Queens- ton, Ont.	Commenced June 16. Against the re-introduction of a straight 10-hour day. Unterminated.	1,000	13,000
<b>MUNICIPAL EMPLOYMENT—</b>

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING MAY, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during May, 1920, based on returns from employers and workpeople, are taken from the June issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes reported to the Department as beginning in May was 204, as compared with 134 in the previous month, and 170 in May 1919. In these new disputes about 78,000 workpeople were directly and over 32,000 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, over 27,000 workpeople were involved, either directly, or indirectly, in 80 disputes which began before May, and were still in progress at the beginning of that month. The total number of disputes in progress in May was thus 284, involving about 138,000 workpeople, as compared with about 140,000 workpeople involved in disputes in progress in April, 1920, and about 105,000 in May, 1919.

**CAUSES.**—Of the 204 new disputes, 141, directly involving nearly 48,000 workpeople, arose on demands for advances in wages; 13, directly involving nearly 11,000 workpeople, on other wages questions; 11, directly involving about 3,000 workpeople, on questions respecting working hours; 4, directly involving about 1,000 workpeople, on details of working arrangements; 25, directly involving nearly 6,000 workpeople, on questions respecting the employment of particular classes or persons; 8, directly involving about 5,000 workpeople, on questions of Trade Union principle; and 2, directly involving nearly 5,000 workpeople, in sympathy with other disputes.

**RESULTS.**—During the month settlements were effected in the case of 105 new disputes, directly involving about 35,000 workpeople, and 37 old disputes, directly involving over 7,000 workpeople. Of these new and old disputes,

41, directly involving about 14,000 workpeople, were settled in favour of the workpeople; 30, directly involving nearly 10,000 workpeople, in favour of the employers; and 71, directly involving nearly 19,000 workpeople were compromised. In the case of 34 other disputes involving nearly 17,000 workpeople, work was resumed pending negotiations.

The following table classifies the disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during May:—

Groups of trades	Number of Disputes			Number of workpeople involved in all disputes in May.	Aggregate loss of working days during May.
	Started before May 1.	Started in May.	Total.		
Building.....	12	41	53	18,000	188,000
Metal, Engineering and Shipbuilding.....	20	44	64	50,000	266,000
Textile and Clothing.....	10	25	35	17,000	174,000
Transport.....	4	15	19	9,000	69,000
Woodworking & Furnishing....	7	9	16	12,000	247,000
Other Trades....	27	70	97	32,000	225,000
Total, May 1920	80	204	284	138,000	1,169,000
Total, April, 1920.....	84	134	218	140,000	889,000
Total May, 1919	55	170	225	105,000	673,000

Of the 1,169,000 working days lost in May by all disputes in progress, over 450,000 were lost by disputes which began before May and were still in progress at the beginning of that month, and over 718,000 by disputes which began in the month.

## CANADA AND THE INTERNATIONAL LABOUR OFFICE

**Report to the Minister of Labour for Canada of the Mission of the Deputy Minister of Labour as Government Representative on the Governing Body of the International Labour Organization at its Meetings in January and March, 1920, in Paris and London respectively.**

**T**HE Minister of Labour has received from the Deputy Minister of Labour a report on the mission of the latter to Europe to attend meetings of the Governing Body of the International Labour Office, and as the report includes an outline of the steps and incidents marking the development of the International Labour Organization, it has been decided to include the same in the pages of the LABOUR GAZETTE. The report is as follows:

To the Hon. G. D. Robertson, LL.D.,  
Minister of Labour.

Sir,—

I beg to present a report of my mission to France and Great Britain as substitute member of the Governing Body of the International Labour Office. The main features of matters arising have been already indicated by cable and otherwise, but it would seem desirable to submit a more formal statement than has been hitherto possible; and, the occasion of the report being one which emphasizes in a special way the social and industrial progress of Canada, it has seemed convenient not only to state particularly the outcome of the mission, but briefly to note also the circumstances and conditions leading thereto.

### PROPOSED INTERNATIONAL LABOUR BODY.

Those who have endeavoured to follow even in a general way the matters growing out of the Peace Treaty and the creation of the League of Nations will have become aware of the establishment concurrently with the League of

Nations of a body designed to serve in a measure as a world labour parliament, not indeed invested with the right of enacting universal laws on any subject but definitely entrusted with the duty of recommending legislation for the enactment of laws by the nations of the world. The first formal action looking to the creation of such a body took place on January 25, 1919, when the Peace Conference at Paris appointed a Commission on International Labour Legislation, the terms of the resolution on the subject being as follows:

That a Commission, composed of two representatives apiece from the five Great Powers, and five representatives to be elected by the other Powers represented at the Peace Conference, be appointed to inquire into the conditions of employment from the international aspect, and to consider the international means necessary to secure common action on matters affecting conditions of employment, and to recommend the form of a permanent agency to continue such inquiry and consideration in co-operation with and under the direction of the League of Nations.

Later, it was found desirable to depart slightly from the terms of this resolution in so far as concerned the question of representation of countries other than the five Great Powers, and also as to the measure of control which the League of Nations should exercise over the proceedings of the body to be created.

As to the first point it was agreed among the nations other than the five Great Powers that Belgium, Serbia, Cuba (for the South American Group), Poland and Czecho-Slovakia, should each name one member of the proposed Commission. The Serbian delegates, however, desired to yield their place to Belgium so that that country might rank

with the five Great Powers in having two seats on the Commission.

#### MEMBERSHIP OF COMMISSION.

A Commission was accordingly appointed with the following membership:

*United States of America:* Mr. Samuel Gompers, president of the United States Federation of Labour; Hon. E. N. Hurley, president of the American Shipping Board. (Substitutes: Hon. H. M. Robinson, Dr. J. T. Shotwell, professor at Columbia University.)

*The British Empire:* The Right Hon. G. N. Barnes, M.P., member of the War Cabinet. (Substitute: Mr. H. B. Butler, C.B., assistant secretary, Ministry of Labour.) Sir Malcolm Delevingne, K.C.B., assistant under-secretary of state, Home Office.

*France:* Mr. Colliard, minister of labour. (Substitute: Mr. Arthur Fontaine, counsellor of state, Director of Labour.) Mr. Loucheur, minister of industrial reconstruction. (Substitute: Mr. Léon Jouhaux, general secretary of the Confédération Générale du Travail.)

*Italy:* Baron Mayor des Planches, former ambassador to the United States, commissioner-general for emigration. Mr. Cabrini, deputy, vice-president of the Supreme Labour Council. (Substitute: Mr. Coletti.)

*Japan:* Mr. Ochiai, envoy extraordinary, minister plenipotentiary of His Majesty the Emperor of Japan at The Hague. Mr. Oka, formerly director of commercial and industrial affairs at the Ministry of Agriculture and Commerce.

*Belgium:* Mr. Vandervelde, minister of justice and of state. (Substitute: Mr. La Fontaine, senator.) Mr. Mahaim, professor at Liège University, secretary to the Belgian Section of the Association for the Legal Protection of Workmen.

*Cuba:* Mr. de Bustamante, professor at Havana University. (Substitutes: Mr. Raphael Martinez Ortiz, minister plenipotentiary; Mr. de Blanck, minister plenipotentiary.)

*Poland:* Count Zoltowski, member of the Polish National Committee, afterward replaced by Mr. Stanislas Patek, counsellor of the Court of Cassation. (Substitute: Mr. François Sokal, director-general of labour.)

*Czecho-Slovak Republic:* Mr. Benes, minister for foreign affairs, afterward replaced by Mr. Rudolph Broz.

The following were appointed officers of the Commission: President, Mr. Samuel Gompers (U.S.A.); Vice-presidents, the Rt. Hon. G. N. Barnes, M.P. (British Empire), Mr. Colliard (France); General Secretary, Mr. Arthur Fontaine (France); Assistant General Secretary, Mr. H. B. Butler (British Empire); Secretaries: Baron Capelle (substitute, Count de Grunne), Belgium; Mr. di Palma Castiglione, Italy; Mr. Oyster, U.S.A.; Mr. Yoshisaka, Japan.

The British Empire is, it will be observed, designated as a whole and not in its component parts, but it should be noted that the Prime Minister of Canada, who, supported by several of his colleagues in the Government, participated from the outset in the proceedings of the Peace Conference at Paris, had availed himself also, in his contact with these matters, of the assistance of Mr. P. M. Draper, of Ottawa, for many years Secretary-Treasurer of the Trades and Labour Congress of Canada, and entitled by reason of his experience and official standing in these matters to rank as a representative of organized labour in the Dominion.

#### PERMANENT ORGANIZATION RECOMMENDED.

The Commission held thirty-five meetings and framed its conclusions in two parts, the first being a draft Convention containing provisions for the establishment of a permanent organization for International Labour Legislation, based on a plan presented by the British delegates to the Peace Conference, and the second being in the form of clauses containing declarations of principles with

regard to a number of matters held to be of vital importance to the Labour World. This Convention ultimately became Part XIII of the Treaty of Peace, Part I extending from Article 387 to Article 426, and Part II being Article 427. The nature of the organization thus created has become fairly well known in Canada because of the general publicity given to the proceedings at the International Labour Conference held at Washington in November last, but they may be with advantage indicated briefly in the present report. The numbers attached to the articles are those as appearing in the Peace Treaty, the bracketed figures being those of the Labour Convention.

Article 387 (1) "A permanent organization is hereby established for the promotion of the objects set forth in the Preamble. The original Members of the League of Nations shall be the original members of this organization, and hereafter membership of the League of Nations shall carry with it membership of the said organization."

Article 388 (2) "The permanent organization shall consist of: (i) a General Conference of Representatives of the Members, and (ii) an International Labour Office controlled by the Governing Body described in Article 393 (7)."

Article 389 (3) provides that a General Conference of Representatives of the Members "shall be held from time to time as occasion may require, and at least once in every year," the Conference to be "composed of four representatives of each of the Members, of whom two shall be Government Delegates and the two others shall be delegates representing respectively the employers and the workpeople of each of the Members." Provision is made also by this Article for the appointment of advisers to the delegates, these to be allowed to speak in place of the delegates with whom they may be respectively associated. The non-Government Delegates are to be "chosen in agreement with the industrial organizations, if such organizations exist, which are most representative of employers or

workpeople, as the case may be, in their respective countries."

Article 390 (4) refers to details of procedure at the Conference.

Article 391 (5) provides that the meetings of the Conference shall be held at the seat of the League of Nations or elsewhere, as decided by a two-thirds vote of Conference Delegates.

Article 392 (6) "The International Labour Office shall be established at the seat of the League of Nations as part of the organization of the League."

Article 393 (7) provides for the constitution of a Governing Body of twenty-four persons, twelve of whom will represent the Governments, six the employers and six the workers. It is provided that of the twelve persons representing the Governments eight shall be nominated by the Members which are of chief industrial importance, and four "shall be nominated by the Members selected for the purpose by the Government Delegates to the Conference, excluding the Delegates of the eight Members mentioned above." The period of office of Members of the Governing Body will be three years.

Article 394 (8) provides for the appointment by the Governing Body of a Director of the International Labour Office who "subject to the instruction of the Governing Body, shall be responsible for the efficient conduct of the International Labour Office and for such other duties as may be assigned to him."

Article 395 (9) "The staff of the International Labour Office shall be appointed by the Director, who shall, so far as is possible with due regard to the efficiency of the work of the Office, select persons of different nationalities. A certain number of these persons shall be women."

Article 396 (10) outlines the functions of the International Labour Office which shall "include the collection and distribution of information on all subjects relating to the international adjustment of conditions of industrial life and labour, and particularly the examination

of subjects which it is proposed to bring before the Conference with a view to the conclusion of international conventions, and the conduct of such special investigations as may be ordered by the Conference. It will prepare the agenda for the meetings of the Conference." Other related duties are set forth in the Article.

Articles 397 (11) and 398 (12) concern details of procedure.

Article 399 (13) provides that "each of the Members will pay the travelling and subsistence expenses of its Delegates and their advisers and of its Representatives attending the meetings of the Conference or Governing Body, as the case may be. All the other expenses of the International Labour Office and of the meetings of the Conference or Governing Body shall be paid to the Director by the Secretary-General of the League of Nations out of the general funds of the League." (The first portion of this section has been, however, interpreted by the Governing Body as requiring only that each Member of the International Labour Organization who is for the time being elected to a seat on the Governing Body shall pay the expenses of the Governmental Representative on the Governing Body, the expenses of a Representative of employers or workers to be paid directly from the funds of the International Labour Office.)

Articles 400 (14) to 404 (18) relate to points of procedure, and provide briefly as follows, viz.: (a) that the agenda for all meetings of the Conference shall be settled by the Governing Body; (b) that the Director shall act as Secretary of the Conference "and shall transmit the agenda so as to reach the Members four months before the meeting of the Conference"; (c) that Governments of the Members may formally object to the inclusion of any item or items in the agenda, such objections to be effective, however, only if sustained by a two-thirds majority of the votes cast by the Delegates present at the Conference; (d) Conference may

regulate its own procedure, but voting is void "unless the total number of votes cast is equal to half the number of the Delegates attending the Conference"; (e) technical experts may be added to any committees appointed.

#### OBLIGATIONS OF A MEMBER.

Article 405 (19) sets forth in some detail the measure of obligation falling upon a Member and is of particular importance,—it reads as follows:

"When the Conference has decided on the adoption of proposals with regard to an item in the agenda, it will rest with the Conference to determine whether these proposals should take the form: (a) of a recommendation to be submitted to the Members for consideration with a view to effect being given to it by national legislation or otherwise, or (b) of a draft international convention for ratification by the Members.

"In either case a majority of two-thirds of the votes cast by the Delegates present shall be necessary on the final vote for the adoption of the recommendation or draft convention, as the case may be, by the Conference.

"In framing any recommendation or draft convention of general application the Conference shall have due regard to those countries in which climatic conditions, the imperfect development of industrial organization or other special circumstances, make the industrial conditions substantially different and shall suggest the modifications, if any, which it considers may be required to meet the case of such countries.

"A copy of the recommendation or draft convention shall be authenticated by the signature of the President of the Conference and of the Director and shall be deposited with the Secretary-General of the League of Nations. The Secretary-General will communicate a certified copy of the recommendation or draft convention to each of the Members.

"Each of the Members undertakes that it will, within the period of one year at most from the closing of the session of

the Conference, or if it is impossible owing to exceptional circumstances to do so within the period of one year, then at the earliest practicable moment and in no case later than 18 months from the closing of the session of the Conference, bring the recommendation or draft convention before the authority or authorities within whose competence the matter lies for the enactment of legislation or other action.

"In the case of a recommendation, the Member will inform the Secretary-General of the action taken.

"In the case of a draft convention, the Member will, if it obtains the consent of the authority or authorities within whose competence the matter lies, communicate the formal ratification of the convention to the Secretary-General and will take such action as may be necessary to make effective the provisions of such convention.

"If on a recommendation no legislative or other action is taken, to make a recommendation effective or if the draft convention fails to obtain the consent of the authority or authorities within whose competence the matter lies, no further obligation shall rest upon the Member.

"In the case of a federal State, the power of which to enter into conventions on labour matters is subject to limitations, it shall be in the discretion of that Government to treat a draft convention to which such limitations apply as a recommendation only, and the provisions of this article with respect to recommendations shall apply in such case.

"The above article shall be interpreted in accordance with the following principle:

"In no case shall any Member be asked or required, as a result of the adoption of any recommendation or draft convention by the Conference, to lessen the protection afforded by its existing legislation to the workers concerned."

Article 406 (20) "Any convention so ratified shall be registered by the Secretary-General of the League of Na-

tions, but shall only be binding upon the Members which ratify it."

Article 407 (21) provides that if any convention coming before the Conference for final consideration fails to secure the support of two-thirds of the votes cast by the Delegates present, it shall nevertheless be within the right of any of the Members of the Permanent Organization to agree to such convention among themselves.

Article 408 (22) Each Member agrees to make an annual report to the International Labour Office on the measures which it has taken to give effect to the provisions of conventions to which it is a party.

Article 409 (23) "In the event of any representation being made to the International Labour Office by an industrial association of employers or of workers that any of the Members has failed to secure in any respect the effective observance within its jurisdiction of any convention to which it is a party, the Governing Body may communicate this representation to the Government against which it is made and may invite that Government to make such statement on the subject as it may think fit."

Article 410 (24) "If no statement is received within a reasonable time from the Government in question, or if the statement when received is not deemed to be satisfactory by the Governing Body, the latter shall have the right to publish the representation and the statement, if any, made in reply to it."

Article 411 (25) gives any Member the right "to file a complaint with the International Labour Office if it is not satisfied that any other Member is securing the effective observance of any convention which both have ratified in accordance with the foregoing Articles." The Governing Body may, if it thinks fit, before referring such a complaint to a Commission of Inquiry, communicate with the Government in question as indicated above. If there is no reply, or if the reply is deemed unsatisfactory,

the Governing Body may apply for the appointment of a Commission of Inquiry (see below) to consider and report on the complaint. If the complaint affects a Government not represented on the Governing Body, the Government in question shall "be entitled to send a representative to take part in the proceedings of the Governing Body while the matter is under consideration."

#### THE COMMISSION OF INQUIRY.

Article 412 (26) "The Commission of Inquiry shall be constituted in accordance with the following provisions:

"Each of the Members agrees to nominate within six months of the date on which the present Treaty comes into force three persons of industrial experience, of whom one shall be a representative of employers, one a representative of workers, and one a person of independent standing, who shall together form a panel from which the members of the Commission of Inquiry shall be drawn.

"The qualifications of the persons so nominated shall be subject to scrutiny by the Governing Body, which may by two-thirds of the votes cast by the representatives present refuse to accept the nomination of any person whose qualifications do not in its opinion comply with the requirements of the present article.

"Upon the application of the Governing Body, the Secretary-General of the League of Nations shall nominate three persons, one from each section of this panel, to constitute the Commission of Inquiry, and shall designate one of them as the President of the Commission. None of these three persons shall be a person nominated to the panel by any Member directly concerned in the complaint."

Article 413 (27) Members agree that with regard to complaints of the nature indicated above, they will respectively place all pertinent information in their

possession at the disposal of the Commission of Inquiry.

Article 414 (28) The Commission of Inquiry shall in its findings embody such recommendations "as it may think proper as to the steps which should be taken to meet the complaint and the time within which they should be taken"; also it shall "indicate in this report the measures, if any, of an economic character against a defaulting Government which it considers to be appropriate, and which it considers other Governments would be justified in adopting."

Article 415 (29) "The Secretary-General of the League of Nations shall communicate the report of the Commission of Inquiry to each of the Governments concerned in the complaint, and shall cause it to be published. Each of these Governments shall within one month inform the Secretary-General of the League of Nations whether or not it accepts the recommendations contained in the report of the Commission; and if not, whether it proposes to refer the complaint to the Permanent Court of International Justice of the League of Nations."

Article 416 (30) "In the event of any Member failing to take the action required by Article 405 (19) with regard to a recommendation or draft Convention, any other Member shall be entitled to refer the matter to the Permanent Court of International Justice."

Article 417 (31) "The decision of the Permanent Court of International Justice in regard to a complaint or matter which has been referred to it in pursuance of Article 415 (29) or Article 416 (30) shall be final."

Article 418 (32) "The Permanent Court of International Justice may affirm, vary or reverse any of the findings or recommendations of the Commission of Inquiry, if any, and shall in its decision indicate the measures, if any, of an economic character which it considers to be appropriate, and which other Governments would be justified in adopting against a defaulting Government."

## TREATMENT OF DEFAULTING GOVERNMENT.

Article 419 (33) "In the event of any Member failing to carry out within the time specified the recommendations, if any, contained in the report of the Commission of Inquiry, or in the decision of the Permanent Court of International Justice, as the case may be, any other Member may take against that Member the measures of an economic character indicated in the report of the Commission or in the decision of the Court as appropriate to the case."

Article 420 (34) The defaulting Government may at any time inform the Governing Body that it has taken the steps necessary to comply with the recommendations of the Commission of Inquiry or with those in the decision of the Permanent Court of International Justice as the case may be, and may request it to apply to the Secretary-General of the League to constitute a Commission of Inquiry to verify its contention. In this case the provisions of Articles 26, 27, 28, 29, 31, and 32 shall apply, and if the report of the Commission of Inquiry or the decision of the Permanent Court of International Justice is in favour of the defaulting Government, the other Governments shall forthwith discontinue the measures of an economic character that they have taken against the defaulting Government.

## APPLICATION OF CONVENTIONS TO COLONIES, ETC.

Article 421 (35) The Members engage to apply conventions which they have ratified to their colonies, protectorates and possessions, subject to certain stated exceptions and modifications.

Articles 422 (36) and 423 (37) deal with procedure details on this point.

## TRANSITORY PROVISIONS.

Articles 424 (38) to 426 (40) are termed transitory provisions and are dealt with below:

## GENERAL PRINCIPLES.

The concluding Article of the Convention, No. 427 in the Treaty of Peace, and constituting section II of the Labour Convention, is a statement of the general principles underlying the Convention and is of the highest importance. The section reads as follows:

"The High Contracting Parties, recognizing that the well-being, physical, moral and intellectual, of industrial wage-earners is of supreme international importance, have framed, in order to further this great end, the permanent machinery provided for in Section I and associated with that of the League of Nations.

"They recognize that differences of climate, habits and customs, of economic opportunity and industrial tradition, make strict uniformity in the conditions of labour difficult of immediate attainment. But, holding as they do, that labour should not be regarded merely as an article of commerce, they think that there are methods and principles for regulating labour conditions which all industrial communities should endeavour to apply, so far as their special circumstances will permit.

"Among these methods and principles, the following seem to the High Contracting Parties to be of special and urgent importance:

"First.—The guiding principle above enunciated that labour should not be regarded merely as a commodity or article of commerce.

"Second.—The right of association for all lawful purposes by the employed as well as by the employers.

"Third.—The payment to the employed of a wage adequate to maintain a reasonable standard of life as this is understood in their time and country.

"Fourth.—The adoption of an eight hours day or a forty-eight hours week as the standard to be aimed at where it has not already been attained.

"Fifth.—The adoption of a weekly rest of at least twenty-four hours, which should include Sunday wherever practicable.

"Sixth.—The abolition of child labour and the imposition of such limitations on the labour of young persons as shall permit the continuation of their education and assure their proper physical development.

"Seventh.—The principle that men and women should receive equal remuneration for work of equal value.

"Eighth.—The standard set by law in each country with respect to the conditions of labour should have due regard to the equitable economic treatment of all workers lawfully resident therein.

"Ninth.—Each State should make provision for a system of inspection in which women should take part, in order to ensure the enforcement of the laws and regulations for the protection of the employed.

"Without claiming that these methods and principles are either complete or final the High Contracting Parties are of opinion that they are well fitted to guide the policy of the League of Nations; and that, if adopted by the industrial communities who are members of the League, and safeguarded in practice by an adequate system of such inspection, they will confer lasting benefits upon the wage-earners of the world."

#### ACTION OF THE CANADIAN PRIME MINISTER.

Publications issued from the Peace Conference go to show that the statement of principles here set forth was not framed without considerable difficulty, and that the action of the Prime Minister of Canada was a factor which in the end determined its precise form. Remarks made by Mr. Barnes, one of the British members of the Peace Conference, at a meeting of the Conference on April 19, 1919, and at which the report of the Labour Commission was

under consideration, throw an interesting light on this point. Mr. Barnes stated that an earlier draft of the report of the Labour Commission had contained a reference to nine resolutions which the Commission had adopted, each one of which was accorded a two-thirds majority vote. Difficulties had arisen, Mr. Barnes remarked, with reference to the drafting of these resolutions. Mr. Barnes stated that he had endeavoured, on behalf of the Commission, to secure an agreement on a re-draft, but he was sorry to say he had been unsuccessful. Sir Robert Borden had been, however, more successful. The final draft of the resolutions in the form as set forth above, and as incorporated in the Treaty, was then submitted by the Canadian Prime Minister.

Sir Robert Borden, after reading the text of the nine resolutions, remarked that the text represented no alterations in substance. There was, however, a new arrangement and the phraseology had been somewhat altered; for example, the difference of conditions among different nations which was alluded to in paragraph 7 of the Articles as originally drafted was now recognized as a condition which must apply to all the principles here laid down. Further than that it was thought that it was not possible to establish a code which should be permanent or enduring, and in the new draft emphasis was laid upon the view that this was an enunciation of principles upon which, from time to time, if need be, a code might be built up.

In the concluding paragraph, continued Sir Robert Borden, emphasis was laid upon the consideration that these methods and principles were not to be regarded as complete or final. It was quite impossible to foresee all developments and all ideals that might arise in the future, and therefore this was put forward as a tentative enunciation of principles which it was believed would result, if they were followed out as they should be, in the improvement of labour conditions throughout the world.

### THE CASE OF FEDERAL STATES.

It will have been noted that Article 19 defines the position of Federal States with reference to the conventions and recommendations coming from an International Labour Conference. The Article is of special importance to Canada as a Federal State. This point was naturally one of much concern at the Peace Conference at Paris, and something of the situation from this point of view may be gathered from some of the public reports issued from the Conference. At a meeting of the Peace Conference on April 11, 1919, at which the report of the Labour Commission was under discussion, Mr. Barnes, the British Minister, discussing the report in some detail, reached the question of procedure, and proceeded with the following remarks:

"I now come to procedure. The most important article connected therewith is No. 405. It has been the chief obstacle to the agreement, ultimately, I am glad to say, reached. It now provides that if the proposals are indorsed by a conference they are to be in the form of a draft convention, or, alternatively, in the form of a recommendation. In either case, if supported by two-thirds of the votes cast at a conference, they become the finding of that conference and are deposited with the Secretary-General of the League of Nations. Each high contracting party then comes under the obligation to submit the convention or recommendation, as the case may be, within twelve months to its competent authority, and, unless such competent authority indorses or accepts the recommendation or convention, as the case may be, that is the only obligation resting upon the affiliated states, subject to a proviso, however, in the following clause, of which I shall say a word in a moment. The state comes under the obligation if its competent authority accepts the recommendation or convention to carry it out.

"Here, however, we come upon the difficulty of federal states. There are states which are prevented by their con-

stitutions from making treaties in regard to labour matters. There are states, such as the United States of America, which include numbers of competent authorities which must be left free to decide for themselves. It was because of that that we decided to allow of a convention being cast in form of a recommendation, and then if cast in the form of a convention it should still be regarded by a federal state as a recommendation only. If a federal state adopted it, it would do so in its own way. The net result of all this is that there is a less degree of obligation resting upon a federal state than upon other states. That is regrettable but, as we found, unavoidable."

### TRANSITORY PROVISIONS OF LABOUR CONVENTION.

The above outline of the terms of the Labour Convention did not, it will be remembered, include the particulars of what were described as the "transitory" provisions.

Articles 424 to 426, the Articles in question, relating to the first International Labour Conference, decree that the Conference should be held at Washington, D.C., in October, 1919, and set forth the agenda of the Conference. The Conference has, in the meantime, come and gone, and although its proceedings and conclusions have been the subject of formal representations, and have otherwise received considerable publicity, summary statements on this subject will not be out of place here, and will tend to make the present document more comprehensive and complete.

The Labour Convention decreed, as stated in Article 424, that "the first meeting of the Conference shall take place in October, 1919," and the place and agenda for the meeting were specified in what was termed an "Annex" to Article 426, the Annex providing as follows: "The place of meeting will be Washington. The Government of the United States of America is requested to convene the Conference."

At the time this portion of the Treaty of Peace was framed, it was apparently assumed that the peace negotiations would have reached a conclusion some time earlier than October, and that the United States would be among the powers signing the Treaty. All are now aware that neither of these expectations was realized. The peace negotiations were, in October, 1919, far from completed. Some of the Powers had signed the Peace Treaty, but the United States was not among the number. The League of Nations and the companion body, the International Labour Office, had not, therefore, come formally into existence.

#### INTERNATIONAL ORGANIZING COMMITTEE.

In the meantime, the Organizing Committee of the International Labour Office had been appointed under the transitory provisions (Annex to Article 426):

"The International Organizing Committee will consist of seven Members, appointed by the United States of America, Great Britain, France, Italy, Japan, Belgium and Switzerland. The Committee may, if it thinks necessary, invite other Members to appoint representatives."

The documents of the International Labour Office show that the Committee was duly organized as follows: United States of America: Dr. J. T. Shotwell (provisionally), Professor at Columbia University. Great Britain: Sir Malcolm Delevingne, K.C.B., Assistant Under-Secretary of State, Home Office. France: Mr. Arthur Fontaine, Councillor of State, Director of Labour. Italy: Mr. di Palma Castiglione, Inspector of Emigration. Japan: Dr. M. Oka, formerly Director of Commercial and Industrial Affairs at the Ministry of Agriculture and Commerce. Belgium: Mr. E. Mahaim, Professor at Liège University. Switzerland: Mr. W. E. Rappard (provisionally), Professor at Geneva University.

Mr. Arthur Fontaine was elected chairman, and Mr. H. B. Butler, C.B.,

assistant secretary of the Ministry of Labour, was appointed secretary.

The Organizing Committee proceeded immediately with its work.

#### AGENDA OF FIRST CONFERENCE.

The agenda for the first Conference had been set forth also in the Annex to Article 426 of the Labour Convention and was as follows:

##### AGENDA:

- (1) Application of principle of the eight-hours day or of the forty-eight-hours week.
- (2) Question of preventing or providing against unemployment.
- (3) Women's employment:
  - (a) Before and after child-birth, including the question of maternity benefit;
  - (b) During the night;
  - (c) In unhealthy processes.
- (4) Employment of children:
  - (a) Minimum age of employment;
  - (b) During the night;
  - (c) In unhealthy processes.
- (5) Extension and application of the International Conventions adopted at Berne in 1906 on the prohibition of night work for women employed in industry and the prohibition of the use of white phosphorous in the manufacture of matches.

#### CONFERENCE PRELIMINARIES.

The Organizing Committee, in May, 1919, sent out to the nations participating in the International Labour Organization a questionnaire, requesting information of a highly detailed character with reference to existing laws, regulations and practices in connection with each of the subjects mentioned in the agenda, also inviting any information available with respect to matters contemplated or suggested, by way of laws or regulations, in relation to these subjects. The questionnaire destined for the Government of Canada was duly received in the Department of Labour, and was given prompt attention. The information requested was gathered, so far as possible, and very full statements on the subject were forwarded to the Organizing Committee. The Organizing Committee was thus enabled to assemble

at its headquarters in London a mass of valuable information from practically all countries of the world. These reports were studied, and printed copies of a carefully prepared abstract were sent out in time to reach most of the Members of the International Labour Organization before the Delegates of the countries in question had set out for the Conference at Washington.

In the case of a few countries remote from the headquarters of the Organizing Committee, and occasionally for other reasons, the reply to the questionnaire was received too late for incorporation in this general abstract, and supplements to the abstract remedied, as a rule, these omissions.

Although the Peace Treaty had decreed that the first International Labour Conference should be held in Washington in October, and was to be convened by the Government of the United States of America, the precise date had been left open. As time passed and it became apparent that the United States was unlikely to have signed the Peace Treaty prior to the end of October, some uncertainty was felt whether or not the official action on the part of the United States, necessary under the labour Convention, would be deemed practicable. Doubt on this point was removed by the issue by the Secretary of Labour of the United States of an announcement that the Conference would be convened at the Pan-American Building at Washington, D.C., at 11 o'clock a.m. on Thursday, October 29.

#### COMPOSITION OF CONFERENCE.

It will be recalled that in Article 389 (3) of the Labour Convention each Member of the International Labour Organization is entitled to send four Delegates to each International Labour Conference, two of them to represent the Government and two to represent employers and workers respectively, these last to be chosen "in agreement with the industrial organizations if such organizations exist, which are most representative of employers or workpeople," etc.

The same Article permits the appointment of advisers for each Delegate, such advisers not to exceed two in number for each item on the agenda. Since there were five items on the agenda, the letter of the Convention would have permitted the appointment of ten advisers for each of the four Delegates, a total of forty-four persons. The privilege of sending advisers was, however, exercised with reserve, and the delegates and advisers together when they actually assembled at Washington, though representing forty-one nations, were but slightly in excess of 400 in number.

#### REPRESENTATION OF DOMINION AND PROVINCES.

There seemed perhaps special reason why the representation of the Dominion of Canada, having in mind our proximity to the place of meeting, and the fact that it was the only North American country which would have a vote in the Conference, should not be inconsiderable. It was, moreover, desirable not to overlook the fact that the constitution of Canada was federal in character and that many of the matters appearing on the agenda of the Conference, and which would come up for discussion and action, were such as would fall within the jurisdiction of the Provinces. The Provincial Governments did not come at any point directly into contact with the International Labour Office, and it would be an obvious advantage if some means could be effected to secure this contact. The feature in the procedure which permitted the appointment of advisers to Delegates to the Conference seemed to offer the opportunity. The different Provincial Governments were each accordingly invited to name one person who might be appointed as an adviser to a Dominion Government Delegate, and each Government accordingly accepted the invitation. The mingling which resulted of Dominion and Provincial officials in the Washington Conference was of the greatest value for the furtherance of the principles underlying the Conference.

The two delegates appointed to represent the Dominion Government were the Hon. G. D. Robertson, Minister of Labour, and the Hon. N. W. Rowell, K.C., President of the Privy Council. With regard to the appointment of delegates on behalf of employers and workers respectively, the Minister of Labour requested recommendations respectively from the Canadian Manufacturers' Association and the Trades and Labour Congress of Canada, these bodies being held to be those which, in the words of Article 3, were "most representative of employers or workpeople." Each of these bodies was requested also to nominate five advisers, and nominations were furnished as requested.

#### THE CANADIAN DELEGATION.

The Canadian delegation to the Convention was constituted as follows:

##### *Government Delegates:*

The Hon. Gideon D. Robertson, Senator and Minister of Labour of Canada.

The Hon. Newton W. Rowell, K.C., M.P., President of the Privy Council of Canada, and Acting Secretary of State for External Affairs.

##### *Advisers to Government Delegates:*

(In the following list Messrs. Acland, Christie and Brown are Dominion Government officials; the remainder are the nominees of the respective provinces).

Mr. F. A. Acland, Deputy Minister of Labour of Canada.

Mr. Loring C. Christie, Legal Adviser to the Department of External Affairs of Canada.

Mr. Daniel A. Cameron, of Sydney, Member of the Provincial Legislature of Nova Scotia.

The Hon. C. W. Robinson, of Moncton, Member without portfolio of the Government of the Province of New Brunswick.

The Hon. W. L. Mackenzie King, C.M.G., M.P., of Ottawa, (named by the Government of Prince Edward

Island), Leader of the Dominion Opposition, and former Minister of Labour of Canada.

Mr. Louis Guyon, of Montreal, Deputy Minister of Labour for the Province of Quebec.

Dr. Walter A. Riddell, of Toronto, Deputy Minister of Labour for the Province of Ontario.

The Hon. Thos. H. Johnson, of Winnipeg, Attorney General for the Province of Manitoba.

Mr. T. Molloy, of Regina, Secretary of the Bureau of Labour for the Province of Saskatchewan.

The Hon. C. R. Mitchell, of Edmonton, Provincial Treasurer of the Province of Alberta.

Mr. J. D. McNiven, of Victoria, Deputy Minister of Labour for the Province of British Columbia.

Secretary (and Adviser):

Mr. Gerald H. Brown, Secretary of the Reconstruction Committee of the Government of Canada.

##### *Employers' Delegate:*

Mr. S. R. Parsons, President, British American Oil Company, Limited, Royal Bank Building, Toronto.

(Appointed on the nomination of the Canadian Manufacturers' Association.)

##### *Advisers to Employers' Delegate:*

Mr. Sam Harris, The Harris Lithographing Company, Ltd., Toronto.

Mr. J. T. Stirrett, General Secretary, Canadian Manufacturers' Association, Toronto.

Mr. E. Blake Robertson, Ottawa Representative, Canadian Manufacturers' Association, Ottawa.

Mr. J. B. Hugg, Canadian Manufacturers' Association, Winnipeg.

Mr. J. G. Merrick, Secretary, Employers' Association, Toronto.

##### *Workers' Delegate:*

Mr. P. M. Draper, Secretary-Treasurer, Trades and Labour Congress of Canada, and President, Ottawa Typographical Union.

*Advisers to Workers' Delegate:*

Mr. Tom Moore, President, Trades and Labour Congress of Canada, Ottawa.

Mr. Arthur Martel, Vice-President, Trades and Labour Congress of Canada, Montreal.

Mr. Robert Baxter, Vice-President, Trades and Labour Congress of Canada, Sydney.

Mr. David Rees, Vice-President, Trades and Labour Congress of Canada, Vancouver.

Mrs. Kathleen Derry, Member, Boot and Shoe Workers' Union, Toronto.

Major L. L. Anthes and Mr. T. A. Stevenson, of the Information and Service Branch of the Department of Soldiers' Civil Re-establishment, were also present at the Conference on behalf of the Department of Soldiers' Civil Re-establishment.

**OPENING OF CONFERENCE.**

The First International Labour Conference opened at Washington on the morning of October 29, 1919. Although the United States was not qualified, technically, to send Delegates to the Conference, the Secretary for Labour of the United States, the Hon. Mr. Wilson, welcomed the Delegates to Washington, and at the unanimous request of the Delegates, acted as President of the Conference throughout its deliberations; also representation of the United States in the gathering was, by vote of the Conference, extended to the United States by courtesy, though the delegates could not have the privilege of voting. Mr. Samuel Gompers, President of the American Federation of Labour, was appointed accordingly as Labour Delegate and appeared at several sessions of the Conference and took some part in the proceedings. No representatives were appointed, however, on behalf of the employers of the United States, or on behalf of the United States Government.

The question of the admission of German and Austrian delegates was considered early in the Conference, and after

some discussion a motion in favour of the admission of German and Austrian delegates was carried, with slight opposition. The German and Austrian delegates had apparently deferred sailing until informed whether or not they would be admitted to the Conference, and ultimately, on account of the difficulty in obtaining steamship passage which would bring them to Washington in time to participate in the proceedings, did not sail.

Forty-one countries were represented, the largest National Delegations being those from Great Britain, Japan and Canada, which were about equal in number. Most, however, of the more distant countries sent delegates only, and not all sent a full quota. The Minister of Labour being detained in Canada during the earlier part of the Conference, the undersigned, as the Deputy Minister of Labour, acted as the Minister's substitute.

The various Delegations were provided with offices in premises adjacent to the Pan-American Building, and in the case of the Canadian Delegation, the different groups were enabled to hold meetings, as occasion required, for the discussion of points arising for consideration. Mr. Gerald H. Brown had been appointed as Secretary of the Canadian delegation, and Mr. Brown's efficient work in this respect conduced greatly to the convenience and advantage of all concerned. Canadian delegates and advisers in all groups were prominent members of the different committees, and took effective part also in the work of the Conference as a whole.

**THE WORK OF THE CONFERENCE.**

It is not necessary here to discuss the general proceedings of the Conference, reports of which have been already printed and published in various forms. It will be, however, in place to state briefly the work accomplished. This is best shown by a statement of the draft conventions and recommendations adopted, which were as follows:

A Draft Convention limiting the hours of work in industrial undertakings to eight in the day and forty-eight in the week.

A Draft Convention concerning unemployment.

A recommendation concerning unemployment.

A recommendation concerning reciprocity of treatment of foreign workers.

A Draft Convention concerning the employment of women before and after child-birth.

A Draft Convention concerning employment of women during the night.

A recommendation concerning the prevention of anthrax.

A recommendation concerning the protection of women and children against lead poisoning.

A recommendation concerning the establishment of Government Health Services.

A Draft Convention fixing the minimum age for admission of children to industrial employment.

A Draft Convention concerning the night work of young persons employed in industry.

A recommendation concerning the application of the Berne Convention of 1906, on the prohibition of the use of white phosphorus in the manufacture of matches.

#### MISCELLANEOUS RESOLUTIONS ADOPTED BY THE CONFERENCE.

Among the miscellaneous resolutions adopted by the Conference was one expressing the hope that the provisions of the draft convention adopted by the Conference might be followed in the legislation enacted by all industrial countries, and that the Governing Body of the International Labour Office should communicate the text of the draft convention to the Governments of all states which might not be Members of the International Labour Organization, and should also study all possible methods for inducing these states to embody the

provisions of the conventions in their domestic legislation.

#### RATIFICATION OF CONFERENCE PROCEEDINGS.

A discussion arose with regard to the steps which might be necessary to give effect to the decisions reached at the Conference in view of the fact that, the Treaty of Peace not having been ratified, the League of Nations and the International Labour Office had not, apparently, come formally into existence. The following Resolution was submitted on this subject, and was, after consideration, adopted: "Seeing that the Treaty of Peace has not been yet ratified, the Conference gives authority to the Governing Body to take such measures as may be necessary to render the Resolutions of the Conference effective. Therefore, when this Conference adjourns to-day, it adjourns leaving it at the discretion of the Governing Body to reconvene the present meeting or to declare it closed, as may be deemed advisable."

#### CREATION OF GOVERNING BODY.

The proceedings included action, in accordance with the provisions of Article 393 (7), for the creation of a Governing Body of the International Labour Office. The article requires that the Governing Body of the International Labour Office shall be constituted as follows: "twelve persons representing the Governments; six persons elected by the Delegates to the Conference representing the employers; six persons elected by the Delegates to the Conference representing the workers. Of the twelve persons representing the Governments eight shall be nominated by the Members which are of the chief industrial importance, and four shall be nominated by the Members selected for the purpose by the Government Delegates to the Conference, excluding the Delegates of the eight Members mentioned above. Any question as to which are the Members of the chief industrial im-

portance shall be decided by the Council of the League of Nations."

Communications from the International Organizing Committee to the Dominion Government had suggested tentatively the following as the eight chief commercial nations, viz., United States, Great Britain, France, Germany, Italy, Belgium, Japan, Switzerland and Spain. At the time the communication of the Organizing Committee was written, it was not clear if Germany would be regarded as qualified for membership in the Conference; on the other hand, the name of the United States was included in the expectation that that country would be qualified for such membership. In any event, the list was presented for the consideration of the other members of the International Labour Organization. The situation with respect to the United States and Germany respectively remained doubtful. The question of the members which would be qualified to rank as among the chief commercial countries received close and careful attention from the Dominion Government, and consideration showing apparent ground for the view that Canada could advance substantial claims to rank within the list of eight chief commercial countries, a statistical comparison of Canada with other leading countries as to resources, industrial, strength and other points which would appear to be involved, was prepared and transmitted to the Organizing Committee. Later it appeared that protests were also received by the Organizing Committee from India, Sweden and the Argentine Republic. At the Washington Conference a committee was appointed to deal with the matter. The situation had been, in the meantime modified, on the one hand, by the admission of Germany by the Conference as a member of the International Labour Organization, and by the failure, on the other hand, of the United States to qualify for membership. By agreement the protests made against the original selection of the Organizing Committee were withdrawn, and after careful discussion, the following countries were named as those which would

appoint Government Representatives to the Governing Board, viz., Belgium, France, Germany, Italy, Japan, Switzerland, Spain, Argentina, Canada, Holland, and, pending the appointment of a Representative of the United States, Denmark. Representatives were elected also by the groups representing employers and workers.

#### FIRST MEETING OF GOVERNING BODY.

The first meeting of the Governing Body was held at Washington prior to the conclusion of the Conference, the membership of the Board being constituted as follows:—

#### *Government Representatives—*

FRANCE.—Mr. Arthur Fontaine, Director of the Labour Department, Councillor of State, Ministry of Labour.

GREAT BRITAIN.—Sir Malcolm Delevigne, K.C.B., Assistant under-Secretary of State, Home Office.

ITALY.—Baron Mayor des Planches, ex-Ambassador at Washington.

SPAIN.—Vicomte de Eza, M.P., ex-Minister of Public Works.

BELGIUM.—Professor M. E. Mahaim, Professor of International Law, University of Liège.

SWITZERLAND.—Dr. Hermann Ruenach, Director of the Federal Office of Social Insurance.

POLAND.—M. F. Sokal, Director of the Labour Department, Ministry of Labour and Social Welfare.

CANADA.—Hon. Gideon D. Robertson, Senator, Minister of Labour.

DENMARK.—Dr. Vedel, Chief of Division, Ministry of Interior.

Japan and the Argentine Republic were each represented by one of the Government delegates from these countries; Germany was not represented.

#### *Employers' Representatives—*

FRANCE.—M. Louis Guerin, Director of the Linen Industry of France.

GREAT BRITAIN.—Sir Allan Smith, K.B.E., M.P., President of the National Confederation of Employers' Organizations.

CZECHO-SLOVAKIA.—Mr. F. Hodacz, Secretary-General of the Federation of Czecho-Slovak Manufacturers.

BELGIUM.—M. Jules Carlier, President of the Central Industrial Committee for Belgium.

SWITZERLAND.—Dr. Dietrich Schindler, Director-General of the Oerlikon Factory.

ITALY.—Signor A. Pirelli, Director of Pirelli Bros., Milan.

Mr. Fontaine will be recalled as having been substitute member for France, of the International Labour Commission which originally framed the Labour section of the Peace Treaty, and was later Chairman of the Organizing Committee of the International Labour Conference. Mr. Thomas, was known to most as having been Minister of Munitions in the French Government during the later years of the war, and was understood to have been active also in the negotiations at Paris, with regard to the Labour section of the Treaty. Mr. Thomas was not a member of the Washington Conference.

#### SECOND MEETING OF GOVERNING BODY.

The second meeting of the Governing Body of the International Labour Office, was held in Paris, beginning on January 26. The Hon. G. D. Robertson, Minister of Labour, representing the Dominion Government on the Governing Body, was, on account of pressure of public business, unable to leave Canada, and the undersigned, as Deputy Minister of Labour, was appointed accordingly as substitute member of the Governing Body. Mr. P. M. Draper, of Ottawa, Secretary of the Trades and Labour Congress of Canada, and the Workers' Representative named for the Governing Body, (pending the appointment of a Representative by the United States), being also unable to attend, Mr. Tom Moore, President of the Trades and Labour Congress of Canada, was appointed as substitute member.

The Canadian Delegates to the Governing Body sailed from New York on the 17th instant on the "Kaiserin Augusta Victoria", a ship which had ordinarily made the transatlantic passage in six or seven days, but which was, unfortunately, on the present occasion seriously delayed by rough weather, so that the Canadian delegates did not arrive in Paris in time to take part in the proceedings of the Governing Body. Conversations, however, with Mr. Albert Thomas, the Provisional Director, and

#### Workers' Representatives—

FRANCE.—M. Léon Jouhaux, Secretary-General of the Confédération Générale du Travail.

GREAT BRITAIN.—Mr. G. H. Stuart-Bunning, ex-Chairman of the Parliamentary Committee, Trades Union Congress.

NETHERLANDS.—Mr. J. Oudegeest, M.P., President of the National Association of Labour Unions.

SWEDEN.—M. A. Herman Lindquist, President of the Second Chamber of the Riksdag, President of the Trade Unions' Association.

CANADA.—Mr. P. M. Draper, Secretary-Treasurer, Trades and Labour Congress of Canada, and President Ottawa Typographical Union.

GERMANY.—Herr K. Legien, Secretary-General of the General Commission of Trade Unions.

(Mr. Legien was not, of course, present.)

Some discussion arose with respect to the matter of the organization of the Governing Body, and after discussion Mr. Arthur Fontaine, of France, was elected Permanent Chairman, to hold office, that is, under Article 7, for three years. M. Albert Thomas, of France, was appointed Director-General, it being understood, however, that the appointment was of a provisional character only.

other officers of the International Labour Office, informed them fully on the subject.

Mr. Arthur Fontaine, Chairman of the Governing Body, presided over its deliberations, and there were also present throughout the proceedings Mr. Albert Thomas, Provisional Director, and Mr. H. B. Butler, Secretary-General of the Washington Conference, also various officers of the International Labour Office, interpreters, etc.

*Ratification of Proceedings at Washington.*—A memorandum was submitted by the Director with reference to steps to be taken to give effect to the decisions of the Washington Conference. The Director cited the Resolution passed by the Conference on this subject at its meeting on November 29. He remarked that the question had been brought to the attention of the legal advisers, not only of the League of Nations, but also of the French Foreign Office, with a view to having its proceedings validated. "The Washington Conference," remarked the Director, "was convened by virtue of Article 424 of the Treaty of Peace. Its date, October 1919, was fixed by the same Article. The place of meeting, its agenda and the position of the Organizing Committee were laid down in the Annex to Section I of Part XIII of the Peace Treaty. These provisions, in common with all the other stipulations of the Treaty, were validated, and took effect by virtue of the fact of the deposit of the ratifications." Some discussion followed the statement of the Director, and finally the question of declaring the Washington Conference closed was put to the vote and carried unanimously.

*Appointment of Director.*—When this subject came up for consideration, Mr. A. Thomas, who, it will be remembered, had been appointed provisionally at the meeting of the Governing Body on November 29 at Washington, withdrew from the room. A brief discussion occurred of a nature complimentary to Mr. Thomas. The question of the appointment of a Director was then put to the vote, and the appointment of Mr.

Thomas was unanimously approved. Mr. Thomas was then recalled and was congratulated by the Chairman on his appointment.

*Organization of the International Labour Office.*—A memorandum had been submitted by the Director with regard to this subject, and Mr. Thomas, in a brief statement to the Commission, outlined the proposition which had been therein set forth in detail. He proposed the formation of three departments of action which would deal with (a) the work of preparation for Conferences and pertaining to the conference during sessions, and subsequently following up the work of a Conference; (b) issuance of a bulletin, and the collection and distribution of information; (c) propaganda and liaison with kindred associations.

To secure that these three sections should have the assistance of all necessary expert knowledge, the Director proposed also the creation of technical branches. Mr. Thomas explained the considerations by which he had been guided. In accordance with the resolutions of the Washington Conference, he had conceived the Labour Office not as a purely administrative machine, but as an organization capable of carrying out as rapidly as possible the tasks entrusted to it under the Peace Treaty. The Director pointed out that the same considerations would apply in the progressive development of the office.

A somewhat extended discussion followed, in the course of which a motion was submitted for the appointment of a Deputy Director who "under the orders of the Director will assist him in carrying on the work of the office, will see that his directions are duly carried out by the departments and sections, and will, to that end, supervise generally the work of the staff." Ultimately it was decided to leave the question of organization and finance to be dealt with by two committees, and committees were accordingly appointed.

*Date, Place and Programme of Seamen's Conference.*—It will be recalled that the draft convention approved by

the Washington Conference with regard to the application of an eight-hour day and forty-eight-hour week to industrial undertakings, contained a provision in Article (1), paragraph (d), to the following effect: "The provisions relative to transport by sea and on inland waterways shall be determined by a special Conference dealing with employment at sea and on inland waterways." Two documents on this subject had been distributed to members of the Governing Body, one of these being a summary of Resolutions adopted by the Seamen's Trade Union Conference, held at Antwerp a few days before the present meeting of the Governing Body; the second document discussed in some detail the general situation as to seamen's work and possible legislation. After discussion, June 15 was adopted as the date of the projected Seamen's Conference. With regard to the place of meeting the cities chiefly discussed were Antwerp and Geneva; ultimately Genoa was adopted.

*Agenda of Seamen's Conference.*—The question of the agenda of the Seamen's Conference was then taken up, and after an active discussion, the following agenda was adopted:—

1. Application to seamen of the Convention drafted at Washington, last November, limiting the hours of work in all industrial undertakings, including transport by sea and, under conditions to be determined, transport by inland waterways, to eight hours in the day and forty-eight in the week.

Consequential effects as regards manning and the regulations relating to accommodation and health on board ship.

2. Supervision of articles of agreement. Provision of facilities for finding employment for seamen. Application to seamen of the Convention and Recommendations adopted at Washington in November last in regard to unemployment and unemployment insurance.

3. Application to seamen of the Convention adopted at Washington prohibiting the employment of children under fourteen years of age.

4. Consideration of the possibility of drawing up an International Seamen's Code.

*Date, Place and Agenda of the Next General Conference.*—The question of date, place and agenda of the next General Conference was next considered.

The Director explained that the legal advisers of the League of Nations were of the view that the Seamen's Conference would count as an ordinary Conference, and would, therefore, fulfil the obligation of holding a Conference during 1920. It was finally decided to hold the next General Conference in the Spring of 1921.

*Report of Budget Committee.*—The Budget Committee pointed out that until the organization of the International Labour Office, a matter which was now before another committee, had been reported upon, it was impossible to draw up detailed estimates for the fiscal period 1920-21. Details, therefore, were submitted only for the half year. The committee expressed itself as strongly of the view that no sinecure posts should be created, but urged that the office should have as its object the fulfilment, in the most direct and rapid manner, of the tasks which had been confided to it. The committee expressed itself favourable to the appointment of a Deputy Director. After consideration of the report, an estimate of £150,000, beginning April 1, 1920 and closing March 31, 1921, was unanimously approved. It had been pointed out that the expenses for the period preceding April 1, 1920, were met by funds advanced by the League of Nations.

*Proposed Commission to Soviet Russia.*—The following resolution was submitted: "That a Commission should be appointed including representatives of trade unions and employers to study the industrial conditions and the situation of the working classes in certain eastern European countries, and, in particular, Soviet Russia."

Considerable discussion followed, and it was finally decided that definite action on the subject should be deferred until the next meeting of the Governing Body, with instructions to the Director, in the meantime, to inquire into and report upon the possibilities and means of carrying out the proposed inquiry.

*Agenda for 1921 Conference.*—Consideration of the agenda for the 1921

Conference was deferred until the next meeting of the Governing Body.

*Governing Body to meet March 22.*—The next meeting of the Governing Body was fixed to be held on March 22, in London, or in Geneva if, in the meantime, officers of the International Labour Organization had been moved to Geneva.

### THIRD MEETING OF GOVERNING BODY.

The Governing Body convened in London on Monday, March 22, meeting in the Library of the House of Lords, which had been placed at its disposition by the courtesy of the British Government. Mr. Arthur Fontaine, President, occupied the chair. Mr. Thomas, the Director, and Mr. H. B. Butler, who had now become deputy-Director, were also present.

The first business taken up was that of receiving the report of the Director. The Director outlined, in some detail, his view as to the relations of the International Labour Office with the League of Nations as resulting from a number of interviews which he had had with Sir Eric Drummond, Secretary-General of the League of Nations. As to finance, the Labour Office would submit its budget, as approved by the Governing Body, to the League of Nations, and its estimate would be included in the general budget presented by the League of Nations to the various governments of the world. A somewhat difficult matter, the Director pointed out, was that of translation. The translation service would be common to both the League of Nations and the Labour Office but the translators doing work for the Labour Office would need a special knowledge of the matters pertaining to labour questions, and should be informed as to the methods of the Labour Office; while the translation service would be thus in a measure common, a number of the translators would be under the authority of the Director of the Labour Office. There was, at the present time, he remarked, considerable difficulty

in finding an adequate supply of qualified officers.

With regard to the question of a library, it was specially desirable that a dual service should be, so far as possible, avoided, but it was none the less necessary that a special section of the library, devoted to social science and questions pertaining to workmen, should be placed under the direction of a librarian who would be attached to the Labour Office, and that the sections of the library concerned with labour matters should be convenient of access to the Labour Office officials who would be continually in touch with the matters which the library specially concerned.

With regard to the question of industrial hygiene, the Director remarked that proceedings at the Washington Conference had, on the one hand, seemed to look to action on this subject on the part of the Labour Office, while on the other hand, the League of Nations had created a section of international hygiene.

A discussion followed which dealt with the general question of the measure of autonomy possessed by the International Labour Office, and whether or not, the Labour Office was in any way subordinate to the League of Nations. No formal conclusion was expressed on the subject, but the Chairman, at the close of the debate, remarked that the discussion which had taken place would prove of considerable service to the Director in his contact on this point with the officers of the League of Nations.

*International Office Headquarters at Geneva.*—The Director referred to a question which had arisen with regard to securing an option for rent or purchase of premises at Geneva which would serve as headquarters for the International Labour Office. It was explained that a plebiscite was to be taken in Switzerland on Sunday, May 16, to approve or disapprove the action of the Swiss Government joining the League of Nations, thus becoming a member also of the International Labour Office. The option proposed would cost 12,500

francs, and if the plebiscite should chance to be unfavourable, there was danger of a loss on the option. The annual rental of the building would be 70,000 francs, and the purchase price 1,000,000 francs. The subject was somewhat actively discussed, and the question of taking the option was left to the discretion of the Director. (It may be noted that the plebiscite on May 16, resulted in the approval of the action of the Swiss Government in joining the League of Nations).

*Maritime Commission Appointed.*—The Director drew attention to the question of the appointment of a Maritime Commission in connection with the International Labour Office whose functions it would be to study maritime questions. The Director questioned whether action would be better taken at the present time or at the Seamen's Conference at Genoa. Considerable discussion followed, and it was finally decided that there should be established a Commission of twelve members, five to represent owners and five to represent workmen, the members to be named by the Conference at Genoa, and two members to be chosen by the Governing Body; this Commission to be associated with the technical maritime section of the Labour Office, and to be consulted on questions relating to maritime work, the Commission to meet at the call of the Chairman of the Governing Body, who also would preside over its deliberations.

This resolution was, after debate, adopted.

*Organization of the Labour Office.*—A report was presented by the committee which had been appointed at the Paris meeting to deal with this subject. The committee reported that a careful examination had been made of the memorandum which had been prepared by the Director with respect to organization, and had approved of the general principles underlying the procedure there suggested. The report of the committee was, after an active discussion, adopted.

*Procedure.*—A report was presented also by the committee on procedure, and after a somewhat active debate, was accepted.

*The Russian Soviet Inquiry.*—The resolution held over from the Paris meeting of the Governing Body with reference to the appointment of a Commission to investigate conditions in countries of Eastern Europe, and particularly in Soviet Russia, received consideration. The Director reported that the question of the appointment of such a Commission had been, subsequently to the January meeting of the Board, taken up with the officials of the League of Nations, and the latter body had accepted the view that reliable information on such matters would be of the highest value and had suggested that it might be an advantage if the Commission were appointed by the League of Nations. After discussions between the officials of the League of Nations and those of the International Labour Office, the Council of the League of Nations had decided to appoint a Commission to investigate the economic conditions in Soviet Russia, provided the consent of the Soviet government was received, and had invited the International Labour Office to name two persons, one an employer and one a workman, for appointment to the Commission.

After an active debate it was decided to accept the suggestion of the Council of the League of Nations and to name, as requested, two persons, one representing employers and one representing workmen, for membership on the Commission to be appointed by the League of Nations, the persons in question being selected respectively by the groups affected. The Governing Body deemed it desirable, however, to proceed with the appointment of a Commission which would make a special inquiry into industrial and social conditions, thus covering matters which would, it was thought, fall outside the scope of the Commission appointed by the Council of the League of Nations, and a Commission was accordingly established,

composed of ten members, four representing workmen and two representing governments. The Governing Body decided that there might also be appointed one adviser for each member appointed by employers and workmen, and two advisers for each of the two members to be named by governments. The employing and workmen groups named their members and advisers before the Body dispersed. It is understood that the workmen members of the Governing Body asked that Mr. Tom Moore or Mr. P. M. Draper, would accept membership on the Commission, and that Mr. Moore was unable to accept this proposition either for Mr. Draper or himself; Mr. Arthur Martel, of Montreal, Vice-President of the Trades and Labour Congress of Canada, and representing the United Brotherhood of Carpenters and Joiners, was, however, named as one of the advisers. France and Great Britain were selected by the Government members of the Board as the two countries which should be requested to send Government delegates, and the Governments of Poland, Czecho-Slovakia, Italy and Switzerland will be requested to name advisers to these delegates.

*Appointment of a Migration Commission.*—A further matter of importance related to the resolution adopted at the International Labour Conference at Washington in November last, requiring the Governing Body to set up an International Commission to study the question of regulating emigration and immigration, and protecting the interests of wage earners not residing in their own country. The Conference had also decided that the representation of European States on this Commission should be limited to one-half of the total number of the members of the Commission. The Governing Body, in dealing with the matter, decided that the Commission in question should be composed of eighteen members and an independent chairman. In determining the composition of the Commission the following points were taken into consideration: first, that of equal representation of Governments and em-

ployers and workers; secondly, that of equal representation of European and non-European countries; and thirdly, that of the respective importance of different countries from the point of view of emigration and immigration. The Governing Body decided to invite the British Government to nominate an independent chairman of the Commission, and allotted to eighteen other countries, seats for representatives of Governments, employers and workers in accordance with the following list:

Governments.	Employers.	Workers.
Brazil	South Africa	Germany
Canada	Argentine	Australia
China	Spain	United States
France	Greece	Poland
Japan	Czecho-Slovakia	Italy
India	Switzerland	Sweden

Canada, it will be observed, falls within the list of countries which will appoint a Government representative and a substitute.

(Mr. Obed Smith, Dominion Immigration Commissioner at London, Eng., has been since appointed as the Canadian representative on the Commission).

The discussion on the subject indicated a general view that the Commission in question would not be brought formally together until shortly before the meeting of the General Conference, which is expected to be held early in 1921. It was understood that the Labour Office would, in the meantime, issue an extensive questionnaire and otherwise gather information pertaining generally to the subject of immigration, which would serve in the nature of a preliminary report on the subject and would be of value for the Commission as a basis for its work.

*Agenda of 1921 Conference.*—The agenda of the 1921 Conference was then taken up. The Chairman suggested consideration of the memorandum by the Director with regard to the inclusion of the agricultural industry within the conventions and recommendations of the Washington Conference; the consideration for the agenda of the 1921 Conference might be with advantage deferred until the next meeting of

the Governing Body. An active discussion followed, and it was decided to include the following items in the agenda of the 1921 Conference, namely:

#### Agricultural Questions.

- (a) adaptation to agricultural workers of the Resolutions of the Washington Conference.
  - 1. Fixing hours of work.
  - 2. Measures for the prevention and reduction of unemployment.
  - 3. Protection of women and children.
- (b) technical agricultural training.
- (c) hygiene.
- (d) guarantee of the rights to form associations and unions.
- (e) protection against accidents, sickness, incapacity and old age.

#### Industrial Diseases.

- (a) disinfection of wool infected with anthrax spores.
- (b) prohibition of the use of white lead in painting.

*Governing Body to meet June 8 at Genoa.*—It was decided to hold the next meeting of the Governing Body at Genoa on June 8, or one week earlier than the opening of the Seamen's Conference at the same place.

The proceedings of the London meeting of the Governing Body were closed on the afternoon of Thursday, March 25, and the Canadian delegates sailed from Liverpool for Canada on the following Saturday, March 27, reaching St. John, N.B., on April 7.

#### QUESTION OF ACTION BY COMPETENT AUTHORITIES.

It may be added that on the ratification of the Treaty of Peace, the Secretary-General of the League of Nations, in accordance with the requirements of the Labour Convention, forwarded to the various governments concerned copies of the authentic text of the conventions and recommendations made at Washington, and a copy was in due course received by the Dominion Government.

The situation in Canada with respect to action by the competent authorities concerning the conventions and recommendations of the Washington Conference has been in the meantime a

matter of discussion between the Dominion Government Departments concerned with a view to determining precise lines of procedure and some aspects of the question of legislative competency, and there is at the time of writing ground for believing that a conclusion as to these several matters will be reached shortly.

#### SEAMEN'S CONVENTION.

With regard to the Seamen's Convention to be held at Genoa on June 15, it may be here stated that the Minister of Labour received in March a copy of the questionnaire sent out by the International Labour Office in accordance with the conclusions reached at the Paris meeting of the Governing Body. The contents of the questionnaire received prompt attention by the Department of Labour, and the information requested was forwarded as soon as possible. Steps were taken, in due course, for the appointment of the Canadian Delegation, and the following appointments were made:—

FOR THE DOMINION GOVERNMENT.—Mr. G. J. Desbarats, C.M.G., C.E., Deputy Minister of the Naval Service; Mr. Philippe Roy, Paris, Canadian Commissioner General in France.

FOR THE EMPLOYERS.—Mr. T. C. Robb, Manager, Shipping Federation of Canada.

FOR THE WORKMEN.—Mr. J. C. Gauthier, of the National Association of Masters, Mates and Pilots, and also of the International Seamen's Union of America.

Messrs. Robb and Gauthier were appointed under the conditions indicated in Article 389 (3) of the Labour Convention namely, in agreement with the industrial organizations "most representative of employers or workpeople."

I have the honour to be,  
Sir,

Your obedient servant,

F. A. ACLAND,  
Deputy Minister of Labour.

OTTAWA, May 15, 1920.

## REPORT OF NOVA SCOTIA COMMISSION ON WOMEN IN INDUSTRY

**B**Y an Act of the legislature of Nova Scotia in 1919, a commission was named to inquire into (a) the hours of labour, wages, and working conditions of women engaged in industrial occupations; (b) schemes providing mothers' pensions or allowances, and what scheme, if any, would be practicable in the province. The commissioners have recently issued a report dealing with the first subject of their reference. With regard to mothers' pensions the Commission decided to report on this part of their work at a later date, as some time would be required to obtain the necessary information.

Reference is made in the report to the labour sections of the Peace Treaty, in which are laid down the principles that wages must be adequate to maintain a reasonable standard of life; that the working day should be eight hours and the working week 48 hours; that men and women should receive equal remuneration for work of equal value; and that each state should provide for a system of inspection, in which women should take part, in order to insure the enforcement of laws and regulations for the protection of the employed. In support of a minimum wage law the findings of the Dominion Royal Commission on Industrial Relations, of 1919, are quoted as follows: "In several of the Provinces of Canada the absence of a minimum wage law, particularly for women and girls, was mentioned as a serious cause of dissatisfaction. In four Provinces—Manitoba, British Columbia, Saskatchewan and Quebec—there is such a law administered by a Minimum Wage Board, by which the minimum rate to be paid is fixed from time to time. We believe that such a law should be enacted in all the Provinces, and should cover not only women and girls, but unskilled labourers as well." A resolution of the National Industrial Conference which was held at Ottawa in September, 1919, is also quoted, in which the Provincial

Governments which had not adopted minimum wage laws for women and children were unanimously recommended to investigate the necessity of such laws and to enact such legislation, if found to be needed. Brief reference is made in the report to minimum wage laws in New Zealand and Australia, the pioneers in such labour legislation; in Great Britain, where the minimum wage boards established by the Trades Boards Act of 1909 were extended in 1918 to cover many new trades; and in the United States where in 36 states the hours and working conditions of women are regulated by law, while minimum wages are fixed in the states of Washington, Wisconsin, Arkansas, Colorado, California, Oregon, Massachusetts, Nebraska, Minnesota and Kansas. Finally, an outline is given of the progress made in Canada, as shown in the legislation enacted in the past two years in Manitoba, Saskatchewan, Quebec, Alberta, and British Columbia.

In the course of its inquiry the Nova Scotia Commission inspected the principal industries in the Province where women were employed, but they had no authority to investigate the working conditions of women employed in offices, shops, hotels, restaurants and telephone offices. The weekly earnings of 2,032 women in 49 industries were found to be distributed as follows:

\$ 5.00 and under	100
5.01 to \$6.00	107
6.01 to 7.00	172
7.01 to 8.00	213
8.01 to 9.00	248
9.01 to 10.00	316
10.01 to 11.00	215
11.01 to 12.00	163
12.01 to 14.00	186
14.01 to 16.00	152
16.01 to 18.00	71
18.01 to 22.00	60
22.01 to 25.00	20
Over \$25.00	8

A large proportion of female workers are thus shown to work for less than \$10 a week; a number of them, however, do not work full time. It was found that one cause of low wages was the large number of girls working in factories who lived at home supported by their parents, and who worked for wages that provided them with little more than spending money. "Many girls," declared the Commissioners, "who must support themselves, and a number of widows supporting children, are thus forced to accept less wages than are sufficient to properly maintain them." Most of the evidence showed that wages should not be lower than \$10 or \$12; one large employer stated that his rule was that a girl should be paid a wage equal to twice the amount of her board bill. The average working hours in the plants examined were 50.4 per week. The actual hours, however, ranged from as high as 60 hours to 44 hours, the latter being the working week in some printing offices and laundries; in three of the largest industries in the Province the week was 55 hours. Employers who were asked their opinion on the proposed legislation showed considerable opposition to a minimum wage, but were favourable to an 8-hour day law.

The general conclusions reached by the Commission were that a large num-

ber of women in the Province were not earning sufficient wages; that hours were frequently too long, especially where women have to stand, or where work is heavy or unhealthy; that working conditions could be improved, and should be subject to standard regulations; that the lack of medical inspection, especially in food factories, constitutes a public menace; that the Nova Scotia Factories Act was too limited in its scope and its provisions were too indefinite. The Commission unanimously recommended the passing of minimum wage legislation similar to that in force in Manitoba and Saskatchewan, providing for the appointment of a Board representative of women workers, the employers and the public; this Board to have power to determine: (a) the standard of minimum wages for women in industry, shops and offices, sufficient to maintain them; (b) standards of hours of labour; (c) standards of conditions essential to health and morals; (d) medical inspection of employees in food factories for the protection of public health. The Commission found it impossible to recommend a flat minimum wage for the whole province owing to the variation in local conditions and in current prices, but they suggested that the proposed Minimum Wage Board be vested with powers to fix suitable standards from time to time.

### LABOUR ORGANIZATION IN CANADA, 1919

**T**HE Ninth Annual Report on Labour Organization in Canada, containing statistics, etc., for the calendar year 1919, has been issued by the Department of Labour. The report deals with the advent of the One Big Union and also gives a review of the progress of the national Catholic unions in the province of Quebec. Notwithstanding these two forces, the international organizations have made a very substantial gain in their following, while the non-international bodies and independent units show losses. The figures given in the report show that trade union mem-

bership in the Dominion has reached the highest point recorded since the Department commenced the publication of these annual reports in 1911, the total reported membership for all classes of labour bodies in Canada at the close of the year 1919 being 378,047. There are in all 2,847 local branch unions in the Dominion, of which 2,309 are affiliates of international organizations, comprising 260,247 members, an increase over 1918 of 412 branches and 58,815 members; 325 local branches with 33,372 members are connected with what are termed non-international

bodies, these figures showing a loss of seven branches and of 4,556 members; 29 are independent units, a decrease of 16, and the reported membership was 1,249 less than that reported in 1918; the national Catholic unions number 83, comprising a membership of 35,000; the One Big Union reported 101 units with a membership of 41,150. These figures show a gain of 573 in local branches of all classes of labour bodies operating in Canada, and the remarkable increase in membership of 129,160. The membership of all classes of organized labour in Canada, as reported to the Department for the past nine years, has been as follows:

1911.....	133,132
1912.....	160,120
1913.....	175,799
1914.....	166,163
1915.....	143,343
1916.....	160,407
1917.....	204,630
1918.....	248,887
1919.....	378,047

#### Trade Union Membership by Provinces

Including all classes of trade unions operating in the Dominion, the standing by provinces is as follows: Ontario, 1,223; Quebec, 513; British Columbia, 263; Alberta, 231; Manitoba, 170; Saskatchewan, 158; Nova Scotia, 157; New Brunswick, 124; and Prince Edward Island, 8.

#### Trade Union Membership in Chief Cities

There are 32 cities in the Dominion having not less than 20 local branches of the international and non-international organizations and independent units, and between them they represent 57 per cent of the branches of these bodies and comprise 56 per cent of the local lodges of all classes of labour organizations in the Dominion, as well as containing approximately 49 per cent of the trade union membership of 378,047 as reported from the headquarters of the central organizations. Montreal leads the cities with 203 local branches of all classes of unions, 130 of which reported 45,289 members; Toronto

stands in second place with 159 branches the membership of 95 which reported being 24,822; Winnipeg occupies third position with 101 branches, 54 of which reported 10,741 members. Other cities in order of number of branches of all classes are: Vancouver, 85 branches, 60 reporting 29,596 members; Ottawa, 80 branches, 58 reporting 9,271 members; Hamilton, 75 branches, 57 reporting 5,253 members; Quebec, 70 branches, 47 reporting 7,388 members; London, 68 branches, 49 reporting 5,053 members; Edmonton, 62 branches, 40 reporting 3,760 members; Calgary, 58 branches, 40 reporting 4,718 members; St. John, 50 branches, 32 reporting 4,599 members; Victoria, 48 branches, 32 reporting 4,164 members; Halifax, 35 branches, 23 reporting 2,946 members; Regina, 35 branches, 25 reporting 1,163 members; Saskatoon, 35 branches, 24 reporting 1,457 members; St. Thomas, 34 branches, 27 reporting 2,946 members, Moose Jaw, 34 branches, 26 reporting 3,251 members; Windsor, 33 branches, 25 reporting 1,987 members; Fort William, 32 branches, 25 reporting 1,368 members; Kingston, 31 branches, 15 reporting 978 members; Brantford, 29 branches, 24 reporting 1,404 members; St. Catharines, 28 branches, 19 reporting 858 members; Peterborough, 28 branches, 20 reporting 1,080 members; Sault Ste Marie, 27 branches, 17 reporting 1,592 members; Brandon, 27 branches, 19 reporting 1,034 members; Stratford, 25 branches, 20 reporting 1,991 members; Niagara Falls, 23 branches, 17 reporting 3,012 members; Sarnia, 23 branches, 16 reporting 757 members; Moncton, 22 branches, 17 reporting 2,937 members; North Bay, 21 branches, 16 reporting 1,448 members; Kitchener, 21 branches, 12 reporting 646 members; Welland, 20 branches, 12 reporting 459 members.

#### Benefits Paid by Central Labour Organizations

Nearly all of the international labour organizations operating in Canada provide for the payment of benefits to members on a varying scale. The report

contains a table showing the reported disbursements made for this purpose in Canada, the United States and elsewhere, the expenditure for 1919 totalling \$15,550,052, a decrease of \$1,252,040 as compared with the payments made in 1918. The amount expended for each class of benefit was as follows:

Death benefits.....	\$10,436,671
Unemployed and travelling benefits.....	298,902
Strike benefits.....	1,789,961
Sick and accident benefits..	1,828,218
Old age pensions and other benefits.....	1,196,300

Four of the non-international organizations reported having made payments for benefits, the total expenditure amounting to \$23,035, an increase of \$6,140 over the disbursements in 1918.

#### Benefits Paid by Local Branches

The report also contains a statement showing the amount paid in benefits for the year 1919 by local branch unions in Canada to their own members, the disbursements aggregating \$583,093, an increase of \$151,589 over 1918. The payments made on account of each class of benefit were:

Death benefits.....	\$185,784
Unemployed benefits.....	15,306
Strike benefits.....	198,438
Sick benefits.....	120,327
Other benefits.....	63,238

#### Other Features of the Report

The report follows closely along the lines of earlier reports on Labour Organization in Canada, the various phases of the plan or organization which has been developed being given due consideration.

Chapters dealing with the advent of the One Big Union and the national Catholic union movement in the province of Quebec are discussed, as are also the activities of the Industrial Workers of the World, and other important incidents in labour matters which have occurred during the year 1919.

The report serves as a directory of trade unions for the Dominion for 1920, containing as it does particulars not only of every known local trade union in Canada, (including branches of international, non-international, independent, national Catholic and One Big Union bodies), but also a list of all central organizing unions, together with the names and addresses of the chief executive officers.

## ANNUAL CONVENTION OF THE AMERICAN FEDERATION OF LABOUR

### Synopsis of the Proceedings of the Fortieth Annual Convention held in Montreal

**T**HE fortieth annual convention of the American Federation of Labour was held in the city of Montreal from June 7 to 19. (This was the second time that the federation had met outside of the United States, the former occasion being when the convention was held in Toronto in 1909.) The preliminary proceedings of the 1920 convention were in charge of Mr. John T. Foster, president of the Montreal Trades and Labour Council. Mayor Mederic Martin extended a welcome on behalf of the municipality, while the Hon. G. D. Rob-

ertson, Minister of Labour of Canada, and the Hon. Mr. A. David, Provincial Secretary of Quebec, welcomed the delegates on behalf of the Dominion Government and the Province of Quebec, respectively. Mr. A. Verville, M.P., member of the Administration Commission of Montreal, and Mr. Tom Moore, president of the Trades and Labour Congress, also contributed to the opening proceedings. Mr. Samuel Gompers, president of the Federation, replied to the addresses of welcome. At a later session the Hon. N. W. Rowell, President

of the Privy Council of Canada, also delivered an address. (The speeches of the Hon. G. D. Robertson and the Hon. N. W. Rowell are published elsewhere in this report.)

The report of the credential committee, which was approved, recommended the seating of 571 delegates, including five fraternal delegates, among whom were two from the British Trades Union Congress and one from the Trades and Labour Congress of Canada. One of the former, Mr. J. Jones, M.P., was taken ill and was unable to attend the sessions. During the convention Mr. J. W. Ogden, of the British Congress, and Mr. J. A. McClelland, of the Canadian body, extended fraternal messages from their respective organizations.

The report of the executive council containing a review of its activities during the year was referred to the appropriate committees, as were also the various resolutions submitted.

#### **Report of Auditing Committee**

The first committee to report was the Auditing Committee, which submitted a statement of the receipts and expenditures for the general funds and several special accounts for the fiscal year. The receipts for the general fund, including balance on hand, amounted to \$1,121,746.11, and the expenses to \$917,765.65, leaving a balance of \$203,980.46. The account of the A. F. of L. building fund showed that the remaining indebtedness had been paid off and that there was a balance of \$1,215.18. The other special accounts were reported upon, showing the amounts received and their disposition. Attention was called to the increase in membership, which had passed the 4,000,000 mark, the number being 75,740 in excess of that figure.

#### **Labour's Demands to Republican Convention**

In accordance with the decision of the executive council, President Gompers and Vice-President Woll went to Chicago, accompanied by P. H. Mc-

Carthy, president of the California State Federation of Labour, after the close of the first day's proceedings to present to the platform committee of the Republican Party the demands of labour which the federation considered essential to its progress, interest and welfare. On their return on June 12th, the delegation presented a report outlining the attitude of the platform committee to the request of the federation, and closing with the statement that "The great underlying principles enunciated by labour for the protection of the rights and interests of the great masses of our people and for their advancement and well-being found no response in the Republican national platform." Similar proposals are to be made to the Democratic Party, the result of which is to be made known in the official records of the federation.

#### **Against Colour Line in Constitutions**

Among the resolutions referred to the Committee on Organization was one requesting that the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees strike out of its constitution the words "only white" members and admit the coloured workers to full membership in the brotherhood or else relinquish jurisdiction over freight handlers, express and station employees and allow them to establish an organization of their own. The committee recommended non-concurrence in the resolution on the ground that the federation could not interfere with the trade autonomy of affiliated national or international unions. The committee stated that the 1919 convention authorized the federation to issue charters to coloured workers if affiliated organizations refused to accept them. An amendment was offered to the recommendation of the committee requesting the Brotherhood of Railway Clerks to remove the words "only white" from its constitution. The amendment was adopted. A similar request was later adopted on recommendation of the committee in re-

gard to the constitution of the Brotherhood of Railway Carmen. The convention approved of a recommendation of the committee that negro organizers be appointed where necessary.

#### **Other Recommendations of Committee on Organization**

The committee on organization approved of the establishment of a trade union information bureau for immigrants, as well as concurring in requests for organization work in various parts of Canada and the United States. On an application for the establishment of an international union of city policemen the committee recommended that when the existing policemen's unions had a combined membership of 6,000 the federation should take action in the direction requested, provided a majority of the unions concerned approved of the formation of such an organization. This was adopted. The question of the establishment of a food producing and distributing department under the American Federation of Labour was referred to the executive council with instructions to hold a conference with the organizations interested, and if they favour the formation of such department to report a comprehensive plan at the next convention. Two resolutions making application for the formation of an international union of office workers were reported on by the committee on organization who recommended that, when the existing unions of office workers had a combined membership of 10,000, similar action to that recommended for a policemen's organization be taken. This recommendation was approved, as was also that referring to the executive council a resolution asking support to the Transportation Trades Council in New York in its fight for better conditions for the men employed on the piers and ships in New York harbour.

#### **Report of Committee on Labels**

The committee on labels, in addition to reporting favourably on two resolu-

tions seeking support for union label goods, submitted a report on the progress made by the Union Label Trades Department during the past year and referred to the value of the establishment of union label leagues as effective agencies for the dissemination of union label agitation. Attention was called to the existence of union labels which have not been endorsed by the American Federation of Labour, especially in the clothing trades, and it was stated that no clothing should be purchased which did not bear a union label that is recognized by the federation. The committee also approved of assistance to the 5,000 members of the cigarmakers' union in Tampa, Fla., who have been on strike since the 18th of April. In the discussion of the report, which was adopted, it was claimed that not sufficient attention was paid by members of unions in patronizing union label products, and greater support was urged. At one of the sessions Miss Ethel M. Smith, fraternal delegate from the National Women's Trade Union League, addressed the convention giving an account of the operations of the league and the progress which had been made since its inception in investigating conditions of the employment of women.

#### **The Shorter Workday**

The committee which dealt with the subject of the shorter workday, in reporting on the three resolutions which had been referred to it, stated that the question was one that must be handled by local unions, with the understanding that the policy of the American Federation of Labour was for the shorter workday first, last and all the time. The resolution dealt with the question of the hours of employment of United States Government postal employees. The committee reported in favour of the 44-hour week with a Saturday half-holiday for everybody, whether engaged in government or any other employment. The committee was of opinion that it might be necessary in some industries to establish a working week of less than

44 hours in order to prevent unemployment in those particular fields, and for that reason recommended that the executive council of the Federation be authorized to support any of its affiliated unions in efforts to shorten working hours when such organizations can show that it is necessary to do so in order to keep all of its members employed. The report was adopted as presented.

#### **Report of Committee on Boycotts**

The committee on boycotts recommended concurrence in a resolution pledging support to the coastwise 'long-shoremen on the Atlantic and the gulf coast in their request for recognition and adjustment of demands and against the open shop. The recommendation was adopted. A dispute between a number of trade unions and a firm in Baltimore was referred to the executive council to investigate, which body also had referred to it for adjustment the complaint of the metal polishers against two bicycle manufacturing firms in Chicago. A resolution sought to declare as unfair to organized labour any persons chosen at the Republican convention for any public office who were guests at hotels, clubs or restaurants against which the Chicago culinary workers were on strike. The convention did not approve of the resolution, but support was pledged to the hotel employees in their fight against the Chicago Hotel Keepers' Association. It was decided to refer to the executive council the matter of the attitude towards organized labour of the Winchester Repeating Arms Company.

#### **Report of Committee on Executive Council's Report**

In reporting on the work of the executive council the committee referred to the magnitude of the task imposed upon the members of the executive during the past year, and in addition to dealing with the report of this body reported on several resolutions which had been referred to the committee. On recom-

mendation of the committee a resolution in reference to the textile workers in Willimantic having members of other crafts in their ranks was referred to the executive council. A request for an international union of building service employees was treated similarly. The committee approved of a resolution opposing discrimination against the negro as well as approving of (1) absolute exclusion of Japanese and other Asiatics, (2) employment of American citizens only in the operating and mechanical departments of the Panama Canal, (3) the holding of a conference of representatives of the coopers and 'long-shoremen's organizations in reference to a jurisdictional claim. Similar action was recommended in regard to a dispute between the plumbers and machinists. The committee concurred in a resolution asking that efforts be made to secure protection for 'longshoremen under the compensation laws of the United States, and also recommended the adoption of a resolution disapproving of assistance being rendered by affiliated unions to any secessionist movement in the ranks of organized labour. Under the caption of "Kansas Court of Industrial Relations," the committee dealt with the reference to this subject in the executive council's report and also with four resolutions on the same matter. The committee approved of the attitude of the executive council in condemning the law enacted in Kansas in regard to labour disputes, approved of the four resolutions submitted in opposition to the statute in question and referred the resolutions to the executive council with instructions to co-operate with organized labour bodies to assist in securing repeal of this law. The committee approved of the report of the executive council on the following matters: (1) Labour, its Grievances, Protests and Demands, (2) Non-Partisan Political Campaign, (3) Presidential Industrial Conferences, (4) Constructive Demands, (5) Committee on Labour, (6) High Cost of Living, (7) Report of Labour Legislation, (8) Porto Rico, San Domingo, (9) Second Pan-American Financial Con-

gress, (10) History of the American Federation of Labour. The committee recommended that the subject of health insurance be referred to a special committee, report to be submitted to the next convention. In addition to reporting upon and making recommendations in reference to several jurisdictional disputes, the committee commended the executive council for its impartiality in dealing with war veterans' associations. The question of the continuation of the organization campaign in the iron and steel industry was referred to the executive council with instructions to call a conference of the presidents of the several organizations concerned. The executive council was commended for its activity in promoting harmonious relations between organized labour and organized farmers, and condemnation was expressed of the practice of strike-breakers or strike-guards under control of private individuals or agencies being clothed in the uniform of the United States army or navy.

#### **Report of Committee on Resolutions**

As with other committees, certain portions of the executive council's report were referred to the committee on resolutions. Approval was expressed of the executive council's opposition to the Cummins-Esch law, and the council was instructed to continue its earnest efforts to have the labour sections of the law repealed. The committee also approved of the council's efforts in opposing compulsory military training and compulsory arbitration and urged continued endeavour in this direction. Other matters reported upon by the executive council, and in which the committee concurred in the action taken, included (1) Soldiers' Relief, (2) War Risk Insurance, (3) Postal Wage Regulation, (4) Rehabilitation of Cripples, (5) Seamen, (6) Anti-Trust Legislation, (7) Railroad Training Act, (8) Newspaper Mailing Privileges, (9) Retirement. The executive council reported on the position taken in regard to the application of the Lever Act to the United

Mine Workers in their demand for increased wages, and their action was endorsed, as was also the council's depreciation of extremist propaganda and movements. Moral support was pledged to the Boston policemen's union in its endeavour to secure a satisfactory settlement of the strike which occurred in September, 1919. Referring to the subject of Political Prisoners, and three resolutions which had been introduced in reference thereto, the committee approved of the one of them declaring that further prosecution and imprisonment in the United States of political offenders is contrary to the traditions of freedom to which the United States is committed, and recommended that efforts be made to have them released. Concerning the Mooney case, the executive was instructed to continue its efforts to secure a pardon for the condemned man.

#### **Government Ownership of Railroads**

The following resolution, providing for government ownership of the United States railroads, was referred to the Committee on Resolutions:

"Whereas, All standard recognized railroad labour organizations have been and are now doing everything possible to educate the American people to the seriousness of the railroad situation, and the necessity for adopting some other means for operating the country's transportation systems in order to provide more adequate and cheaper transportation and to eliminate the sinister influence of railroad corporations from our national life; and

"Whereas, The railroad question is an industrial question, it is also a social question, and it is far more than a question of dividends to stockholders, or the wages of employees, it is a question that involves every industrial activity of the nation; and

"Whereas, We believe that the continued operation of the railroads under the provision of the Transportation Act of 1920 neglects all these questions and makes their solution impossible, and we believe further that the provisions of

this Act providing for a subsidy and the utilization of public funds by private individuals is a betrayal of the public interest and is subversive of the traditions of our country; and

"Whereas, The above mentioned recognized railroad labour organizations have, after careful deliberation and by instructions of their respective memberships, adopted and are advocating a plan providing for Government ownership and democratic operation of the railroad properties; therefore, be it

"Resolved, That the Fortieth Annual Convention of the American Federation of Labour go on record as indorsing the movement to bring about a return of the systems of transportation to Government control and democratic operation; and be it further

"Resolved, That the Executive Council be and are hereby instructed to use every effort to have the Transportation Act of 1920 repealed and legislation enacted providing for Government ownership and democratic operation of the railroad systems and necessary inland waterways."

When the resolution was reported a majority of the committee recommended the changing of the word "ownership" in the last resolve to "control." A minority report was presented recommending the substitution of the word "ownership" in place of "control" in the two resolves. The most protracted debate of the convention took place on this question, which was decided by a roll call vote, the minority report in favour of government ownership of the railroads being adopted by 29,159 votes to 8,349. At a previous session of the convention, on invitation, Mr. Glenn E. Plumb, author of what is commonly known as the Plumb plan of railroad operation and control, delivered an address outlining the details of the proposal.

### The Irish Question

Three resolutions on the Irish question were referred to the committee on resolutions. The committee after hearing

those interested in the resolutions submitted the following substitute, which was adopted without discussion:

"Whereas, The American Federation of Labour has approved the efforts of the Irish people to establish an adequate form of self-government, and in the exercise of their right to select their own form of government have, by vote of an overwhelming majority of the Irish people, established the Irish Republic; and

"Whereas, The English Government is now seeking to destroy through military forces the republican form of government already established by the Irish people; and

"Whereas, The House of Representatives, the Senate of the United States, the British Trades Union Congress, the Labour Movement of Australia, the American Federation of Labour, as well as the liberty-loving people of the world, have urged the English Government to fully recognize the rights of the Irish people to govern themselves; therefore, be it

"Resolved, That the American Federation of Labour, in convention assembled, reaffirms its recognition of the Irish Republic, and respectfully request that the military forces of occupation in Ireland be withdrawn from that country, and that the Irish people be accorded the right of self-determination, the same as all other nations recently given their complete freedom as enunciated in the declarations of the President of the United States, comprising the fourteen points, all of which were solemnly agreed to by the British Government and its Allies in the recent World War, and that we tender our aid to the people of Ireland in their efforts for freedom to the end that Ireland be permitted to take its place among the free nations of the world; and, be it further

"Resolved, That we, the American Federation of Labour, in convention assembled, appeal to the workers of England, Scotland and Wales, and ask that they exert their powerful influence to the end that their government officials, at

present in power by the votes of the people of England, Scotland and Wales, immediately withdraw the army of occupation from Ireland, and permit the Irish people to peacefully pursue their lives under the form of government which they have established through laws made by themselves and executed by their duly elected officials."

A cablegram was received from the National Executive of the Irish Trade Union Congress sending greetings to the workers of America, and requesting that efforts be made to the end that the principle for which America claimed to have entered the war be made applicable to Ireland and that the power of American labour be used to secure the release of their colleague, James Larkin.

#### **Refuse Support to Russia**

Three resolutions asking for the lifting of the blockade against Russia, the opening of commercial relations by the United States and the withdrawal of all foreign troops from that country, were reported upon by the committee on Resolutions, who offered the following substitute for the consideration of the convention:

"Resolved, That the American Federation of Labour is not justified in taking any action which could be construed as an assistance to, or approval of, the Soviet government of Russia as long as that government is based upon authority which has not been vested in it by a popular representative national assemblage of the Russian people; or so long as it endeavours to create revolutions in the well-established, civilized nations of the world; or so long as it advocates and applies the militarization of labour and prevents the organizing and functioning of trade unions and the maintenance of a free press and free public assemblage."

An amendment was moved as follows:

"That this convention urge upon the United States Government a cessation of its activities in upholding the block-

ade against Russia, and that it recognize and uphold the right of reciprocal trade with all peoples and countries with whom the nation is at peace; that the convention protest against the supplying of ammunition and other war supplies to nations or elements making war on Russia, and that Russia be left unhindered to work out its own problems."

After a lengthy debate the amendment was defeated and the recommendation of the committee adopted by a large majority.

#### **Want Re-establishment of Free Speech**

The convention went on record in favour of every possible effort being made to re-establish the right of free speech, free press and free assembly where at present denied, and to aid those trying to prevent an invasion where these rights are threatened. A resolution was also adopted asking for a congressional investigation into the alleged suppression of free speech and free assembly in the state of Pennsylvania.

#### **Other Resolutions Adopted**

In addition to the resolutions referred to above the committee on Resolutions reported favourably on the following:

In favour of a congressional investigation into the conditions of the coal miners in West Virginia.

In favour of installation of fire prevention devices in public buildings.

In favour of support in organizing the telephone industry.

In favour of reclassification of the United States civil service employees.

In favour of the formation of co-operative or people's banks in the United States.

In favour of the employment of scientific experts in industry and production by the American Federation of Labour.

In favour of the United States Congress providing liberally for the study of technical research in all branches of science touching the welfare of the people.

In favour of the establishment of a federal employment service.

In favour of abolition of unreasonable speed tests in the United States postal service.

In favour of other states being petitioned to adopt similar compensation laws to that of Ohio.

In favour of supporting the strike of fur workers in New York.

In favour of urging international organizations to have their local branches affiliate with trade and labour councils and state federations.

Approving of minimum and maximum representation in trades councils of two and ten, respectively.

In favour of a more general observance of labour's memorial day and labour Sunday on the days named for such observance.

In favour of bringing the question of government employment to the attention of party leaders and presidential candidates with the view of securing a definite declaration regarding the rights and privileges of government employees.

#### Internal Affairs

The convention concurred in a proposal that a copy of the report of the executive council be mailed to each accredited delegate ten days previous to the opening of the annual conventions. In reporting on the several matters referred to it, the committee on law recommended that the dues of members of directly affiliated local unions shall not be less than seventy-five cents per month and that the per capita tax of such local unions shall be twenty-five cents per month; that the federation shall receive twenty-five per cent of each initiation, but in no case shall the amount to the federation be less than

\$1.00. The committee also recommended that twelve and a half cents of the per capita of directly affiliated local unions be set aside as a strike fund for such bodies, and that the strike benefits be increased from \$6 to \$7 per week to be paid for a period of not more than six weeks unless authorized by the executive council, no benefits to be paid for the first two weeks. These recommendations were adopted. A resolution was submitted asking that the salary of the president be increased to \$12,000 per annum and that of the secretary to \$9,500. The committee reported favourably on the proposal. An amendment was introduced to make the salary of the secretary \$10,000. President Gompers spoke against the proposed increase for the president and moved that the report of the committee be laid on the table. This motion, however, was lost, and the increases were adopted. The salaries of organizers were, on recommendation of the committee, increased from \$8 to \$10 per day, not including Sunday, and the hotel allowance raised from \$6 to \$8 per day. A resolution asking for an increase of four vice-presidents on the executive council was approved by the committee, and on a viva voce vote was adopted. Subsequently a roll call was taken and the recommendation of the committee was defeated.

#### Report of Committee on Adjustment

A number of resolutions dealing with matters of jurisdiction over certain classes of workers were referred to the committee on Adjustment, which in most instances recommended their reference to the executive council for the purpose of arranging conferences with the disputants with the view of having amicable settlements effected.

#### Report of Committee on Education

This committee in reporting under the caption "Child Labour," recommended among other things in favour of more effective legislation in regard

to the employment of children; and approved of a federal measure designed to assist the several states in the promotion and support of education. The committee also endorsed retirement funds for teachers and supported a movement to secure the franchise for residents in the District of Columbia and the Canal Zone as well as commending the work of the Federal Board for Vocational Training of soldiers. Concurrence was given to the establishment of a women's bureau in the Department of Labour and to the principle of collective bargaining. Referring to the Senatorial investigation of the schools of the District of Columbia, the committee reported that nothing derogatory to the teachers' union was established. Attention was called to attacks which had been made on the union movement among teachers, and the committee asked for protection of teachers against discrimination on account of their affiliation with organized labour. Among other matters reported by the committee were (1) Preparation of text books, (2) Co-operative Plan and Co-operative Stores, (3) the Under-paid Professions, (4) National Labour University, (5) Lecture Bureau, (6) Representation in Congress for the Canal Zone, (7) Vocational Education, (8) Legal Restrictions upon Educational Progress, (9) Labour Declaration on Education, (10) Re-endorsement of Educational Platform of the Federation. The question of establishment of a daily press was referred to the executive council, and the committee reported favourably on a resolution protesting against labour being misrepresented in moving picture productions. The committee approved of the purchase by trade unionists of government securities and reported favourably on a resolution in regard to the tenure of teachers, as well as endorsing a resolution asking for an investigation into the salmon packing industry. The report of the committee was adopted.

### International Labour Relations

The committee on International Labour Relations in presenting its report stated: "That the principle of self-determination applies industrially as well as politically in the affairs of human kind and of nations. While realizing our obligations to the peoples of every country in the world and anxiously desirous of fulfilling these obligations to the fullest, yet we cannot surrender our democracy and freedom to any foreign political rights involving self-government, country or combination of foreign countries. Neither can we nor should we surrender our rights to determine our own policy and to fix our nation's standards on the economic field of human endeavour and achievement."

Under the caption "Mexico," the committee agreed with the various declarations of the executive council, which among other things included opposition to "any exercise of force by the United States to satisfy the desires of those Americans whose sole interest in Mexico is the exploitation of its workers, its boundless wealth of oil and minerals." Sympathy was expressed with the Mexican people and the statement made that there was no misunderstanding between the working people of the United States and Mexico. The committee endorsed the action of the executive council in joining with other authorized forces in rendering relief to the starving peoples of devastated Europe. The work of the federation delegates to the Pan-American Federation of Labour was commended, as was also that of the fraternal delegate to the British Trades Union Congress. The committee approved of President Gompers' attitude in declining to participate in the proceedings of the International Labour conference held in Washington, D.C., in October, 1919, and expressed satisfaction at the advent of trade union organization in India. Concerning the Amsterdam Conference of the International Federation of Trade Unions the committee referred to the report which had been submitted by the delegates from the federation,

pointed out some of the fundamental facts which it contained, referred to the system of voting, and the financial obligations entailed as an affiliate, the per capita alone amounting to \$20,000 per annum. Attention was also called to the issuance of a circular by the bureau of the International Federation, over the protest of the president, which was in effect a demand for a general strike to achieve the overthrow of constituted government and the establishment of a socialist form of government. The committee recommended that continued affiliation with the International Federation of Trade Unions be referred to the executive council, suggesting certain conditions for guidance in the matter, and commended the delegates to the Amsterdam Conference for their conduct at the meeting. The action of the executive council at the Washington meeting of the International Federation held in October, 1919, was indorsed, whereat a demand was made that the per capita tax be reduced. The committee endorsed the executive council in its support of the Peace Treaty and the covenant of the League of Nations, and concurred in the recommendation of the executive that the ratification of the treaty be urged upon the Senate of the United States without any reservations which would tend to injure the effectiveness of the covenant. The committee further pointed out that the 1919 convention had approved of the Peace Treaty and that the federation could not recede from the position then taken without endorsing the policy of greed, hatred and brutal war as the rule for the settlement of relations between nations. After a lengthy debate the report of the committee was adopted practically unanimously.

#### **Committee on State Bodies**

The report of the Committee on State Organizations approved of a resolution seeking to secure the enactment of a law in the various states compelling publicity as to the actual cost of manufactured articles, and also supported a

protest against what are known as plant unions fostered by employing interests. While expressing appreciation at the temporary relief rendered to public employees by the granting of a bonus, the committee was opposed to the system, declaring in favour of increased wages rather than a bonus. The committee concurred in the efforts put forth by the executive council to secure legislation to prevent the manipulation of prices and approved of all State federations of labour rendering every assistance in securing an adequate federal convict labour law to eradicate the evils of convict labour.

#### **Address of the Hon. G. D. Robertson**

The following is the address of the Hon. G. D. Robertson, Minister of Labour, delivered at the opening proceedings of the federation:

Mr. Chairman, Mr. Gompers, Your Worship, Ladies and Gentlemen: About two and one-half years ago it was the pleasant privilege of the government and Parliament of Canada to do honour to the American Federation of Labour as represented by its respected president, in that both Houses of Parliament adjourned one day and gathered together the members of both Houses in one chamber, and there for an hour and a half listened very attentively and very earnestly to a splendid speech delivered from the Prime Minister's desk by your honoured president.

With that in mind, I hoped the Prime Minister of Canada would be here this morning to extend a welcome to the American Federation of Labour delegates, but I am sure you will appreciate that while Parliament is in session, especially as it is growing to a close, it is very difficult, if not impossible, for the Prime Minister to leave Ottawa at the present time. He has, however, asked myself to extend greetings to the convention in his behalf, and has sent you a message which, with your consent, I will proceed to read. The message is addressed to the reader, under date of June 5th, and is as follows:

Ottawa, Ont., June 5th, 1920.

Dear Senator Robertson:

To my great regret I find that my public duties will prevent me from being present to greet the members of the American Federation of Labour at Montreal on Monday next. I beg that you will, on behalf of the Government, convey to the president, officers and members of the Federation a warm and hearty welcome.

The holding of this great conference on our side of the boundary line emphasizes the close association of the two countries, not only in ideals, but in many and varied forms of national activity.

While still under the shadow of the world-wide conflict from which both countries have so recently emerged, and in which their sons fought valiantly side by side in a supreme common purpose, we may fittingly recall the unfaltering spirit of patriotism which, in both countries, animated the ranks of labour throughout the struggle. Without that spirit victory could not have crowned the cause which we united to maintain.

In these days of peace there is the like need, perhaps even a greater need, for the same spirit of unity and co-operation not only within each country but between the two nations. I pray that the deliberations of the conference may have a profound influence for the furtherance of this high purpose.

Yours faithfully,

R. L. BORDEN.

Hon. G. D. Robertson,  
Minister of Labour,  
Ottawa.

May I, Mr. Chairman, for a moment supplement the greeting and welcome that the Prime Minister sends to you by a few further remarks, not only as Minister of Labour and a member of the Federal Government, but it is particularly pleasant to me upon this occasion as a member of one of the organizations affiliated with this Federation, a member in good standing for something over twenty-five years and an officer of that organization for a considerable period to, as a trade unionist, welcome the American Federation of Labour to Canada.

I see before me this morning both the present and past presidents of the organization of which I had the pleasure and honour of being a member for years. Their faces recall to me many pleasant experiences as well as strenuous tasks we performed in years gone by. And therefore with those recollections in mind it is more than an ordinary pleasure to greet them and all trade unionists here assembled, coming together for the great common purpose of endeavouring to add to the measure of human happiness of the millions of people in North America.

The very name, "American Federation of Labour," is not fully understood by many of our people in Canada. The term "American people" brings to the minds of many of our people the great Republic to the south of us; and in the minds of many of our people outside the trade unions the American Federation of Labour is a United States organization. Your coming to Canada, your holding your convention here, is going to be a reminder to millions of people in this country that the American

Federation of Labour is a federation of labour men covering the continent and not the United States alone. It will remind of the fact that there are over 300,000 members of the trade unions affiliated with this great Federation who are residents of and citizens of this great Dominion. It will remind them of the fact that the cause of labour is universal; it will remind them of the fact that the determination of the labour men to obtain a fair share of the comforts of life and to receive justice at the hands of employers and of governments is also universal.

Many years ago, from humanitarian motives, the American Federation of Labour in convention and through the policies adopted by its executives, set for itself very high ideals. The Federation has for years been pursuing, consistently and persistently, with commendable honour, a course towards the goal which it had set for itself. The Federation has made wonderful progress and has merited and received the commendation and respect of millions of citizens in these two North American countries, as well as the wide world over. I am confident that the holding of this convention here at this time is going to be of great service to the advancement of proper, sane labour principles and policies in the Dominion of Canada as well as the United States.

There is a far better understanding and fuller knowledge of the purposes and policies of this great organization in this great country than in the past. Unfortunately, however, there are those whose interests seem to them to make it desirable to misrepresent—in some cases I believe wilfully misrepresent—the aims and purposes of this great Federation of Labour. There are some, and they are rapidly growing less, among the class of employers who will intimate to you, and to us, and to the public generally that the American Federation of Labour is an organization to advantage of American employers and capitalists and to the disadvantage of Canadian employers and industry. Nothing is further from the fact, as you well know; nothing is more desirable than that there should be an equal opportunity for both labour and capital in both countries on an equal footing, and there is nothing that tends more to stabilize and standardize conditions of employment in both countries than do the great international organizations that are affiliated with this Federation.

On the other hand, there are many wage earners who seem to feel that the policies pursued by international officials with this federation are not sufficiently progressive and drastic, and they are saying to the workman in Canada: "Don't join an international union, because you are sending your money out of Canada for someone else to use." That impression ought to be dispelled. These great international organizations that have been built up through years of experience and care have been and are one of the greatest assurances and guarantees of continued interna-

tional peace between these two countries that it is possible to establish.

I have not, as you will note, attempted to prepare a speech. I have come here for the purpose of extending an honest, sincere, glad welcome on behalf of the government of Canada, and as a trade unionist myself, so I shall not delay you any longer with any general remarks as I know you have much business to do and other gentlemen are here to extend greetings. But I do sincerely hope that the deliberations and discussions that shall take place here shall not only be useful and edifying to the delegates and the organizations they represent, but that this convention shall mark a new era in the advancement of the labour movement. I hope that there will be a better understanding and a fuller appreciation of the methods and policies of the organizations affiliated with this great Federation, and that when this convention shall have closed that the American Federation of Labour and all the many trade unions affiliated with it will hold a higher place in the respect and confidence of the people of Canada than they have ever before. I thank you.

#### Address of the Hon. N. W. Rowell

The address of the Hon. N. W. Rowell, president of the Privy Council, delivered at the morning session of June 14, was as follows:

It affords me very great pleasure that I accepted the invitation you so graciously extended to me to pay a visit to this meeting and representative gathering which voices the sentiments of the toilers of our two countries. We recall with great pleasure and satisfaction the visit you were good enough to pay to us, Mr. President, two years ago to the city of Ottawa. Members of the convention will be interested in knowing that it is not often the Parliament of Canada affords the privilege to one who is not a member of that Parliament to address its members in the House of Commons. On three occasions during the war that privilege was accorded: once to the distinguished representative of our gallant ally, Mr. Viviani, ex-President of France, who visited the United States and Canada during the war to convey the greetings of France to the nations on this side of the Atlantic; on another occasion to the Honourable Mr. Balfour, the representative to us of the Mother country, England, who visited the United States and Canada as High Commissioner of that country, to convey the greetings of Great Britain to the United States and Canada in the midst of the war; and the third distinguished representative who was accorded the privilege of addressing the House of Commons was your President, the man who spoke for the toilers of these two countries. I

may perhaps consider this a return visit for the honour and courtesy of that occasion.

On that occasion, Mr. President, you spoke to us of the resolution, the determination of the people of the United States, and particularly of the toilers of the United States, to stand true to the cause to which they had committed themselves, and to fight out the issue until the Prussian militarism was destroyed and liberty and democracy were again made secure for the world.

To-day we need not discuss the problems of the war. That is happily ended, and to-day I do not come to bring you a message in reference to war, but rather a message in reference to the days of peace.

Our two nations, the United States and Canada, have given to the world an example of the possibility of two nations living side by side and settling all their international differences and disputes by reason, rather than by the sword. For more than a hundred years our two peoples have lived side by side, and every difference that has divided us, every dispute that has arisen, has been adjusted by peaceful means to the great benefit of our two nations; and we believe that what is possible between our two countries should be possible between all the nations of the world.

I believe further, Mr. President, that no class in any land is more directly, more vitally interested in the peaceable settlement of international disputes than are the toilers in all our lands. I know the conditions in my own country, and I assume that what is true of Canada is true also of the United States and the other nations that took part in the war. Something over sixty per cent of all the men who enlisted in the Canadian forces—and you know we had an enrollment of something over 600,000 men, with our limited population in Canada—more than sixty per cent of those who enlisted were classed as manual labourers in their attestation papers. Mr. President, if our international differences are to be settled by the sword, the workers must do the bulk of the fighting and in the end they must bear the brunt of the burden. When we take the after consequences of war, the burdens of taxation that must be borne by the people, and take the after consequences of war as they are seen in Europe to-day—poverty, distress, famine, disease and death, who suffered most from those awful consequences following the war? The toilers, more than any other class in the community.

And so to-day, in coming to you with a message of peace and good-will and in the interests of international co-operation, I feel that I am coming to a body of men vitally interested in the important problems we are discussing. I believe gatherings such as this make an important contribution to international good-will.

You meet here, side by side, representatives of our two nations, to discuss subjects in

which we are both interested. I venture to think, as you talk over these matters one with another, that you will find that the lines of division are very small, very insignificant, compared with the great fundamental concurrence of thought which you hold in common. As a matter of fact, the great majority of our international misunderstandings, international differences, come from a lack of knowledge, a lack of appreciation of the viewpoint of the other party. The closer we can get together, the more frequently we meet together, the more constantly we exchange views one with the other, the more truly will we remove misunderstandings and come to know the viewpoint of the other, and thereby promote international co-operation and international peace.

As we in Canada and the United States have set the world an example during the past hundred years of how international disputes can be settled by reason rather than the sword, I believe, Mr. President, it should be the high privilege of our two countries, hand in hand, to help lead the world in the century that lies before us in the peaceable solution of all international disputes and problems. I can think of no higher ideal than any two nations could entertain than the one I have suggested to you.

Now I know, Mr. Chairman, there are differences of opinion about the League of Nations. I am not going to enter into a discussion of that matter here. I know there are differences as to what the Covenant of the League should contain, but I believe that I voice your sentiments, Mr. President, and the sentiments of the workers of both lands, and of the public-spirited citizens of both lands, when I say there should be some form of international agreement, some method of international co-operation, some means by which the enlightened conscience and judgment of mankind should be brought to bear upon all international disputes that arise, so that peace and justice may be maintained without a resort to the arbitrament of arms.

And so I do hope that we in Canada, speaking only for our own country, have accepted the League of Nations, and we have entered it; we have accepted the international labour organization; we have entered into it, and we intend to pursue the course upon which we have entered, because we believe it is not only in the national interest, but in the interest of the peace and progress of the United States.

What you do in the United States is a matter to settle yourselves, but I am sure that you will agree that the ideals we have maintained between us with such great benefit to the two nations should be extended to the other nations of the world.

Mr. President, may I say a word of tribute to you for the splendid work you did as chairman of the Labour Commission of the Peace Conference at Paris. I want to pay my tribute to the chairman and to the members of the Commission for the preparation and incorpora-

tion in the Treaty of Peace of the labour clauses of that Treaty. It is the first time in any great international agreement to which the nations of the world had committed themselves that the welfare of the toiler is declared to be a matter of supreme international concern to all the peoples of the world. It is the first time in history that certain great principles relating to labour and its position and status in the world have received international recognition, and I believe the toilers of this continent owe a great deal of gratitude to the chairman for the important part he played in working out those principles and in securing their incorporation in the Peace Treaty.

I said a moment ago that we had accepted those principles. We joined in the International Labour Conference at Washington, we have applied those principles to some of the practical problems facing us in our country at the present time. I recall, Mr. President, while you did not honour us very frequently with your presence, that on one occasion you moved a resolution that the proposed eight-hour convention should be referred to a sub-committee of the conference for consideration and report. That struck me as such a sane suggestion that I seconded it. The convention voted it down. We discussed the matter three days more, and after three days I had the honour to move the same resolution and it was unanimously adopted. That shows, Mr. President, how wise we both are in dealing with these matters. But certain very important conclusions were reached at that conference.

Now we are very closely related industrially, our two countries, the United States and Canada. The very fact of the existence of this body shows how closely we are related industrially; the very fact that you are here joined in one great organization shows how close is the identity of interest in our two countries on industrial matters. I want to say to you, Mr. President, in all seriousness, while the government of Canada must decide for itself, or the various governments possessing legislative authority must decide for themselves, what they are going to do in connection with the conventions and recommendations adopted at Washington, it will make it much more difficult for our Parliaments and Legislatures to act if you do not move along the same lines at the same time. And I say this in the interests of the workers of Canada, who are anxious to see these laws and functions put into effect. If you move ahead with us, this continent moving together along this advanced programme, it not only means a great deal for the toilers of this country, but it means a great deal for the toilers throughout the world. And as at the Peace Conference at Paris they recognized what a vital relation all these labour and economic problems have to the peace of the world, so will steady progress, solid, substantial progress along sane lines in harmony with the labour clauses of the Peace Treaty tend to remove the injustices from which the toilers

in all lands suffer; will tend to establish the social and economic order on a more stable basis, and will make for the permanent peace and progress of the world. And it is to this high and noble purpose that we are all called, in our common effort at international co-operation and international good-will.

One word, Mr. President, in conclusion. In the year 1914, before this war broke out, our two nations were engaged in preparing for the celebration of the one hundred years of peace. You had appointed committees on your side of the line; we had appointed committees on ours. Our preparations were rudely interrupted in August, 1914, when we suddenly found ourselves engaged in the greatest war in history.

Some three years later you found yourselves engaged in the same titanic struggle. We celebrated the one hundred years of peace between our two countries, not by erecting some granite shaft, some marble monument to commemorate that event; we celebrated it by the sons of our two countries laying down their lives in France and Flanders in order that militarism might be overthrown and peace restored to a war-cursed world. Having commemorated the hundred years of peace by helping bring back peace to the world, let us now unite our efforts in a noble purpose to seek to bring to all the nations of the world, to give to all the nations of the world as a splendid, God-given heritage, the hundred years of peace which we have enjoyed.

### ANNUAL CONVENTION ONTARIO PROVINCIAL COUNCIL OF CARPENTERS AND JOINERS

**T**HE eighth annual convention of the Ontario Provincial Council of the United Brotherhood of Carpenters and Joiners of America, was held at Peterborough during the last week of June. The report of the secretary showed that 40 new local branches had been formed during the year, the total number being 77. The membership had grown from 5,294 to 7,451, with eight locals not reporting. A resolution recommending that immigrants be met at the port of landing by union officials was referred to the Trades and Labour Congress of Canada. The executive was instructed to request the provincial government to enforce the Building Trades Inspection Act and to appoint inspectors for the rural districts, and to amend the Workmen's Compensation Act to require the employer to report all accidents, whether the injured employee leaves his work or not. A resolution was passed in favour of introducing the Carpenters' Union label among the carpenters of the province, and it was ordered that this resolution be sent to every local union of

carpenters in the province. The executive was instructed to make a call upon all locals for a per capita tax in support of striking woodworkers at Ottawa. The executive was instructed to forward a resolution to the Trades and Labour Congress in favour of the extension of the Industrial Disputes Investigation Act to all industries upon the application of either the labour organization or the employer involved, or of a municipality; the elimination of the clause forbidding a strike pending the decision of a Board of Conciliation appointed under the Act; and amendments to the Act that would preserve the full liberty of the workers and employers during the sitting of the Board.

The election of officers carried out under the proportional representation plan, resulted in the election of Fred Hawes, Hamilton, president, and T. Jackson, 9 Mount Noel Avenue, Toronto, secretary-treasurer. It was decided to hold next year's convention at St. Catharines.

## WESTERN CANADA CONFERENCE OF TYPOGRAPHICAL UNIONS

---

**T**HE seventh annual convention of the Western Canada Conference of Typographical Unions was held at Medicine Hat, Alta., on June 2-4. President H. W. Falconer, of Moose Jaw, presided. Resolutions were passed, among others, in favour of the following measures: Continuation of the effort to have the union label registered in Canada; strict enforcement of the International Typographical Union rules in regard to the hiring of help; in favour of the stand taken by the Trades and Labour Congress of Canada in connection with the

Winnipeg Strike Trial; standardization of the industry throughout the Dominion with regard to working conditions, scales, hours of labour, and wages, the latter to be dealt with by local unions, where living conditions differ, such wages to be sufficient to insure a full and complete living. The proceedings concluded with the election of officers for the ensuing season, Mr. R. M. Wilson, of Calgary, Alta., being elected President, and Mr. B. W. Bellamy, of Medicine Hat, Alta., Secretary. The next annual convention will be held at Moose Jaw, Sask.

---

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OF MAY 23 TO JUNE 19, 1920

**R**EPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada show a decrease in the number of placements during the four weeks' period covered by the present report as compared with the period ending May 22, the number of placements during the four weeks from May 23 to June 19 being 26,445, while the number of placements during the period ending May 22 was 31,129. The decrease was due partly to the closing of nine temporary offices in Ontario and Quebec, which had been opened mainly for demobilization purposes.

During the period under review (May 23 to June 19) the placements were reported by weeks as follows: Week ending May 29, 6,311; week ending June 5, 6,202; week ending June 12, 6,967; week ending June 19, 6,965.

In addition, casual placements, in which the employment was not expected to continue more than one week, numbered as follows: Week ending May 29, 1,689; week ending June 5, 1,674; week

ending June 12, 1,870; week ending June 19, 1,974.

At the beginning of the period, May 23, 5,022 men and 870 women, a total of 5,892 persons, remained unplaced as compared with 3,913 men and 1,144 women, a total of 5,057 at the end of the four weeks. On May 23 also 13,370 vacancies notified by employers remained unfilled, of which 8,468 were for men and 4,902 for women, as compared with 6,319 for men and 4,353 for women, a total of 10,673 at the end of the period. During the period under review 30,740 men and 3,640 women applied for employment, while 28,618 new vacancies for men and 5,369 for women were notified by employers. This would indicate a much closer approximation of supply and demand, or applications and vacancies, than during the preceding period. During the preceding period the excess of supply (vacancies) over demand (applications) was 4,624. Placements reported numbered, excluding casuals, 24,283 for men and 2,162 for women, as compared with 28,951 for men and

2,188 for women during the previous period, a decrease of 4,694. In addition to the placements noted above, the offices of the Service made 7,207 casual placements during the period, representing a decrease of 480 as compared with the preceding period. The accompanying table shows the work of the offices for the four-week period ending June 19 in some detail.

The chart shows graphically the num-

ber of applications and vacancies registered as well as the number of placements made for the full period of the record. The chart indicates that for the four weeks' period there was a decrease in the number of applications registered as compared with the previous period. There was a corresponding falling off in the number of vacancies and a decrease likewise in the number of placements effected.

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF MAY, 1920

THE present article on unemployment among the members of Local Trade Unions deals with unemployment as at the end of May, 1920, and is based on returns received from 1,596 labour organizations, with a total membership of 201, 650. For all occupations reporting, 2.88 per cent of the members were unemployed as compared with 2.83 per cent at the end of April, 1920, and with 3.83 per cent in May, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness, or as

the direct result of strikes or lockouts, are not considered as unemployed.

The slight increase in the percentage out of work at the end of May as compared with April may be attributed to a decrease in the volume of employment in the manufacturing and mechanical industries and, in lesser degree, in the transportation group. In building and construction, however, considerable improvement was registered. That the percentage of unemployment at the end of May is smaller than was reported in the corresponding month of last year is due to there having been greater activity in nearly all the groups of indus-

tries, except transportation, the increase in activity being particularly marked in manufacturing and mechanical industries and in building and construction.

Table I on this page summarizes the returns by provinces. Decreases in the percentage of unemployment were reported in all provinces except Quebec and British Columbia in comparison with the returns for April. As compared with the corresponding month of 1919, however, three provinces recorded increases in unemployment, Manitoba, Alberta and British Columbia, that in the last named province being the most pronounced. The decrease in the volume of employment in British Columbia, however, was in part, indirectly caused by an industrial dispute in the shipping industries.

TABLE 1.—PERCENTAGE OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

The percentages reported idle of the different groups of industries are indicated in table II on page 888.

Unemployment in the manufacturing and mechanical industries as reported by 417 unions having a combined membership of 56,888 was slightly more prevalent than at the end of April, 3.40 per cent of the members having been unemployed as compared with 2.28 per cent in the preceding month. As compared with the returns for May of last year, however, unemployment showed a decrease, the percentage out of work in that month, having been 4.05. Unemployment in metals, machinery and conveyances was slightly more marked than in the preceding month, largely due to continued shortage of fuel and materials. There was, however, considerable improvement in the percentage as compared with the returns for May of last year. Workers in food, tobacco and liquors and printing, publishing and paper goods were more fully engaged than in the preceding month, but the percentages out of work were slightly larger than in May of last year. In the textiles, carpets and cordage and glass working groups the percentages of unemployment showed slight decreases as compared with both April, 1920 and May, 1919, the percentages in the three months, particularly in the former group, being small. In clothing and laundering and leather, boots, shoes and rubber the percentages out of work were larger than in the preceding month and also than in the corresponding month of last year. Seasonal slackness and reductions in staffs for stock-taking purposes would account in part for these decreases in employment. In the pulp, paper and fibre group as reported by 19 organizations no members were reported idle, as compared with a nominal percentage of unemployment in April and with 1.17 per cent in May, 1919. On the contrary, the percentages out of

work in the woodworking and furniture, jewelry, and oil refining groups were larger than in both months here used for comparative purposes. In the first named group this inactivity occurred largely among piano and musical instrument organizations in Ontario. In addition to the members out of work considerable short time was reported by unions of boilermakers, machinists, cigarmakers, tailors, boot and shoe workers and glass workers.

Reports from 649 organizations of transportation workers having a combined membership of 81,129 persons indicated that 2.62 per cent of the members were unemployed as compared with percentages of 2.57 in April and 2.21 in May, 1919. The nominal increase in the percentage out of work as compared with the return for the preceding month may be attributed to enforced idleness in the navigation sub-group, particularly among longshoremen in British Co-

lumbia as an indirect result of a strike in the shipping group. Employment among steam railway employees, (whose returns constituted nearly 72 per cent of the entire group membership reported), showed a slight improvement, as compared with the returns for April 1920, and also in comparison with the figures for May of last year. Teamsters and chauffeurs as reported by 26 organizations registered no unemployment as compared with percentages of 2.43 in the preceding month and .82 in May of last year. The percentage out of work among street and electric railway employees was the same as in the preceding month. It was, however, slightly lower than in the corresponding month of 1919. Some short time was reported by unions of engineers, firemen and trainmen.

In the mining, quarrying and refining of ores group, returns were received from 32 unions having a total member-

ship of 9,431 persons, and show that 1.16 per cent of the members were out of work as compared with 1.10 per cent at the end of April and with 2.84 per cent at the close of May, 1919. Miners were not quite as well employed as in the preceding month but considerable improvement was shown as compared with the figures for May of last year. Quarry workers and mill and smeltermen, as reported by one union in each sub-group, registered no members out of work. Some short time was reported by unions of mine workers.

The percentage out of work in the building and construction group, as recorded by 269 organizations having an aggregate membership of 32,993, was 4.32 as compared with unemployed percentages of 5.92 in April and 8.68 in May, 1919. Bricklayers, masons and plasterers, electrical workers, steam shovel and dredgemen and hod carriers and building labourers reported increased activity, both as compared with the figures for April, 1920 and for May 1919. Carpenters, and joiners, painters, decorators and paperhangers, tile layers, lathers and roofers reported slightly increased percentages of unemployment as compared with April. There was, however, considerable improvement in these trades in comparison with the returns for May of last year. On the other hand, granite and stone cutters and bridge and structural iron workers reported less unemployment than in April, but the percentages were larger than in the corresponding month of 1919. Slight increases in the percentage out of work were reported by unions of plumbers and steamfitters as compared with the returns for both April, 1920, and May, 1919, partly due to shortage

of materials. A few organizations of carpenters and joiners, bricklayers, masons and plasterers and plumbers reported some short time. The number of unions, whose members were not on full time, however, was considerably less than in the preceding month.

In the public employment group as reported by 81 unions having a combined membership of 7,058, the percentage out of work was .04 as compared with .43 per cent in April and with no members out of work in May of last year.

Unemployment in the group of miscellaneous trades as indicated by returns received from 143 organizations with 13,600 members was 1.57 per cent as compared with percentages of 2.49 in the preceding month and 7.26 in May, 1919. Retail clerks, as reported by six unions, showed a nominal percentage of unemployment as compared with no members out of work in April and with a percentage of 2.28 in May, 1919. The percentage idle among hotel and restaurant employees was the same as that registered during the preceding month. There was, however, slightly less unemployment recorded by these unions as compared with the returns for May of last year. Musicians and theatre employees, stationary engineers and firemen and unclassified workers showed greater activity than in either month used in this article for comparative purposes. On the contrary, there was a nominal increase in the percentage of idleness among barbers in both comparisons. Very little short time was reported by any unions in this group.

The tabulated statement on the following pages present the returns in some detail.

## EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD MAY 2 TO MAY 29, AS REPORTED BY EMPLOYERS

### Summary of Employment Conditions from January 17, 1920

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from May 2 to May 29 inclusive, show continued improvement in the employment situation, the increase in the volume of employment being particularly marked in the second and third weeks of the period.

The accompanying chart shows the weekly percentage of change in the number of persons on pay-rolls since the base week (January 17, 1920) as reported by employers making returns, the number reporting being on an average about 5,000. The chart indicates gains in the volume of employment during each of the weeks under review as compared with the base week. The returns for the week ending January 17 were taken as a base. It had been the intention to use the week of January 1, but this was found impracticable because of the abnormal situation at that time due to the annual inventory period and the consequent reductions in staff. The week of January 17 coincides fairly closely with the close of this period, and accordingly reflects more normal conditions.

While there had been considerable recovery from the declines incident to the annual inventory period by January 17, the chart shows that further increases were manifested in the remaining weeks of the month. The slight set-back from the level of employment of January 24

which occurred during the following week, indicated chiefly declines in the Retail Trade group representing curtailment in staffs recruited during the holiday season. Recovery was shown, however, during February and by the middle of the month the increase over the base week amounted to 9,384 persons, or 1.4 per cent. From February 14 to the closing week of March the curve indicates a rather stable situation. The marked rise at the end of March represents the resumption of spring time operations and the beginning of active railway, and, in a lesser degree, other construction work. During the month of April, the rise in the volume of employment afforded by the firms reporting was rapid. By the week of May 1 the firms reported an increase in their staffs as compared with the base week of 31,542 persons. While the upward tendency continued during the first three weeks of May, an equilibrium was manifested at its close.

The reports since January 17 indicate considerable variations in employment conditions as between districts. Though declines were in evidence in the Maritime Provinces during the first two weeks, increases were recorded during the remaining weeks, until at the close of the period, the reports indicated net increases in staffs of 5,882 persons, or 9.5 per cent over the base week. Substantial increases were registered also in Quebec, and lesser increases in On-

tario. In the Prairie Provinces slackness in the volume of employment, as compared with the base week, was evidenced up to the first of May, when the demand for railway construction workers, in particular, overbalanced the declines incident to the seasonal curtail-

ment of coal operations in Alberta. British Columbia registered gains varying in extent throughout the period, the percentage increase at the close of the period practically coinciding with the average percentage for the whole of Canada.

The changes recorded for each of the four weeks under review as compared with the preceding week were as follows:

Week ending May 8, an increase of 2,674 persons, or .4 per cent.

Week ending May 15, an increase of 5,005 persons, or .7 per cent.

Week ending May 22, an increase of 4,773 persons, or .7 per cent.

Week ending May 29, an increase of 1,235 persons, or .2 per cent.

A summary of the returns by industrial groups shows that Railway Construction; Edible Plant Products; Pulp and Paper; Hotels and Restaurants; Telegraph and Telephone Operations;

and Wholesale Trade registered gains during the whole four weeks of the period under review. Building Construction; Clay, Glass and Stone Products; Fur and Fur Goods; Non-Ferrous Metal Products; Rubber Goods; Coal Mining; Non-Metallic Minerals other than coal (quarrying); Retail Trade; Local, Water and Railway Transportation showed fluctuations with a net gain for the period as a whole. On the contrary, Logging; Edible Plant Products; Iron and Steel Products; Mineral Products, n.e.s.; Textiles; Miscellaneous Manufacturing Industries (largely chemicals and tobacco); Metallic Ores and Personal Service (chiefly laundries) reported decreases, taking the period as a whole, with increases

during one or more weeks of the period. In Leather and Leather Goods and Wood Distillates, reductions in staffs were reported in all four weeks.

As during the preceding period the increases recorded in the Railway Construction group were the most noteworthy, the additions during the four weeks aggregating 5,074 persons. The substantial increase reported in the numbers employed in Lumber and its Products was due largely to the requirements for saw mill operations. In Edible Animal Products, the gains may be attributed to activity in the fish packing industry, particularly in the Maritime Provinces. Shortage of raw sugar occasioned most of the reductions registered in Edible Plant Products, while the shortage of fuel and materials continued to affect employment in the Iron and Steel group adversely. In Textiles

and Leather and Leather Goods, the falling off represents in the main between-season inactivity in these groups.

For the four-week period under review, employment conditions were substantially uniform throughout Canada. Quebec and the Prairie Provinces reported increases during all four weeks of the period. In the Maritime Provinces, Ontario and British Columbia, net increases were recorded, with declines in one or more of the weeks of the period. In the provinces within the districts, however, slight fluctuations occurred during the different weeks, except in Manitoba and Saskatchewan, which reported gains throughout the period. In every province, however, a net increase was registered for the four weeks.

## REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, MAY, 1920

**R**EPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the month of May showed an increase of nearly 6 per cent in the number of employees and of not quite 26 per cent in the amount of wages paid as compared with the preceding month. In May, 1920, 10,901 persons were temporarily employed, and the payrolls amounted to \$1,062,590, as compared with 10,294 employees and an aggregate payroll of \$844,868 in April.

In comparison with the same period in 1919 increases of about 14 per cent in the number of employees and of not quite 51 per cent in the wages paid are indicated, there having been 9,531 em-

ployees with an aggregate payroll of \$704,394 in May, 1919.

Toronto, Hamilton, London, Winnipeg, Brandon, Edmonton, Vancouver and Victoria recorded increases in the number of employees both as compared with the preceding month and with May, 1919. St. John, Moose Jaw, Saskatoon and Calgary registered increases as compared with the returns for April, but in comparison with the figures for May, 1919, declines in the number of persons employed were recorded. On the other hand, Montreal and Ottawa showed decreases as compared with the preceding month, while in comparison with the returns for May of last year large increases were reported. In Re-

gina the number of persons temporarily employed during May was the same as in the preceding month, but there was an increase as compared with the corresponding month of last year.

As to wages, St. John, Ottawa, Toronto, Hamilton, London, Winnipeg, Brandon, Regina, Moose Jaw, Edmonton, Vancouver and Victoria reported increases both as compared with April, 1920, and with May, 1919. In Montreal

a slight decline in the payrolls as compared with the preceding month was indicated, but in comparison with the figures for May of last year a substantial increase was reported. On the contrary, Saskatoon and Calgary showed increases in the amount of wages paid temporary employees in comparison with the figures for April, while as compared with the returns for May, 1919, nominal decreases were recorded.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORK-PEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, MAY, 1920, COMPARED WITH APRIL, 1920 AND WITH MAY, 1919.

### EMPLOYMENT IN THE BUILDING TRADES DURING MAY, 1920, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 56 cities showed a decrease during May as compared with the preceding month, the total value of

building permits falling from \$16,385,153 in April to \$12,160,379 in May, a decrease of \$4,224,774, or 25.8 per cent. Nova Scotia, Ontario, Alberta and British Columbia reported increases in this

comparison, that of \$429,592 in Ontario being the largest. On the other hand, Prince Edward Island, New Brunswick, Quebec, Manitoba and Saskatchewan reported decreases, those in Manitoba and Quebec of \$2,359,581 and \$2,268,292 respectively, being the most noteworthy.

As compared with the corresponding month in 1919, there was an increase of \$4,384,097, or 56.4 per cent, the value for May, 1919, having been \$7,776,282. In this comparison the three Maritime Provinces, only, reported small declines in the value of the permits issued. In the remaining provinces large increases were recorded, that in Ontario of \$2,565,923 being the most substantial.

The returns from 35 cities originally used in this report (which are distinguished by asterisks) are tabulated separately and show that the total value of building permits issued by these cities amounted to \$10,819,356, a decrease of \$4,513,827, or 29.4 per cent, as compared with the returns for April, 1920. In comparison with the figures for May, 1919, an increase of \$3,675,501, or 51.5 per cent, was recorded.

Of the larger cities, Toronto and Edmonton reported increases in the value of permits issued, both as compared with the figures for April, 1920, and for May, 1919. Montreal, Winnipeg and Vancouver registered decreases as compared with April, but in comparison with the returns for May of last year substantial increases are reported.

Of the smaller centres, Quebec, Westmount, London, Niagara Falls, Ottawa, Sarnia, Sault Ste. Marie, Welland, Brandon, Lethbridge and Prince Ru-

pert recorded increases as compared with both April, 1920, and May, 1919.

**AGREEMENT BETWEEN THE WESTERN CANADA COAL OPERATORS'  
ASSOCIATION AND THE UNITED MINE WORKERS OF AMERICA,  
DISTRICT 18**

---

**D**URING June an agreement was reached between representatives of the Western Canada Coal Operators' Association of Alberta and Eastern British Columbia and the United Mine Workers of America, District 18, on the following basis:

1. That a contract be made effective from April 1, 1920, to March 31, 1922.

2. That the retroactive monies from April 1 shall be paid on or before August 1, 1920.

3. This contract is made and entered into for the sole use of the members of the United Mine Workers of America and the members of the Western Canada Coal Operators' Association. All men who work in and around the mines who are eligible to become members of the United Mine Workers of America shall join that organization and agree to sign check-off for all dues, assessments and fines, and the management of the mines agree to forward deductions made to the Acting Secretary of the District or such other persons as that official may designate.

4. (a) That all day wage rates in effect on October 31, 1919, (which shall include the ninety-two cents war bonus) shall be advanced twenty-seven per cent.

(b) Except in lignite fields, all contract tonnage rates and contract yardage mining rates in effect October 31, 1919, be advanced twenty-seven per cent.

(c) That the tonnage rates in the lignite fields be advanced twenty-four cents.

(d) That all yardage, room turning and dead work rates in effect October 31, 1919, be advanced twenty per cent.

(e) That the application of the H. C. L. nine-two cents on contract miner's wages be made by adding the twenty-seven per cent on the ninety-two cents, or one dollar and seventeen cents to his wages for each day's work.

(f) The 1917-1919 agreement\* to be used as a basis, and no change other than above indicated to be made unless the same has been made by order of the Director of Coal Operations or by mutual consent by the two interested parties, except the selling prices of explosives, supplies, and coal.

The agreement was submitted to vote of the members of the Union and was carried by 2,738 in favour of it, and 976 against.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Coal Mining

ALBERTA AND EASTERN BRITISH COLUMBIA. — WESTERN COAL OPERATORS' ASSOCIATION AND THE UNITED MINE WORKERS OF AMERICA, DISTRICT 18. An agreement between these bodies, which was ratified by vote of the members in June, is given on page 697.

### Construction—other than Railway

MONCTON, N.B. — MASTER PLUMBERS OF THE CITY OF MONCTON AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS OF AMERICA, LOCAL No. 600. Agreement effective from May 1, 1920, to April 31, 1921.

Hours of labour: 8 a.m. to 5 p.m., with one hour for lunch.

The minimum rate of wages for journeymen, plumbers and steamfitters, 77 cents per hour, to be advanced to same amount as government men employed in Moncton shops when they receive an advance.

Overtime: from 5 p.m. to midnight, time and one-half; from midnight to 8 a.m., double time; double time for Sundays and public holidays, with treble time on Labour Day.

"All apprentices shall serve five years, and no apprentice shall be permitted to use the tools excepting with a journeyman until he has served at least three years of his apprenticeship, after

which he shall receive pay at the rate of one-half the current rate paid journeymen for the fourth year, and two-thirds the current rate paid journeymen the fifth year, after fifth year to receive the minimum rate of wages."

"In case of any grievance arising between the parties to this agreement which cannot be adjusted by the representatives of both organizations, it shall be referred to a joint arbitration board composed of three masters and three journeymen mutually agreed upon, said board shall meet within forty-eight hours and shall have full power to settle such grievances and appoint an arbitrator if necessary."

The employees "agree to use their efforts to the end that all plumbers and steamfitters in their employ at present and those to be employed in the future during the period of this agreement shall be members of the United Association."

The employees "agree to use their efforts to the end that no member of their Association shall do any work pertaining to his trade for anyone but a Licensed Sanitary and Heating Engineer."

CALGARY, ALTA. — CALGARY ASSOCIATION OF SANITARY AND HEATING ENGINEERS AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL No. 496. Agreement to be effective until May 31, 1921. In the event of change being desired, notice to be given in writing on February 1, 1921, and settled by February 28, 1921, to come into effect May 31, 1921. If no notice is given, agreement to remain in force for another year, providing three clear months for contract estimating.

Minimum wage rate to be \$1.05 per hour for journeymen; helpers to be paid following percentages of journeyman's rate: first year, 60 per cent; second year, 65 per cent; third year, 70 per cent; fourth year, 75 per cent.

Overtime to be paid as follows: double time Sundays and holidays; time and one-half for first five hours after regular quitting time and double time thereafter; night shifts (which must be at least two nights' duration), time and one-quarter for 10-hour shift.

Apprentice to be allowed to use tools only under supervision of a licensed plumber, until he has served three years and passed an examination; five years to be term of apprenticeship; one apprentice to each shop, and one additional to each five journeymen, with not more than five apprentices in any one shop. Journeymen to be employed for at least two months concurrently before employer is entitled to retain the apprentice; not more than one steamfitters' helper or apprentice to be employed to each journeyman steamfitter except in heavy lifting; apprentices and helpers to serve for five years, the last as improver, and to pass examination before using the tools.

No journeyman plumber, steamfitter or gasfitter to work except for a licensed plumber or steamfitter within jurisdiction of Local 496. This clause not to affect men working for City of Calgary or School Board.

In case of grievance, agent to wait on employer to settle same; failing this, a committee of not less than two and not more than three of each party to be appointed to settle same within one week.

GUELPH, ONT.—CARPENTER SECTION OF GUELPH BUILDERS' EXCHANGE AND AMALGAMATED SOCIETY OF CARPENTERS AND JOINERS, LOCAL No. 2611. Agreement effective from May 1, 1920, to April 30, 1921. Ninety days' notice must be given previous to April 30, 1921, if change is desired.

Employers to hire only carpenters carrying current working card, or permit issued by limited Brotherhood; carpenters not to work on any job where carpenters not complying with this rule are employed, or where other trades do carpenters' work.

Hours of labour: eight hours per day, first five days, between 8 a.m. and 12 noon, and between 1 p.m. and 5 p.m.; four hours on Saturday, between 8 a.m. and 12 noon. Overtime rate: time and one-half to 10 p.m.; double time from 10 p.m. to 7 a.m.; time and one-half from 7 a.m. to 8 a.m.; double time Sundays and holidays. No work to be done on Labour Day.

Minimum wage rate per hour: May 1, 1920, to July 31, 1920, 75 cents; August 1, 1920, to April 30, 1921, 85 cents; foreman to receive not less than 10 cents over highest rate paid to journeymen. Apprentices: each employer to be allowed one apprentice to every four journeymen; wages per hour not to be less than 40 cents first year, 50 cents second year, 60 cents third year, and 10 cents less than minimum rate for journeymen for fourth year. Apprentices to attach themselves to the Union not later than their second year; apprentices above the age of eighteen not to be accepted unless they have previously worked at the trade.

HAMILTON, ONT.—THE GENERAL CONTRACTORS' ASSOCIATION AND THE MASTER CARPENTERS' ASSOCIATION OF HAMILTON AND THE HAMILTON DISTRICT COUNCIL OF THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA. Agreement effective from May 1, 1920, to April 30, 1921.

In case of dispute employees not to order strikes against employers, nor to leave work before dispute is brought before the Joint Arbitration Committee for settlement, this committee to consist of three members representing the employers, and three members representing the employees, and to meet at least once in every three months.

Hours of labour: eight hours for first five days of week from 8 a.m. to 5 p.m.; 4 hours on Saturday from 8 a.m. to 12 noon.

Overtime (to be worked in emergency) and holidays: Sundays and holidays, double time; no work on Labour Day; Saturday afternoon until 5 p.m. and other overtime, time and one-half.

Minimum rate of wages per hour, 85 cents; wages to be paid every two weeks.

Employers to hire only carpenters carrying current working card, or permit from Carpenters' District Council at Hamilton; carpenters not to work on any job where carpenters not complying with this rule are employed, or where other trades do carpenters' work.

Steps to be taken by both parties before termination of this agreement to introduce Apprenticeship System and Trade Tests.

WINDSOR, ONT.—BUILDERS' AND CONTRACTORS' ASSOCIATION OF WINDSOR, AS REPRESENTED BY THE GENERAL CONTRACTORS' SECTION AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL NO. 494. Agreement effective from May 1, 1920, and from year to year unless two months' notice is given by either party prior to April 1 of each year.

Rate of wages: per hour—from May 1, 1920, to July 1, 1920, 90 cents; from July 1, 1920, to April 20, 1921, \$1.00.

Hours of labour: eight hours per day, from 8 a.m. to 5 p.m. for first five days of week; from 8 a.m. to 12 noon on Saturday.

Overtime: time and one-half for first hour; afterwards, and Sundays and holidays, double time.

Disputes to be referred to a joint committee.

Steps to be taken to introduce Apprenticeship System and Trade Tests.

EDMONTON, ALTA.—EDMONTON DISTRICT COUNCIL OF CARPENTERS AND EDMONTON CONTRACTORS' ASSOCIATION. Agreement to be in effect from May 1, 1920, to May 1, 1921, notice of change to be given on or before January 1, 1921, and agreement to be settled on or before January 31, 1921, and in the event of no notice being given on January 1, 1921, agreement to remain in force another year.

Minimum wage: per hour—from May 1 to July 1, 1920, 80 cents; from July 1, 1920, to April 30, 1921, 85 cents.

Work to cease at 12 noon on Saturday, and no work to be done from 12 noon to 5 p.m. Saturday except to preserve life and property.

Overtime: double time on holidays (except Labour Day, when no work shall be done); all other overtime, time and one-half.

Hours of labour: eight hours from 8 a.m. to 5 p.m., except Saturday.

#### Food Products

MONTREAL, QUE. — ST. LAWRENCE SUGAR REFINERIES, LTD., AND EMPLOYERS. Agreement to be in effect from June 17, 1920, to May 1, 1921.

Employees to decide by ballot before June 19, 1920, whether the refinery shall operate Sundays or not. Overtime and work between 7 a.m. and 6 p.m. on Sundays to be paid at the rate of time and one-half.

The base rate to be 40 cents per hour. Men doing special work to be graded over and above this rate as per schedule.

"This Company agrees to increase the attached rates of pay in proportion to any general increase in the cost of living that may occur in this district during the term of this contract. Proof of such general increase in the cost of living to be endorsed by the Department of Labour at Ottawa."

"This company will also place in force, free of all cost to the employees, the following scale of insurance to be paid to their families at death: one year but less than two, \$500.00; two years to four, \$1,000; four years to six, \$1,250; six years to eight, \$1,500; eight years to ten, \$1,750; over ten years, \$2,000."

"This company will receive a Committee of five or six of its employees at any time by appointment to discuss any matters of mutual interest."

Rates of pay: per hour—refinery, centrifugal men, 43½ cents; sugar shovellers and spreaders, soft sugar packers, general labourers, 40 cents. Raw sugar house: centrifugal men, 43½ cents; bag turners, 41 cents; general labourers, 40

cents; sweetland press men (head), 42 cents; sweetland pressmen (asst.), 41 cents; assistant Johnson press men, 40 cents; raw sugar elevator men, 44 cents; raw sugar electric truck men, 41 cents. Char house: char pullers and firemen, 41 cents; watchmen and buggymen, 40 cents; man in charge of new char, 42 cents. Packing department: coppers, 43 cents; pilers and truckers, 40 cents. Grinding mill: leading men, 44 cents; general labour, 40 cents.

FERNIE, B.C.—FERNIE-FORT STEELE BREWING COMPANY, LIMITED, (IN LIQUIDATION) AND INTERNATIONAL UNION OF UNITED BREWERY, FLOUR, CEREAL, AND SOFT DRINKS WORKERS OF AMERICA, LOCAL 308. Agreement in effect June 1, 1920, to May 31, 1921.

Only union men to be employed, unless they cannot be furnished. Extra help to have a permit card issued by Local 308 before going to work.

Hours of labour: eight hours daily, from 7 a.m. to 4 p.m. or from 8 a.m. to 5 p.m. with one hour for dinner.

Extra work: overtime, time and one-half; Sundays and legal holidays, double time.

Minimum wage rates: per day—brewers, cellarmen, kettlemen, coopers, \$6.25; wash-house men and others employed in brewery, \$6; slack barrel coopers, \$5.65; per month—teamsters, \$150; first engineers, \$190; second engineers, \$180.

#### Printing and Publishing

TORONTO, ONT.—MASTER PRINTERS' AND BOOKBINDERS' ASSOCIATION AND TYPOGRAPHICAL UNION No. 91. Memorandum to be attached to recent agreement, which expires June 1, 1921. (A summary of this agreement appeared in the LABOUR GAZETTE for August, 1919, on pages 960 and 961.)

The employers, realizing the high cost of living, agree to pay from May 1, 1920, to May 31, 1921, to journeymen and apprentices, hand compositors, floormen, stonemen, make-ups and proof-readers, linotype operators and machinists, monotype and monoline operators

and machinists, typesetters on typesetting machines, a bonus of 10 per cent on current wage, said bonus to be paid weekly, and to be paid only on the basis of the regular 48-hour week or fraction thereof, and shall not in any way affect overtime rates which shall be governed by the existing agreement referred to.

ALBERTA. — DAILY NEWSPAPER PUBLISHERS OF CALGARY, MEDICINE HAT AND EDMONTON, AND TYPOGRAPHICAL UNIONS Nos. 449, 451, AND 604. Agreement to be in effect from May 1, 1920, to October 31, 1922.

Questions which cannot be settled by conciliation to be submitted to arbitration. A joint standing committee to be selected, to which shall be referred questions regarding this contract or scale of prices thereof which cannot be settled otherwise. All awards of the joint standing committee or board of arbitration to be made in writing.

Apprentices: youths who handle type in the composing room and no others, to be considered as apprentices; the number of apprentices in newspaper offices not to be greater than one for the first five journeymen, two up to ten journeymen, and one additional for each ten journeymen thereafter, provided that no more than five apprentices shall be employed in any one office; apprentices to be not less than sixteen years of age at the time of beginning their apprenticeship and to serve five years.

Scale of apprentices in relation to journeymen's scale: first year, one-quarter; second year, one-third; third year, one-half; fourth year, two-thirds; fifth year, three-quarters.

Overtime rate: time and one-half up to three hours, double time after three hours; double time Sundays. Christmas Day, Dominion Day and Labour Day to be paid straight time without working.

The Calgary agreement is modified by a special clause to be in force May 16, 1920, to May 15, 1921, between the publishers of the Morning and Weekly Albertan and the Daily and Weekly Herald

and Calgary Typographical Union No. 449, which provides as follows:

Minimum wage scales: per week—\$45 day work; \$48 night work; 45 hours to constitute a week's work. In the event of the cost of living in the month of October, 1920, showing an increase over April, 1920, of 10 per cent or more, the scale of prices therein set forth shall be increased by 5 per cent for the last six months of this agreement, the cost of living figures to be those of Department of Labour at Ottawa and to be for the Province of Alberta only.

A similar clause occurs in the Edmonton agreement.

#### **Vehicles for Land and Water Transportation**

THREE RIVERS, QUE. — TIDEWATER SHIPBUILDERS, LTD., AND METAL TRADES COUNCIL OF THREE RIVERS. Agreement effective May 1, 1920, to April 1, 1921.

Hours of labour: forty-eight hours per week; eight hours and forty-five minutes for the first five days, to be worked between 7.30 a.m. to 12 noon, and 1 p.m. and 5.15 p.m., and four hours and fifteen minutes on Saturday, between 7.30 a.m. and 11.45 a.m.

Overtime rates: time and one-half up to midnight, and double time thereafter; double time Sundays and holidays.

In case of grievances, the company to meet a committee of employees.

Apprentices: one for the shop and one for every five mechanics employed; apprentices to serve four years. In the blacksmiths, boilermakers and iron shipbuilders, sheet metal workers, electrical workers, plumbers and steamfitters trades, 50 per cent of the apprentices may be taken from the ranks of helpers.

Minimum wage rates: per hour—blacksmiths, chippers and caulkers, riveters, furnacemen, 60 cents; boiler-makers, 75 cents; carpenters and joiners, electricians, millwrights, 65 cents; machinists, plumbers and steamfitters, shipfitters, 70 cents; cranemen, holders-on, 55 cents; boilermakers' learners, shipfitters' learners, drillers, heaters,

punchers, 50 cents; patternmakers, 80 cents; loftsmen, 90 cents; reamers, helpers, 45 cents; bolters, labourers, 40 cents; apprentices, 25-52½ cents.

THREE RIVERS, QUE.—THREE RIVERS SHIPYARDS, LTD., AND CANADIAN METAL TRADES DISTRICT COUNCIL. Agreement effective from May 1, 1920, for eleven months.

Working hours: forty-eight hours per week; eight hours per day (or night).

Overtime and holidays: time and one-half for overtime until midnight, and double time thereafter; double time Sundays and holidays.

In case of grievances, the company to meet a committee of employees to adjust same.

For apprentices' regulations see previous agreement.

Minimum wage rates: per hour—acetylene department: burner and electric welder, 65 cents; helpers, 45 cents. Anglesmith department: anglesmith, 75 cents; helpers, 45 cents. Blacksmith shop: first class, 70 cents; second class, 60 cents; helpers, 45 cents. Bolting and liner department: lineman, 45 cents; bolters, 40 cents. Chipping and caulking department: chipper and caulkers, first class, 65 cents; second class, 55 cents; learner, 45 cents; packer, 50 cents; packer's helper, 40 cents. Coppersmith, 75 cents; helper, 45 cents; pipefitter, steamfitters and plumbers, first class, 70 cents; helpers, 45 cents. Drilling and reaming department: driller and reamer, 55 cents; driller, 50 cents; helpers, 40 cents. Electrical department: electricians, first class, 65 cents; helpers, 45 cents. Engineering department: machinists, first class, 80 cents; second class, 65 cents; helpers, 45 cents. Material labour department: locomotive engineer, 55 cents; locomotive fireman, 45 cents. Mold loft: loftsmen, 90 cents. Paint department: painters, 50 cents. Pattern shop: pattern makers, 75 cents. Plate and angle shop: bending rollers, 60 cents; countersinkers, 55 cents; fitter, 80 cents; planer, puncher and scraper, 50 cents; helpers, 40 cents. Rigging department: first

class leading hand erector, 70 cents; second class, 50 cents; connectors, 55 cents; hoist and derrick operators, 55 cents. Rivetting department: rivetters, hand, 75 cents; rivetters, machine, 70 cents; learners, 45 cents; helpers, 40 cents; holders-on, 55 cents; heaters, 35 cents. Ship carpenter department: ship carpenter and joiner, and millwright, 65 cents; labourers, 40 and 38 cents; firemen stationary boilers, \$3.50 per day. Apprentices, 25 cents to 55 cents.

A clause in the agreement further provided that if the cash subsidy under discussion at the time were granted by the Federal parliament, the above rates of pay would be increased by 15 per cent, or proportionately according to the amount of cash subsidy granted.

#### Transportation—Electric Railways

QUEBEC, QUE. — QUEBEC RAILWAY, LIGHT AND POWER COMPANY, (CITY STREET RAILWAY DIVISION) AND FRATERNITÉ NATIONALE DES EMPLOYÉS DE TRAMWAYS DE QUÉBEC, (UNION OF CONDUCTORS AND MOTORMEN OF THE CITY STREET RAILWAYS DIVISION). Agreement effective from May 15, 1920, until March 1, 1921.

Company to engage only conductors and motormen who are members of the Union. Differences to be submitted to committee of employers and employees.

Wage scale effective May 16, 1920: per hour—on entering service, 34 cents; after one year, 40 cents; after two years, 42 cents; after five years, 45 cents.

QUEBEC, QUE. — QUEBEC RAILWAY LIGHT AND POWER Co., AND CITY DIVISION SHOPMEN. Agreement effective from June 1, 1920, to May 31, 1921, and from year to year unless written notice of 30 days is given.

Hours of labour: daily except Sunday, 7.30 a.m. to noon, and 1.00 p.m. to 6 p.m.; night work, 7 p.m. to midnight, and 1 a.m. to 6 a.m.; road work, day, 7.30 a.m. to 6 p.m., with one hour meal; road work, night, 7 p.m. to 6 a.m. with one hour meal.

Extra work: time and one-half overtime, Sundays and holidays.

Employees having grievances may present their case to their officer; if an investigation is desired, the aggrieved party, a committee of not more than three employees representing him, may during working hours make arrangements with the foreman to this effect. The investigation to take place within 48 hours after such application, and if satisfactory arrangements cannot be made, the case to be referred to a higher official of the Division, finally approaching the General Manager. If, after investigation, it is found that the employee has been treated unjustly, he shall be paid for all time lost.

“In order that the Committee (not exceeding three) may be properly constituted and have the right to be recognized as such, they must first have made application for a settlement of the case to the foreman, before applying to a superior officer.”

“A hearing will be given by the Master Mechanic to every employee in the shop who desires to complain. Reports or suggestions for the betterment of conditions will always receive consideration.”

Wage scale: day men, 9 hour day, per hour—day car foreman, 55 cents; armature winders, 57 cents; blacksmiths, 53 cents; blacksmiths' helpers, 47 cents; carpenters, car and bench, 51 cents; electricians, 1st, 48 cents; 2nd, 43 cents; machinists, 53 cents; painters (letterers), 51 cents; painters' helpers, 43 cents; pitmen, troublemen and truckmen, 45 cents.

Night men, 10 hour day: per hour—night car foreman, 45 cents; brake inspectors, 37 cents; controller inspectors, 36 cents; motor inspectors, 36 cents; oilers, 36 cents; car cleaners, 35 cents.

Apprentices: per hour—1st year, 18 cents; 2nd year, 22 cents; 3rd year, 26 cents; 4th year, 30 cents.

PORT ARTHUR, ONT.—PUBLIC UTILITIES COMMISSION OF THE CITY OF PORT ARTHUR AND CAR BARN EMPLOYEES OF THE PORT ARTHUR CIVIC RAILWAY. Agreement in effect June 16, 1920, for twelve months.

Disputes to be investigated by a Committee of Employees and the Manager. In the event of a disagreement, evidence to be submitted to the Commission, whose decision shall be final.

"Working hours shall be in accordance with schedule but in event of an eight hour day becoming legalized by Act of Parliament during the term of this agreement and embracing street railways, same will be adopted."

## FAIR WAGE CONTRACTS, JUNE, 1920

**D**URING June the Department of Labour received for insertion in the LABOUR GAZETTE, the following information relative to four fair wage contracts, awarded by the Department of Public Works. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

## DEPARTMENT OF PUBLIC WORKS.

Alterations, etc., to Government Printing Bureau, Ottawa, Ont. Name of contractors, Bate, McMahon & Company, Ottawa, Ont. Date of contract, June 21, 1920. Amount of contract, \$20,263.

Dredging on three shoals, Goodfellow Bar and Cassilis Lawlors' shore, in Northwest Miramichi River, N.B. Name of contractors, Maritime Dredging Company, Limited, Newcastle, N.B. Date of contract, June 2, 1920. Amount of

contract, Class "B" \$0.54 $\frac{3}{4}$  per cu. yd. (scow measure).

Construction of War Trophies Building, Ottawa, Ont. Name of contractors, Doran & Devlin, Ottawa, Ont. Date of contract, June 18, 1920. Amount of contract, \$17,789.

Construction of wharf and warehouse at Kagawong, Manitoulin Island, Ont. Name of contractors, McNamara Brothers & Thornton, Sault Ste. Marie, Ont. Date of contract, June 26, 1920. Amount of contract, unit prices.

## POST OFFICE DEPARTMENT.

The following is a statement of payments made in June for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders.	Amount on orders.
Making metal dating stamps and type, and other hand stamps and bass cown seals.....	\$ 959.06
Making rubber stamps, etc.....	118.83
Supplying stamping material, pads and ink.....	207.45
Supplying mail bag fittings.....	4,051.16
Scales repaired.....	36.90
Hampe's repaired.....	29.50
Making up and supplying letter carriers' uniforms....	8,260.20

## PRICES RETAIL AND WHOLESALE IN CANADA, JUNE, 1920

**T**HE feature of the prices movement was a substantial decline in some raw materials, particularly in wool, jute, raw silk, hides, raw furs and turpentine. There were also decreases in a number of farm products. On the other hand there were increases in some grain, in cattle, sugar, coal, coke, bricks and paper. In retail food prices, meats, sugar and potatoes were again higher.

The average cost of a weekly food budget in terms of the retail prices in some sixty cities at the middle of the month was \$16.92 as compared with \$16.66 at the middle of May, \$13.72 in June, 1919, and \$7.35 in June, 1914. The chief increase was in potatoes, which averaged \$6.51 per bag as compared with \$2.12 in June, 1919. As the budget includes a fairly large quantity of potatoes to represent potatoes and other fresh vegetables, this increase accounts for a large part of the increase in the cost of the food budget as compared with June, 1919. Onions, however, were also very high in price, while canned vegetables were little changed from a year ago. Sugar was also much higher than a year ago and there were higher levels in eggs and butter, meats, bread, flour, rice, evaporated apples and prunes.

In wholesale prices, the Departmental index number fell to 349.3 as compared with 356.6 for May, 284.1 for June, 1919, and 135.3 for June, 1914. The chief decreases for the month were in hogs, sheep, hay, potatoes, lake fish, butter, eggs, wool, jute, raw silk, hides, some metals, turpentine, raw furs and rubber, but there were increases in oats, barley, corn, cattle, cheese, sugar, cotton goods, iron products, coal, coke, gasoline, coal oil, bricks, chemicals and paper.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc. The list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workingmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central, without modern conveniences or with incomplete conveniences.

The weekly family budget calculated in terms of the average prices in the cities for which reports are received includes twenty-nine staple foods, laundry starch, coal, wood, coal oil, and rent, these being the items for which statistics have been obtained each month and published in the LABOUR GAZETTE since January, 1910. The quantities of each commodity included are modifications of those employed in similar calculations by various authorities. For some articles comparatively large quantities are included owing to the absence of other important items of the same class. For in-

stance the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained.\* In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light, and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included, it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or in any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal

to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

In meats there were substantial advances, the greatest being in sirloin steak, which averaged 41.5c. as compared with 39.3c. in May, increases appearing in a number of the cities throughout the country. In round steak, rib roast and shoulder roast and veal there were also increases. Mutton averaged 2c. per pound higher. Pork advanced less than beef, while lard declined.

Eggs showed a slight increase in the average, there being increases in some localities with decreases in others, while in half of the cities there was little change. Milk averaged slightly lower, decreases having occurred in ten cities, following decreases in eight other cities a month before. Butter declined in a number of the cities.

Bread advanced about  $\frac{1}{2}$ c. per lb. in half of the cities. Flour and rolled oats were up in a number of the localities, but tapioca declined in several. Canned vegetables were practically unchanged. Onions had risen steeply in May, reaching 20c. per lb. in several cities, but declined in many cities in June. Potatoes had risen steeply in February and again in May. The average price per bag in January was \$3.09, as compared with \$1.87 in January, 1919. In February the price averaged \$3.91, in May \$6.15, and in June \$6.51. New potatoes, chiefly imported, came on the market at very high prices, but as consumption decreased and supplies from the new crop increased, the prices fell rapidly. By the middle of June decreases had occurred in twelve of the cities and by the end of the month the

\*At times when the price of an article heavily weighted for this purpose rises (or falls) abnormally the increase (or decrease) in food prices so indicated is exaggerated and this should be taken into account in using the budget as an indicator of changes in the cost of living.

\*December only. †See footnote page 913.

downward movement had become general.

In jams and canned fruit there were a number of advances due, it was reported, to the high price of sugar and the higher cost of new supplies. Corn syrup also advanced in several of the cities. Sugar advanced and reached 22c. per lb. for granulated in over half of the cities, 25c. in several, and 24c. in others. In only five cities was the price as low as 20c. and in none lower.

Anthracite and bituminous coal were higher in several of the cities. Wood also advanced slightly. Coal oil advanced in many of the cities. Rent showed some advances.

### Wholesale Prices

**GRAINS AND FODDER.**—Wheat was steady at the prices fixed early in the year. Barley advanced from \$1.80 per bu. to \$1.92½ at Winnipeg, and oats from \$1.17 to \$1.31. Flaxseed declined from \$4.51 per bu. to \$4.10. Hay was \$2.00 lower at Montreal and \$1.00 lower at Toronto at \$30 per ton.

**ANIMALS AND MEATS.**—At Winnipeg, the best cattle rose from \$16 to \$17 per 100 lbs., but fell back to \$16. At Toronto, butcher cattle rose from \$14.75 to \$16. Beef, dressed, advanced to 34c. per lb. for hindquarters and 22c. for forequarters. Hogs fell from \$19.25 per 100 lbs. to \$18.25, but recovered to \$19.00 in the last week. Sheep were down from \$10.00 to \$8.50 per 100 lbs.

**DAIRY PRODUCTS.**—Finest creamery butter at Montreal had fallen from 60c. to 54¼c. in May, but in June rose to 57½c. per lb. Creamery solids at Toronto fell to 55c., but rose to 59c. Dairy butter was lower at 45-51c. Cheese averaged slightly higher at 29c. Eggs rose at Toronto from 52-53c. to 56-58c. per doz.

**FISH.**—Lake trout were lower at 16-

17c. per lb. and whitefish at 18-19c. The dry fish market on the Atlantic coast was dull, but stocks of the old catch had been pretty well cleared out.

**FRUIT AND VEGETABLES.**—Lemons and oranges were up to 50c. per box. Prunes were easier. Canadian strawberries came on at Toronto at 25-30c. per box, but fell to 17-20c. the next week. Potatoes were down to \$6.75 per bag in small lots at Toronto and at Montreal fell to \$4.75 in car lots.

**MISCELLANEOUS FOODS.**—Oatmeal was firmer and flour was higher at Montreal. Some brands of sugar advanced 50c. per 100 lbs., reaching the same price as the others had reached in May, \$19.26 per 100 lbs. in barrels at Toronto.

**TEXTILES.**—Ontario unwashed wool was again lower at 18-28c. per lb., and the market was reported to be uncertain. Raw cotton was slightly lower at 39.25c. per lb. Cotton goods averaged higher. Raw silk, Japan, was lower at \$6.80 for Kansai No. 1, filatures, as compared with \$16.40 in January. Italian extra classical was also lower at \$9.00 per lb. Jutes were lower also.

**HIDES, LEATHER, BOOTS AND SHOES.**—No. 1 beef hides fell to 15c. per lb. at Toronto and calfskins to 20c. Horse-hides were down to \$5.00-6.00 each.

**METALS AND IMPLEMENTS.**—Iron bar, black sheets and galvanized sheets were slightly higher, but wrought iron scrap declined from \$27 to \$24 per ton. Brass was up, but lead, quicksilver, silver, spelter, solder and tin were lower. Axes advanced.

**FUEL AND LIGHTING.**—Bituminous coal at Montreal rose from \$9.50 to \$10 per ton and anthracite from \$12.90 to \$13.50. Connellsville furnace coke rose to \$14.50-15.00 per ton at the ovens. Gasoline was 1c. higher at 30c at Toronto, and coal oil at 27½c.

**BUILDING MATERIALS.**—Shingles and rough lumber were lower on the Pacific coast. Bricks, building paper, soil pipe

# INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR JUNE, 1920, MAY, 1920, AND JUNE, 1919, 1918, 1917, 1916, 1915, 1914, AND 1913.

(Average price 1890-1899=100.)

\*Preliminary figures. †Ten Commodities off the market, fruits, vegetables, etc., one line of spelter was dropped in 1915.

and benzine were higher, but linseed oil was easier. Turpentine declined from \$4.25 per gallon to \$3.50.

HOUSE FURNISHINGS. — No changes were reported.

DRUGS AND CHEMICALS. — Alcohol,

borax, carbolic acid, copperas and glycerine advanced.

MISCELLANEOUS.—In raw furs, mink and skunk declined. Malt and newsprint paper advanced, but raw rubber declined.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest statistics available as to the prices movement in the United Kingdom and in other countries.

### United Kingdom

In the United Kingdom the retail prices of food at the first of June were reported to be 155 per cent higher than in July, 1914, as compared with 146 per cent higher at the first of May, the rise being due mainly to the increase in granulated sugar, potatoes, and eggs. The average price of granulated sugar rose from 10d. per pound to 1s. 2d. The average price of milk fell from 9d. per quart to 7¾d., and butter was slightly cheaper. The increase in clothing since July, 1914, was estimated to be 330 per cent. In fuel and light the retail prices of coal were found to be up 135 per cent, whereas on May 1 the price had risen only 75 per cent. Gas had increased 65 per cent, lamp oil 200 per cent, candles 260 per cent. The average increase in the cost of fuel and light was estimated at 125 per cent. The increase in rent was estimated to have been between 15 and 20 per cent, due to increases in local taxation as other increases were forbidden by the Increases of Rent Restriction Acts. The increase in the cost of living from July, 1914, to June 1, 1920, for a workingman's family was, therefore, estimated to have averaged 150 per cent. In wholesale prices the index number of the *Economist*, London, indicated a slight decline at the end of May and a much greater decline at the end of June, all groups being down except cereals and meats.

### Belgium

The *Revue du Travail* for Belgium reported the general level of retail prices of food and other necessities at the middle of March to be 6 per cent higher than in February, and 345 per cent higher than in April, 1914. In the twelve principal centres the average increase in food was 364 per cent, in clothing, fuel and light 345 per cent, and in the less necessary articles 396 per cent.

### Italy

In Rome the general level of food prices in April was reported by the Municipal Labour Office to be 3.3 per cent higher than in March and 210 per cent higher than in 1914. Other necessities, including clothing, fuel, lighting, rent, etc., were 206 per cent higher than in 1914. In Milan the Municipal Labour Office reported the cost of maintaining a pre-war standard of living for a family of five in May, 1920, to be 11.8 per cent higher than in April and 338 per cent higher than in 1914. Since 1914, clothing showed an increase of 492 per cent, heat and light 436 per cent, and rent 8.3 per cent.

### United States

Wholesale prices in the United States fell slightly during May as shown by the index numbers of both Bradstreet and Dun for June 1 and further increases appeared for June as shown by the index numbers for July 1. *Dun's Review*, July 10, 1920, reported:

After an upward turn that carried prices, on the average, nearly 120 per cent above the pre-

c6 months.

war level, the recent decline in the index number seems trivial, and it is still being intimated in some quarters that the current downward movement may reflect nothing more than a passing development. Yet influences are at work, as has been previously stated, that apparently foreshadow further yielding of prices, and the fact is not to be disregarded that a greater readjustment in Dun's compilation has been prevented chiefly by the sustained firmness of foodstuffs, as a whole, and that the im-

portant clothing class reveals a decisive recession. That consumption of commodities in this country has lately been diminished is scarcely to be doubted; and that the contention that prices cannot decline while production costs remain so high is one which is being questioned by not a few people. The increasing desire to move goods, which is not confined to retail circles, but which is also noted in various primary channels, is significant of the reversal of sentiment among sellers, and indicates that markets are no longer one-sided.

### WORKMEN'S COMPENSATION IN ONTARIO DURING 1919

THE report of the Workmen's Compensation Board of Ontario for 1919, the fifth year of the operation of the Act, records a substantial increase over previous years in the amounts disbursed. Although fewer accidents were reported, being 44,260 as compared with 47,848 in 1918, the benefits in 1919 totalled \$4,192,859.93, or an average of \$14,000 per day, compared with a total of \$3,883,994.84 in the previous year. This increase is stated to be due to higher wages and to extensions of widows' and children's allowances and medical aid under amendments which took effect early in the year. The wage increases which automatically raise the amount of compensation for disability are shown by the average weekly income of injured workmen, as follows: in 1915, \$13.27; in 1916, \$15.63; in 1917, \$19.06; in 1918, \$21.93; in 1919, \$24.80. More than 100,000 people (including dependants) were benefited by compensation, while about half a million workmen were under the protection of the Act. The report states that only 1.71 per cent of the assessment paid by employers in Ontario last year went toward expenses, and it is claimed that, "Probably under no other law does so nearly the whole of what employees pay for accidents go for the benefit of the injured workmen and their families." In contrast with this, it is claimed that in England under the system of individual liability and court procedure, about half the assessments are eaten up by expenses. In the United States where private in-

surance companies deal with injured workmen more than 75 per cent of the premiums paid by employers are intercepted before they can reach the workmen or their widows and children. The Ontario system results in more liberal benefits being available for the employees, and in lighter assessments for the employer. The average rates of assessment of employers in the five years since the Act came into force were as follows: in 1919, \$1.22 per \$100 of payroll; in 1918, \$1.09; in 1917, \$0.99; in 1916, \$1.09; in 1915, \$1.27. The increase of assessments for 1919 was largely due to amendments to the Act increasing widows' and children's compensation and abolishing the time limit of one month for medical aid.

The average cost per accident in which compensation was paid was \$135.80, of which \$121.71 was for compensation and \$14.09 was for medical aid. Accidents are classified under three heads: first, those resulting in temporary disability, the average cost of these being \$47.21 (\$35.70 for compensation and \$11.51 for medical aid); second, permanent disability accidents, of which the average cost was \$708.87 (\$673.06 for compensation and \$35.81 for medical aid); third, fatal cases (including those in which there were no dependants) the cost averaging \$2,156.28, while of dependency cases alone the cost averaged \$3,092.37. Fatalities numbered less than one per cent of the total cases dealt with during the year. Permanent total disability cases were less than one-tenth of one per cent

of the total; permanent partial disability cases were 6.50 per cent; temporary disability cases were 57 per cent, while about 36 per cent of the total, involving less than seven days' loss of time, called only for medical aid. The aggregate time lost during 1919, not including loss through death or permanent disability, was 573,653 working days; ninety per cent of those disabled lost less than six weeks' work; while the average time lost in disability cases was 19.75 days. In many cases, however, the effects of an accident may continue beyond the year, and the full measure of disability is not taken until after the close of the second year. The average age of the injured workers was 34.93; 24 per cent were foreigners; 41 per cent were unmarried, and about 5 per cent were females.

Up to the present time few cases of malingering have been brought to the notice of the Board, one of the chief objections raised against the enactment of the Workmen's Compensation law being thus shown to have little justification.

The report contains a chapter by the statistician of the Board, who presents the results of a special investigation into the effects of permanent injury on the wage earner. These results afford some evidence that the pensions awarded in most cases meet the wage loss consequent from injury, and "that there is an opportunity for every disabled worker, provided he be willing to seize it, to earn wages, which with his pension will bring his earnings to a parity with what he was earning at time of injury."

In an appendix to the report an address by the president of the Board is reproduced, giving an analysis of the Ontario Act and the method of its administration. The strong points of the law, he claims, are "simplicity of procedure, expeditious payment of benefits, elimination of litigation and expense, and limitation of the employer's burden as nearly as possible to what the workmen and their dependants actually receive."

## RECENT LABOUR LAWS OF CANADA, NEW BRUNSWICK, ONTARIO, ALBERTA AND BRITISH COLUMBIA

**T**HE present article is a summary of various laws bearing directly or indirectly on labour matters and recently enacted by the Dominion Parliament or by the provincial legislatures of New Brunswick, Ontario, Alberta and British Columbia. Legislation recently enacted in the provinces of Quebec, Manitoba and Saskatchewan was summarized in the May issue of the LABOUR GAZETTE.

### Canada

At the session of the Dominion parliament which closed on July 1, various laws were passed of interest to labour. These included measures amending the

Industrial Disputes Investigation Act, 1907; the Employment Offices Co-ordination Act; the Technical Education Act; and an Act respecting the Director of Coal Operations, having jurisdiction over what is known as District 18, in Alberta and South-eastern British Columbia.

Six amendments were made to the Industrial Disputes Investigation Act, 1907. One provides for the establishment of a single board of conciliation and investigation where a number of individual employers, companies or corporations are acting together or in the opinion of the Minister have interests in common; formerly it was necessary to obtain the consent of each individual employer to the establishment of a

board, or to establish a separate board for each employer. An amendment which replaces Section Sixteen of the Act requires the consent of the majority of trade unionists affected, or a majority of the employees affected when unorganized, before application for a board can be made on their behalf; this consent must be obtained by a vote by ballot, at a meeting called on not less than three days' notice. Section Twenty of the Act, relating to the transmission of copies of applications for boards or statements in reply, is amended to conform with the first amendment. Section Thirty-four, relating to the payment of witnesses, was amended by providing a minimum allowance of four dollars per day. Section Fifty-seven was amended by forbidding any alteration in respect to wages or hours or any action in the nature of a strike or lockout until a copy of the report of a conciliation board has been delivered through the registrar to both the parties affected. Section Sixty-three (a), which was added to the Act in 1918, is amended by enabling the Minister to establish a board of conciliation when a strike or lockout seems to the Minister to be imminent.

The Employment Offices Co-ordination Act was amended to empower the Minister of Labour to set aside from the annual appropriations an amount for the maintenance of employment offices other than those operated by provincial governments, provided that no such office should receive assistance under the Act unless the Minister were satisfied that the provincial government concerned did not propose to enter into an agreement for the maintenance of employment offices in that province. The amendment also provides that the sum set aside for municipal or other offices approved by the Minister but not operated by provincial governments shall be distributed among the offices *pro rata* with their expenditures as provided in the case of offices conducted by provincial governments.

The Technical Education Act was amended by repealing subsection 2 of

Section Five, which prevents the employment of the federal grant for "the supplying of furnishings and equipment for any technical education institution established in the province prior to the first day of April, one thousand nine hundred and nineteen."

By the Act respecting the Director of Coal Operations for Alberta and Southern British Columbia, the orders issued by this officer under the authority of various orders-in-council under the War Measures Act were validated and continued in force, and the Director of Coal Operations was empowered to continue in the exercise of his authority, which would otherwise have ceased with the close of the session of parliament.

#### New Brunswick

During the session of the New Brunswick Legislature which lasted from March 6 to April 24, an Act consolidating and amending previous acts concerning the protection of factory workers was passed and also amendments regarding workmen's compensation, workmen's liens, vocational education and housing.

The amendment to the Factories Act provides that the Factory Inspector shall carry out his duties under the direction of the Workmen's Compensation Board upon which have been conferred many of the powers formerly reserved to the Lieutenant-Governor in Council. Provisions in the previous Act which have to do with the health of employees have been omitted as coming properly under the Health Act. New sections require employers to produce certificates of age for all children or young persons employed by them who are under sixteen years of age. Such certificates must be signed by a parent of the child and penalties are provided for contravention of these provisions by employers or parents. An exemption from the terms of the Act is permitted in the case of lobster, fish and fruit canning establishments within the Province. Prior to this amendment, only canning factories outside of cities and towns were excluded. The sections

of the Act relating to the regulation and inspection of steam boilers provide for the appointment by the Lieutenant-Governor in Council of an inspector or inspectors of steam boilers, and restrict the appointment of the members of the Board of Examiners to stationary engineers who have not less than ten years' experience and who are practically conversant with the construction of boilers and the operation of steam plants.

Changes in the Workmen's Compensation Act increase the benefits payable on account of accident or disease. The maximum amount that may be paid in case of permanent partial disability is raised from \$1,500 to \$2,500; the allowance for burial expenses from \$75 to \$100; the monthly payment to a widow or invalid widower from \$20 to \$30 and the allowance for a child from \$5 to \$7.50 per month. Formerly the Act provided that payments in respect of a child should cease when the child attained the age of sixteen years; the recent amendment raises this age in the case of girls to eighteen years. The clause of the Act of 1918 limiting the total amount of compensation to \$3,500 is repealed. Payments at the increased rate are to be made from January, 1, 1920, but is retroactive to January 1, 1919, in the case of widows, invalid widowers or children. The clause stipulating that regard must be had to any military or other pension received by a workman in the consideration of the amount due is struck out, but a limit of \$1,500, is imposed on the amount of earnings that may be considered as a basis for the calculation of compensation due. Provision is made for the furnishing of medical, surgical, hospital and skilled nursing service, the cost to be paid from the accident fund. The Board is empowered to direct the installation of first-aid appliances and service in any industries it deems proper.

By an amendment to the Workmen's Lien Act, the latter is extended to cover work in connection with pulpwood, cedar posts, telegraph poles and railroad ties which was formerly exempted from the provision that any person

performing certain labour should have a first lien on the logs or timber for the amount of wages due.

The Vocational Educational Act, 1918, was amended to provide for the drawing up of a budget by the local vocational committees to cover the expenses for the school year and to confer on these committees, subject to certain conditions, authority to provide vocational instruction and to make the necessary arrangements therefor. Changes are made also in the sections of the Act regarding grants to the local vocational committees by the Province.

An amendment to the Housing Act, 1919, extends the provisions of the Act to cover incorporated villages as well as towns and cities.

### Ontario

The Ontario Legislature enacted a considerable number of labour laws during the late session which extended from March 9 to June 5, 1920. Acts relating to minimum wages for women and allowances for mothers were passed, and amendments made to existing laws regarding workmen's compensation, wages, factories, etc.

The Minimum Wage Act provides for the appointment of a board of five members, two of whom must be women, with power to conduct such investigations as it may deem necessary for the purpose of ascertaining working conditions and rates of wages, and to establish minimum rates of wages for female employees in any trade, occupation or calling in Ontario. Special rates may be fixed for part-time employees, apprentices or workers handicapped in some manner. The Minimum Wage Board may convene a conference, representing equally employers and employed with an impartial chairman, to determine a proper minimum wage to be paid in any industry. In the event of failure on the part of such a conference to come to any agreement, a new conference may be convened or regulations may be issued by the Board establishing certain minimum rates. Regulations of the Board

become effective on publication. Provision is made for the payment of per diem allowances and expenses to members of the Board for any period during which they are engaged on business relating to the administration of the Act. Farm labourers and domestic servants are excluded from the scope of the law which is to become operative on October 1, 1920.

The Mothers' Allowances Act, which is to go into effect also on October 1, provides for assistance to mothers of two or more dependent children under fourteen years of age, payments being restricted to widows or wives or inmates of a hospital for the insane in Ontario or of men permanently incapacitated from supporting their families. It is required, further, that such a mother must be resident in Canada at the time of the death or total disability of the father and must have been living in Canada for three years, and in Ontario for two years, prior to the application for an allowance. Applicants must be British subjects or the widows or wives of British subjects and must be fit and proper persons to have the care of children. For the administration of the Act a commission composed of five persons, two of whom must be women, is to be appointed by the Lieutenant-Governor in Council for periods of one, two, three, four and five years respectively. Subsequent appointments are to be made for a term of five years. A per diem allowance and expenses are payable to each member of the commission for attendance at meetings of the commission, but there is to be no other remuneration. Applications for assistance are to be received by the commission through local boards or otherwise. The municipality in which a beneficiary has resided for one year is required to pay to the Provincial Treasurer one-half the amount of the allowance, the remainder to be paid by the province. The commission is authorized to issue regulations approved by the Lieutenant-Governor in Council, with regard to the appointment of local boards, inquiries and

investigations by such boards as to persons to whom allowances may be paid, their property qualifications and other matters enabling the carrying out of the provisions of the Act.

The Workmen's Compensation Act was amended with regard to the amount of benefits payable. In case of death from accident or disease occurring in the course of employment, the maximum allowance for burial expenses is increased from \$75 to \$125; the monthly allowance to a widow is raised from \$30 to \$40, and the child's allowance where the deceased workman leaves a widow, from \$7.50 to \$10. In the case of orphan children, the monthly payment is increased from \$10 to \$15 and in all cases the maximum amount payable is 66 $\frac{2}{3}$  per cent of the workmen's average earnings instead of 55 per cent as formerly. Provision is made for the payment to a suitable person who acts as foster-mother of the children of the same monthly allowance as if she were the widow of the deceased workman. A lump sum payment of \$100 is also to be made to a widow or foster-mother. In non-fatal cases, the amount of compensation to a workman is raised from 55 per cent of his average weekly earnings to 66 $\frac{2}{3}$  per cent of such earnings, the minimum allowance to be \$12.50 per week. The new scale of benefits is to apply to fatal accidents happening on and after July 1, 1920, but pensions payable on account of death from accidents prior to that date are to be adjusted to the new scale from July 1. The provision of medical aid is extended to include the furnishing of artificial members and apparatus rendered necessary as a result of the accident.

An amendment to the Factory, Shop and Office Building Act declares ineffective, after April 30, 1920, all early closing by-laws in so far as they apply to the sale of fresh fruit. The amendment adds a section prohibiting the use in any factory of elevators or hoists constructed on the principle of an endless belt or similar contrivance unless provided with certain safety-devices. By

an amendment to the Wages Act, 70 per cent of any debt due to a workman in respect of his wages is exempt from seizure or attachment, but the judge hearing the case is empowered to increase or decrease this amount according to circumstances. Formerly \$25 was the amount declared exempt.

The Fire Departments Hours of Labour Act, which is to become operative on January 1, 1921, provides that employees of municipal fire departments shall be off duty one day of twenty-four hours in every calendar week.

The Railway Employees' Voting Act, 1918, which provided that municipalities might pass by-laws enabling the application of the act in order that railway employees whose duties necessitate their absence on polling day might vote at elections, was amended to cover elections for the board of education or the board of public school trustees or the voting on by-laws, and to require any municipality to pass a by-law declaring the act to apply if a petition to that effect has been signed by at least twenty-five such railway employees and presented to the municipal council at least two weeks prior to the date of the nomination meeting.

An amendment to the Stationary and Hoisting Engineers Act, 1919, which provided for the appointment of a board of examiners of three members in place of the five members required by the previous Act, repeals the section to this effect and enacts that the board may consist of three or five members.

A Technical Education Act was passed to permit the establishment of schools for technical training, the cost of which is to be paid from the funds appropriated by the Legislature or received from the Dominion Government in accordance with the provisions of the Federal Technical Education Act, 1919.

Retiring allowances are provided for employees of the Provincial Public Service by an Act of the recent session. Retirement is to be compulsory at the age of seventy years and optional at

sixty-five; the allowance is based on the average yearly salary during the last three years of service, and is not to exceed one-fiftieth of such average salary multiplied by the number of years' continuous service. Allowances may not exceed \$2,000 and no more than thirty years' service may be counted. Provision is made for the payment of allowances to persons serving more than ten years and for allowances to widows or children of persons entitled to allowances at the date of their death. The fund from which such payments are to be made is to be formed of contributions from the salaries of the employees at rates varying with their ages, and from the Government.

An amendment to the Ontario Housing Act, 1919, raises the amount which the cost of a house erected under the terms of the Act may not exceed, and provides that no new loans may be made under the provisions of the Act after December 31, 1920. The Municipal Housing Act, passed during the session, also limits the cost of houses erected under its terms.

#### Alberta

The Legislature of Alberta was in session from February 17 to April 10. Several Acts of interest to industrial workers were amended, among them being the Workmen's Compensation Act, 1918, and the Factories Act, 1917. The Mothers' Allowance Act, 1919, was amended by the insertion of a clause limiting the granting of allowances to widows and insane persons' wives resident in the province of Alberta at the date of the enactment (April 17, 1919), to widows whose husbands were resident at the time of their death and to wives whose husbands were living in the province at the time of their commitment to a hospital for the insane. An amendment to the Boilers' Act, 1918, declares the act not to apply to any boiler or steam-heating plant with a capacity of two horse-power or under, nor to railways under the supervision of the Dominion Government nor to boilers

subject to inspection under the Dominion Steam-boat Inspection Act. The original act exempted from its provisions steamboat boilers and boilers owned or operated by railway companies employing competent inspectors.

The Early Closing Act is amended by repealing the clause requiring the approval of the Lieutenant-Governor in Council of early closing by-laws and empowering him to declare such by-law of no effect, wholly or in so far as it affects a particular class of shops.

At the session of the Legislature in 1919, an amendment was made to the Factories Act providing that the Lieutenant-Governor in Council might appoint, in any town having a population of more than five thousand, an advisory committee of two persons representing employers and employed, together with a third person appointed by the Attorney General to make recommendations regarding the hours of employment of any person in a factory, shop or office, and concerning the minimum wages at which girls and women might be employed. The chief factory inspector might issue regulations putting such recommendations into effect. At the recent legislative session this clause was repealed and provision made for the establishment of minimum wages and maximum hours by procedure more in line with that adopted in other provinces. An advisory committee must be appointed for the province, four members to be chosen by the Lieutenant-Governor in Council to represent equally employers and employed and a fifth member to be nominated by the Attorney General. Authority is given such committee to investigate and determine the amount that shall be paid as a minimum wage to any one under eighteen years of age, or to any woman or girl who is employed in a factory, shop or office. The number of hours per day and per week that may be required of any person and the number of apprentices that may be permitted in any factory, shop or office are also to be determined by the committee, which has power to call witnesses, examine them under oath and

compel the production of such documents as may be necessary. It is declared to be unlawful for any employer to discharge or threaten to discharge, or to discriminate in any way against an employee because such employee has given evidence, or is about to give evidence, in any inquiry made relative to this act. Compensation for the services and expenses of the members of the committee is to be determined by the Lieutenant-Governor in Council. The latter is empowered to issue orders putting into effect the recommendations of the advisory committee.

The amendment to the Workmen's Compensation Act provides that any employer whose industry is not within the scope of the Act may have his employees brought under the Act by application to the Workmen's Compensation Board, if the application is approved by the Board and not objected to by a majority of the employees. This clause does not apply to any industries specifically exempted from the operation of the Act, and the application must be for a period of not less than twelve months at the expiration of which notice may be given of withdrawal from the scope of the Act. The Board may require an employer to include in his pay-roll the wages of all workmen employed by him in any industry, which, if carried on separately, would be an industry within the meaning of the Act. The clause exempting travelling salesmen and clerical workers not exposed to the hazards of the industry is repealed, and farming and ranching are specifically excluded from the operation of the Act. Extensive powers are given to the Board with regard to measures to be taken for the prevention of accidents and diseases. Regulations regarding proper sanitation and the installation or adoption of safety appliances or devices may be issued, and in the event of failure to comply with such orders or in case of special danger the Board may order the employer to close down the whole or any part of the industry concerned. Any assessment levied on an employer is given priority, as respects the property

of the employer within the province, over all debts, mortgages, etc., excepting wages due to employees. If an employer fails to retain from the wages of his employee the amount he is entitled to retain for purposes of medical aid, he is to be personally liable to pay to the Board such amount. The scale of compensation is raised considerably by the recent amendment. Compensation at the new rates from the date of the amendment is payable to workmen or dependents in respect of an accident which occurred prior to the change in the Act. Formerly \$2,500 was fixed as the maximum amount which might be paid in the case of death or permanent incapacity. This limit is removed by the recent amendment and monthly payments are continued to a widow till her re-marriage or death. In the event of re-marriage a lump sum payment of \$480 is to be made as under the previous act. In the case of death or of incapacity the monthly benefits to widows or invalid husbands, are increased from \$20 to \$30, and from \$5 to \$7.50 for each child under sixteen years of age, the maximum monthly allowance to a family being increased from \$40 to \$60. A penalty of \$25 per day is to be imposed for every day of failure on the part of any person to comply with the provisions of the Act.

In order to qualify for the grant of the Federal Government in aid of technical education, the Schools Grants Act of Alberta was amended to provide annual grants equal to 40 per cent of the salaries of approved teachers giving instruction in commercial, technical or industrial subjects, the maximum grant to be \$600 for any teacher so employed. A grant equal to 20 per cent of the salaries of approved teachers giving instruction in household economics, manual training, music or art is to be made, the grant not to exceed \$300 for each of such teachers. For approved equipment for teaching commercial, technical or industrial subjects, a grant equal to 25 per cent of the expenditure thereon is payable, the amount not to exceed \$4,000 in any year. In the case of school districts employing less than thirty

teachers and providing instruction in any of these subjects, a grant is payable equal to 50 per cent of the salaries of the teachers engaged in such work whose qualifications have been approved by the Department of Education of the province and also a grant equal to 50 per cent of the expenditure on approved equipment, the maximum grant in each case being \$1,200 in any year.

#### British Columbia

In British Columbia the Legislature began its session on January 29, and was prorogued on April 17. The labour legislation enacted comprised amendments regarding workmen's compensation, factories, weekly half-holidays and the payment of wages, and an Act to provide for mothers' pensions.

The Mothers' Pensions Act provides for the payment of allowances to mothers of one or more children under the age of sixteen years, who are widows or who are wives of men who are inmates of an asylum for the insane or of a penal institution, or who are unable through illness or accident to support their families. Mothers whose husbands have deserted them and any others whom the provincial Superintendent of Neglected Children deems proper to be assisted are within the scope of the Act. Assistance is limited to mothers who are British subjects and have been resident in the province for at least eighteen months prior to making application for allowances. Authority is given to the Superintendent to restrict help to those mothers whom he deems proper persons to have the care of children. The Act fixes the maximum monthly allowance for a mother with one child under sixteen years of age at forty-two dollars and fifty cents, and an additional seven dollars and fifty cents for each additional child under sixteen years of age. The payment of allowances is to cease on the mother's re-marriage or her removal from the province. Provision is made for the appointment by the Lieutenant-Governor in Council of local advisory boards to assist the Super-

intendent of Neglected Children in the proper carrying out of the Act.

The amendment to the Workmen's Compensation Act increases the amount of compensation payable in the event of accident or disease. The monthly allowance to a widow or invalid widower is raised from \$20 to \$35; the allowance to a child, where there is a surviving parent, from \$5 to \$7.50, and to an orphan child from \$10 to \$12.50, the maximum in the case of orphan children being increased from \$40 to \$50 per month. Where there is a widow or invalid widower with children, the maximum allowance is raised from \$40 to \$65. Where the dependents are other than a widow, widower or children, the maximum monthly payment to a parent or parents of the deceased is \$30 in place of the \$20 fixed by the original Act, the maximum to such dependents not to exceed \$45 in the whole. The sum permitted to be paid

to a widow on her re-marriage in lieu of a continuance of the monthly payments is fixed at \$480 and not maintained at an amount equal to the monthly payments for two years as was formerly the case.

An amendment to the Factories Act simplifies the wording of the Act. By an amendment to the Weekly Half-Holiday Act, certain public holidays are brought within the scope of the Act, and shops required to observe a weekly half-holiday are to be closed also on such public holidays.

Provision is made by an amendment to the Act concerning the semi-monthly payment of wages that, in the case of coal-miners, wages must be paid on a Saturday and at least fortnightly. An amendment to the Mineral Survey and Development Act makes the provision regarding the semi-monthly payment of wages and the security for them more comprehensive as regards working leases on mining property.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**I**N 1914 an employee was struck by a falling plank when at work, and his left shoulder was broken. While he was temporarily incapacitated, his employer paid him half his wages, as provided by the law of the Province of Québec. The following year he became afflicted with a disease of the spine, which he attributed to the accident, and he brought action against his employer, under the law which permits the revision of the terms of an indemnity within four years from the date of the agreement between the parties, or of the definite judgment of a court, claiming an annual payment of \$600.

**Payment of  
legal indemnity  
does not make  
agreement  
allowing revis-  
ion of it in  
Québec**

Bench. The employer claimed among other things that the evidence showed the disease from which the plaintiff suffered was not a consequence or result of the accident, and that there had never been an agreement between the two parties, which was an essential condition before an action could be brought for a revision of the indemnity. The employee, however, claimed that the payment of half the wages implied a tacit agreement between the two parties. In the evidence given by the two doctors who attended him, the probability that the disease was a consequence of the accident was admitted, but it was stated that such a condition of the spine might arise from other causes.

It was held by the Court, with one judge dissenting, that the two doctors expressed opinions without being very sure of the relation of cause and effect between the disease and the accident, and that the employer could not be con-

The Superior Court of the district of Québec gave judgment in favour of the plaintiff and an appeal was entered by the defendant in the Court of King's

demned to pay the sum demanded on suppositions and probabilities. It was also held that there had been no agreement between the two parties, the payment of the half wages being made because the law required it, and unless the circumstances showed an arrangement made independently of obligations imposed by law, there could not be said to have been an agreement.

The judgment of the Superior Court was therefore annulled and the action dismissed with costs. (*Quebec—Gosselin v. Bélanger.*)

A roadmaker employed by a railway company in Alberta was injured by the wreck of a speeder, or a converted handcar, on which he was travelling in the course of his employment. He brought action against the railway company for damages. The trial judge, as reported in the LABOUR GAZETTE for December, 1919, on pages 1536 and 1537, dismissed the plaintiff's action, on the ground that it was hardly reasonable that the plaintiff should be able to engage himself to assist the defendant company in putting a defective road in good condition and at the same time hold the Company liable for any accident happening to him in the course of his duty. The plaintiff entered an appeal in the Alberta Court of Appeal, which reversed the findings of the lower court, basing its judgment on the following considerations: The conclusion of the evidence was irresistible that the accident which caused the accident was due to the bad condition of the truck. If the track was dangerous, the fact was that the plaintiff was put in a position of danger by the employer rather than that he accepted employment under conditions known to him to be dangerous. The plaintiff had requisitioned new rails for this part of the track and the Company was negligent in not supplying them. When his acceptance or non-acceptance of a risk

is left to implication, the workman cannot reasonably be held to have undertaken it unless he knew of its existence and had the means of appreciating its danger, and we are not warranted in extending the implication to cover a consent to encounter dangers aggravated by the defendant's neglect to supply the necessary material asked for to remove the unnatural dangers.

The appeal was therefore allowed, and judgment was given for the plaintiff for the sum of \$8,500 and costs, subject to defendant's right within thirty days to appeal from the amount assessed. (*Alberta—Malcahy vs. Edmonton, Dunvegan and British Columbia Railway Company.*)

A workman employed in painting houses was injured through an explosion of gasoline on a stove when preparing his mid-day meal. He brought action for compensation against his employer in the Superior Court at Montreal under the Workmen's Compensation Act of Quebec. On behalf of the employer it was claimed that the plaintiff had no right to use the stove in question and that as he was not engaged in his work at the time of the accident, he could have no recourse under the Workmen's Compensation Act.

It was held by the Court that under the Act a man's employment was not broken by an interval of rest, and still less by the time taken for meals, particularly if the meals were taken on the works or at a place permitted by the employer and under the control of a foreman. The accident on which the present claim was based took place during an interval for dinner and at a place designated by the defendant in the usual way as a place where his workmen could take their meals. This place was under the control of a foreman and therefore, the court said, came within the ambit of plaintiff's work. Judgment was accordingly given in favour of the

**Employer liable if workman through his negligence is exposed to unusual risks**

**Compensation awarded workman hurt when preparing noon meal**

plaintiff for \$103.95 damages and an annuity of \$33. (*Quebec—Boucher vs. Bourdon.*)

A youth was injured when working for the St. Maurice Paper Company.

**Compensation  
allowance not  
to be ordered  
paid pending  
judgment if  
case doubtful**

His father as tutor brought action against the Company under the Workmen's Compensation Act, Quebec, claiming \$2,500 damages. The Superior Court in the district of Joliette ordered the Company to pay the plaintiff

\$1.50 a day as provisional allowance, pending final judgment in the action. The Company appealed against this order, and the appeal was sustained by the Court of Appeal. In its judgment the Court of Appeal held "In an action in virtue of the Workmen's Compensation Act, provisional allowance shall not be allowed if defendant's plea denying responsibility is very serious on its face, and if the Court has serious doubts that plaintiff can obtain final judgment against the defendant." (*Quebec—Lanoue vs. St. Maurice Paper Company, Limited.*)

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

The full text of the recent decision of the United States Railroad Wage Board awarding increases in wages amounting in the aggregate to six hundred million dollars, to railway employees in the United States, is printed in this issue of the LABOUR GAZETTE. The issue also contains an exhaustive article on Workmen's Compensation in Canada, in which article the various provincial laws are examined and compared.

The cost of the weekly family budget of staple foods dropped very slightly, averaging \$16.84 at the middle of July as compared with \$16.92 in June, \$13.77 in July, 1919, and \$7.42 in July, 1914. The index number of wholesale prices again declined, being 346.8 for July as compared with 349.3 for June, 294.9 for July, 1919, and 134.6 for July, 1914.

At the beginning of July the percentage of unemployment among members of trade unions was 2.48, as compared with 2.88 at the beginning of June, and 2.57 at the beginning of July, 1919. According to returns received from nearly 5,000 firms, the total volume of employment in Canada remained fairly steady during July, there being slight variations only from week to week.

The time loss due to industrial disputes during July was less than during either June, 1920, or July, 1919. There

were in existence during the month 49 strikes, involving about 6,734 workpeople and resulting in a time loss of 81,221 working days. At the end of the month there were on record 19 strikes, involving about 1,442 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During July the Department received reports from nine Boards established to deal with disputes between (1) the Winnipeg Electric Railway Company and certain of its employees, being members of Street Railway Employees' Union; (2) the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers' Union; (3) the Toronto Hydro-Electric Commissioners and their employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers; (4) the Corporation of Moose Jaw and civic employees, members of Civic Employees Local Union No. 9; (5) the Canadian Pacific Railway Company and certain of its employees, engaged in the commercial telegraph service, members of the Commercial Telegraphers' Union of America; (6) the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being waterfront freight handlers, at Vancouver, B.C., members of Local No. 38-52, In-

ternational 'Longshoremen's Association; (7) Toronto Suburban Railway Company and its employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers; (8) the Toronto, Hamilton and Buffalo Railway Company and certain of its employees, being freight handlers, at Hamilton and Brantford, Ont., members of the Canadian Brotherhood of Railroad Employees, and (9) The Master Printers of Ottawa and certain of their employees, members of the Ottawa Typographical Union, No. 102.

Four applications were received for the establishment of Boards and a Board was established in connection with a dispute for which application had been received during the month of June.

#### **Registration of children in Quebec**

Since last spring when the issuing of registration cards to children began under the provisions of the Quebec Industrial Establishments' (Amendment) Act respecting child labour, about 8,000 children between the ages of fourteen and sixteen years have been examined by factory inspectors at Montreal, and 2,000 at Quebec. The cards show the name, age and nationality of each child, number of years of studies, whether an attendant at night school, ability to read and write, nature of employment, residence, complexion, height, weight, and any special mark of identification. A child cannot be employed unless in possession of one of these cards and in order to obtain one a certificate of baptism must be produced and ability shown to read and write.

#### **Ontario Bureau of Industrial Hygiene**

A bureau of industrial hygiene, under the supervision of Dr. J. G. Cunningham of Toronto, has recently been established in connection with the Department of Health of Ontario. The duties of the bureau are to investigate dangerous trades and report to employers methods of obviating danger to

workmen; to advise as to the most applicable and cheapest safety devices for the different industries; and to instruct employees how best to avoid accidents. Factory sanitation will also come within the purview of the bureau.

The formation of a Dominion committee with somewhat similar objects in view, the Committee on Industrial Fatigue, a branch of the Dominion Honorary Advisory Council for Scientific and Industrial Research, is discussed elsewhere in this issue.

#### **Progress of "Mothers' Allowances" in Canada**

The Mothers' Allowances Act passed at the late session of the Ontario Legislature, is the fourth act of its kind in Canada. Similar acts were passed in Manitoba in 1916, in Saskatchewan in 1917, and in Alberta in 1919. All these acts have been summarized in previous issues of the LABOUR GAZETTE. Three of the five commissioners to administer the Ontario Act have been appointed as follows: Rev. Peter Bryce, Toronto; Mrs. Adam Shortt, Ottawa, and Mrs. William Singer.

In Nova Scotia a commission was appointed in 1919 to inquire, among other things, into the practicability of a scheme for mothers' allowances for the province. Early in their investigations, however, the commissioners found that while much information, of a general character, was available, they could not arrive at any satisfactory conclusions, in the absence at the time of a reliable estimate of the number of mothers who would benefit by such a scheme.

#### **Medical care of smeltermen at Trail, B. C.**

In the June issue of the LABOUR GAZETTE mention was made of a proposed agreement between the Consolidated Mining and Smelting Company of Canada and three physicians of Trail, B.C., with respect to the medical treatment of the Company's employees and their families. The agreement was to be made subject to the approval of the Workmen's Compensation Board. In

return for certain medical benefits to the employees, the Company agreed to deduct from the wages of each employee \$1.30 per month and to pay the same over to the physicians. In the case of married men an additional sum of \$1 per month would be deducted, which sum would entitle members of their families also to certain medical benefits. These two proposals were submitted by the Workmen's Compensation Board to a vote of the employees in May last, and the ballot taken showed a large majority in favour of both proposals.

This vote was later protested by certain of the workers, and the Workmen's Compensation Board declared the result invalid and ordered another vote to be taken by secret ballot on July 5. The result of this ballot was as follows: Medical benefits for employees only (for which \$1.30 per month to be deducted); for, 353; against, 344. Majority of 9 in favour. Medical benefits for families of married employees (for which an additional \$1 to be deducted); for, 184; against, 201. Majority of 17 against. The first proposal therefore became operative on July 16.

#### Trade unions favour co-operative movements

Steps have been taken by the United Farmers' Co-operative Company to establish a co-operative distributive store at Toronto in conjunction with the labour organizations. At a public meeting recently held in the Labour Temple a joint co-operative committee was appointed composed of representatives of the Toronto District Labour Council, the Independent Labour Party, the Grand Army of United Veterans and the Canadian Federation of Labour. The company have agreed to open a co-operative general store, providing the joint committee sell one thousand or more United Farmers of Ontario associated stock certificates at \$10 each.

Under the auspices of the Trades and Labour Council of Windsor, Ont., a joint stock co-operative store, with 200 stockholders, has recently been opened in that city.

According to the British *Labour Gazette*, the closer connection of the trade unions in Great Britain with the co-operative movement is marked by the decision of the National Union of General Workers, at their conference in May, to transfer all union funds from ordinary banks to the Co-operative Wholesale Bank. A similar decision was made by the National Union of Clerks.

The Scottish Mine Workers' conference decided on a joint meeting with the Scottish Wholesale Society for the purpose of establishing facilities for banking. The Railway Clerks' Association decided that, as far as possible, investment funds should be placed on deposit with the Co-operative Wholesale Society, but the executive opposed, on practical grounds, a resolution advocating that the whole of their banking business should be transferred to the Co-operative Wholesale Bank.

#### Women's Labour Bureau in United States

An act has been passed by the United States Congress establishing a Women's Bureau in the Department of Labour.

The duty of the Bureau will be "to formulate standards and policies which shall promote the welfare of the wage-earning women, improve their working conditions, increase their efficiency and advance their opportunities for profitable employment." The Bureau has authority to investigate and report to the department upon all matters pertaining to the welfare of women in industry.

#### Austrian "Workers' Chambers" to review proposed labour laws

According to the British *Labour Gazette* for June, definite constitutional standing was assigned to workers' associations in Austria by a law which came into effect in May last, creating "Workers' Chambers" for the manufacturing industries, handicrafts, commerce, transport and mining. The Chambers are consulted as the authoritative voice of labour on all questions affecting the welfare of workers,

including insurance, unemployment, housing, food, health and education. All proposed labour legislation and executive regulations must be submitted to the Workers' Chambers before their adoption by Parliament. Each chamber is composed of two sections, one of manual, the other of non-manual workers, and the membership must consist of at least thirty and not over one hundred delegates, elected for five year terms, in accordance with regulations issued by the Department of Social Affairs. The two sections vote together in electing a president, but each section elects its own chairman, these officers also being appointed for a five-year term. While the chamber deliberates as a whole, each section may present independent recommendations to the Government. Workers' Chambers may also be required by the Department of Social Affairs to appoint labour representatives to act on joint committees of employers and employees for the discussion of industrial problems.

#### Jottings

The thirty-sixth annual convention of the Trades and Labour Council of Canada will be held at Windsor, Ont., commencing September 13. In the convention call reference is made to the increasing number of women in employment, and the importance of their problems, and unions which include women are requested to bear this in mind when electing delegates.

The annual convention of the Canadian Federation of Labour will be held in Hamilton, Ont., commencing August 23.

The quadrennial convention of the United Brotherhood of Carpenters and Joiners of America will open at Indianapolis on September 20. Canadian delegates will attend.

The Dominion Coal Company, of Sydney, N.S., announce that they will offer two scholarships at McGill University annually to their employees. Similar

grants are already made by the International Nickel Company and by the Granby Consolidated Mining and Smelting Company.

The Dominion Coal Company has established a department of industrial relations to supervise and compile statistics in connection with accidents, health of workmen, housing, first-aid and accident prevention.

A charter has been issued by the Dominion Trades and Labour Congress, to the Association of Federal Employees of Ottawa, an organization recently formed by a number of permanent civil servants at Ottawa. The new union is organized along lines similar to the National Federation of Civil Servants of the United States, and has a clause in its charter by which its members will not be involved in any outside trade-union disputes which may arise.

Branch organizations of the Association of Canadian Building and Construction Industries, which was organized at a conference of builders and contractors in November, 1918, have been formed in Montreal, Toronto, Ottawa, Hamilton, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver, and other cities.

At the annual meeting of the New Brunswick Medical Society, recently held at Moncton, a committee was appointed to arbitrate with the Workmen's Compensation Board with respect to fees paid by the Board for patients coming under the provisions of the Workmen's Compensation Act, which the society contended were too low. The opinion was expressed that in order to avoid a dual system of payments, all industrial accidents should come under the jurisdiction of the Board, employees on the National Railways being at present excluded. Contract work in general was discussed and disapproved of.

The British Railway Clerks' Association, at their annual conference in May, instructed the executive not to accept any agreement containing the principle

of a sliding scale of salaries based on the cost of living. On the other hand, the National Union of Scottish Mine Workers favoured an advance in wages equal to any advance in prices.

Clothing manufacturers of Rochester, New York, will co-operate with the government in training wounded veterans of the war who have been receiving education from the Federal Board for Vocational Education. Several firms have taken these men into their designing and manufacturing departments.

The National Society of Operative Printers and Assistants, England, are erecting, as a memorial to their members who fell in the war, a sanatorium for printers suffering from tuberculosis, a convalescent home, and a home for aged printers and their wives.

In order to cope with the housing shortage in London, England, the London County Council is contemplating the erection of a new town comprising 24,000 houses, with 20 schools, fire sta-

tions, libraries, and other public buildings, within the next five years, on an estate of 3,000 acres which has been acquired for the purpose, about eleven miles east of the city.

The United States Department of Labour has reported that during 1919, 3,374 strikes and lockouts took place in the United States, affecting 4,000,000 workers.

The New York State legislature has established a Child Welfare Commission to collect and study all laws relating to child welfare and make recommendations to the legislature of remedial legislation and other legislation necessary to establish a children's "code."

The New Jersey legislature recently passed a bill creating a State Industrial Safety Museum under the Department of Labour. \$25,000 has been appropriated for the purpose. As previously noted, the Factory Department of the British Home Office proposes to open a similar museum in London.

---

## INDUSTRIAL CONDITIONS DURING JULY, 1920

---

### I.—General Review

The total volume of the employment in Canada remained fairly steady during the month of July,

#### **The Labour Market**

with slight variations from week to week. In the Maritime Provinces, Quebec, Ontario, and British Columbia gains in the second week were offset by losses in the other weeks; while in the Prairie Provinces weekly advances continued until near the close of the month. The iron and steel, machinery and conveyances group reached a high point of activity in the second week, while non-ferrous metal products began the month with a decline but made substantial recovery in the third week. In the food group a falling tendency was noted

about the middle of the month. The textile and clothing industries continued to experience the usual seasonal decline, with, however, some signs of recovery. The leather trades still showed a decrease in employment, this being most marked in the third week. In the pulp and paper industry small average declines were recorded except in the first week. Steady employment conditions were maintained in the clay, glass and stone trades. Railway transportation showed a small net increase for the month, while water transportation made steady gains. In mining (other than coal) the non-metalliferous mine workers continued active, but the metallic ore group showed a decline. Activity in

the coal mines increased in the first half of the month, but a sharp drop, mostly in British Columbia, due partly to lack of storage space, was recorded in the third week. Building and railway construction continued to show steady gains throughout the month. In the lumbering industry small gains alternated with losses in number employed.

The loss of time on account of industrial disputes was less during July than during June, 1920, or July, 1919. There

#### Strikes

were in existence at some time or other during the month 49 strikes, involving about 6,734 workpeople, and resulting in a time loss of 80,221 working days, as compared with 60 strikes, 12,406 workpeople and 155,502 working days in June, 1920; and 75 strikes, 62,020 workpeople and 683,896 working days in July, 1919. On July 1, there were on record 29 strikes, affecting 4,229 workpeople. Twenty strikes were reported as having commenced during July, as compared with 27 in June. Sixteen of the strikes commencing prior to July and fourteen of those commencing during July were reported terminated, leaving 19 strikes in-

volving about 1,442 workpeople, on record at the end of the month.

The prices movement was again marked by decreases in wholesale prices of

many materials and seasonal changes in foods, some of which were in-

creases and some decreases. The net result was another decline in the index number of wholesale prices which fell to 346.8 for July as compared with 349.3 for June, 356.6 for May, 294.9 for July, 1919, and 134.6 for July 1914. The chief decreases for the month were in grains, fish, fruits and vegetables, textiles, and lumber, with increases in livestock and meats, butter and eggs, sugar, coal and coke, some building materials and some chemicals. In retail prices, the average cost of a family budget of staple foods in some sixty cities averaged \$16.84 at the middle of July as compared with \$16.92 for the middle of June, \$13.77 in July, 1919 and \$7.42 in July, 1914. The chief decrease for the month was in potatoes with slight decreases in a number of other lines and increases in some meats, in eggs and in sugar. Coal, wood and rent were also higher.

## II.—Industries and Trades.

Employment in the iron and steel industry of Nova Scotia continued good during July. SYDNEY

#### Metals and machinery

reported the production from three blast furnaces as follows:—21,100 tons of pig iron; ingots, 22,900; blooms and billets, 900 tons; plates, 4,200 tons; standard rails, 3,600 tons; light rails, 590 tons; rods, wire and nails, 10,030 tons; the stove and furnace and metal roofing industries continued active. The output of the four blast furnaces at SYDNEY MINES was 7,600 tons of iron and 10,200 tons of steel; one furnace was undergoing repairs. The structural steel industry at WESTVILLE was at a standstill for about three weeks following a fire at the Bridge Company's

plant; engine, boiler and farm implement makers were busy, sheet metal workers were fairly active and the electrical trades were normal; the Nova Scotia steel plants continued running steady double shifts. At HALIFAX the bolt, nut, bar and skate factories continued in steady operation, with heavy orders ahead; stationary engine and boiler works were very brisk; stove and furnace factories were active, though iron trimmings were difficult to obtain from Western Canada. The main workshop of the Maritime Bridge Company at NEW GLASGOW was destroyed by fire early in the month; the staff had been reduced from 200 to 100 owing to shortage of stock. AMHERST reported the malleable iron industry hampered by an

industrial dispute; foundries were active, though material was rather scarce. At CHARLOTTETOWN moulders, machinists, electrical workers and other metal trades had a busy month. The rolling mill at ST. JOHN ran steadily with increasing business; tin and sheet-metal workers were busy. The foundries and machine shops at MONCTON resumed normal employment after an interruption for several weeks caused by a fire. The foundries at SACKVILLE operated steadily. Foundry workers and machinists were very busy at FREDERICTON, MONTREAL reported activity in structural steel; engine and boiler makers were busy; sheet metal workers were fairly active and electrical workers normally employed; activity in the rolling mills was affected by a strike. At QUEBEC structural iron and steel workers, and stationary and portable steam engine and boiler makers had a busy month. Machine and repair shops at ST. HYACINTHE were very active, and at ST. JOHN'S, IBERVILLE and SOREL the metal trades were well employed. The iron foundries at THREE RIVERS worked full time with over 500 employed. A considerable falling off in activity in foundries was noted at OTTAWA and HULL. Iron workers at PEMBROKE were actively employed. At TORONTO the metal and machinery trades were generally depressed owing to the continued shortage of steel and coal, and many men were out of work, especially in connection with the machinery and electrical apparatus industries; agricultural implement plants were busy and the sheet metal industry was active, with skilled labour in demand; many iron and steel workers were among the recent arrivals from Great Britain, and a number of them who were unable to obtain work at their own trades were placed on farms or found other work. At HAMILTON the fuel shortage affected employment early in the month in the steel industry but conditions improved later and employment became good throughout the group. Machine shops, foundries, and chain, can and plating factories at NIAGARA FALLS all required help. At OSHAWA the malleable

iron works closed early in the month owing to shortage of material, but there was some demand for machinists, moulders and coremakers. ST. CATHARINES reported good employment in all metal trades, including boilermakers and electrical workers, but the chain factory closed early in the month from scarcity of material. At BROCKVILLE stove and furnace, tool and hardware factories were busy. BELLEVILLE reported fair activity in the bar iron, bolt and plate factories and in the portable engine and boiler shops. Moulding shops and foundries at PETERBOROUGH worked to capacity, with moulders and coremakers in demand; machinists were also very active, all shops working overtime; electrical workers were busy after a settlement of the late strike. Continued activity throughout the metal group was reported from GALT, especially in the farm implement and machinery sections. BRANTFORD reported some demand, especially for unskilled labour, in the iron and steel industry; malleable iron foundries, farm implement, stove and furnace, and electrical fixture factories and machine shops were all very busy. At KITCHENER some demand was noted for machinists, moulders and helpers and for tinsmiths; farm implement factories ran full time, and electrical workers were very busy. Tinsmiths were also in demand at WATERLOO. Moulders were in urgent demand at GUELPH. Active conditions were reported from STRATFORD. A continued shortage of moulders, polishers and other skilled workers was noted at WOODSTOCK; stove and furnace workers were steadily engaged. The rolling mills at LONDON, while less active still retained the same staffs; the wire and iron plants were busy; threshing engine and thresher factories were steadily busy except for a strike of two days' duration; stove and furnace workers were well employed except in the tin and enamel departments which were held up by a shortage of material. At ST. THOMAS a number of iron workers were thrown temporarily out of work by the burning of a plant towards the end of the month, but other iron works

and foundries continued steadily active with moulders in demand. CHATHAM reported an improvement in the structural steel industry, one plant operating night shifts. Boilermakers and helpers were required at SARNIA. Increased employment was noted in the steel industry at CHATHAM; the electrical trades were about normal. WINDSOR reported great activity in the structural steel industry with a demand for foundry labourers; machinists had a very busy month; the injector factory increased its staff to cope with foreign orders, the brass foundry being equipped with special moulding machinery. The malleable iron works at OWEN SOUND ran night shifts, and machine shops were busy. Steel and iron workers were in demand at SAULT STE. MARIE. All branches of the metal trades at WINNIPEG were well employed throughout the month, without change in numbers employed. The metal trades at MEDICINE HAT were fairly well employed but the rolling mill still remained closed. Activity in the iron industry at LETHBRIDGE was hampered by a strike of machinists. Metal workers at EDMONTON were reported fairly busy. VANCOUVER reported fair conditions in the foundries and rolling mills; the stationary and portable engine and metal roofing, tin, copper and sheet metal trades were also fairly active, but stove and furnace factories were rather slack. The engineering trades at NEW WESTMINSTER showed steady improvement. At VICTORIA the iron foundries and electrical plants were moderately active, principally in repairs, but stove foundries were fairly busy.

SYDNEY reported continued activity in boat and shipbuilding and repairing.

**Vehicles (land and water)** Shipyard workers, engine, boiler and automobile makers were well employed. Activity in

the shipyards at HALIFAX was hampered by the continued strike in the marine trades, but 850 men were reported on the payroll at Halifax shipyards; some of their work was completed in the smaller shops; 25 war drifters were

overhauled and repaired; supplies of light plate were difficult to obtain from Sydney. The car works at AMHERST were hampered by shortage of stock, but employment was good after the settlement of an industrial dispute. The Canadian National Railway locomotive and car repair shops at MONCTON continued very busy during the month; garages were all very active. MONTREAL reported slack conditions in the shipyards, but engine and boiler workers were actively employed. At QUEBEC workers in iron and steel shipbuilding and repairing were very busy, but the construction of wooden ships showed a decided falling off, one yard stopping completely and 300 men being laid off. The shipyards at SOREL had an active month. Over 600 workers were steadily employed at one shipyard at THREE RIVERS, but the other yard, which formerly employed about the same number was finally closed at the end of the month. During the first half of the month the cabinet and carriage departments of the OTTAWA car works were tied up by the woodworkers' strike, but normal activity was resumed later. The locomotive and car shops at HAMILTON were hampered by shortage of materials. BROCKVILLE reported activity in motor boat, automobile and engine works, the moulding work, however, being done in outside shops. The locomotive shops at KINGSTON had a busy month with about 600 men employed, this being the normal number; the shipyards gave steady employment to about 220 men. BELLEVILLE reported fair activity in automobile repairing and making of parts. The engine and tractor factories at GALT were very busy. The carriage works at BRANTFORD were steadily active. KITCHENER reported continued activity in the automobile and bicycle factories. The locomotive and car shops at STRATFORD had a busy month. Sufficient skilled labour was available at WOODSTOCK for the wagon and sleigh factories, but general labour was somewhat scarce. About 400 men were thrown out of employment at CHATHAM by the temporary closing of the Gray

Dort and Hayes wheel factories, but they were quickly absorbed by other trades. WINDSOR reported increased employment in the automobile factories, the foundries being very busy in turning out engines; automobile parts factories ran to capacity; tool and die makers were in demand in the machine shops. Railway shops at WINNIPEG were busy throughout the month. Help was required at MEDICINE HAT in the manufacture of tractors. The C. P. R. shipyard at VERNON was active on tugs and scows. VANCOUVER reported a decline of activity in boat and shipbuilding, men being laid off in two or three lines of work in the yards; automobile repair work was plentiful, and the cycle and motor engine shops were busy. Shipwrights were in demand in the yards at PRINCE RUPERT. VICTORIA reported activity in the wooden shipyards, additional help being taken on.

Activity continued throughout the food group at SYDNEY, HALIFAX, AMHERST and CHARLOTTE

**Foods, liquors  
and tobacco**

TOWN, with some improvement in abattoirs and soft drink plants.

Active conditions also prevailed at WESTVILLE. The milk factory at TRURO was rushed to capacity. The sugar refinery at St. JOHN ran continuously; flour and feed mills, bakeries and creameries were busy and the brewery and soft drink trades were fairly active, though affected by a rise in retail prices. Bakeries and cheese and butter factories at MONCTON were very busy. At MONTREAL flour and feed plants, abattoirs and meat packing houses, breweries and soft drink factories were active; bakers and confectioners were normally employed, though affected by a shortage of sugar supplies; fruit canning was hampered by the same cause; cigar makers were slack. QUEBEC reported busy conditions in fruit preserving and canning plants, creameries, dairies, soft drink factories and breweries; abattoirs and packing houses and tobacco factories were active. At SHERBROOKE employees in the food indus-

tries were busy, especially brewery workers. St. HYACINTHE, St. JOHN'S, IBERVILLE, SOREL and THREE RIVERS reported general activity throughout the group. At OTTAWA and HULL activity in certain of the food industries was affected by cool weather, but general conditions were good throughout the month. At TORONTO the flour mills and cereal plants were in steady operation throughout the month; abattoirs and packing houses were quiet with a number of workers out of employment; bakers and confectioners were generally active as regards domestic trade, but the export trade in confectionery was affected by the overstocking of overseas markets; fruit and vegetable canners were active, but handicapped by a shortage of cans; soft drink plants and breweries were active, and cigar makers fairly well employed. HAMILTON reported continued activity throughout the food group. Canning factories at NIAGARA FALLS ran to capacity, but experienced a shortage of cans owing to scarcity of tin plate. Employment was good among all classes of food workers at St. CATHARINES, BROCKVILLE and KINGSTON, but cigar makers had a dull month; girls were mostly employed at the latter trade. BELLEVILLE reported the flour mills already active in grinding this year's crop for home use and feed; fruit and vegetable canneries and creameries and soft drink factories were very busy. At PETERBOROUGH bakers, confectioners and meat packers were busy, but flour, feed and cereal workers were rather less active. Conditions were generally good at GALT and BRANTFORD. Butchers were in demand at KITCHENER; bakers were busy but candy makers were slack; breweries and soft drink factories were very busy, but cigar makers were only fairly active. GUELPH and STRATFORD reported active employment in all branches. Female help was in demand in the confectionery trade at WOODSTOCK. A demand for biscuit and candy makers was reported at LONDON, the factories working overtime; millers and soft drink workers were very busy, and the cigartrade showed some improvement. St. THOMAS reported normal con-

ditions in the local industries. Help was taken on in the abattoirs at ST. THOMAS, overtime being worked; the sugar factories were ready for the beet harvest, and about 300 operatives would shortly be employed; the soft drink plants were very active and the cigar industry about normal. WINDSOR reported increased activity among bakers and confectioners; creameries were handicapped by short supplies of milk; breweries and soft drink plants were very busy. At WINNIPEG confectionery workers had increased employment and female help was in demand; vegetable canners continued active but without increase in staffs; brewery and soft drink factory workers were steady, and creameries were normally active. Creameries and soft drink plants at BRANDON were very busy; flour mills, bakeries and breweries were busy, but cigar makers were dull. The abattoir at MOOSE JAW ran on short time owing to insufficient supplies of cattle and hogs. MEDICINE HAT reported rather slack conditions in the flour mills, two plants closing down for repairs during the dull season, and the other only running one 8-hour shift; other food industries were fairly active. Brewery workers at LETHBRIDGE were exceptionally busy, except for a two days' strike early in the month; flour mills continued rather quiet. At CALGARY the flour and feed plants were rather quiet, and abattoirs were also slack; bakers and confectioners and brewery and soft drink workers were well employed. A number of packing plant employees at EDMONTON were laid off during the month. FERNIE reported unusual activity in the breweries and soft drink plants; bakers, confectioners and dairy workers were also busy. At VANCOUVER flour, feed and cereal workers were fairly busy; the sugar refinery was not fully active owing to shortage of raw sugar; abattoirs and packing houses were rather less active, but conditions were good in the baking and confectionery plants, dairies, breweries and soft drink factories; the fruit and vegetable canning season opened with good prospects. VICTORIA reported

general activity throughout the group, the canneries being active, particularly in small fruits, but owing to the cost of sugar the pack was less than in former years.

Rope and twine workers at HALIFAX continued steadily employed. The woollen mills at AMHERST had a very busy month. At TRURO the woollen mills resumed work after being closed for two weeks for repairs and alterations. Both cotton mills at ST. JOHN were busy, extensive improvements being introduced. The woollen mills and underwear factory at MONCTON operated steadily with the usual staffs. The cotton factory at FREDERICTON ran full time. At MONTREAL the woollen and knitting, and tent and sail factories were busy. QUEBEC reported activity among tent, awning and sail makers. Cotton and woollen operatives and bleaching, dyeing finishing and textile printing workers at SHERBROOKE were well employed. The woollen factories at ST. HYACINTHE worked steadily, in some cases day and night; underwear factories were very busy. The cotton mills at THREE RIVERS gave steady employment to about 1,400 workers. At TORONTO the woollen, hosiery and knitted goods plants were busy, with experienced workers in demand; tent, awning and sail makers had an active month and carpet and rug makers were steadily employed. The textile plants at PEMBROKE were running to capacity. ST. CATHARINES reported activity in all textile trades, including woollen, knitting and silk mills, with some demand for help. Tent, awning and sail workers at BROCKVILLE were well employed. At KINGSTON the textile trades were active. PETERBOROUGH reported some decline of activity in the woollen mills, which closed for two weeks for alterations, workers being paid for one week on condition that they return and work for the company for the rest of the year. The cotton and woollen industries at GALT were very busy, some mills importing help from abroad; silk operatives were

**Textiles,  
cordage and  
carpets** 

well employed and bleaching and dyeing workers were busy. BRANTFORD reported a demand for female help for the woollen and hosiery factories; the cordage factory was short of unskilled help. The felt factories at KITCHENER continued busy; help was wanted at the twine factory. At GUELPH cotton, woollen and linen mills and hosiery goods factories had an active month; carpet and rug weavers were well employed. The woollen and knitting mills at STRATFORD were busy. A shortage of female labour and of raw materials for the knitting and textile factories at WOODSTOCK was reported. Female help was in strong demand at LONDON for the knitting, underwear and hosiery factories, which worked overtime. The knitting factory at St. THOMAS had a busy month. Textile and woollen workers at CHATHAM were steadily active. WINDSOR reported increased activity in the tent factory due it was stated to the scarcity of houses. At WINNIPEG the bag factories had a quiet month, some inexperienced help being laid off; knitting factory workers continued fairly steady; tent and awning plants were quiet, but without change of staffs.

Steam laundries at SYDNEY continued active. At HALIFAX the ready-made

**Clothing,  
boots, shoes  
and laundering**

clothing industry showed improvement, wool supplies from Great Britain being more regular, but the Canadian supply limited; laundries, dyeing and cleaning plants were busy. The boot and shoe trade at AMHERST was dull, some employees being laid off. The cap factory at TRURO ran full time with capacity help, skilled workers being brought in from Montreal and Ontario; the shirt factory ran full time. Tailors and garment workers at CHARLOTTETOWN had increased activity; laundry and dye workers, and boot and shoe workers had a good month. At St. JOHN, activity was noted in the ready-made clothing trade and in steam laundries. A shortage of experienced help was reported at MONCTON in the

tailoring, dressmaking and millinery shops; the cap factory continued active and laundries and cleaning plants were also very busy. Female help was in demand for the tailor shops at FREDERICTON; shoe and larrigan workers were steadily active. At MONTREAL the ready-made clothing and hat and cap factories were rather quiet, owing partly it was stated to overproduction; some workers, it was reported, have been idle for from 10 to 15 weeks; laundries were active; the boot and shoe trade was dull. QUEBEC reported activity in the ready-made clothing and women's whitewear trades, but glove and fur workers were rather slack, and shoe factories were dull. Ready-made clothing, and boot and shoe workers at SHERBROOKE had a good month, and steam laundries and cleaning plants were very busy. Boot and shoe workers at St. HYACINTHE were rather slack, one large plant being temporarily closed. Glove workers at THREE RIVERS were steadily active. Clothing factories at OTTAWA and HULL had a quiet month, cool weather limiting demand for summer goods. At TORONTO the ready-made clothing, shirt and overall, hat and cap, glove and women's whitewear factories were fairly busy with experienced and other female workers in demand; a shortage of material was experienced and in some cases plants were closed because of shortage of orders; fur workers had a quiet month but steam laundries and dyeing and cleaning plants were active; the boot and shoe industry was quiet, a large percentage of workers being laid off. All clothing factories at NIAGARA FALLS were busy during the month. Hat and glove workers at BROCKVILLE were well employed, fur workers were fairly active, and laundries were busy. BELLEVILLE reported good employment for women in the shirt factory; laundries and dyeing plants were busy. Women's wear factories at PETERBOROUGH were busy in the manufacture of children's clothes, female help being in great demand; boot and shoe workers were somewhat less active. GALT reported activity in the ready-made clothing, shirt and collar trades and in laundries

and dyeing plants. At BRANTFORD dress, overall and shirt workers and steam laundries had a busy month. KITCHENER reported the robe and clothing factory running full time; help was required in the shirt, collar, glove and button plants; laundries and dyeing plants were also very busy. Women's whitewear workers at GUELPH were well employed; help was in demand for the rubber factories. Laundries and dyeing plants at STRATFORD were unusually busy, boot and shoe repairers were fairly active. The ready-made clothing factory at LONDON was very busy, the plant being enlarged; steam laundry workers were also well employed; shoe workers were not so busy, trade having slackened. The shoe industries at ST. THOMAS also reduced their working forces and hours owing to uncertain market. Machine hands were in demand at WINDSOR for the overall factories, and steam laundries also required help. Steady conditions were reported at WINNIPEG in the ready-to-wear, shirt, hat and cap and whitewear trades; glove workers had increased employment; furriers were active on repairs; laundries were quiet but cleaners fairly active. VANCOUVER reported conditions rather quiet in the ready-made clothing industries with the exception of the overall and shirt trade; boot and shoe workers and steam laundries and dyeing plants were busy. At VICTORIA the shirt and overall factories were rather less active, but laundry, dyeing and cleaning workers were well employed.

The felt and tarred paper industry at HALIFAX showed some improvement in July, though a shortage of materials was experienced. The pulp mills at ST. JOHN, CHATHAM, LIVERPOOL and MURRAY continued fairly active on account of the shortage of coal. The pulp mill at BATHURST was closed during the last week of the month. In the province of Quebec the pulp and paper mills at THREE RIVERS, SHAWINIGAN FALLS, WINDSOR, CAP MAGDELAINE, EAST

ANGUS, CHICOUTIMI and KENOGAMI were steadily active, but a slight decline in employment was noted at HULL, DONNACONA, CHANDLER, LA TUQUE and BAGOTVILLE. In Ontario slight increases of staffs were reported in the pulp and paper mills at STURGEON FALLS, THOROLD and HAWKESBURY; steady conditions prevailed at TORONTO, IROQUOIS FALLS, SMOOTH ROCK FALLS and SAULT STE. MARIE, while a slight decline was recorded at ESPANOLA and OTTAWA. Felt and tarred paper workers at HAMILTON were active. At ST. CATHARINES pulp and paper, beaver board and other pulp product workers had a busy month; the pulp mills now operated by the Beaver Board company turned out about 15 tons of bleached pulp per day; a new finishing plant gave increased employment, about 100 additional men working in the laminating machine department alone. The asphalt roofing factory at BRANTFORD was very busy. Help was required at PORT ARTHUR and FORT WILLIAM for new pulp mills. The pulp and paper mills at OCEAN FALLS and POWELL RIVER, B.C., had a busy month.

Printers continued active throughout July at SYDNEY, HALIFAX, WESTVILLE and CHARLOTTETOWN.

**Printing,  
publishing  
and paper  
goods**

Printers were in demand at TRURO and ST. JOHN; paper box workers also were well employed at the latter place. The printing trades were active at MONCTON and FREDERICTON. At MONTREAL newspaper and job printers, bookbinders and lithographers were well employed. QUEBEC reported busy conditions in the printing and publishing trades; paper bag factories were busy, but box factories were quiet. Printers, binders and paper box workers at SHERBROOKE had a good month. At SOREL printers had a quiet month. OTTAWA and HULL reported the usual activity in job printing and publishing with no slackening for the summer season. At TORONTO printers, bookbinders, engravers and lithographers had plenty of employment, with ex-

perienced bindery workers in demand; paper box and bag factories were active, though somewhat hampered by shortage of material. Printers at HAMILTON were fairly busy. Activity was reported among printers and bookbinders at NIAGARA FALLS and St. CATHARINES. Printers were reported active at BROCKVILLE, KINGSTON and BELLEVILLE. Box makers and other paper workers, also the printing trades, were busy at GALT, BRANTFORD, GUELPH and STRATFORD. At KITCHENER printers were less active than in the previous month, but paper box makers were very busy. Woodstock reported fair conditions in the printing trades. At LONDON printers were rather less busy, but a demand was noted for paper bag makers. Additional help was taken on at CHATHAM in the printing shops. Increased activity was reported in the printing shops at WINDSOR, but paper box makers were less active. At OWEN SOUND printers and box workers were very busy. At WINNIPEG printers and bookbinders were active with slightly increased employment; box makers had a quiet month but without change in staffs. Printers at BRANDON, LETHBRIDGE and CALGARY were fairly active, but at EDMONTON the printing and publishing trades were rather less active. VANCOUVER reported fair activity in the printing and publishing trades and in the paper box industry. At VICTORIA the printing shops were moderately active, but lithographers were busy; paper box factories were quiet, some employees being laid off.

Continued activity was noted in the sash and door factories and planing mills at SYDNEY. At

#### **Woodworking and furniture**

HALIFAX the planing mills worked steadily supplying local requirements; broom and cooperage workers were also well employed. The sash, door and planing mills and furniture factories at WESTVILLE were fairly active. Woodworking factories at AMHERST were all very busy. The mattress factory at TRURO ran full time. At CHARLOTTETOWN the planing mills

and broom factories had a busy month, but upholsterers, varnishers and polishers were rather slack. St. JOHN reported activity in the planing mills and brush and broom factories. The planing mills at MONCTON also were busy supplying building requirements; cooperage workers were well employed. At FREDERICTON the mills had a very busy month. At MONTREAL wooden box, furniture and piano workers had a fair month. QUEBEC reported activity in the planing mills, furniture, broom and brush factories, but the wooden toy industry was quiet. The planing mills and chair factory at SHERBROOKE were busy. At St. HYACINTHE the chair factory which had been idle owing to scarcity of materials was ready to re-start; organ and phonograph factories were very active. THREE RIVERS reported very busy conditions in the mills and in the chair, casket and coffin factories. Woodworkers at St. JOHN's and IBERVILLE were well employed in supplying building needs. The woodworking and furniture trades at SOREL were quiet. The sash, door and planing mills at OTTAWA and HULL were shut for more than half the month owing to a strike of woodworkers; and little activity was evident later because of small demand from builders; box workers were busy after the strike called off. At TORONTO the sash, door and planing mills, and furniture, piano and phonograph plants were all busy, with an urgent demand for skilled cabinet makers. HAMILTON reported activity throughout the woodworking group. Conditions were good at NIAGARA FALLS and fair at St. CATHARINES. The office furniture factory at BROCKVILLE was extended, and the mills also were active. The piano industry at KINGSTON was normally active. The planing mills at BELLEVILLE were busy preparing materials for building; chair and furniture makers were also well employed. The mills and box factories at PETERBOROUGH were active. At GALT furniture and mill workers were very busy. Piano and gramophone makers and planing mill operatives at BRANTFORD were well employed. A shortage of help

was reported at KITCHENER for the furniture trade; sash, door and box factories were very busy; broom and cooperage workers were fairly active, but the wooden toy trade was rather slack. At GUELPH piano and sewing-machine makers and planing workers were active. STRATFORD reported activity in the sash, door and box factories. Planing mills at LONDON were rushed with work for the building trades; wooden box and barrel makers were employed to capacity; piano workers were increasingly active. Cabinet makers and finishers were in demand at St. THOMAS, but some labourers were laid off. A shortage of help was reported in the woodworking trades at WINDSOR; piano makers were well employed on summer orders. The planing mills and sash and door factory at OWEN SOUND were busy. WOODSTOCK reported an urgent demand for skilled help in the furniture trades, which were exceptionally busy; the organ industry was rather quiet. At ORILLIA furniture factory workers were less active, but planing mills were busy. Sash and door factories and planing mills at WINNIPEG ran steadily with the number of employees practically unchanged. The sash and door factories and planing mills at CALGARY were fairly busy. At VANCOUVER the mill workers were busy, and furniture and chair trades were fairly active. VICTORIA reported moderate activity in the planing mills; wooden box makers were well employed.

Leather bag and harness workers at HALIFAX continued well employed.

**Leather and rubber (other than clothing)** The trunk and bag factory at AMHERST was steadily active. Leather workers at FREDERICTON were also active. At MONTREAL tanneries and trunk, bag and harness factories were fairly busy, and rubber workers were well employed. Tanneries at QUEBEC had a very dull month, and trunk and bag workers were slack. Tannery workers and harness makers at St. HYACINTHE were well employed. Tannery workers

at SOREL had a busy month. At TORONTO the trunk, leather bag and harness trades were active, and rubber factories were busy. HAMILTON also reported activity in the various leather industries. OSHAWA reported a demand for harness-makers. About 120 men were laid off at the tannery at KINGSTON, only 25 being retained. The tanneries at KITCHENER ran full time; experienced trunk and suitcase workers were in demand; the rubber factories were generally very busy, with help in demand, but at one plant work ceased for two weeks to allow extensions to be made. Tannery workers and harness repairers at STRATFORD were well employed. A number of workers were laid off in the tannery at LONDON. Tannery workers at WOODSTOCK reported a satisfactory month. Harness and leather workers at WINNIPEG were well employed during the month. Trunk, bag, harness and horse goods makers at CALGARY were very busy.

WESTVILLE reported the cut stone, granite, brickyard and clay product workers well employed during the month. The cement plants at MONCTON were very busy.

Brick and tile workers at FREDERICTON were active. The glass factories at MONTREAL continued in steady operation. At QUEBEC stone-cutters had a dull month. SHERBROOKE reported busy conditions in the cut stone and granite works and brickyards. The artificial stone factories at THREE RIVERS were idle for part of the month on account of shortage of cement. Work at the cement plant at HULL, where about 700 workers are normally employed, was suspended for part of the month owing to shortage of coal. At TORONTO the brickyards were in full operation and glass factories were active. HAMILTON reported activity in the cut stone works, brick, tile and pipe yards, cement factories and pottery works. Stone and granite cutters at BROCKVILLE were fairly active and the municipal brickyard operated steadily. The cement plant near BELLEVILLE

ran steadily day and night to keep pace with the great demand for this product but scarcity of coal hampered expansion of work. At KITCHENER stone and marble cutters and cement, brick, tile and sewer pipe workers were all busy throughout the month. Help was in demand for the lime works at GUELPH. The brickyards at LONDON were busier than ever before, many additional workers being employed. The clay industries at CHATHAM were active. Help was in demand for the brickyards and clay pits at ESTEVAN. At MEDICINE HAT brick and tile workers and stonecutters were well employed. The brickyards at LETHBRIDGE were busy. VICTORIA reported busy conditions in the brickyards and cement factories.

Continued activity was reported at SYDNEY in the chemical industries, including the naphtha, carbolic acid, creosote, dead oil, naphthaline and pitch plants. At HALIFAX employment

**Paints, oils,  
chemicals,  
explosives**

showed an increase in the petroleum and lubricating oil factories. The paint and varnish trades at MONTREAL were normally employed, and chemical, drug and medicine plants were fairly active. At QUEBEC cartridge and ammunition workers had a quiet month. SHERBROOKE reported great activity in the lubricating oil and grease factory, though oils were rather difficult to obtain; factories for gunpowder, acids, extracts, drugs and medicines were also busy. The paint mills in THREE RIVERS district were fairly active. Soap, paint and varnish works at TORONTO had a good month. HAMILTON reported activity in the soap, acid and drug industries and fair conditions in the gunpowder and ammunition factories. The electrochemical plants at NIAGARA FALLS continued busy, and the fertilizer and carborundum factories ran day and night. Employment was good in the paint and varnish factory at BRANTFORD. At KITCHENER the oil, grease and glue factories were busy throughout the month. A shortage of oil hampered activity in the paint and varnish factories at WINDSOR;

the salt factory increased its staff, but the pharmaceutical plant was rather less active. The linseed oil mills at MEDICINE HAT continued active. The oil refinery, paint, varnish and soap factories at VANCOUVER were fairly busy. At VICTORIA the paint and soap factories were fairly active, but a number of workers were laid off at the explosive plants.

The earnings of the Canadian Pacific Railway during June were \$16,480,574 as compared with \$13,577,273 in June 1919.

**Railways, shipping and 'longshore work** During July the number of persons employed by the Canadian Pacific Railway, the Grand Trunk Railway and the Canadian National Railways on railway operation, including general office staffs, trainmen, engine crews, station employees, and parlor and dining car employees showed an increase of about 1,500 persons, the total number of employees at the end of the month being 68,200 as compared with 66,700 at the end of June. These gains were accounted for by additions of 900 persons to the staffs of the C. N. R., 500 to the C. P. R. and 100 to the G. T. R. The Government railways in eastern Canada were said to be affected during July by the general shortage of coal. SYDNEY reported great activity in shipping and 'longshore work, other transportation workers continuing active. Conditions at HALIFAX also were fairly busy in all departments. WESTVILLE reported the railways well manned and the electric railway, transfers and garages busy. Engine drivers and firemen at TRURO were rather slack owing to light traffic, but at CHARLOTTETOWN all spare trainmen were reported engaged owing to extensive ballasting operations. At ST. JOHN railways were very busy with tourist and general traffic; on the street railway arrangements were made for introducing one-man cars; 'longshore work was slack owing to quiet shipping conditions. In the vicinity of MONCTON train crews were well employed on ballast trains. At FREDERICTON business and tourist traffic by rail and

steamer was brisk. At MONTREAL the railways were employing more men; most of the men recently let out in the Angus shops of the C. P. R. were taken back; 'longshore men were busy, the harbour showing much activity. QUEBEC reported an active month for river-side workers, and other traffic, especially automobile and tourist, was very heavy. Active conditions were noted at SHERBROOKE, THREE RIVERS and SOREL. At TORONTO steam railways were busy, with heavy freight passenger traffic; street railwaymen were fully employed; navigation was active with work plentiful for sailors and 'longshoremen. Steam and electric railways at HAMILTON were very active with both freight and passengers; 'longshoremen also were well employed. Transportation workers at NIAGARA FALLS were active. At BROCKVILLE 'longshore work was brisk, for the most part in handling coal; tourist and holiday traffic increased employment. BELLEVILLE reported heavy passenger and freight traffic on the three railways operating in the district; 'longshoremen were chiefly engaged in handling coal; transfers were exceptionally busy on holiday traffic. At PETERBOROUGH the street railway was very busy on improvement and maintenance of way; the Trent Canal traffic was heavy. Steam and electric railwaymen and transfer workers at BRANTFORD had a good month. At KITCHENER the freight departments of the railways were very busy and electric railwaymen were well employed. LONDON reported a resumption of activity on both the C. P. R. and G. T. R.; more help was employed in garages and transfers. Railway traffic employees at ST. THOMAS made slightly better time than in the previous month, particularly in the case of brakemen; shopmen were also very busy. At CHATHAM railway shipments showed an increase, much freight coming by water. Street railways were very busy at WINDSOR owing to the races; owing to limited shipping facilities at Detroit motor lorries were used to bring products over from there for shipment. Freight transportation at OWEN SOUND

was light but passenger traffic was heavy. The freight passing through the canal at SAULT STE. MARIE in June amounted to 297,090 tons, compared with 522,272 tons in June 1919; the drop being accounted for by the opening of a new lock on the American side which takes boats of heavier draft. (Figures for July in this connection are not at present to hand). Some demand for section men and foremen was reported at PORT ARTHUR and FORT WILLIAM. Street railways at WINNIPEG were steadily active but without change of staffs. At BRANDON transport workers were fairly active. Help was in demand on the railways at SASKATOON. Railway sectionmen and extra gangs were in demand at REGINA. At MOOSE JAW a considerable movement of coal eastwards was noted. Railway and transfer workers in all departments at MEDICINE HAT were well employed, though freight traffic was rather lighter. CALGARY reported fair activity on railways and transfers, and garages were busy. The taking over by the C. P. R. of the Edmonton, Dunvegan and B. C. Railway management greatly increased the demand for section men and railway gangs. At VANCOUVER steam and electric railways were busy, and navigation and 'longshore workers were more active; transfers were fairly active and garage workers were well employed. PRINCE RUPERT reported activity in longshore work after the settlement of the strike about the middle of the month. At VICTORIA transportation in all branches, steamship, rail and automobile, was very heavy.

Quarrying was active in QUEBEC district owing to the demand for concrete and crushed stone. At SHERBROOKE asbestos miners were busy, chrome iron miners were fairly active, but the copper mines were quiet; granite cutters were well employed. Additional men were coming into COBALT district, where the shipments from the silver mines during the month amounted to

approximately 1,803,174 pounds of ore, as compared with about 3,376,255 pounds of ore in the previous month. Bullion shipments amounted to 351 bars containing 376,439.70 fine ounces of silver, as compared with 124 bars containing 150,692 fine ounces in June; it was stated that between two and three million dollars worth was stored at the mines, only a limited amount being allowed to flow into the market; labour was more plentiful but men were in demand for assessment work on claims recently staked on the Gillies limit. At the gold camps of PORCUPINE and KIRKLAND LAKE labour supply difficulties were being gradually overcome; a good supply of labourers coming in; both camps were extending operations and a number of new properties were being developed. Muckers and machine runners were in demand for the mines at TIMMINS. At SAULT STE. MARIE more miners, muckers and labourers were required for the Magpie iron mine. WINNIPEG reported a demand for men for the gold mines. The Flin Flon copper mine employed about 140 men, two shafts being sunk. Miners were in demand at THE PAS. Metalliferous mining at FERNIE was fairly active, and further development work was in progress which was expected to require labour later in the season. At NELSON, TRAIL and ROSSLAND the Josie mine suspended operations as the TRAIL smelter was unable to store any more ore until their copper furnaces started, but the workers obtained employment at the Rossland mines; the mines in the ROSSLAND area showed slightly increased activity, and in NELSON district the Blue Bell mine Company increased their staff and were preparing to start a second shift at the concentrator; one copper furnace started on July 20, and one lead furnace worked steadily; the lead, zinc and silver refineries turned out their usual amount, but the copper refinery remained closed for remodelling for the greater part of the month. CRANBROOK reported a slackening demand for men for the Sullivan mines; the White Horse placer mine closed down for a time owing to an accident.

PRINCE RUPERT reported a demand for men for ANYOX and STEWART. At ALICE ARM about 200 tons of ore a day were being hauled from the mine to tidewater.

Production in the Nova Scotia coalfields was reported to be showing an upward tendency partly due to the operation of several small mines in Cape Breton, including those at PORT HOOD, LITTLE BRAS D'OR and POINT ACONI, and to increased production at NORTH SYDNEY. The output of the Dominion Collieries at SYDNEY, however was 249,013 tons in July as compared with 286,000 tons in the previous month; 33,500 tons of coke were produced, 120 ovens being in operation. In the Nova Scotia Company's collieries at SYDNEY MINES 52,000 tons of coal were produced, compared with 56,500 tons in June. The output of coke was 7,750 tons, compared with the previous month's output of 8,200 tons, 40 ovens being off for the month leaving 150 ovens in operation. All the coal mines at WESTVILLE were reported busy during the month. Increased production was reported in the MINTO mines. WINNIPEG reported a demand for miners for the prairie coalfields. A shortage of miners and mine labourers was reported at ESTEVAN; an industrial dispute was reported practically over. CALGARY reported a slackening in the demand for miners for Alberta towards the end of the month. At DRUMHELLER the mines worked short time, having few orders for coal. Both the C. P. R. Galt mines Nos. 3 and 6, at LETHBRIDGE worked to capacity throughout the month, with large outputs; many smaller mines also reported work plentiful. EDMONTON reported miners in demand for northern Alberta. The mining situation at FERNIE was reported to be fairly satisfactory, though conditions were somewhat unsettled both there and at MICHEL owing to the opposition of the One Big Union to the U. M. W. of A. check-off. At VANCOUVER a demand was noted for coal miners for the coast mines. NANAIMO reported most

of the mines on Vancouver Island working regularly, with some demand for miners at the South Wellington and Morden mines; Granby mine at CASSIDY was closed about the middle of the month, but was expected to resume as the month closed.

The value of building permits issued in 55 cities during June amounted to \$13,295,041, as compared with \$12,155,879 in May, and \$7,577,346 in June, 1919. Building activity in the Maritime provinces was considerably handicapped during the month by a shortage of cement. At SYDNEY the building trades were fairly busy. HALIFAX reported activity in the erection of industrial, public and private buildings, as well as extensive paving and road work. Building was quiet at WESTVILLE, but marked activity was reported at TRURO, with a demand for painters. Government dredging work was in progress in the harbour at ST. JOHN; the building trades were fairly active. A good demand for labour was noted at MONCTON, and at FREDERICTON the building trades were well employed, with a shortage of painters and carpenters. At BATHURST the lumber company had about 100 houses under construction. The building trades at MONTREAL had a quiet month, but at QUEBEC considerable activity was noted; construction work on the Quebec Central Railway was under way. SHERBROOKE reported busy conditions in building of all classes; progress was made in the construction of one hundred new homes under the Government's housing scheme. At ST. HYACINTHE construction was at a standstill, but some repair work was in progress. The building trades at THREE RIVERS were fairly active, but were hampered by the shortage of cement; very little harbour dredging or municipal work was done. ST. JOHN'S reported a shortage of labour for road construction. Building activity in OTTAWA and HULL became more general on the conclusion of the woodworkers'

strike on July 17, but it was retarded by a scarcity of cement, brick and other material, due, it was stated, to shortage of coal, and to the demand on cement stocks for road and bridge construction; materials were coming in rather better as the month closed, though some outside men were still unemployed. The shortage of cement retarded operations at PEMBROKE, but much work was being done on roads and streets. The building trades were active at TORONTO, especially in the erection of suburban dwellings, about 100 houses being under construction in Weston district; the construction of commercial buildings was held back to some extent by the strike of ornamental iron workers; the Canadian General Electric Company was erecting a large factory. Carpenters were in demand at OSHAWA, where 108 houses were being built under the local housing scheme. At HAMILTON building activity was somewhat retarded by a strike of unskilled labourers, but they returned to work before the close of the month. Activity was noted in the building trades at NIAGARA FALLS; work was resumed on July 8 on the Hydro-Electric Commission's canal, after being tied up by labour difficulties since June 16. Building under the housing scheme was in progress at WELLAND. Fair conditions were reported at ST. CATHERINES, both in building and railway construction; operations on the Welland ship canal, sections 1, 2 and 3, were resumed during the month. At BROCKVILLE construction was active in all lines. Operations were active at KINGSTON, the strike of masons, bricklayers and plasterers being settled. Street repairing was very active at BELLEVILLE, and some dwellings and industrial buildings were under construction. Few dwellings were going up at PETERBOROUGH, but employment was good on public and industrial buildings; work on the new bridge was also in progress. GALT reported the building trades greatly hampered by shortage of cement; a new line of the Grand River Railway was started between PRESTON and HESPELER. At BRANTFORD the build-

ing trades were fairly well employed. KITCHENER reported much activity in building, with a demand for bricklayers, masons, carpenters and helpers; a large gang of men continued working on the new line through the south and west wards of the city. A shortage of labourers was said to retard municipal work at GUELPH; the building trades had a fairly busy month, though materials were scarce at times. At SARNIA preparations were begun for building houses under the Government housing plan. The building trades were busy at STRATFORD. Building labour was well occupied at WOODSTOCK. LONDON reported much construction under way, including industrial, commercial, and private buildings; and about 40 houses under the Housing Commission; civic work on street paving and dressing was active, and the construction of the new reservoir was being rushed. Construction work was quiet at St. THOMAS, but considerable municipal work was in progress. At CHATHAM and WINDSOR the building trades were well employed, with some demand for help. At OWEN SOUND street paving was suspended for the year, but building was active. Government road construction was active in COBALT district between Swastika and Kirkland Lake. At SAULT STE. MARIE activity was noted in the building trades. WINNIPEG reported a demand for building labourers; practically all skilled mechanics in the building industry were well employed. Activity in the building trades was also reported at BRANDON and REGINA, but at SASKATOON, MOOSE JAW, and MEDECINE HAT, conditions were quiet. At CALGARY a slackening in activity occurred during the month, some trades working only part time. EDMONTON reported activity in the building trades, with no great demand for additional help. VERNON reported that work on the Aberdeen Lake irrigation dam was complete. NELSON and TRAIL reported building rather slow, but the smelter company was busy remodelling its various plants; the copper refinery was partly ready to open. At VANCOU-

VER a small amount of construction was in progress on commercial buildings and dwellings; some dredging was done in the harbour; street and other civic work was quiet. NEW WESTMINSTER reported activity in the building trades, and at VICTORIA an increase was reported in the numbers of workers on dwellings and commercial buildings; and new round-houses were under construction for the Canadian Pacific Railway.

The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and the Canadian National Railways on railway construction, including maintenance of way, showed an increase of about 2,500 persons during the month of July, the total at the end of the month being 45,600, in comparison with 43,100 at the end of June. These gains were due to weekly increases in the staffs of the Canadian Pacific Railway amounting to 900 persons, and in the staffs of the Canadian National Railways, amounting to 1,600 persons.

CHARLOTTETOWN reported quiet conditions in the lumbering industry during July. At St. JOHN and FREDERICTON the saw and shingle mills run steadily. Two lumber camps at BATHURST were opened up during the month, and full operations in eight or nine camps were to start as soon as men could be secured. In QUEBEC district the saw mills worked to capacity on the seasons's cut, and at SHERBROOKE the saw and shingle mills were also very busy. The saw and shingle mills at OTTAWA and HULL had a busy month. At PEMBROKE the mills ran steadily but shipping was hampered by shortage of cars; men were in demand early in the month for shipping pulpwood; the low water holding up one or two drives may curtail operations later in the season. Saw and shingle mills at PETERBOROUGH continued very busy. TIMMINS reported some demand for sawyers, setters and trimmers, all the mills being busy. At OWEN SOUND saw mill workers had an active month. At SAULT STE. MARIE men

were in demand for the pulp and pine woods, and also to cut cordwood; men were required for the sawmills at PORT ARTHUR. Sawmill workers were in demand at PRINCE ALBERT. EDMONTON reported a shortage of mill workers and bushmen. At FERNIE all the mills worked fairly steadily in spite of unsettled market conditions; occasional shortage of labour was felt, and there was some difficulty in transporting logs to the mills; about 700 feet of flume used for this purpose, was destroyed at Boulder Creek in a bush fire, which also burned 2,000 newly cut logs. NELSON and TRAIL reported the lumbering industry fairly active, some mills having sufficient men and others running short handed; a new sawmill on Porecupine Creek was

working to capacity. Experienced millmen and bushmen were in demand at CRANBROOK, KAMLOOPS and CHASE. At VANCOUVER the coast lumber and shingle mills and camps were reported still fairly busy, though conditions were somewhat unsettled; small tie camps scattered through the country were generally busy. NEW WESTMINSTER reported activity in the saw and shingle mills, but some large mills were temporarily closed for repairs or stocktaking. Loggers and bushmen were in demand at PRINCE RUPERT. VICTORIA reported activity in the lumbering industry, excepting shingle mills. NANAIMO also reported lumbering rather less active on VANCOUVER ISLAND; the logging camp and sawmills at PORT ALBERT closed down early in the month, but reopened later.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF JULY, 1920, WITH TEXTS OF BOARDS' REPORTS

**D**URING the month of July the Department received reports from nine Boards of Conciliation and Investigation established to deal with disputes between (1) Winnipeg Electric Railway Company and certain of its employees, being members of the Street Railway Employees' Union; (2) the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers' Union; (3) the Toronto Hydro-Electric Commissioners and their employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers; (4) the Corporation of Moose Jaw and civic employees, members of Civic Employees Local Union No. 9; (5) the Canadian Pacific Railway Company and certain of its employees, engaged in the commercial telegraph service, members of the Commercial Tele-

graphers' Union of America; (6) the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being waterfront freight handlers, at Vancouver, B.C., members of Local No. 38-52, International Longshoremen's Association; (7) Toronto Suburban Railway Company and its employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers; (8) the Toronto, Hamilton and Buffalo Railway Company and certain of its employees, being freight handlers, at Hamilton and Brantford, Ont., members of the Canadian Brotherhood of Railroad Employees, and (9) the Master Printers of Ottawa and certain of their employees, members of the Ottawa Typographical Union No. 102.

Four applications were received for the establishment of Boards and a Board was established in connection with a dispute for which application had been received during the month of June.

### Applications Received.

During the month of July applications for Boards were received as follows:

(1) From the Municipality of the City of Prince Rupert, B.C., concerning a dispute between the Grand Trunk Pacific Railway Company and certain of its employees, being longshoremen at Prince Rupert. The employees in this case had gone on strike and the application was made by the City under the authority of Section 63a of the I.D.I. Act. A Board was established composed as follows: His Honour Judge F. McB. Young, Prince Rupert, chairman, appointed on the joint recommendation of the other two members, Mr. Fred Dawson, nominated by the company, and Mr. W. E. Thompson, nominated by the City as representing the employees concerned.

(2) From certain employees of the Master Printers of Ottawa, members of the Ottawa Typographical Union No. 102. The personnel of the Board and the text of the Board's report appear in the present article.

(3) From the employees of the Hull Electric Company, members of Division No. 591, Amalgamated Association of Street and Electrical Railway Employees of America. A Board was established composed as follows: Captain W. P. Grant, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. D. Kelley, Ot-

tawa, and Jos. Gibbons, Toronto, nominees of the company and employees respectively.

(4) From the employees of the Vancouver and Victoria Gas Companies, being gas workers. A Board was established composed as follows: Mr. Chas. E. Tisdall, Vancouver, chairman, appointed on the joint recommendation of the other two members, Messrs. A. G. McCandless and Victor R. Midgley, Vancouver, nominees of the companies and employees respectively.

### Other Proceedings under the Act.

During the month of July a Board was established to deal with the dispute between the following companies: (1) Toronto and Niagara Power Company; (2) Toronto Power Company, Toronto; (3) Toronto Power Company, Niagara Falls, Ontario, and (4) Toronto Street Railway Company, and certain of their employees, being members of the following trade unions, namely: (1) blacksmiths and helpers, members of Local 318, International Brotherhood of Blacksmiths and Helpers; (2) electrical workers and helpers, members of Local 353, Toronto, and Local 897, Niagara Falls, International Brotherhood of Electrical Workers; (3) woodworkers, members of Toronto District Council of Carpenters, and (4) machinists and helpers, members of District Lodge No. 46, International Association of Machinists, and Lodge 1296, Niagara Falls, Ontario, International Association of Machinists.

### Report of Board in dispute between the Winnipeg Electric Railway Company and its street railway employees

**A** REPORT was received from the Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being members of the Street Railway Employees' Union. The Board was composed as follows: His Honour Judge Robert H. Myers, Winnipeg,

chairman, appointed by the Minister in the absence of a joint recommendation from the other members, Messrs. Chas. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Dafoe and was accompanied by a proposed agreement.

A minority report was presented by Mr. Ward. The company later advised that the findings of the Board regarding wages adjustments were acceptable to them.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, being members of the Street Railway Employees' Union, employees.

Winnipeg, Man., July 5, 1920.

To the Honourable,  
The Minister of Labour, Ottawa.

Sir,

The Board of Conciliation and Investigation consisting of Messrs. Charles E. Dafoe, Robert S. Ward and His Honour Judge R. H. Myers, appointed by you to inquire into and endeavour to settle the differences between the Winnipeg Electric Railway Company and certain of its employees being members of the Street Railway Employees' Union held its first session in Winnipeg on the nineteenth of May, 1920. Subsequently the Board held three sittings in May and six in June when evidence and arrangements were submitted by all parties concerned. Each member of the Board attended every session. Messrs. C. A. Tanner, Alfred Scoble, Alex. Tevendale, Alderman John Blumberg, H. I. Toombs, W. A. Freeman, H. B. Wilson, R. L. Lyon, R. E. Long and other employees attended as representing the employees and Messrs. F. L. Butler, L. Palk, R. R. Knox, J. R. Ong and M. L. Kane represented the company. It was found that the many points at issue were those that had formed subjects of controversy and arbitration before other Boards in previous years and the two parties had very decided views upon them and neither was prepared to yield.

The chief points at issue were as follows:

1. The Company had guaranteed a weekly minimum wage of \$18.00 to extra motormen and conductors, the employees asked that the amount be raised to \$30.00.

2. Employees wanted time and one-half for extra men—the same as for regular motormen and conductors.

3. A question as to seniority rights of a man promoted who might hereafter be returned to the ranks.

4. Charge money raised from \$35.00 to \$50.00.

5. The question of uniforms, pea jackets and overcoats was a very important topic, both parties desiring radical changes from the existing agreement.

6. Regarding overtime of motormen and conductors and what time to comprise "platform time." This issue involved considerations of reporting time, pull-in time, box time, etc.

7. The employees were demanding that in making time schedules a larger percentage should be straight runs and runs to be completed within a spread of ten and eleven hours and that no spread should exceed twelve hours.

8. Shorter hours for men in shops and car barns and on the tracks.

9. Annual holidays for all men.

10. More wages.

After the parties had closed their cases the Board held several sessions and also interviewed the officials of the company and of the union in an effort to effect an agreement but without complete success. It may be noted here that the award last September dealt with several of those same differences and the decisions then arrived at could not be disturbed without a very strong case being made out and presented to this Board which was not done.

The majority of the Board thereupon agreed to recommend that a settlement of the points at issue be arranged according to the draft agreement and schedule attached to this report.

The Board have granted certain concessions to the employees respecting passes, platform time, overtime and an amount guaranteed as weekly wage to extra men. The amount granted as increase in wages places the employees in more favourable circumstances than street railway employees in most of the Canadian cities and on a par with the City of Toronto where an agreement was effected a few days ago. The terms of the proposed agreement and schedule are fair to all parties considering all the circumstances.

We therefore recommend that both parties accept the draft agreement prepared by the majority of this Board and submitted herewith. Mr. Ward, one of our Board, was a member of last year's Board, and in the award made last September by the latter Board he expressed his opinion that the increase to 55c then made did not entirely take care of the increased cost of living. He is still of the same opinion and furthermore still contends that the additional increases now granted of three, four and five cents per hour are not sufficient to keep pace with the cost of living and he declines to sign this report.

The negotiations were carried out with the utmost good feeling among the contending parties and we express our appreciation of the courtesy shown to us.

Respectfully submitted,

(Sgd.) R. HILL MYERS,  
Chairman.

(Sgd.) C. E. DAFOE,  
Member.

This Agreement made in duplicate this... day of..., A. D., 1920, between Winnipeg Electric Railway Company, hereinafter called "The Company" of the first part; and Winnipeg Street Railway Employees' Union, representing certain employees of said company mentioned in the agreement hereinafter called the "Employees" of the second part.

Witnesseth that the parties hereto agree as follows:

This agreement shall take effect and be binding upon the parties hereto from the 1st day of May, 1920, to the 30th day of April, 1921, and

thereafter until terminated as hereinafter provided. If either party desires to terminate this agreement on the 30th day of April, A. D. 1921, they will give the other party thirty days' notice prior to that date. If such notice is not given, this agreement shall continue in force thereafter until terminated by a thirty days' notice by either party prior to the 1st day of May, or the 1st day of November in any year.

#### WAGE SCHEDULE AND WORKING CONDITIONS— MOTORMEN AND CONDUCTORS

##### WAGE SCHEDULE

(a) Motormen and Conductors shall receive for

	Daily, except Sunday	Sunday only
	Per hour	Per hour
First 6 months.....	50c	55c
Second 6 months.....	53c	58c
Second year.....	57c	52c
Third year and thereafter.....	60c	65c

(b) All extra motormen and conductors reporting regularly at the Company's stated time every day during the week, and ready and able to work for the Company, shall be paid a minimum of twenty dollars (\$20.00) per week.

(c) Motormen and Conductors booked on regular runs scheduled out of car house shall be required to report for duty at the car house five (5) minutes before time to leave and shall be allowed five (5) minutes reporting time in addition to platform time.

(d) Motormen and Conductors working overtime shall be paid at the rate of time and one-half for such overtime. This is not applicable to extra motormen or conductors, except when a car is being operated by an extra motorman or conductor and a regular motorman or conductor and they each perform a like service on the full scheduled run, when each shall receive the same consideration in respect to any overtime that may be earned on that run.

(e) Lay-off time is the time between the shifts of a scheduled run and when thirty minutes or less shall be considered a part of and be paid for as platform time.

(f) Motormen and Conductors training students shall be paid 5 cents per hour extra for such service while so engaged.

(g) Motormen and Conductors who are required to place their cars in the car barns or in storage yard at the end of regular runs shall be allowed five (5) minutes pull-in time in

addition to platform time for so doing—it being understood that full schedule time applicable to that period of the day shall be allowed to complete the last trip.

(h) Conductors on outlying lines shall be allowed box time in addition to platform time for time required in excess of ten (10) minutes in travelling between relief points and the place of receiving or delivering fare box. Any motormen on an outlying line required by the Company to come to the office shall receive same consideration.

(i) Wages shall be paid semi-monthly on the 15th and last day of each month, except when either of the above days falls on Sunday or a Holiday, in which event payment shall be made on the day previous if proper arrangements can be made to do so.

#### EQUIPMENT OF CARS

All cars shall be cleaned and fully equipped with proper appliances for operating, including an adequate supply of sand and fuel, and a broom for each car and shall be ready for service ten (10) minutes prior to the time at which they are due to leave the barn. The motorman and conductor of each car before leaving for the run must see that the car is fully equipped with the proper appliances and supplies, and if anything is found to be lacking must report at once to an Inspector or Foreman. Conductors and Motormen must keep their vestibules clean while on their run, and must report any defects or anything wrong with the car at the end of the run. No motorman or conductor shall be compelled to take a car without doors or with broken windows from the barns between October first and May first. All motormen's and conductors' vestibules shall be fitted with a heater, and as cars are remodeled all conductor's vestibules shall be fitted with an enclosure for the winter months containing a heater. Both motormen's and conductors' vestibules shall be made as tight and comfortable as possible. All double end cars shall be fitted with trolley catchers, double glass in front vestibule window and mats for the motormen's use during the winter months, and shall have a heater installed in each end of the car ready for use by October first. Stools shall be furnished for the use of the motormen and conductors on such routes as the General Manager may think best. Stools for conductors shall be supplied only on single end cars. The handles for operating door mechanism shall be fitted with covering during the winter months to be effective from October first. All front vestibules on closed cars shall be darkened at night, either by being fitted with curtains or blinds or in such manner as may be thought best. Doors on vestibules of double end cars shall remain on permanently.

#### SENIORITY

Seniority subject to efficiency shall be given preference on all runs. Seniority shall date from the time an employee receives a badge. Each motorman and conductor shall have the oppor-

tunity of selecting his run in accordance with the length of his service with the company. Not more than three months shall elapse between the dates on which runs are posted for selection by motorman and conductor. It is understood that the company will provide adequate facilities for signing up of runs.

#### PROMOTIONS

Any employee now in the Traffic Department acting as Division Superintendent, Traffic Supervisor, Timekeeper, etc., who was promoted from the position of motorman or conductor prior to the 13th September, 1919, will retain his seniority rights as of that date and such employees thereafter promoted shall retain their seniority rights as of the date of their promotion, but such seniority rights shall not be exercised by any employee now in the Traffic Department, or who may hereafter be promoted to a position in the Traffic Department, until the next regular sign-up of runs after the employee retires from such position as he may now hold or to which he may hereafter be promoted in the Traffic Department.

#### CHANGE MONEY

After two months service with the Company conductors and relief men will be furnished with tickets and change to the amount of \$35.00 after signing the company's form of agreement for the return of the money when called upon to do so.

#### MONEY CHANGES

Hereafter conductors entering the service shall be furnished with a conductor's money changer by the company, and same shall remain the property of the company.

#### UNIFORMS

Every two years, without charge, conductors shall be furnished with a uniform pea-jacket, and each motorman with a uniform overcoat, and any motorman or conductor who leaves the service of the company for any cause within six months after receiving a pea-jacket or overcoat, may either return coat or pea-jacket and pay \$1.00 per month for each month it has been in his possession, or keep it and pay the cost of it less \$1.00 per month for the time it has been in his possession. Provided, however, that when an employee who has been two years or more in the service of the Company leaves, the charge for pea-jacket or overcoat shall be computed from October first in each year.

Each motorman and conductor will be provided with a summer cap each year, and a winter cap every three years,—winter caps to be issued not later than November first and summer caps not later than May first in each year.

Each motorman or conductor will be provided with a regulation uniform each year on following conditions: motorman or conductor entering service will pay half the cost of first

uniform, all uniforms furnished thereafter shall be furnished free of charge to the motorman or conductor.

Circumstances permitting, orders for uniforms shall be issued not later than January 31st.

Should a motorman or conductor with less than two years service to his credit leave the service of the company, or be discharged within four months after receiving a uniform, such motorman or conductor will be charged full price of such uniform, it being understood that when a motorman or conductor has been in the service of the company for a period of over two years the charge for the uniform shall be computed from May first.

A motorman or conductor entering the service of the company before July 31st in any year shall be provided with a regulation uniform for that year.

SCHEDULES

In schedule making the following definitions shall apply:

“Platform time”—Actual running time on cars either:

- 1. From time car leaves car house until crew is relieved; or
- 2. From time the crew takes car on relief until car completes its run arriving at the car house; or
- 3. From time at which crew takes car on relief until it leaves car on relief.

Plus lay-off time of thirty minutes or less as hereinafter defined.

“Lay-off time”—The time between the shifts of a regular scheduled run and when not exceeding thirty minutes shall be considered part of the platform time.

“Reporting time”—Time allowed crews in addition to platform time and lay-off time for all regular cars scheduled out of the car houses or storage yards. The reporting time is not to be included with platform time in the calculation of overtime or spread time.

“Pull-in-time.”—Time allowed crews for placing cars in car barns at end of regular runs and is not to be included in platform time in the calculation of overtime or spread time.

“Box-time.”—Time allowed in excess of ten minutes required for the trip between the place of receiving or delivering fare box and the relief point.

“Spread time.”—The elapsed time from the beginning of platform time on the first shift to the end of platform time on the last shift. In the calculation of spread time, the reporting time, pull-in-time, and box time are not to be included.

“Guarantee time.”—The time necessary to be added to the total of platform time, lay-off time, reporting time, pull-in time and box time, to make seven hours and forty-five minutes.

“Overtime.”—The platform time in excess of eight hours and twenty minutes. Reporting

time, pull-in-time and box time, shall not be included in any calculation of overtime but shall be paid for at regular rates.

All runs posted for selection shall conform as nearly as possible to an eight hour day.

Employees on regular runs working in excess of eight hours and twenty minutes platform time, shall be paid overtime at the rate of time and one half for all such additional time.

On all runs posted for selection employees shall be paid a minimum time of seven hours and forty-five minutes.

Not less than thirty-five per cent of all scheduled runs shall be straight runs.

Not more than twenty per cent of scheduled runs shall be three piece runs.

Not less than fifty per cent of scheduled runs shall be completed within a spread of ten hours, and not less than sixty-five per cent of the total runs within eleven hours.

No run shall exceed thirteen hours spread.

REPORTS

All motormen and conductors asked to come to the office to make reports relating to matters that have not taken place in connection with their own car, will be paid for the time lost so doing.

Conductors and motormen making reports of accidents occurring in connection with their own car will be paid for all time exceeding twenty minutes lost in waiting in the Company's Office to make such reports.

Any motorman or conductor required by the company to attend court to give evidence which necessitates the loss of time to said conductor or motorman, will be paid full rate of wages for such time lost.

MOTOR BUS OPERATION

All men required to operate motor busses shall be taken from the service and the motor bus runs shall be posted for the general sign-up of runs once each year, as near as possible to January 1st, it being understood that such runs shall be available only to men having the necessary qualifications.

SPECIAL RUNS

As far as practicable no motorman or conductor shall be compelled to leave his regular run to take a special run.

WAGE SCHEDULE AND WORKING CONDITIONS

The terms "Car Inspector" applies to all men other than car cleaners, sweepers, and stove tenders employed in the Fort Rouge car barn and North car barn both day and night, and at the main barn at night. This term will apply to men employed on shift work at Fort Rouge Car Barn, North Car Barn and at Main Car Barn.

## HOURS OF WORK

*Section A.* For men in the Fort Rouge Construction Shop eight (8) hours, between the hours of 8 a.m. and 17k, with one hour off for lunch between the hours of 12k and 13k shall constitute a day's work. On Saturdays during the months of May, June, July and August four (4) hours between the hours of 8k and 12k shall constitute a day's work. All time worked over eight (8) hours per day, except during the months of May, June, July and August when four (4) hours shall constitute a day's work on Saturdays, shall be considered overtime and shall be paid for at the rate of time and a half. All time worked over four (4) hours on Saturdays during the months of May, June, July and August shall be considered overtime and shall be paid for at the rate of time and a half.

*Section B.* For men employed in the Main Street Shop and Car Barn during the day shift eight (8) hours between the hours of 8k and 17k with an hour off for lunch between the hours of 12k and 13k shall constitute a day's work. On Saturdays during the months of May, June, July and August four (4) hours between the hours of 8k and 12k shall constitute a day's work, except for car maintenance men which includes painters, carpenters, controller men, air brake men, pitmen and car cleaners, who will be required to work on Saturday afternoons during the months of May, June, July and August when necessary. All time worked over eight (8) hours per day shall be considered overtime and shall be paid for at the rate of time and one half. All time worked over four (4) hours on Saturdays during the months of May, June, July and August shall be considered overtime and shall be paid for at the rate of time and a half.

For men assigned to night work or shift work in the Main Street shops and Car Barn eight (8) hours shall constitute a day's work, and forty-eight (48) hours shall constitute a week's work. All time worked over eight (8) hours per day, of forty-eight (48) hours per week, shall be considered overtime and shall be paid for at the rate of time and a half.

*Section C.* For men employed in the Fort Rouge Car Barn and North Car Barn, during the day shift eight (8) hours between the hours of 8k and 17k with an hour off for lunch between the hours of 12k and 13k shall constitute a day's work. Six (6) days of forty-eight (48) hours per week shall constitute a week's work for men in these two barns. All time worked over eight (8) hours per day, or forty-eight (48) hours per week shall be considered overtime and shall be paid for at the rate of time and a half.

Car House Inspection and Cleaning.	Days	Nights and shift work.
Car Repair men or Car Inspectors:—		
1st 3 months.....	44c	46c
2nd 3 months.....	46c	48c
2nd 6 months.....	49c	51c
3rd 6 months.....	51c	53c
4th 6 months.....	57c	60c
Car Cleaners, Sweepers, Stove Tenders, etc...	44c	46c

For men working at night or on shift work in the Fort Rouge Car Barns and North Car Barn, eight (8) hours per day shall be considered a day's work, and forty-eight (48) hours per week shall be considered a week's work. All time worked over eight (8) hours per day, or forty-eight (48) hours per week, shall be considered overtime and shall be paid for at the rate of time and a half.

*Section D.* Time and a half shall be paid for all Dominion Holidays, and in case when the holiday falls on Sunday the above rate shall apply on the day on which the Holiday is observed. Except that the men employed in car maintenance which includes painters, carpenters, controllers, air brake men, pitmen and car cleaners in Main Street Shops and Car Barns, and men employed at night in Main Street Shops and Car Barns, Fort Rouge and North Car Barns both day and night, will not be paid at the overtime rate when working Saturday afternoons, Sundays and Legal holidays when such time comes in their regular shift. Only such men as are required to maintain cars for service shall be required to work Sundays and Legal Holidays.

The term "shift work" is to be interpreted as any eight (8) hours work exclusive of lunch hour period in any twenty-four (24) hour period.

Seniority with efficiency shall govern in all Departments.

Wages shall be paid semi-monthly on the 15th and last day of each month, except when either of the above days falls on Sunday or a holiday, in which event payment will be made on the day previous if proper arrangements can be made to do so.

#### WAGE SCHEDULE AND WORKING CONDITIONS, TRACK DEPARTMENT

The following minimum wage shall prevail during the life of this agreement:

Track labour .....	44c
Foremen, Leading Trackmen or Sub-foremen:—	
1st 6 months .....	45c
2nd 6 months and after .....	50c

#### HOURS OF WORK

For men working in track department, during the day time eight (8) hours from 8k to 17k with one hour off for lunch between 12k and 13k shall constitute a day's work. Six days (6) or forty-eight (48) hours per week shall constitute a week's work. All time worked over eight (8) hours per day, or forty-eight (48) hours per week, shall be considered overtime and paid for at the rate of time and a half.

When men are assigned to regular night work or to shift work eight (8) hours shall be considered a day's work, and six (6) days or forty-eight (48) hours per week shall be considered a week's work. All time worked over eight (8) hours per day, or forty-eight (48) hours per week shall be considered overtime and shall be paid for at the rate of time and a half.

The term "shift work" is to be interpreted as any eight (8) hours work exclusive of lunch hour period in any twenty-four (24) hour period.

Wages shall be paid semi-monthly on the 15th and last day of each month, except when either of the above days falls on Sunday or a holiday, in which event payment will be made on the day previous if proper arrangements can be made to do so.

#### SUB-STATION OPERATORS

The following wage shall prevail during the life of this agreement:—

	Per month
1st class operators .....	\$145
2nd class operators .....	130
Senior 3rd class operators .....	125
Junior 3rd class operators .....	120
4th class operators .....	115
Floormen .....	95
Wipers .....	90
Transcona operators, each .....	140

#### Relief operators.—

The rate of pay of Relief operators will be an intermediate rate between the two classes of operators which they relieve.

Station Maintenance Men.	Per hour.
Wiremen journeymen .....	80c
Wiremen helpers .....	65c
Wiremen Apprentice:—	
1st 6 months .....	33c
2nd 6 months .....	38c
3rd 6 months .....	44c
4th 6 months .....	51c
3rd year .....	57c
4th year .....	65c

Miscellaneous.	Per month
Telephone and bonding men .....	\$150
Batteryman .....	100

#### HOURS OF WORK

(a) In stations operating twenty-four (24) hours, except Transcona, eight (8) consecutive hours out of any twenty-four (24) hours period shall constitute a day's work, and forty-eight (48) hours shall be considered a week's work.

(b) In stations operating nineteen (19) hours and having two shifts, 9½ consecutive hours per shift for five days per week a total of 47½ hours per week.

(c) Station maintenance men, eight (8) hours shall constitute a day's work from 8k to 12k, and from 13k to 17k. The hours on Saturday to be from 8k to 12k, total of forty-four (44) hours per week. For all work up to forty-eight (48) hours per week, (exclusive of Saturday afternoons) straight time will be paid—all time over forty-eight (48) hours per week will be paid for at overtime rate. For men assigned to shift duty any eight (8) hours, exclusive of lunch hour period in any twenty-four (24) hour period, shall be considered a day's work—forty-eight (48) hours shall be considered a week's work.

(d) That Saturday afternoons, Sundays and Legal Holidays, and other time worked over bulletin hours shall be paid for at the rate of time and a half. Legal holidays to be as follows: Sundays, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, New Year's Day and Civic Holiday.

Employees in the station operating staff and maintenance men assigned to shift work will not be paid at the overtime rate when working Saturday afternoons, Sundays or Legal Holidays when such time comes in their regular shift.

Any employee who has worked overtime shall not be paid off to equalize the overtime made.

Any employee called out in case of emergency after 21k shall receive not less than four hours pay at regular rates.

Any employee on duty called to go on evening or night shifts shall be allowed to work until 12k.

In station operating staff when men are required to work over forty-eight (48) hours per week, except Transcona, such excess time will be paid for at the rate of time and one-half.

The hours of work of operators at Transcona remain same as at present.

All men working on monthly salary who have been one year in the service of the Company shall receive two weeks holidays each year with pay.

When any of the station operating staff are assigned to work on their days off same to be paid at the rate of time and one-half.

Wages shall be paid semi-monthly on a specified pay day, when either of the days fall on Sunday or a Holiday payment will be made on the day previous if proper arrangements can be made to do so.

Seniority with efficiency shall prevail in all Departments.

In case of a man moving to a higher position he shall receive the minimum rate of pay for that position.

As vacancies occur promotion will be made on the basis of seniority with efficiency.

All wires carrying a voltage of 675 volts or over to ground shall be classed as high voltage wires.

In station work two journeymen, or one journeyman and helper, are required to work on wires carrying a voltage of 675 volts or more to ground.

#### APPRENTICE

An apprentice is an employee not having four (4) years experience in one or more branches of the trade. Apprentices shall be required to work only under the supervision of a journeyman except for the last six months of their apprenticeship. Apprentices shall not be required to work overtime except in cases of emergency.

#### WAGE SCHEDULE AND WORKING CONDITIONS, TRUCK DRIVERS

The following minimum wage shall prevail during the life of this agreement:—

Truck drivers.....52c per hour.

#### WORKING CONDITIONS

Eight (8) hours per day shall constitute a day's work—forty-eight (48) hours per week shall constitute a week's work. Overtime will be paid for at the rate of time and one-half over eight (8) hours per day or forty-eight (48) hours per week.

Seniority with efficiency shall prevail.

Truck drivers in Electric Department will act as groundmen or helpers when required to do so.

Truck drivers in Track Department will load and unload truck when required to do so.

All Truck drivers will be held personally responsible for truck placed in their charge, and will be required to keep truck clean and see that it is supplied with the necessary oil and gas.

All repairs to engine and equipment in truck will be made by employees in the garage.

Truck drivers violating the City By-laws governing traffic rules will be held personally responsible.

Truck drivers will not be required to purchase their own chauffeur's license after their first year's service as such.

#### GENERAL WORKING CONDITIONS

##### DISCRIMINATION

Neither the company nor the employee shall discriminate against any employee for being or not being a member of the Street Railway Employees' Union.

##### LEAVE OF ABSENCE

(a) Reasonable leave of absence will be granted to employees on application to their respective Superintendents, or shop and barn foremen, and employees taking other employment during such leave shall be considered to have terminated their service with the company.

(b) Any employee elected or appointed to office in the employees' union which requires his absence from the Company's employ shall, during such absence, retain his seniority rights and may upon his retirement from such office return to the company's employ.

(c) Officers of the employee's Union shall be granted leave of absence on business of the employees' Union insofar as the regular operation of the service will permit, and their application for leave of absence shall be given preference over any other application for leave of absence on the same day.

##### REDUCTION OF STAFF

When employees are laid off because of slack work the youngest men in the service shall be laid off first, and when the company desires more men these men laid off shall be given preference.

## REFERENCES

Any employee leaving the service of the company for any cause shall upon application be furnished with a reference as to length of service, character and ability, while in the company's employ. Regular printed forms shall be used for this purpose.

## TRANSPORTATION

Free transportation on all lines of the company will be granted to employees who are in uniform or who produce a badge or pass furnished by the Company. The company undertakes to procure for the employee free transportation over the lines of the Suburban Rapid Transit Company, and the Winnipeg, Selkirk and Lake Winnipeg Railway Company, upon application being made to the General Office. The maximum number of passes in any one day on any one line to be twenty, such passes good on any day with the exception of holidays.

## GRIEVANCES

It is agreed that the company through its properly accredited officers shall meet and confer with the properly accredited officers of the employees' Union, or with committee of employees upon any and all questions which may from time to time arise between the company and its employees. All complaints and grievances to be adjusted by the Traffic Superintendent, or by the Superintendent or Foreman in charge of the various departments in which the employees hereinafter mentioned are employed, if possible. When such adjustment cannot be made the matter will be taken up with the company direct by a committee representing the men having the grievance and they shall endeavour to reach a mutual understanding. It is distinctly understood by the parties that in the meantime there will be no lockout on the part of the company or strike on part of the men. Any employee who has been discharged or suspended and who feels aggrieved shall have the right to have his case taken up with the company by a committee appointed by the employees. If after investigation such employee is found not guilty of sufficient cause to warrant such discharge or suspension, he shall be reinstated to his former position and paid for all time lost. No report or grievance complaining of the conduct of an employee shall be received or recognized by the company as affecting the record of the employee, nor shall it be entered upon his record sheet unless it bears the name of the complainant. Any report or grievance shall be open to inspection by the employee or by the grievance committee appointed by the employee. Such report or grievance must be disposed of by the company, and the finding of the company as to the culpability of the employee entered on the company's record sheet.

In witness whereof the parties hereto have executed these presents:

## Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, members of the Street Railwaymen's Union, employees.

To the Honourable Gideon Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir:

I regret very much that the majority of the Board did not arrive at a decision regarding an increase in wages with which I could agree, thus making it necessary for me to submit a minority report.

At the first meeting of the Board, at which the parties to the dispute were present, it became very evident that they were a long way apart with a long list of unsettled questions. The employees had presented a new agreement to the company which, in addition to asking for an increase in wages, contained a large number of changes in working conditions. The company, on the other hand, presented a new agreement to the Board which contained the same rates of pay as the existing agreements, and a number of changes in working conditions, none of which were concessions to the men, but all of them being an endeavour to take something away.

Practically no progress had been made towards settling any of the points at issue before coming before the Board,

in fact the men had not seen the company's new agreement until it came before the Board. After devoting a lot of time to hearing the evidence of the parties, and later discussing the changes asked for by both parties the net result of the Board's report on working conditions is the adoption of the old agreements with very little change. Although I am convinced that the changes in working conditions asked for by men were reasonable and with some slight modification should have been granted, I could have signed the report if an equitable increase in wages had been secured.

The increase granted motormen and conductors amounts to (4) four cents per hour for the two lowest rates and (5) five cents per hour for the two highest rates; making their rates as follows:

	Week days per hour	Sundays per hour
First 6 months ...	50	55
Second 6 months...	53	58
Second year .....	57	62
Third year and there- after .....	60	65

Other classes of labour covered by this agreement received the following increases. Those now receiving from 30 to 40 cents per hours, an increase of (3) cents per hour. For those receiving 40 to 50 cents per hour, an increase of (4) four cents per hour. For those receiving 50 cents per hour up, an increase of (5) five cents per hour. Men paid on a monthly basis to be increased (10) ten dollars per month.

In view of the large increase in the cost of living which needs no argument from me to prove, it is so apparent to us all, I am of the opinion that the increase does not take care of a reasonable portion of the increase in the cost of living. To be reasonably fair the increase offered ought to have been double.

#### Uniforms.—

The agreement between the company and the motormen and conductors provides that the company shall supply the men with one uniform each year, except that the men pay half the cost of the first uniform.

During 1919 a large number of motormen and conductors did not receive a uniform as provided in the agreement, and the men asked in their proposed agreement that,

“any motorman or conductor who did not receive a uniform for the year 1919, shall receive two uniforms for 1920, or be reimbursed the cost of the 1919 uniform.”

For the following reasons I consider this request should be granted.

First.—The existing agreement between the company and men provides that the men shall receive a uniform each year.

Second.—A large number of men did get uniforms in 1919 in accordance with the agreement.

Third.—The fact that some men got uniforms and others did not gives the appearance of discrimination against some men.

Fourth.—The fact that the men are supplied with uniforms is considered in fixing the wages of the men, and is therefore a part of their wages.

It would have been but fair for the Board to at least have awarded these men one half of the cost of the 1919 uniform and I hope the company will consider this a fair proposition.

All of which is respectfully submitted.

Dated this 5th day of July, A.D. 1920.

(Sgd.) R. S. WARD,  
Member of Board.

## Report of Board in dispute between the Winnipeg Electric Railway Company and its gas workers

**A** REPORT was received from the Board established to deal with the dispute between the Winnipeg Electric Railway Company and certain of its employees, being members of the Gas Workers' Union. The Board was composed as follows: His Honour Judge Robert H. Myers, Winnipeg, chairman, appointed by the Minister in the absence of a joint recommendation from the other members, Messrs. Chas. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Dafoe and was accompanied by a proposed agreement. A minority report was presented by Mr. Ward. The company later advised that the findings of the Board regarding wages adjustments were acceptable to them.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees, being members of the Gas Workers' Union, employees.

Winnipeg, Man., July 2, 1920.

The Honourable,

The Minister of Labour, Ottawa.

Sir:—

Regarding the dispute between the Winnipeg Electric Railway Company and certain of its employees being members of the Gas Workers' Union. The Board of Conciliation and Investigation appointed by you under the Industrial Disputes Investigation Act, 1907, consisting of Hon. Judge Robert H. Myers, Chairman, Robert S. Ward and Charles E. Dafoe, Members, beg leave to report as follows:—

The Board was duly constituted and held regular sessions on the 11th, 14th,

16th and 18th June, and personally visited the Gas Works accompanied by the representatives of both parties and made a thorough inspection of the plant and the conditions of labour.

Messrs. James Hector, Henry Winkworth and Edward Maytum represented the employees, and Messrs. M. L. Kane, J. W. Lawler, and L. Palk represented the Company, throughout the negotiations, all of which were characterized by the greatest harmony and courtesy. This was the first occasion that these employees had appeared before a Board and their demands were confined largely to two subjects, first, for one day off in seven, and second, an increase in wages.

After the evidence was all placed before the Board, we held three or four meetings and decided that the request of the employees be granted. The majority of the Board have prepared a draft agreement and wage schedule which we have presented to the Company and employees for their acceptance. Mr. R. S. Ward, representing the employees, does not entirely concur in our conclusions and will report separately.

The terms and conditions are the best that the Board can offer in the interests of both parties at the present time and recommend the acceptance of the same by them.

The Officers of the Company have promised to improve the conditions of the mess room, wash house and lavatory accommodation at the Gas Works, and we recommend that this be done immediately, and hereafter that the same be kept in a clean sanitary condition and that proper lockers be provided for those employees who are compelled to change their clothing at the works.

Respectfully submitted,

(Sgd.) R. HILL MYERS,

Chairman.

(Sgd.) C. E. DAFOE.

THIS AGREEMENT made in duplicate this day of A.D., 1920, between the Winnipeg Electric Railway Company, hereinafter called "The Company", of the first part, and Employees of the said Company, members of the Gas Workers of Winnipeg, hereinafter called "The Union", of the second part.

WITNESSETH: That the parties hereto hereby agree as follows:—

#### 1. *Duration of Agreement.*—

This agreement shall take effect and be binding upon the parties hereto from the 1st day of May, 1920, to the 1st day of May, 1921, and thereafter from year to year, until changed by the parties hereto. Either party desiring to change this Agreement on the 1st day of May, 1921, or the 1st May of any subsequent year, shall notify the other party in writing of its desire to change, at least thirty days before such date, and details of desired changes must accompany notice.

#### 2. *Discrimination.*—

Neither the Company, the Employees, nor the Union shall discriminate against any employee for being or not being a member of the Union, but foremen shall not be members of the Union.

#### 3. *Wage Schedule.*—

(a) The following rates of wages shall prevail from the date of this agreement:—

	Per hour.
Machine men.....	65 cents.
Front door men.....	63 "
Back door men.....	63 "
Pipe jumpers.....	60 "
Hand stokers and scurfers.....	63 "
Trimmers.....	55 "
Fire cleaners.....	60 "
Boiler men, firemen and scurfers' helpers.....	55 "
Boiler cleaner.....	55 "
Work fitters.....	55 "
Yardmen, coke wheelers, and latter employed in coal cars and purifying house or any part of the gas works.....	44 "
Blacksmiths.....	60 "
Handyman—pipefitter—tinsmith.....	55 "
3 men working on coal elevator.....	53 "

#### (b) *Overtime.*

Overtime shall be paid at the rate of time and a half. Employees working on Sundays, legal holidays, etc., when such time comes in their regular shift, shall not be paid at overtime rate.

#### (c) *Payment of Wages.*—

Employees shall be paid semi-monthly on the fifteenth and last days of each month, except when either of the above dates fall on a Sunday or holiday, in which event either payment shall be made on the day previous if proper arrangement can be made to do so.

(d) Employees shall enjoy the same privileges as regards passes on the Company lines as previously.

#### 4. *Hours of Labour.*—

Eight (8) hours shall constitute a day's work for men in the gallery and nine (9) hours for yardmen, labourers, and other like employees, and forty-eight (48) and fifty-four (54) hours respectively shall constitute a week's work.

#### 5. *Instructions.*—

In case of breakdown or in other emergencies all employees must unite to meet the emergency as directed although it may not be in their ordinary line of work.

#### 6. *Leave of Absence.*—

(a) Employees shall be granted reasonable leave of absence upon application to their respective foreman. Any employee taking other employment during such leave or who does not report for work at the termination of the leave, shall be considered to have terminated his service with the company.

(b) Officers of the Union shall be granted leave of absence for the purpose of Union business insofar as the regular operation of the works will permit and their applications shall be given preference over any other applications for leave of absence on the same day.

(c) An employee working on the eight (8) hour relay shifts who absents himself from work without leave as a consequence of sickness or other unforeseen cause, shall where his regular shift is on the morning or afternoon relays, report for duty at the office of the works, personally or by telephone, on the day prior to that on which he intends to return to work, at least two (2) hours before the substitute goes off duty; when his regular shift is working nights, he shall report before noon on the day on which he is prepared to recommence work.

(d) Employees working in relay shifts shall change shifts in proper rotation as may be arranged by the Company and this Union from time to time.

#### 7. *Reference.*—

Any employee leaving the service of the company for any cause shall upon application be furnished with a reference as to length of service, character and ability, while in the Company's employ. Regular printed forms shall be used for this purpose.

#### 8. *Grievances.*—

In cases which may require immediate adjustment, the foreman in charge may confer with the representative of the Union and arrange the point at issue, and if the arrangement is not satisfactory to the employees, they may appeal to the Superintendent of the Plant, but the employees must carry out the orders of the foreman pending the appeal to the Superintendent.

The Company, through its accredited representatives, shall meet and confer with the proper accredited representatives of the employees upon any and all questions which may arise from time to time between the Company and its employees.

IN WITNESS HEREOF the parties hereto have executed these presents:

WINNIPEG ELECTRIC RAILWAY Co.

By.....  
Vice President and General Manager.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Winnipeg Electric Railway Company, employer, and certain of its employees being members of the Gas Workers' Union, employees.

To the Honourable Gideon Robertson,  
Minister of Labour, Ottawa.

Sir:

I regret very much that the majority of the Board did not arrive at a decision regarding an increase in wages with which I could agree, thus making it necessary for me to submit a minority report.

The New Agreement proposed by the men contained several changes in working conditions in addition to the request for an increase in wages. I do not think that it is necessary for me to review all the changes requested and the manner in which they were disposed of, as a unanimous report would have been made had an equitable increase in wages been secured for the men.

The men asked for a 48-hour week for men working in the yards; they now work 54. This request was not conceded. In view of the fact that the 48-hour week is so generally adopted and recognized, I am of the opinion

that the Board ought to have granted this request.

They also asked that men working in the Gas Plant be allowed one day off in seven. They now work seven days per week, 8 hours per day. I am pleased that the Board has granted this request, but regret that in doing so it did not increase the hourly rate sufficient to make their weekly wage at least the same as heretofore. With the exception of three men who got an increase to make their weekly wages a few cents more than formerly, all the others suffer a reduction in the weekly wage. The majority report will no doubt show these increases in detail.

The increase of four and five cents per hour which was granted to the other employees is of little value to them at present, as it was shown in the evidence that the company is now paying them more than the minimum rate set by the Board. It will of course be the minimum when labour gets more plentiful.

So much has been said and written about the increase in the cost of living, that I need not go into a lengthy argument to prove the need for better increases in wages to take care of a larger portion of the increase in the cost of living. The increase offered by the majority report does not take care of a reasonable portion of the increase as shown by the LABOUR GAZETTE. For this reason I did not join with the other members of the Board in making the report.

All of which is respectfully submitted.

Dated this 5th day of July, A.D. 1920.

(Sgd.) R. S. WARD,

Member of Board.

## Report of Board in dispute between the Toronto Hydro-Electric Commissioners and their electrical workers

**A** REPORT was received from the Board established to deal with the dispute between the Toronto Hydro-Electric Commissioners and their employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers. A Board was established composed as follows: Mr. J. M. Godfrey, Toronto, chairman, appointed by the Minister in the absence of a joint recommendation of the other two members, Messrs. Frank R. Ewart and Louis Braithwaite, Toronto, nominees of the employer and employees respectively. The report was signed by all three members and contained recommendations as to settlement, although a minority report was later presented by Mr. Braithwaite.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Toronto Hydro-Electric System, employer, and their employees being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers, employees.

To the Honourable,  
Gideon Robertson,  
Minister of Labour, Ottawa.

The Board of Conciliation and Investigation appointed in relation to the differences between the employers and employees in this case, met by appointment at Toronto, on Saturday, the 19th day of June, 1920, and continued in session thereof on the 21st, 22nd, 23rd, 24th, 25th, 28th, 29th, and 30th days of June, and the 2nd and 3rd days of July, 1920.

Each member of the Board was present at all the above sittings.

The representatives for the employers, The Toronto Hydro-Electric System, before the Board, were Mr. H. H. Couzens, Manager of the System, Mr. P. E. Hart, Managing Engineer, Mr. H. J. McTavish and Mr. E. M. Ashworth.

The representatives for the Employees were Mr. James T. Gunn, Mr. J. Noble, Mr. R. Meeson and Mr. Alex. Farquhar.

The evidence and arguments of both sides, and the exhibits filed by them, were duly heard and considered, and all points in contention between the parties weighed and discussed by the Board.

The first matter considered was the dispute regarding the non-payment of wages to certain employees of the System who did not work owing to weather conditions on the 27th day of February, 1920. The Board, after hearing both sides, feel that this dispute arose through misunderstanding between the Superintendent and the men. It was suggested that owing to this misunderstanding the men should be paid their wages during the time they did not work on that day. Mr. Couzens accepted this suggestion and the matter was thus amicably adjusted.

The Board next considered the question of Temporary Foreman, and it was agreed that **CLAUSE 12** of the working conditions of the System as embodied in the Minority Report of 1915 be amended to read as follows:—

### “(12) TEMPORARY FOREMEN, ETC.—

In the case of men acting as temporary foremen or temporarily taking a higher position where such men are required to act for only a short time no change shall be made in their rate of pay, but where they are required to act for three days or longer they shall receive for such time as they are acting the foremen's or sub-

foremen's rate of pay, but the official or foremen making the temporary appointment should notify at once his next superior officer in writing of such appointment.

The Board next considered the question of promotion. We are in favour of the following principle governing promotion, namely: right of promotion will be governed by seniority where ability is equal and sufficient. (Seniority begins at the time the employee's pay starts.) Where a promotion is made to the grade of sub-foremen or above there shall be a probationary period of six months. If at any time during that period the employee promoted does not show capacity for the position he shall revert to his former position. If at the expiration of that period he does show proper capacity then he shall be permanently appointed. During the probationary period he shall receive the pay corresponding to that position.

The majority of the Board are not in favour at the present time, except as hereinafter mentioned, of disturbing the present classification of the employees of the System. Mr. Braithwaite representing the men, does not agree with this conclusion and will submit his views in this matter in a Minority Report.

The Board, however, are of the opinion that a new classification should be made in the case of Transformer Meter Installers.

The scale of wages for this class is set forth in a Schedule dealing with wages hereto annexed.

The Board are of the opinion that the classification of the Station Operating Division should be changed so that when an Assistant Operator becomes an Operator he shall receive a commensurate increased rate of wages. This is provided for in the Schedule of wages hereto annexed.

The Board are further in favour of allowing the time served by an Assistant Operator relieving an operator to count in determining promotion as time served as an operator.

When men are employed temporarily in the Operating Department on ac-

count of holidays or sick-leave, such relief men should be employed as assistant-operators and the assistant-operators given the opportunity to serve as operators.

The Board favour amending Clause 10 of the System's Working conditions as set forth in a Minority Report of 1915, to read as follows:—

#### (10) GRIEVANCE COMMITTEE.—

Any employee who feels himself aggrieved in any way shall have the right by appointment to interview the General Manager and submit his case. At all times by appointment the General Manager will receive a Grievance Committee from any department. It is also understood that the Business Agent of the Local or General Officer of the Organization may be a member of said Committee if desired by the employee or employees affected.

The Board further report in favour of adding the following provision to the present Working Conditions,—

"The System shall deliver to the jobs the material required, except small articles which can be conveniently carried by employees not to exceed ten pounds."

The Board are further in favour of the following provision for promoting co-operation between the Management and the Employees:—

"The Employees in any Department shall have the right to select one of their fellow employees to take up from time to time with the System's representative the question of the welfare of the employees and suggestions that will be beneficial to the System".

The other conditions as set out in the Minority Report of 1915, are to continue in full force and effect.

In two cases involving promotion affecting a number of employees the management of the System have agreed to reconsider these promotions and permit the employees a full opportunity to make any representations proper and necessary.

The Board lastly dealt with the vexed question of wages:

It is obvious that an agreement on this question could only be reached by invoking the spirit of conciliation and compromise. After considerable discussion the Board finally agreed upon the Schedule of Wages hereto annexed. This wage scale is to remain in full force and effect from July 1st, 1920, to 31st March, 1921, and there-

after until abrogated by Thirty (30) days notice in writing by either party.

There shall be no reduction in wages or existing privileges by the adoption of this report.

All of which is respectfully submitted.

(Signed) JOHN M. GODFREY,  
Chairman  
LOUIS BRAITHWAITE,  
F. R. EWART.

**Minority Report**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a Dispute between the Toronto Hydro-Electric System, employer, and their employees being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers, employees.

To the Honourable,  
Gideon Robertson,  
Minister of Labour, Ottawa.

As outlined in the majority report *re* classification in which I could not agree

with the other members of the Board, I herewith submit the following report.

In Article 1 (Scope) clauses 4, 5, and 6 of the schedule dealt with by the Board are the ones upon which I disagree; viz.:—

Sec. 4. Any male who has served three years in the electrical industry shall be rated as a Journeyman. Apprentices shall serve three years in the Industry before being rated as a journeyman.

Sec. 5. The Commission shall, on and after the 1st day of July, 1920, provide continuity of employment for all apprentices in their service, during their apprenticeship period.

Sec. 6. The ratio of apprentices to journeymen, in the Commission's service, engaged after May 1st, 1920, shall not exceed one apprentice to three journeymen in each department.

After hearing the evidence from both parties to the dispute and carefully judging the same from every angle, I have no hesitation in agreeing with the above clauses, as the facts prove to me that it is not selfish motives that prompt the electrical workers in their demand for the apprenticeship system on the Hydro-Electric System; but the object is to train competent mechanics with a knowledge of the electrical industry as a whole; who will be an asset to the fast developing industry. The

present classification tends to produce specialists in a particular branch of the industry, of which there are many, giving no opportunity to replace efficient mechanics or experts for the continuity or the expansion of the electrical industry.

I submit this in all fairness to the management with the hope that this minority report will be given deep consideration from the broad view-point of the greatest benefit to the industry.

(Sgd.) LOUIS BRAITHWAITE.

### Report of Board in Dispute between the Corporation of Moose Jaw and its civic employees

**A** REPORT was received from the Board established to deal with the dispute between the Corporation of Moose Jaw, Sask., and its civic employees, members of Civic Employees Local Union No. 9. The Board was composed as follows: The Honourable Mr. Justice G. E. Taylor, Moose Jaw, chairman, appointed on the joint recommendation of the other two members, Messrs. Geo. R. Mackie and R. A. Chadwick, Moose Jaw, nominees of the corporation and employees respectively. The report was unanimous and contained recommendations regarding settlement of the dispute. Advice was later received that a resolution had been passed by the City Council adopting these findings.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the City of Moose Jaw, employer, and Civic Employees' Local No. 9, employees.

To the Honourable,

The Minister of Labour, Ottawa.

The draft agreement hereto attached was submitted to the Union by the City and on the opening of the proceedings before the Board the representatives of the men were prepared to accept its

general terms with some modifications. It is convenient, therefore, to attach it and make our findings in relation thereto. The main issue is over wages.

We find: first; that the limitation on overtime to "after nine hours' work" and "after sixteen hours' work" shall only apply when the work is "on shifts". When "not on shifts" overtime shall be any time outside of the regular working hours prescribed in the agreement.

Second: That employees who have been in the City's service for at least a year (not necessarily continuously) on being incapacitated through sickness shall receive full pay for sick time, not to exceed three weeks in any one year; and the City to have the right to demand a Medical Certificate after two consecutive days' absence.

Third: Employees whose services are required the year round should have at least one week's holidays at usual pay, in each year, after six months' service.

Fourth: Legal holidays are not to include Easter Monday, Arbor Day or the King's Birthday, and work on these days shall not be "overtime".

Fifth: Should the employees make an arrangement with a physician for medical attendance at a fixed rate to be deducted from the men's pay, the City should undertake the work of making the deductions and paying over to the physician employed, and assist in carrying out the arrangement.

Sixth: That Group Insurance on all civic employees,—the whole cost thereof (within reasonable limits) to be borne by the City—should receive the serious consideration of the City Council, and provision be made for putting it into force as soon as the City's finances warrant. Under this Insurance employees are assured of something for their families in case of death whilst in the city's employ, and on leaving the employment may continue the policy at the employee's expense at customary rates. We deem this important as many employees are personally unable to make this provision. We are advised that under this system no medical examination is required.

Mr. Mackie does not concur in this finding as stated and adds a special memorandum of his own.

Seventh: Those employees in the several departments who are employed by the city either for the whole working season, or the year, should not be classed as "labourers" but as "helpers." and when on the pay roll, employees should when so employed receive a guaranteed weekly wage. We have set out the pay in the schedule. The men who should be so raised from the classification of "labourers" to "helpers", who are now in the City service are:—

**Sewer and Water Department:—**  
Haresign, Beattie, Woodcock, Cathro, Bresiley, Pollard, Osbourne, Jeffreys, Biggs, Arthurs, McKay, Matthews, Stackley, Gilchrist, Elliott, Breeze and Keys.

**Board of Works.—**Peach, Meronich, Fender, Smith, Grimes, Bradbury, Jackaman, Rybe, Gilmour, Smith, and Upton.

Nothing in this finding is to be construed to limit the right of the City to reduce its staff as work slackens or ceases, nor to employ common labour as required.

Such labourers may in the discretion of the city be promoted as helpers after not less than four months in the city service.

Helpers absent without leave shall be deducted at the rate per hour for his class for time lost.

Eighth: The minimum rate of wages shall be as follows:—

<i>Sewer and Water Department.—</i>		Per hour.
Foreman of construction.....	70	cents.
Tappers and caulkers.....	60½	cents.
With a minimum weekly wage of \$30.25.		
Hydrant and emergency men....	59½	"
With a minimum weekly wage of \$29.75.		
Helpers.....	56	"
With a minimum weekly wage of \$28.00		
Labourers—Going rate of wages prevalent in the City.		
Motor truck driver.....	56	"
With a minimum weekly wage of \$28.00.		

<i>Sewage Disposal Works.—</i>		Per week.
Chief operators.....	\$34.00	
4 assistant operators, each.....	30.00	

<i>Water and Meter Department.—</i>		
Foreman.....	\$34.00	
Tester.....	29.50	
Repairer.....	28.00	

<i>Water and Meter Department.—</i>		
Meter reader.....	\$26.00	
Sewer and water timekeeper....	28.85	

<i>Board of Works Department.—</i>		
General foreman.....	\$34.00	
Sub-foreman.....	30.00	
Team foreman.....	27.50	
Stableman.....	26.50	
		Per hour.
Steam engineer.....	70	cents.
Blacksmith.....	74½	"
Helpers and teamsters.....	53	"
With a minimum weekly wage of \$26.50.		

Labourers—Going rate of wages prevalent in the City. Employees in the Board of Works Department on a weekly wage shall not be entitled to overtime. This is not to apply to helpers, nor on such jobs as the City Engineer may designate as special jobs.

<i>Street Cleaning Department.—</i>		Per week.
Foreman.....	\$27.00	
		Per hour.
Street cleaners.....	45	cents.
With a minimum weekly wage of \$22.50.		

<i>Incinerator.—</i>		Per hour.
Engineer.....	75	cents.
Firemen.....	60	"
Charger.....	50	"
With a minimum weekly wage of \$30.00.		

The men in this Department to work 60 hours per week.

*Nuisance Ground.—*

	Per week.
Attendant.....	\$23.00

*City Stores.—*

	Per month.
Helper.....	\$105.00

*Parks and Boulevards.—*

	Per hour.
Helpers.....	53 cents.

With a minimum weekly wage of  
\$26.50.

Labourers at the rate prevalent in the city.

*Power House and Boiler Room Employees.—*

"As the present fitter is being recommended to the position of Master Mechanic, an office of greater responsibility, it is unnecessary for the Board to deal with his case unless the parties cannot agree. If they cannot, we will deal with it in a supplemental report."

	Per month.
Fitters.....	\$154.00
	Per hour.
Fitters' helpers.....	60 cents.

*Laborers:—*

The men now so employed we are advised will be made "coal trimmers", and the work of coal trimmers will be extended to take in the unloading of coal. When casual labour is required it will receive going wage prevalent in the City.

	Per hour.
Coal trimmers.....	55 cents.
Boiler washer.....	55 "
Boiler helpers.....	53 "
	Per day.
Ash conveyor man.....	\$5.00
	Per hour.
Fireman.....	58 cents.
Truck driver.....	56 "

With a minimum weekly wage of  
\$26.50 for a 48 hour week, with right to  
overtime.

*Wipers and Oilers.—*

\$55.00 per month for 1st 6 months.

66.00 " " 2nd "

77.00 " " 2nd year.

95.00 " " 3rd "

or third class papers.

110.00 per month for third year with third  
class papers.

These men are in training for better positions.

The training should be supervised and accepted in lieu of better pay.

As to other Departments and employees not mentioned, the rates set out in the draft agreement attached hereto are adopted and generally the provisions of the draft agreement, except as altered in these findings, shall apply.

Ninth: Helpers laid off in any Department should be taken on in any other having work to do before ordinary casual laborers are employed, and when so taken into another Department, even if only temporarily therein, should be classed and paid as helpers in that Department. This is not intended to apply to relief work.

Tenth: As agreed between the parties the above rates to apply since 1st April, 1920, and as agreed employees receive back pay since that date at a rate in accordance with these findings. The agreement is to extend to the 31st March 1921.

As the members of the Board have agreed on these findings as a compromise between the different contentions, no purpose will be served by endeavouring to add reasons, or in discussing the matters at issue.

All of which is respectfully submitted.

Dated at Moose Jaw, Saskatchewan  
this sixth day of July, A.D., 1920.

(Sgd.) GEO. E. TAYLOR,  
Chairman of Board.  
GEO. D. MACKIE, M.E.I.C.  
Member for Employer  
R. H. CHADWICK,  
Member for Employees.

(Sgd.) J. R. B. GRAHAM,  
Witness.

## DRAFT AGREEMENT.

## CITY OF MOOSE JAW.

Schedule of Wages and Working Conditions for Civic Employees employed in the under-mentioned Departments of the City of Moose Jaw, from the 1st of April, 1920, to the 31st day of March, 1921.

1. *Sewer and Water Department:—*

Nine (9) hours shall constitute a day's work, and as far as possible the City will endeavour to arrange the hours in this Department to be from 7 to 12 noon and 1 to 5 p.m., on Saturdays from 7 to 12 noon, but the City reserves the right to divide the day into two or more shifts with a separate gang of employees in each shift, or alter the above hours without notice, and where this is done the regular rate of wages shall apply for 9 hours. Sundays and legal holidays

to be paid for at double time; time and one-half to be paid after 9 hours' work; double time to be paid after 16 hours' work with the exception of Saturdays, when time and one-half shall be paid after five hours' work, and double time after 17 hours work.

2. Emergency men, in consideration of being paid a higher base rate, will be expected or required to act as sub-foremen, Tappers, Caulkers and Hydrantmen, but when not engaged on this class of work will work as labourers.

3. The City is to carry out the terms of the Building Trades Protection Act of 1912, and shall, when it is deemed necessary, see that when men are employed on excavation work there shall be a man on the surface of the ground to insure the safety of the men engaged in the trench, and assist in the carrying out of the work.

4. The minimum rate of wages is as follows:

	Per hour.
Foreman of construction.....	70 cents.
Tappers and caulkers.....	60½ "
Hydrant and emergency men.....	59½ "
Motor and truck driver.....	56 "
Labourers.....	56 "
Valve tenders (when required).....	\$26.40
	Per week.

#### 5. Sewage Disposal Works:—

The hours shall be as follows:—

Pump-House.—Three shifts of eight hours each for seven days a week. The starting time of each shift shall be as specified by the City Engineer.

#### 6. Distributor and Sedimentation Tank Rooms:—

One shift of 9 hours per day for six days a week.

7. Sludge Beds.—One shift of ten hours a day for six days a week.

8. The wages to be as follows:—

	Per week.
Chief operator.....	\$35.00
Four assistant operators.....	29.70

9. Each man shall be entitled to one week's holiday with pay per year to be granted during the summer months at times satisfactory to the City Engineer, and also legal holidays in rotation without loss of pay and convenient with shift duties.

10. Wages will be paid operator absent through sickness for a period not to exceed three weeks during the term of this schedule. The City can demand a Doctor's certificate after two consecutive days absence.

11. During the absence of any operator shift duties shall be performed by the other operators as can be conveniently arranged by the Chief Operator with the approval of the City Engineer.

#### 12. Water Meter Department:—

Nine (9) hours shall constitute a day's work, the hours to be from 8 a.m. to 12 noon and from 1 p.m. to 6 p.m. One half the employees shall be given a half holiday on alternate Saturday afternoons. The meter foreman shall have two weeks' vacation per year with pay, and all others on the permanent staff one week's vacation

per year with pay. The dates for vacation shall be satisfactory to the City Engineer. All employees shall receive pay for legal holidays.

13. All employees shall work overtime when necessary and when ordered by the City Engineer, but shall not receive extra pay for such overtime.

14. The wages shall be as follows:

	Per week.
Meter foreman.....	\$34.00
Tester.....	29.45
Repairer.....	27.75
Reader.....	25.55

#### 15. Board of Works Department:—

Nine (9) hours shall constitute a day's work in this Department, and the conditions as to details of the hours shall be the same as stated in paragraph 1 of this agreement.

16. The wages to be as follows:—

	Per week.
Team foreman.....	\$27.50
General foreman.....	34.00
Sub-foreman.....	30.00
Stableman.....	26.50
	Per hour.
Steam engineer.....	70 cents.
Labourers.....	53 "
Blacksmith.....	74½ "

17. Teamsters: Nine (9) hours shall constitute a day's work in this department, and conditions as to details of the hours shall be as set forth in par. 1 of this agreement, with the following exceptions; that the hours shall be from 6.30 a.m. to 12 noon and from one p.m. to 5.15 p.m., with the exception of Saturdays, when the hours shall be from 6.30 a.m. to 12.15 noon. The time hereinbefore stated, 7 a.m. and after 5 p.m., and after 12 noon Saturdays to be devoted to stable duties without pay.

18. The rate of wages for teamsters to be 53 cents per hour. The team foreman shall be granted one week's holidays per year with pay.

19. Stablemen: to be given one day off per month and to be granted one week's holiday per year with pay.

20. Overtime work to be taken as far as practicable by team numbers.

#### 21. Street Cleaning Department:—

Hours to be from 7 a.m. till 11.30 a.m. and from 1 p.m. to 5.30 p.m., except during the months of July and August when the hours shall be from 7 a.m. to 11.30 a.m. and from 1 p.m. till 5 p.m. Only two men shall work every Wednesday afternoon.

22. The wages to be \$21.45 per week, but for any time lost a deduction at the rate of 42 cents per hour will be made. The foreman in this Department to receive \$26.50 per week and one week's holiday per year with pay.

#### 23. Nuisance Ground Attendant:—

This employee to receive \$23.00 per week and one week's holidays per year with pay.

#### 24. Parks and Boulevards:—

Nine hours shall constitute a day's work in conformity with the details set out in paragraph 1 of this agreement.

25. Wages of the Superintendent to be \$121.00 per month.

#### 26. City Stores:—

Nine (9) hours shall constitute a day's work, the details as to time as set forth in paragraph 1 of this agreement. Employees in this department to have every other Saturday off and two weeks' holidays per year with pay.

#### 27. Power House and Boiler Room Employees:—

In this department 8 hours shall constitute a day's work. Paragraph 1 of this agreement shall apply as to the right of the City to divide the day into two or more shifts in this Department.

28. Firemen: shall be paid time and one-half for Sundays and legal holidays, and other employees enumerated below shall be paid double time for Sundays, legal holidays and from 12 midnight to 8 a.m. All other overtime shall be paid for at the rate of time and one-half.

29. Fitter: \$154.00 per month with two weeks' holidays per year with pay.

	Per hour.
Fitter's helpers.....	58 cents.
Labourers.....	53 "
Coal trimmers.....	55 "
Boiler washers.....	55 "
Boiler helpers.....	53 "
Ash conveyor man.....	\$5.00 per day
Electric motor truck driver	\$116.00 per month,
with two week's holidays per year.	
Wipers, \$55.00 per month for first 6 months.	
" 66.00 " " second 6 months.	
" 77.00 " " second year.	
" 95.00 " " third year or third	
class papers.	
" 110.00 " " third year with	
3rd class papers.	

#### GENERAL CONDITIONS.

31. In connection with all aforementioned departments, the rates of pay in this agreement are the minimum rates.

32. Any employee having a grievance either specified or of a general nature may present his or her case to the foreman of his or her department if investigation is desired; the aggrieved party or another employee representing him or her may during working hours arrange with his or her foreman for an investigation, which investigation shall be held within forty-eight (48) hours after such application, and in case satisfactory adjustment cannot be made the case may be referred to the highest official of that department until the commissioners are reached. If, after investigation, the employee is found to have been unjustly dealt with he or she will be paid for all the time lost. No employee representing his or her fellow workers will be discriminated against. In case an investigation is to be held an interview may be arranged between the representative of the Union and the Depart-

ment representing the Department concerned by special appointment, but the arrangement must be made in such a way and at such a time that it will not interfere with the work of any department.

33. Promotions in the service shall, if possible, be made from the staff, efficiency and seniority being considered when promotions are made.

34. It is understood and agreed that the Dominion Holidays known as Arbor Day and the King's Birthday shall not be deemed to be legal holidays within the meaning of this agreement.

35. This agreement to remain in force from the 1st day of April, 1920 to the 31st day of March, 1921. In the event of either party desiring a change in the rates of wages or other working conditions as set out hereinbefore, notice must be given by the party desiring the change to the other party not later than the 31st day of January, 1921, otherwise this agreement shall continue in force for the succeeding year.

Signed and sealed on behalf of the City of Moose Jaw this                      day of 1920.

Signed and sealed on behalf of the Civic Employees' Federal Union No. 9, this day of                      1920.

Mayor.

City Clerk.

#### Minority Report

In the matter of The Industrial Disputes Investigation Act, 1907, and of a dispute between the City of Moose-Jaw, employer, and Civic Employees Local No. 9, Moose Jaw, employees.

July, 6, 1920.

I cannot agree to finding number six of the Board. The question of the advisability of insuring the City's Employees under the scheme known as "Group Insurance" does not, in my opinion, come within the scope of the remit to the Board. The matter is entirely one of policy for the City Council to deal with and the Council if so advised will determine the question in relation to its merits and demerits.

(Signed) GEO. D. MACKIE, M.E.I.C.

Member for Employer.

## Report of Board in dispute between the Canadian Pacific Railway Company and its commercial telegraphers

**A** REPORT was received from the Board established to deal with the dispute between the Canadian Pacific Railway Company and certain of its employees, engaged in the commercial telegraph service, members of the Commercial Telegraphers Union of America. The Board was composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. F. H. Phippen, K.C., and Jas. T. Gunn, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Phippen, the latter, however, making certain reservations. Mr. Gunn did not concur in these findings and filed a minority report.

### Report of Board

In the matter of the Industrial Disputes Act, 1907, and of a dispute between The Canadian Pacific Railway Company, employer, and employees engaged in the Commercial Telegraph Service, being members of the Commercial Telegraph Union of America, employees:

To the Honourable,  
G. D. Robertson,  
Minister of Labour, Ottawa.

Upon the application of the employees you appointed a Board of Investigation and Conciliation to investigate and report upon the dispute between the above named parties. After organizing, taking the usual oaths of office, and considering the matter referred to them, the Board fixed the 5th day of July, A.D. 1920, at 10 a.m., at the Court House in the City of Montreal to proceed with the inquiry and hear the parties and their witnesses, and were attended by Thomas Carrothers, General Chairman, Roy Smith, General Secre-

tary, and Messrs. E. F. Bailey, D. J. McCabe, McLaren, A. Clay, and Thomas Cahill, Committee on behalf of the Telegraphers, and Messrs. A. E. Turner, E. P. Smith and A. Levine, Committee on behalf of the Clerks, Employees, representing the employees, and Mr. J. McMillan, Manager, Mr. Marshall, Assistant Manager, and W. M. Thompson, Superintendent, and J. D. Mitchell, Superintendent of Traffic, representing the employers.

Upon opening up of the matter, it was found that the nature of the dispute outlined in the application presented by the employees involved an investigation into some of the working rules and all the rates of pay granted the employees over the whole commercial telegraph system from Halifax to Vancouver operated by the employers. This territory is divided into districts, namely, Atlantic, Eastern, Ontario, Algoma, Manitoba, Saskatchewan, Alberta and British Columbia, embracing about 700 Morse Telegraph operators, 115 Morkrum operators and 500 clerks, employees, members of the Commercial Telegraph Union of America.

The Morse Telegraph employees have and have had a schedule of working rules and rates of pay for many years past and first included and obtained representation for the Morkrum writer in the schedule of 1917, but the clerks in the telegraph service were only included in the schedule and obtained representation for the first time in A.D. 1919, by a ruling of the Canadian Railway Board of Adjustment.

The schedule granted the telegraph employees prior to 1913 with intermediate changes was revised and reported upon by a Board of Conciliation in August, A. D. 1917, and again in August, 1918, when the increases granted this class of employee fixed by the McAdoo Award in rates of pay were made effective upon the joint application

of the employers and employees to the aforesaid Board of Adjustment, and again revised on similar application in August, A.D. 1919, when the telegraph clerks were included. The demands now before this Board on behalf of the telegraph employees seek some few changes in the working conditions and rules, and it will be proper to consider and report upon the same before invading the other and more important matter covered by the application of the employees.

The employees demand that "all overtime be paid for at the rate of time and one half." Upon examination and investigation of the effect of this amendment, it was found that it would only benefit a small percentage of the employees, and it has already been passed upon adversely to the applicants on more than one occasion, but has again been carefully investigated by this Board, and in my opinion there are no sufficient reasons shown to warrant the granting of the demand and the present existing rule relating to overtime is fair and equitable and should stand.

The application further demands a change involving an increase of rates of pay for the Morkrum employees upon entering the service, and after six months a further increase and after 12 months a still further increase in rates. The increases range from 10 to 30 per cent, and the amendment adds another division or group in this class of employees, as the rules now in force provide minimum compensation for the Morkrum writers on entering the service with an increase in rate after 12 months' service. Upon investigation it is found that the rates granted the Morkrum operators since they obtained representation in 1917 have risen from \$60.00 minimum and \$65.00 after 6 months' service and \$70.00 after one year's service, to \$90.00 per month for the first year and \$95.00 per month thereafter in A.D. 1919, and, having regard to these increases and the class of service rendered, and the other conditions granted by the rules, the further increase of \$10.00 to each class of Morkrum writer defined by the present rules

is the only change or amendment that should be made therein, and I would so recommend.

There also appeared in the working rules Sec. 5 of Article 5 apparently at present in force, but about this there was much dispute, as it was claimed by the employer that such section was included in error so far as the clerks are concerned, while the contrary was maintained by the employees, and upon the investigation it was made to appear that this very section in effect was submitted in the joint application to and ruled upon by the Board of Adjustment and disposed of and decided by the Board in August A. D. 1919, and it is now immaterial what the situation was in regard thereto prior to or since the decision of the Board of Adjustment which I adopt and recommend to be put and continued in force from the date thereof. In the rules and wages for commercial telegraphers and clerks, Article 1X, Paragraph 4, should therefore read in part as follows: "Article 5, Paragraphs 6 and 7."

The main and most important demand presented to this Board by the employees, and forming the outstanding relief sought by the employees, was the amendment requesting large advances in rates of pay for the Morse telegraph operators and the clerks in the telegraph service covered by the schedules, which, if granted, would advance the maximum to \$190 a month in the percentage group offices and corresponding advances in the branch and other offices and also in the minimum rates in each district over the entire system.

In order that you may be aware of the nature, and have some better knowledge of the service rendered by the employees, it should be stated that in the several districts into which the field of operation is divided and the system operated, there are in each district one or more main offices wherein the Morse telegraphers are divided into percentage groups and these offices are located at Halifax, St. John, Montreal, Ottawa, Toronto, Winnipeg, Moose Jaw, Calgary, and Vancouver, with branch offices in the same cities, and at other commer-

cial centres in the several districts with one or more operators as the volume of business demands, with fixed rating for each percentage group and one small group rated as the employers may direct having regard to the minimum. The demands presented by the employees to this Board, as stated, seek material increases in the rate of pay for the employees in these offices, raising the maximum to \$190.00 a month and the minimum to \$130.00.

It should be re-stated here that in the revision of 1918 the rates of pay provided by the terms of the well-known McAdoo Award were made effective over the entire system, largely increasing the rates then existing and in the revision by the Board of Adjustment as appears by the written decision by them delivered on the 7th day of August, A. D. 1919, the former rates were again increased by \$12.00 per month per position in the first, second and third positions in the grouped offices, and \$10.00 per month to all operators, Morse or Morkrum, outside the percentage groups, making the maximum in the grouped offices \$143.75 per month, and the minimum \$100.00 per month. It is clear that the main foundation for these advanced demands rests largely, if not entirely, on the oft-repeated ground of the greatly increased and advancing cost of living, so frequently and forcibly advanced in support of all such applications of this character.

There has been little or no testimony supplied to establish any material change in other conditions relating to the service of any of the employees, although representatives from almost every district were before us, nor was it seriously maintained that any other organization in the same line of commercial activity in the same territory or elsewhere comparable paid any higher or better rate or granted more favoured conditions to its employees in the commercial telegraph service. It is asserted and not successfully contradicted, that there has been an advance in the cost of living since the last increase in rates of pay, but the company contend that they should not be burdened with the whole

of these increases on any principle that can be applied and further contend that all precedent supports their position in this respect. All these statements, representations and contentions have been given the best and most careful consideration of this Board, and I am of the opinion that the present demands are excessive, but that some increase in the rates of pay is warranted on the grounds and for the reasons hereinbefore mentioned.

It may be well to state that there are in or about 250 Morse Operators employed in the Western Districts and 400 in the Eastern and Maritime Districts, and there has always existed a differential in rates and in some other respects in favour of the Western employees, and it is not considered at the present time or in the present circumstances to be expedient or judicious to make any alteration or amendment affecting these conditions so long existing and well understood. I have decided to make the recommendations following:—

1. That the minimum rate at present existing for Morse Telegraph Operators should be increased \$10.00 per month.

2. That the Morse Telegraph Operators in the percentage grouped offices be granted an increase in existing rates of pay equal to \$20.00 per month per position in the 1st, 2nd and 3rd groups.

3. That all other Morse Operators be granted an increase in existing rates of pay equal to \$17.00 per month, provided, however, that in all cases in which greater increases are provided by the minimum rates established herein such increases shall be applied.

The Board finds that in accordance with the ruling of the Board of Adjustment made on 7th August, A.D. 1919, a schedule of working rules and rates of pay for the clerks and clerical staff represented by the telegraph operators covering every office in the several districts was put in force and observed, and the present demand of the employees seeks very material but somewhat excessive advances in the rates for all employees in this branch of the service.

Every representation made on behalf of the telegraph operators was made applicable to and for the benefit of the clerical staff.

The clerks employees covered by the application of the employees find employment in the established percentage groups offices and their branches and in other commercial centres where the business requirements demand, but not in every office in the entire system.

These statements, representations, and conditions have been given the best and most serious consideration of the Board, and it is considered that some increases are warranted, and I have decided to make the recommendations following:

1. That the existing rates of monthly pay for the clerks hereinafter named be increased and fixed at the rates specified that is to say:—

The cashier at St. John.....	\$102.50
The cashier at Halifax.....	135.00
The cashier at Montreal.....	160.00
The accountant assistant at Montreal.....	135.00
The cashier at Ottawa.....	120.00
The cashier at Quebec.....	120.00
The cashier at Toronto.....	145.00
The cashier at Hamilton.....	120.00
The cashier at Winnipeg.....	145.00
The cashier at Calgary.....	145.00
The cashier at Edmonton.....	145.00
The cashier at Vancouver.....	120.00
The solicitor at Vancouver.....	135.00

2. All other clerks now receiving \$90.00 or over per month shall be granted a monthly increase in present existing rates equal to \$10.00 per month.

3. All clerks now paid \$87.50 per month shall be paid an increase of \$12.50 per month.

4. All other clerks having three years' service with the employers and now receiving \$75.00 or over and less than \$87.50 per month and not covered by above defined ratings shall receive an increase in existing monthly rates equal to \$10.00 per month.

5. All other clerks receiving less than \$75.00 per month and having over two years' service with the company and not covered by above defined ratings or any of them shall receive an increase in present existing rates of \$5.00 per month.

That these rates be put into force and made effective from and after the 1st day of June, A.D. 1920, and will remain in effect, subject to thirty days' notice given by either party.

Dated this 21st day of July, A.D. 1920.

(Signed) R. D. GUNN,  
Chairman.

Toronto, July 22, 1920.

I accept the Chairman's findings as stated on this and the preceding six type-written pages initialled by me, but do so merely that the conciliation proceedings may not prove abortive.

Personally I would not have raised the minimum of the Morse Operators. The claim for additional remuneration is based solely on increased living costs. Any increase claimed only because of increased costs of living should not affect the minimum.

Neither would I have granted the increases which Judge Gunn awards to the Morse Operators. They appear excessive. The increases to the Morkrum operators and to the clerks are fair. Yet whilst holding these views I waive them and concur in the Chairman's award so as not to render the proceedings useless by disagreement.

(Signed) F. H. PHIPPEN.

#### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between Canadian Pacific Railway Company, employer, and employees engaged in the commercial telegraph service, being members of the Commercial Telegraph Union of America, employees.

The Honourable G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,

The report of the Board of conciliation herein, I am informed, has been made to you. I refrained from signing the report as I found myself unable to agree with the other members of the

Board as to some of the recommendations, and I beg to submit my recommendations for same:

1. That the Morse Telegraph Operators in the percentage grouped offices be granted an increase in existing rates of pay equal to \$25.00 per month for positions in the 1st, 2nd and 3rd groups.

2. That all other Morse operators be granted an increase in existing rates of pay equal to \$22.00 per month, provided, however, that in all cases in which greater increases are provided by the minimum rates established herein such increases shall be applied; and *Provided further*, that the Morse operators in the cities of St. John, N.B., and Halifax, N.S., shall be raised to the rates pertaining to Morse Operators in Montreal and Toronto percentage offices.

3. That article 5, paragraph 5, in the 1919 schedule shall be interpreted to cover all the clerical staff in addition

to the telegraphic staff, and further that the back pay due to the clerical staff for overtime worked under this paragraph shall be effective from the date of the adoption of the 1919 rules.

4. That all clerks receiving less than \$75.00 per month shall receive an increase on present existing rates of \$5.00 per month, and that all clerks receiving \$75.00 per month and over, and less than \$87.50 per month, shall receive an increase in existing monthly rates equal to \$10.00 per month.

I concur with the other recommendations made by the Chairman and the employer's nominee.

All the above I beg respectfully to submit.

JAMES T. GUNN,  
Employees' nominee on Board.

Dated at Toronto, on the 3rd day of August, 1920.

### Report of Board in dispute between the Canadian Pacific Railway Company (Western Lines) and its waterfront freight handlers at Vancouver

**A** REPORT was received from the

Board established to deal with the dispute between the Canadian Pacific Railway Company (Western Lines) and certain of its employees, being waterfront freight handlers, at Vancouver, B.C., members of local No. 38-52, International 'Longshoremen's Association. The Board was composed as follows: The Honourable Mr. Justice Denis Murphy, Vancouver, chairman, appointed on the joint recommendation of the other two members, Messrs. Edwin A. James, Vancouver, and Joseph Taylor, Victoria, nominees of the company and employees respectively. The report was signed by the chairman and Mr. James and contained recommendations as to settlement. A minority report was presented by Mr. Taylor.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company (Western Lines), hereinafter called the employer, and certain of its employees, being waterfront freight handlers, members of Local No. 38-52, International Longshoremen's Association, hereinafter called the employees.

The Honourable G. D. Robertson,  
Minister of Labour, Ottawa.

Sir:

The Board appointed to investigate the dispute between the above parties was convened on July 5th, 1920. Sitings to take evidence were held on July 5th, 6th, 8th and 9th. Sitings of the Full Board to consider the evidence and the nature of the report to be submitted, were held on July 12 and 13th.

For the purpose of the wage scale, the employees are at present divided into two classes: the first known as checkers, the second as truckers.

Eight hours constitute a day's work. Work done between the hours of 8 a.m. and 12 noon and between 1 p.m. and 5 p.m., is known as straight time work. Work done between the hours of 5 p.m. and 8 a.m., and also work performed on Sundays and holidays is known as overtime work. The wages paid at present are: to checkers 75 cents per hour for straight time, and \$1.10 per hour overtime; to truckers 65 cents per hour straight time, and \$1.00 per hour overtime. Work done during the overtime hours is, of course, paid for at overtime rates whether the employee has worked any straight time on a given day or not. On the other hand, though an employee may have worked a full 8 hours' straight time he receives, if a checker, only the \$1.10 per hour for any extra time put in, and if a trucker, \$1.00 per hour for such time. It will be seen, therefore, that the term "overtime" as used in this employment does not necessarily have its ordinary meaning, that a man has already put in a day's work before he begins to earn overtime pay. Overtime pay depends on the particular hours out of the twenty-four during which the work is done, and not necessarily on the number of hours actually put in.

The employees now ask, for checkers 90c. per hour straight time, and \$1.35 per hour overtime, and for truckers 80c. per hour straight time and \$1.20 per hour overtime.

They base their claim for an increase on three main points: First, that the present rates were fixed in June, 1918, and that there has been no increase since that date, while the cost of living has gone up materially; Second, that the rates which they now ask are in fact being paid in all American Ports on the Pacific Slope, and that these rates were in fact paid for one month in the City of Vancouver by the Great Northern Railway Company; Third, that they,

because of the nature of the work to be done, have to put in erratic hours whilst at the same time compelled to appear once daily to ascertain whether they are to work or not.

For a fair understanding of the dispute, it is necessary to know in general the duties of the employees and the nature of the work.

The employees handle exclusively export and import freight at the Company's docks in Vancouver. All freight consigned to the City of Vancouver, arriving in cars, or originating in Vancouver and to be moved by cars, is handled at the Company's local freight sheds. Similar freight arriving by ship or carried away by ship is handled by the 'longshoremen. The employees take the export freight from the car to the freight shed and pile it there. They take the import freight from the dock to the shed and pile it there, or, on occasion, they take it from the dock direct to the car. Import freight if so piled by them in the sheds, is subsequently taken by them from such sheds to the cars. They have nothing to do with taking export freight from the dock to the ship, or with taking import freight from the ship to the dock. This work is done by the 'longshoremen.

A gang usually consists of one checker and eight men. Two of these eight pile the goods in the car and are called "stowers." Two load the goods on the trucks and are called "loaders." Two push the trucks from the shed to the car, or vice versa as the case may be, and are called "truckers." Two pile the goods in the shed and are called "pilars." In addition, some men who receive truckers' pay, operate Barlow elevators, which are elevators that, if necessary, raise the loaded truck from the dock to the level of the shed floor, or *vice versa*, and others, called "linemen," take the lines as the ships come to the dock, and assist in tying them up.

It is clear that these lines of work are what is termed common labour, in the sense that no extended period of

training is required to enable a man to perform them.

There are various grades of checkers, but taking the gang checker as a type, —his duties, according to the evidence being the most onerous of his class,— he has under him and exercises general supervision over the eight members of his gang whose duties have been hereinafter indicated, and he has also to check the goods as they are taken from the car or the pile in the shed, and see that they are placed in the proper pile or car. It will be seen there is some responsibility attached to his position, and it is also one that calls for an ordinary education; but it cannot be called "skilled labour" in the sense of requiring an extended period of training to enable a man to successfully perform it. Of course experience is valuable in this, as in every class of work.

Car sealers put the seals on the loaded cars, and keep a record and make a report on the seals. Crane men operate electric cranes. It is obvious that car sealers do not require any extended training for their particular work, and it was not shown in evidence that the crane men do. Whilst, therefore, the men grouped under the head of checkers for the purpose of the wage scale may, in some sense, be called skilled labour, they are not skilled labour in the sense of having to serve a term of apprenticeship or to require any long period of training to enable them to successfully perform their duties.

It appears to the majority of the Board that these employees occupy a middle position, between the checkers and truckers at the local freight sheds, who handle local freight, and the long-shoremen at the docks, who handle the freight from the dock to the ship or from the ship to the dock. The work of the truckers, pilers, loaders and stowers at the local freight shed is, in the main, identical in nature with the work done by the employees.

The checkers' work at the local shed is, if anything, a little more difficult than the work of the checkers at the wharf, be-

cause of the greater number of consignees and the small lots of goods. The conditions under which the work is done at the local freight sheds and at the dock are, for the most part, identical. In both instances, the work is mainly done under cover. It is true, however, that there is a somewhat greater degree of exposure to the weather at the docks, for when cargoes of oil and hides and such material arrive, they have to be handled in the open. Some exposure to the weather occurs at the local sheds, because some of the work there is done on an uncovered platform.

At the local sheds, the checkers are paid a monthly rate of \$115.00 per month, and the truckers, etc., are paid by the hour, at the rate of 43 cents an hour for straight time, the hours of straight time being identical with the hours of straight time at the dock,— and 64½ cents an hour for overtime, the overtime hours being also identical with overtime hours at the dock. Stowers at the local freight shed, for some reason, receive 44 cents an hour for straight time and 66 cents an hour for overtime. There is no such differential in the case of stowers at the dock. During the hearing the employer offered to put the checkers at the dock on a monthly basis at the rate of \$125.00 per month, hours and conditions to be similar to those applicable to checkers at the local freight sheds, but the offer was declined.

The great difference between labour at the local sheds and at the docks is, that the men at the local sheds get regular employment every day, for eight hours. From the nature of the work that has to be done, this cannot obtain in the case of the employees. It is clear that they can only work when there is export freight in the yards to be taken into the shed, or import freight in the shed to be put into cars, or export freight from a ship unloading cargo at the dock to be put direct into the cars. Hence the employees have to be asked to work erratic hours.

The method of procedure is as fol-

lows: the employer has ascertained by experience approximately the number of men that will be needed to carry on this work from month to month. At present the number is about two hundred and fifteen. These men's names are placed on the employer's rolls, and they are in a sense regarded by the employer as its employees, but it is quite true that, so far as a contract of employment is concerned, such contract is made daily, and ceases when the day's work is done; the only provision being that a man once set to work must be paid a minimum of two hours' wage, whether he works the two hours or not. It is only fair to state, however, that whilst there is no contract for a definite period of service, men on the rolls who attend regularly in fact get work enabling them to regard this as a permanent employment, one witness called having been with the employer 26 years, a considerable number of which at least having been put in at this work, whilst others called have been at it from periods ranging from twenty months to nine years.

The men attend at the dock every morning at 8 o'clock. The employer's foreman then picks out such of them as he needs for the ensuing 24 hours' work, and the others are free to employ themselves as they see fit. Since, however, it is necessary for the employer to be assured that it will have such men as it may need, and since no one can tell beforehand what is to be the volume of export and import freight to be handled in any given 24 hours, and since it only carries on its roll such a number of men as experience has taught it will be needed to carry on this work from month to month, it follows that, although it is not the explicit rule of the employer, yet it is the practice that a man who does not regularly attend daily at 8 o'clock to see if there is work for him, while he does not perhaps cease to be regarded as a possible employee, is not likely to be chosen as against those who regularly attend. In fact, to secure equal treatment with their fellows, the men have to place themselves at the employer's disposal every day.

An effort is made,—and the pay-rolls of the employer show in the main successfully,—to allot practically the same amount of work over a given period to each of the men who attend regularly. It will be seen, then, as stated, that the marked difference between the conditions of the work at the local freight sheds and at the dock consists in the fact that there are eight hours regular work given to every employee at the local freight sheds, whereas at the docks a man has to take his chance as to whether he will get any, and what amount of work, on any given day, and if he gets it, his hours may be straight time or overtime hours.

The work done by the 'longshoremen is, in its general nature, similar to the work done by the employees, but obviously the 'longshoremen can only work when ships are in port, either discharging or loading cargo. The same division of straight time and overtime obtains for 'longshoremen as for the employees. Their rate of pay is 90 cents per hour for straight time and \$1.35 for overtime. It is clear, also, that the 'longshoremen's work is much more erratic than that of the employees. When a ship comes to port, they hire on for the work of unloading the cargo, or loading it, and they have no further employment until the arrival of another ship. Their work therefore calls for long hours at one period, alternating with more or less long periods during which they have no employment. The employees, on the other hand, get much more regular work than do the 'longshoremen, for the reason that the export freight is arriving or may arrive daily, and has to be transferred to the sheds (if the ship to carry it away is not in dock ready for cargo) and then from the sheds to the dock when the ship does come in, and import freight is not by any means all taken direct from the ship to the cars, but—except in special instances, to which reference will hereinafter be made,—is largely stored in the sheds, and the work of taking it from the sheds to the cars is spread over a considerable length of time after the

completion of the 'longshoremen's work in connection with the ship. It will be seen, then, that generally speaking the work done by the men in the local freight sheds, by the employees and by the 'longshoremen, is in its nature much the same. The main difference is in the matter of hours. At the local freight sheds these are regular, being eight hours daily; in the case of the employees they are erratic, depending on the volume of the export and import freight to be handled; but by reason of what has been said hereinbefore, it will be evident that their employment is much more continuous and their hours in the main much more regular, than those of the 'longshoremen.

Ordinarily, the employees are not asked to work more than ten hours in any given twenty-four. The exceptions are when cargoes of silk or mutton arrive. Silk is rush freight and mutton perishable so both have to be taken direct from the dock to the cars. The employees, therefore, may, when these cargoes arrive, be asked to work twelve hours out of any twenty-four. Of course, because of the much higher rate of pay for overtime, it is to the employer's interest not to require the employees to work more than eight hours if it can be avoided, and that only during straight time hours. So far as the evidence shows, some of the men have been asked to work more than ten hours out of any given twenty-four on an average of about three times a month during the past six months; these being occasioned by the arrival of mutton or silk. The actual figures are once in January, four times in February, twice in March, five times in April, none in May, and three times in June. About twice a month in addition, during the past six months, some of the men have been asked to work ten hours instead of eight, out of a given twenty-four. The figures are: None in January, once in February, twice in March, none in April, once in May, twice in June. (Exhibit 23). It is possible these figures are not absolutely correct, but they are com-

piled from the only instance where full data as to time were given to the Board and being the time of one of the principal checkers they ought to be approximately correct as it seems unlikely that other men would be called on for more overtime considering the checker's presence is essential when this work is going on. No man is ever asked to work more than twelve hours, although he is at liberty apparently to do so, if the work is there to be done, and some of them have actually done so; (Exhibit 23). So far as the evidence shows, apparently only four such occasions have presented themselves within the last six months, and the highest number of hours put in is sixteen out of the twenty-four. The actual figures compiled from the data above referred to are, no instance in January; February 9th, 16 hours; February 12th, 15½ hours; February 19th, 14 hours; no instance in March; April 26th, 14 hours; no instance in May, no instance in June.

As a general rule, then, so far as the evidence shows, the men are not asked to work more than eight hours out of any given twenty-four, and have not in fact done so to any great extent.

The average monthly earnings of the checkers from September 1st, 1919, to March 1st, 1920, was \$161.79 per month, and the average for truckers for the same period was \$149.18. (Exhibit 21). The average for the ten months from September 1st, 1919, to July 1st, 1920, for checkers is \$156.53, and for truckers \$118.76 (Exhibit 26).

Exhibit 21 was compiled for the six months during which the agreement (Exhibit 6) between the employer and employees was actually in force, although it is still being utilized as a *modus vivendi*. The employees, in presenting their case, used data from January 1st, 1920, to June 30th, 1920. The employer was therefore requested to furnish data covering the same period, and as a result filed Exhibit 26. It will be seen the average earnings in the case of men receiving truckers' pay is considerably less when the ten months is

taken than when the six months is taken. There is not a great difference in the case of men receiving checkers' pay. This emphasizes the fluctuating volume of work to be done and of course the conclusions hereinafter arrived at are based on the past ten months' experience, as shown in evidence. If in the future through any considerable period of time the volume of work to be done should materially fall off with the result that the employees' aggregate earnings should be materially reduced, obviously different conclusions would have to be drawn. From the nature of the case this Board can only deal now with this phase on the basis of the last ten months' experience.

Coming now to the points on which the employees rest their case; first, that the present rates were fixed in June, 1918, and that there has been a considerable rise in the cost of living since that date, and no increase in their rates of pay,—it must be conceded that there has been rise in the cost of living. If, therefore, it can be shown that the rate fixed in June, 1918, was a fair rate as compared with wages paid for similar classes of labour at that time in Vancouver, it would follow that the employees are entitled to an increase. This rate was fixed by an award made in the United States while the Government of that country was operating the railroads.

Remembering that the employees are not skilled labourers in the technical sense of the term, it cannot be successfully contended, in the opinion of the majority of the Board, that the rates so fixed in 1918 were not considerably higher than the rates paid for similar labour in Vancouver at that time. In fact, they are considerably higher than are now being paid for similar labour, despite the increase in the cost of living since 1918. This is shown by comparing the rates paid and the money earned by the employees with the rates paid to the men in the local freight sheds. It is true that these men have applied to the Railway Adjustment Board of Canada

for an increase in rates; it is also true, apparently, that the Railway Adjustment Board has postponed making any decision for a period of ninety days to see what will be the result of a similar application to a somewhat similar body in the United States. Even granting, for the sake of argument, that the men in the local freight sheds are entitled to an increase—as to which the majority of the Board of course expresses no opinion, the case not being before them,—it is clear that there is a great spread between what is now being paid them and what is being paid the employees, *i.e.*, \$115 per month as against an average of \$156.63 in the case of men receiving checkers' pay, and 43-44 cents an hour straight time and 64½ cents to 66 cents overtime as compared with 65 cents for straight time and \$1.00 for overtime, in the case of men receiving truckers' pay. Of course in considering this spread the erratic hours hereinbefore discussed must not be lost sight of. On the other hand, with regard to both employments it must not be forgotten that the work goes on from year's end to year's end—a feature obviously having an important bearing on the question of aggregate earnings.

The evidence shows that the employer is now paying to other employees who may be roughly classed as engaged in similar unskilled labour, the following rates; to machinists' helpers, 52 cents to 59 cents per hour for straight time and time and a half for overtime; to truckers at stores, they are paying 45¼ cents to 49¼ cents per hour straight time; to shop labourers 40 cents for straight time and 60 cents for time after ten hours; to bridge building labourers, 40 cents per hour straight time and 60 cents per hour overtime; to bridge men, 53 cents an hour straight time, 79½ cents an hour overtime; to rough bridge carpenters, 57 cents an hour straight time, 85½ cents an hour overtime; to track labourers, 40 cents an hour straight time, 60 cents an hour overtime; to yardmen 64½ cents an hour day work, 66 cents an hour night work. To yard

foremen they are paying  $68\frac{3}{4}$  cents an hour day work and  $69\frac{1}{4}$  cents an hour night work. (Exhibit 25).

It is further to be remembered, that while, as shown, the hours of the employees are to some extent erratic, the work is continuous in the sense that it goes on regularly throughout the year. It may, of course, vary in quantity, but there is no such absolute cessation of work as takes place in many of the skilled trades, such as carpenters, bricklayers, etc., who are compelled to lay off in the winter time, for the most part.

In view of those facts and figures, the majority of your Board is of the opinion that the first point taken by the men in support of their application has not been made out.

The second point is, that the rates asked for are actually being paid in the American Ports on the Pacific, and were paid for one month in the City of Vancouver by the Great Northern Railway Company.

These higher rates were granted in August 1919, at a period when the railways in the United States were still being operated by the United States Government. It is true that they have continued to be paid since the railways were returned to private control. The fact that such rates are being paid in the American ports is by no means conclusive, in the opinion of the majority of the Board, that they should be paid in Vancouver, though of course it is a relevant fact to the employees' case. If it were so conclusive it must follow that all rates of wages to be paid on Canadian Railways must be identical with the rates paid in the United States. It is true that during the war period such a course was generally followed, but it can scarcely be argued that that was a normal period. It may be true also—though of this fact the Board has no knowledge except the statement that that body is delaying a decision to see what occurs in the United States in the particular instance—that the Canadian Railway Adjustment Board is largely governed in the matter of fixing wages

by what is done in the United States, but a Board such as this must, in the opinion of the majority, whilst not ignoring such a fact, be primarily governed by local conditions and local rates of pay since these are the only matters the Board can properly investigate.

It is clear that several factors may operate to make the aggregate earnings of the men in the American Pacific ports receiving these higher rates, less than the aggregate earnings of employees in Vancouver paid at the present rates. If an excessive number of men were employed by any given employer, this result would be brought about,—or if the volume of export and import freight handled by any single employer in the American ports for a given period was small, as compared with that handled by the employer in Vancouver. Or again, if the volume of export and import freight were the same, but if the employers' facilities for handling it were not such as to allow of the spreading of this handling over a considerable length of time, as is done by the employer in Vancouver, but compelled them to handle it much as the cargoes of ships are handled in Vancouver, then the conditions of the men doing the work, as to long hours and continuity of labour, would be much more strenuous and intermittent than those under which the employees work, for it would mean, as in the case of the 'longshoremen, long hours of continuous work for a short period, and then long stretches of enforced idleness, during which there would be no work at all. Without, therefore, a thorough investigation of the actual conditions in each American port, it does not seem to the majority of the Board, in view of the large aggregate earnings of the employees, that this second point is well taken, regard being had to the proven facts as to local conditions and local rates of pay.

The men argue strenuously that the employer, being in competition with these American ports, should be prepared to pay the rates paid there. The majority of the Board believe the proper

method of approaching a problem such as the one presented here is to determine first that a fair living wage shall be paid in any given employment. No business should exist which cannot pay such living wage. When it is established that a living wage is being paid, as in the opinion of the majority of the Board has been established here, then the conditions of employment should be regarded in fixing extra remuneration for unfavourable conditions. To some extent the employees' contention that the conditions are unfavourable, inasmuch as their hours are erratic, is true, but these hours are not, as a general rule, excessive, and on the whole the majority of the Board conclude that so long as actual present conditions as to volume of work, hours of labour, cost of living, etc., obtain, the rates now being paid, with the exception herein-after mentioned, are a reasonable compensation for such unfavourable conditions.

The third point on which the employees' case rests, the erratic hours, has been practically covered in the foregoing discussion. The hours are erratic in the sense that an employee cannot be sure that he will on any given day get work, whilst, to ensure getting his share of work in a given time, he must attend daily at 8 a.m. at the dock. If he does get work, it may be during straight time or overtime, and he is only sure of two hours' pay when ordered to start. On the other hand, so far as the evidence shows, long hours are exceptional, and abnormal hours rare. Here again the majority of the Board feel, subject to the same qualifications, *i. e.*, so long as present actual conditions as to volume of work, hours of labour, cost of living, etc., obtain, that the high rates paid in this employment, as compared with those paid to other classes of labour of roughly the same type, reasonably compensate the employees for the erratic hours.

The majority of the Board, therefore, feel constrained to hold that they cannot recommend the granting of the increase asked for. They do feel, however,

that in one particular the employees have made out a case that requires an adjustment of the wage scale. As stated, on exceptional occasions the employees may be requested to work for twelve hours out of a given twenty-four. They are not forced to do so, but are expected to comply with this request, unless there is some good reason for non-compliance. This is possibly made necessary from the nature of the work to be done, but it is an undoubted hardship for any man to have to work such long hours. It has been shown in this report that these occasions are exceptional, and that if the men were not called upon to work on such exceptional occasions, more than ten hours per day, their aggregate earnings would be only slightly reduced.

The majority of the Board believe that any time over ten hours out of a given twenty-four hours, put in by any employee whether continuously or not, should be paid for at a higher rate than is now given. This will have a two-fold result. It will act as an inducement to the employer to avoid making such requests, if at all possible, and it will make the employees feel, if they are called upon to work such abnormal hours, that they are gaining something in addition to their ordinary overtime pay, a condition that does not obtain now.

The majority of the Board would therefore recommend for all time in excess of ten hours out of any given twenty-four hours, which an employee puts in, he should be paid, if he comes under the class of checker, at the rate of \$1.35 per hour, and if a trucker, \$1.20 per hour.

#### Minority Report

In the matter of Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific

Railway Company (Western Lines), hereinafter called the employer, and certain of its employees, The Water-front Freight Handlers Association, Local 38-52, Auxiliary, Pacific Coast District, International Longshoremen's Association, employees.

The Honourable G. D. Robertson,  
Minister of Labour, Ottawa.

Sir:

Finding myself unable to agree with the other two members of the Board in the matter of the recommendation contained in their report, I hereby present a minority report for your consideration.

The existing rate now being paid to the employees was put into effect in June, 1918, and while it was based upon what is known as the "White Award," this award being to cover this class of work, as well as 'longshore work in the Puget Sound ports, by the National Adjustment Commission, under the Chairmanship of Mr. Henry M. White, of Seattle, Wash., the putting into effect of the rates contained in this award was brought about through negotiations between representatives of the employer and representatives of the employees, being accepted by both as an equitable basis of compensation.

In August, 1919, the rates for this class of work in Puget Sound and other

American ports was advanced from sixty-five (65) cents per hour straight time and one (\$1.00) dollar per hour overtime, to eighty (80c.) cents per hour straight time and one dollar and twenty cents (\$1.20) per hour overtime, the putting into effect of these rates not being in any sense a war measure, but being brought about through negotiations.

As a matter of fact these rates were accepted by the Great Northern Railway Company in Vancouver, being paid for a period of about one month.

I therefore submit, that if the rate as put into effect in June, 1918, was equitable, (and there was no attempt upon the part of the employer during the hearing to prove otherwise) that, in view of the increased cost of living from that time to date, as shown by the statistics issued by the Department of Labour, that the employees should be given the increase asked for, namely, fifteen (15) cents per hour straight time, and twenty (20) cents per hour overtime for the truckers, etc., and fifteen (15) cents per hour straight time and twenty-five (25) cents per hour overtime for the checkers, and make my recommendation accordingly.

(Sgd.) JOSEPH TAYLOR.

#### **Report of Board in dispute between the Toronto Suburban Railway Company and its electrical workers**

**A** REPORT was received from the Board established to deal with the dispute between the Toronto Suburban Railway Company and its employees, being electrical workers, members of Local Union No. 353, International Brotherhood of Electrical Workers. The Board was composed as follows: His Honour Judge J. A. Barron, Stratford, chairman, appointed by the Minister in the absence of a recommendation from the other two members, Messrs. Geo. D. Kelley, Ottawa, and Louis Braithwaite,

Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Kelley and contained recommendations as to settlement. Mr. Braithwaite presented a minority report.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between the Toronto Suburban Railway, employer, and certain of its em-

ployees, being electrical workers, members of Electrical Union No. 353, International Brotherhood of Electrical Workers, employees.

The undersigned members of the Board created by the Honourable Minister of Labour by order dated the 15th of July, 1920, having met and considered the matters covered by the reference to them under the said statutes, and having had before them all parties concerned and having had submitted to them evidence *viva voce* as well as written evidence, and having taken upon themselves the burden of the reference to them, now declare their award and findings to be as follows:

We consider and are of the opinion there should be a raise in wages and that that such increase or raise shall be on the percentage of 15 per cent to and for all employees who are now paid upon an hourly basis, and that in regard to all employees who are paid by the month, that there should be an increase of ten dollars (\$10.00) per month to each and every one of such employees. In view of the fact that the number of employees is comparatively so small, necessitating as is admitted, more or less overlapping of work, and more or less exchanging of work, employees acting in this regard mutually to their own benefit and advantage, we think the present conditions governing the operation of the road, so far as employees are concerned should not be interfered with, except as hereinafter mentioned, but left as they are.

Whenever and wheresoever any employees are called upon to do extra work that in every case there shall be a minimum time allowance of not less than two hours. When however services have been rendered that would entitle the employee to be paid an amount equal to the said minimum pay on the day on which such service is rendered, then after the lapse of such time the employee shall be entitled to be paid for such further service as he performs at the rate at which he would be paid if performing service in the usual course of

his employment. Only one minimum allowance shall be paid for in any one day of twenty-four hours.

Seniority according to the length of service in the Company coupled with efficiency in the opinion of the proper officers of the Company shall be the basis of promotion. Employees assigned to other departments of the Company temporarily may when released return to the position from which taken without loss of seniority. Employees declining promotion shall not lose their seniority except to the employee promoted.

No employee shall be dismissed without good cause.

This finding shall, in its operation and effect begin on the First day of July, 1920, and continue in full force and effect for the period of one year.

Dated at Toronto, this 30th day of July, A.D. 1920.

(Sgd.) JOHN BARRON,  
Chairman.

(Sgd.) GEO. KELLEY,  
Member.

#### Minority Report

In the matter of the Industrial Disputes and Investigation Act, 1907, and of a dispute between the Toronto Suburban Railway Co., employer, and certain of its employees, being members of Local 353, International Brotherhood of Electrical Workers, employees.

To the Honourable Gideon D. Robertson,  
Minister of Labour, Ottawa.

Sir:

The Board of Conciliation and Investigation appointed to consider the difference between the parties to this, failed to arrive at an agreement in making recommendations on the points left to them by the contending parties.

Many of the clauses in the schedule were agreed to by direct negotiation between the representatives of the employers and employees.

It was left to the Board to make recommendations on wages and hours.

The majority of the Board have decided not to interfere with present working hours and have recommended an increase for hourly men of 15 per cent and \$10.00 for monthly men. These recommendations I cannot agree with after reviewing the evidence submitted by the men's committee before the Board.

The representatives of the Company claim their small organization cannot be compared with ones in the city of a similar industry. The men claim that the work is similar, and the hazards just as great, further contending the smallness of the industry is no justification for longer hours or less wages to those paid for the same work in a larger industry. The men claimed the Suburban Railway may further increase its lines or at some future time be taken over by a still larger organization, and if this should happen, they would be working to a disadvantage if others have better conditions in the same organization.

The Company's representatives claim they only hire journeymen, having no room for apprentices. In the event of a change in the arrangements in the future, where the opportunity may present itself for the placing of apprentices to train for the different branches of the industry for the continuity of the service, I have included them in my recommendation for wages.

Taking all the above facts into consideration, I recommend the following:

(1) Length of the working day for all employees, eight hours.

(2) Time and one-half for overtime (excepting operators), for the first four

hours. Double time thereafter and on Sundays and holidays.

Operators work is necessarily continuous and at present work 7 days per week. Relief should be arranged to allow these men 1 day off in 7 and time and one-half for overtime, plus two weeks' holidays as at present with pay.

	per hour.
Winders journeymen.....	85c.
Apprentices, first six months.	50c.

**Report of Board in dispute between the Toronto, Hamilton and Buffalo Railway Company and its freight handlers at Hamilton and Brantford, Ont.**

**A** REPORT was received from the Board established to deal with the dispute between the Toronto, Hamilton, and Buffalo Railway Company and certain of its employees being freight handlers at Hamilton and Buffalo, members of the Canadian Brotherhood of Railway Employees. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Geo. S. Kerr, K.C., and Henry G. Fester, Hamilton, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by a proposed agreement.

**Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Toronto, Hamilton and Buffalo Railway Company, employer, and certain of its employees being freight handlers and freight clerks, members of the Canadian Brotherhood of Railroad employees, employees.

To the Honourable,  
Senator G. D. Robertson,  
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation established by you herein has the honour to report as follows:

On Wednesday the 21st day of July 1920, the Board met pursuant to appointment, at the Court House in the City of Hamilton. All the members were present. The representatives of the employer, who attended, were Messrs. F. F. Backus, General Manager, T. H. & B. Railway Company, H. T. Malcolmson, Superintendent, C. M. Sinclair, Agent at Hamilton, and H. C. Thomas, Agent at Brantford.

The representatives of the employees who attended were Messrs. John J. Campbell, Secretary of Employees' Committee, Joseph P. Miller, Chairman of the Committee, George Hands, a member of the Committee and Elroy Robson, Organizer of the said Canadian Brotherhood.

The Board continued in session on the 22nd, 23rd and 26th days of July. The Board was unable to obtain an agreement between the parties chiefly for the reason given by Mr. Backus, which was that the employer could not and would not enter into any agreement differing from the rules and rates of pay in effect on the Canadian Pacific Railway Company and the Michigan Central Railway Company, as he said these Railways are the owners of the employer. A further difficulty in the way of obtaining an agreement was that both parties expect that the Canadian War Board [The Railway Association of Canada] will adopt in whole or in part the recent award of the United States Railway Board.

There seems to be no grievance felt by the employees, no complaint, and the employer, subject as stated, appeared willing to adopt any rules and regulations and rates of pay which are generally adopted by the other Roads, but is not willing to take the responsibility of acting separately. The Board heard the discussions, arguments, evidence and statements of both sides which were put in, at considerable length, on the various sections of the proposed agreement submitted by the employees including the wage scale. After full consideration of these matters the Board of Conciliation recommends the schedule of rules and rates of pay hereto annexed and made part of this report for acceptance by the employees and employer as a fair and reasonable temporary working agreement until the Canadian War Board or other duly appointed central

authority recommends the United States Railroad Board's recent award or a modification thereof for adoption by the Railroads in Canada. The General Manager of the employer states to the Board that the Toronto, Hamilton & Buffalo Railway Company would adopt such recommendation of the War Board as soon as the Canadian Pacific and Michigan Central Railway adopt the same.

All of which we, the members of your Board have the honour to submit.

Dated at Hamilton this 26th day of July, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.  
GEO. S. KERR,  
For Employer  
HENRY G. FESTER,  
For Employees.

# RATES OF PAY AND RULES OF SERVICE FOR CERTAIN CLASSES OF EM- PLOYEES.

Recommended by the Board of Conciliation for Acceptance by the Employer and Employees.

## ARTICLE 1.

For the purpose of this schedule the word "Employee" shall be understood to mean any employee filling any position incorporated in these rules, regulations and rates of pay at each point mentioned herein, recommended by the award of the Board of Conciliation for acceptance by the parties.

## ARTICLE 2.

(a) Members of Committee shall be relieved when required for Committee work and will be furnished with necessary transportation. Sufficient notice must be given to superior officer so that the interests of the railway may not suffer.

(b) Employees will, if circumstances permit, be relieved not exceeding four (4) times each year and furnished transportation for the purpose of attending their meetings, such transportation to extend only to the limits of the Superintendent's division in which they are employed, provided the Company will not be put to additional expense.

## ARTICLE 3.

Employees attending Court or investigations at the request of the proper officer of the Railway will have reasonable expenses paid by the Railway in addition to their schedule wages, on production of receipts. In such cases the witness fees shall go to the Railway.

## ARTICLE 4.

Employees off duty on proper leave of absence or on account of sickness, for any reasonable length of time, will not lose their seniority rights. The Railway, however, will reserve the right to determine seniority rights after six months' absence.

## ARTICLE 5.

Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions. Employees temporarily assigned to lower rated positions shall not have their rate reduced.

## ARTICLE 6.

(a) Promotions shall be based upon ability, merit and seniority. Ability and merit being sufficient, seniority shall prevail. It is understood and agreed that rules for promotion and seniority do not include employees having less than six months' service. Such positions will be bulletined for five days in the department where they occur.

(b) Senior applicants declining promotion become junior to employee accepting same.

## ARTICLE 7.

In reducing forces seniority shall prevail. When forces are increased employees will be returned to service and the positions formerly occupied in the order of their seniority.

Employees desiring to avail themselves of this rule must file their names and addresses with the proper officials.

Employees failing to report for duty or giving a satisfactory reason for not doing so within seven days after the date of notification will be considered out of the service.

## ARTICLE 8.

Employees shall, on application, have returned to them all foreign service cards, or letters of recommendation that may have been taken up for inspection.

## ARTICLE 9.

When the employee is dismissed or leaves the service after giving due notice required by the rules, such employee will on request, be given the usual certificate of service, showing the capacity in which employed and whether discharged or leaving of own accord. If discharged, cause of dismissal to be stated on request.

## ARTICLE 10.

Employees will not be suspended or discharged without just cause. When an employee considers that he has been unjustly treated he will have the right to appeal to the Superintendent or General Manager in the order named and may be accompanied if he desires by one or two fel-

low employees in good standing. In case an employee has been suspended and on further investigations found not at fault, he will be reinstated and paid for all time lost. Any objection to a decision must be handed in at once and no allowance will be made for time lost between the date of the decision and the date on which the appeal for re-hearing is made.

Grievances which can be adjusted locally between those immediately concerned will be adjusted in the Railway's time.

#### ARTICLE 11.

Present arrangements as to holidays and leave of absence to be continued as at present.

#### ARTICLE 12.

Employees will be subject to the general rules of the Railroad in regard to leave of absence and free or reduced transportation.

#### ARTICLE 13.

The following holidays will be granted to all employees, viz.: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day. When it is necessary to call upon such employees to work on holidays above named, they will be paid time and a half. When an employee is called upon to work on Sunday, such employee will be paid time and a half, but if arrangements are made to relieve staff one day a week, Sunday work will be treated the same as week days, the intent being that where possible to do so, employees will be given one day's rest in each seven days. Employees will not be expected to work on holidays or Sundays and will not be paid extra time unless they are especially instructed by the head of the department to do so; night employees to receive the same consideration as day employees. Minimum call to be equal to three hours at regular rates.

#### ARTICLE 14.

The time of monthly rated employees who work for fractions of a month will be paid *pro rata* on the basis of the number of days in each month, Sundays excepted.

#### ARTICLE 15.

Eight consecutive hours, exclusive of meal hours, shall constitute a day's work for all employees. All overtime shall be paid at time and a half. When notified or called to work outside of estimated hours employees will be paid a minimum allowance of three hours. The minimum allowance will not apply when employee was advised prior to going off duty to return to work after hours. Employees will not be required to suspend work during regular working hours to absorb overtime.

#### ARTICLE 16.

When an employee is transferred by order of proper official, such employee will receive free transportation for himself, family and household goods and will suffer no loss of time in consequence thereof. Such time not to exceed two days when not contrary to law.

#### ARTICLE 17.

Employees accepting official positions in the Railway service or with the General Committee will retain their seniority rights as provided for in this schedule.

#### ARTICLE 18.

##### RATES OF PAY.

##### Brantford Freight Office.—

Chief Clerk .....	\$145.00
Inward clerk .....	120.00
Rate clerk .....	115.00
Car clerk .....	105.00
Assistant cashier .....	87.50
Assistant biller .....	90.00
Assistant car clerk .....	87.50
Stenographer (1st year apprentice) .....	55.00
Assistant inward clerk .....	87.50
Outstandings (2 yr. standing) .....	65.00
(3 yr. standing) .....	87.50
Messenger .....	55.00

##### Station Staff—

Baggagemen .....	95.00
------------------	-------

##### Freight Sheds—

Freight foreman .....	115.00
Checkers (2) .....	95.00
Porters .....	42½c. per hr.

##### Hamilton Freight Sheds—

Senior checkers (classified in Schedule presented as inwards foreman, outwards foreman, and yard foreman) .....	105.00
Checkers .....	100.00
Car checker .....	95.68
Freight porters (Classified in Schedule presented as stores, pickers-out, car sealers, senior freight-porters and junior freight porters) .....	46c. per hour.

This schedule to remain in effect from the first day of June, 1290, until revised or terminated by thirty days notice from either party.

HENRY G. FESTER.

**Report of Board in dispute between the Master Printers of Ottawa, and certain of their employees**

**A** REPORT was received from the Board established to deal with the dispute between the Master Printers of Ottawa, members of the Ottawa Printers and Book Binders Association, and certain of their respective employees, being members of the Ottawa Typographical Union No. 102. The Board was composed as follows: Mr. Geo. D. Kelley, Ottawa, chairman, appointed on the joint recommendation of the other two members, Messrs. J. Kilpatrick and Jas. Drury, Ottawa, nominees of the employers and employees respectively. The report was unanimous and contained recommendations as to settlement of the dispute, which both parties later expressed their willingness to accept.

**Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Master Printers of Ottawa, members of the Ottawa Printers and Bookbinders Association, employers, and certain of their respective employees, being members of the Ottawa Typographical Union No. 102, employees, the dispute being referred to a Board of Conciliation and Investigation by mutual consent under Clause 63.

The Honourable,  
The Minister of Labour,

The above Board of Conciliation duly met at the City of Ottawa on July 15th,

16th, 17th, 19th, 20th and 21st. Different of the Master Printers appeared before the Board, the employing printers being represented by their President, R. Stanton Lee. Evidence was submitted on both sides, and after hearing the same it was decided that Section 21 of the Agreement entered into between the Master Printers and their employees should be reopened and that the minimum wage referred to in the said section of the said Agreement, from and after the first day of July, A.D. 1920, should be the sum of Thirty-Five Dollars, of which Thirty-two Dollars (\$32.00) should be considered as being the wage proper, the balance in the nature of a bonus.

The representatives of the employees were advised that the above change in their agreement was made on the condition that no further change be asked for in the said agreement until the expiration of the same, and this was consented to and the findings of the Board are based upon such consent. All of which is respectfully submitted.

Dated at Ottawa, this 21st day of July, A.D., 1920.

(Sgd.) GEO. KELLEY,  
Chairman.

J. KILPATRICK,  
Member.

JAMES DRURY,  
Member.

## WAGE AWARDS OF ARBITRATOR AFFECTING CERTAIN STEAMBOAT AND FERRY EMPLOYEES IN BRITISH COLUMBIA

Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, at Vancouver, B.C., recently acted as arbitrator in connection with two disputes, between, (1) the municipality of North Vancouver and its ferry employees,

masters, mates and engineers, and (2) the Coastwise Steamship and Barge Co., Ltd., and the National Association of Marine Engineers, acting on behalf of the engineers of the S. S. Marmion. On July 1 and July 24, respectively, Mr. Bulger made his awards as follows:

### Report of Arbitrator in wage dispute between the Municipality of North Vancouver and its ferry employees, masters, mates and engineers

In the matter of arbitration of wage increases between the Municipality of North Vancouver and ferry employees, being Masters and Mates, members of the Canadian Merchant Service Guild, and Engineers, members of the National Association of Marine Engineers, I respectfully submit herewith my findings as arbitrator for the information and guidance of the aforementioned parties:

The following rates are awarded to and apply as per classification mentioned:

Masters .....	\$190.00	per month.
Masters, Relieving.	190.00	" "
Mates.....	155.00	" "
Mates, Relieving ..	145.00	" "
Engineer, Chief....	190.00	" "
Engineer, 2nd.....	185.00	" "

*Masters:* In disallowing any further increase requested for Masters above that granted by the Council I have given due consideration to the duties and responsibilities involved, working conditions and hours, and relative pay for Masters occupied in more hazardous and responsible positions.

*Relieving Master:* As the duties, responsibilities and working conditions in the case of the Master apply likewise to that of the Relieving Master, there is no apparent justification for a difference of rates for like service rendered, therefore, the same rate should apply and is hereby awarded.

*Mates:* In the claim for increase for Mates there appears to be justification for some advance above that allowed by the Council. The additional duty of collecting fares which entails almost continuous service during the watch should not be considered a part of the work that ordinarily comes under the customary duties of Mates and, therefore, some compensation should be allowed for such extra service. The spread of salary between Masters and Mates as recommended by the Council is, in my opinion, too great for the services rendered and is deserving of a more equitable adjustment. The preceding reasons as set forth, without involving other questions bearing on the matter, are, I believe, sufficient to entitle the Mates to better compensation for their services and, therefore, said increase is hereby granted and is so awarded.

*Relieving Mates:* The rate herein set for Relieving Mates is, I believe, fair and reasonable for the service performed. The casual nature of employment in the case of the Relieving Mate tends to obviate the same application of principle as applies between Master and Relieving Master for like services rendered.

*Chief Engineer:* The increased rate awarded for Chief Engineer in my opinion is a more reasonable compensation for the service performed than the rate recommended by the Council. I am res-

trained in this particular instance in not conceding the full increase asked for by the engineers' representative by certain formalities observed in governing rates between the Masters and Engineers which, written or otherwise, appear to be the custom.

*Second Engineer:* The rate recommended by the Council appears to be inadequate in the case of the Second Engineer. The service performed is to all intents and purposes identical to that of the Chief Engineer in that they assume full command and responsibility

of the operation of their respective vessels during the operation of same—the position of Chief Engineer being nominal only. The rates for Second Engineers as herein set forth are recommended, and so awarded, to apply.

*Date award effective:* As applying to Masters and Mates to be effective from, and including, the first day of January, 1920, and for Engineers from, and including, the first day of March, 1920.

All of which is respectfully submitted for the consideration and approval of the parties herein mentioned.

**Report of Arbitrator on wage dispute between the Coastwise Steamship and Barge Co., Ltd., and the National Association of Marine Engineers, acting on behalf of the engineers of the S.S. Marmion**

On July 24, Mr. Bulger in his award as arbitrator in the above dispute granted wages per month as follows: Chief engineers, \$215, second engineer \$170, third engineer \$155, on the ground that these were entitled to the increase of \$25 per month granted by the company to deck officers and engineers of s. s. Amur and to the deck officers of s. s. Marmion, over the rates recommended by the Royal Commission, which investigated the grievances between the Canadian Merchant Service Guild and the British Columbia Shipowners in January 27, 1919. (LABOUR GAZETTE, March 1919, page 242.). The arbitrator found

this increase had been granted with few exceptions by the shipping and transportation companies in British Columbia to cover changes in the cost of living since the award of the Royal Commission was made. It was also found that the particular duties of the engineers of the s. s. Marmion curtailed their enjoyment of the customary shore leave and that the work of towing added to the duties of the engineers, entailing more frequent repairs, attention to bearings and valves, the packing of joints, glands and pistons, and therefore to pay these engineers less than the amounts awarded would involve discrimination.

**COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS**

**T**HE cost of Living Commission, appointed on January 21, 1919, to determine every three months the increase in the cost of living for coal miners on Vancouver Island, and to report the amount by which wage rates should therefore be increased or decreased, forwarded its report for the quarter ending June 30, 1920,\* to the Department on July 29, 1920. The Commission consisted of Mr. John McAllister, representing the miners; Mr. Tully Boyce, representing the

operators; and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, as chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners are accustomed to trade in the various towns. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computation and adjustment for the quarter under review was

the same as used on all previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices on June 30 over March 31, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase or decrease as an equivalent to cover similar increases or decreases in clothing. An increase of 3.65 per cent was ascertained, which amounted to an increase in wages of 11 cents per day where the base rate was \$3.00 per day, and 11½ cents per day where the base rate was \$3.15, the increase in wages to

become effective from August 1, 1920, and to apply to all underground service, clerical and office employees.

The investigation showed that sugar, jams, syrup, flour and cornmeal had advanced considerably; that slight advances had occurred in canned vegetables, soups, cereals, evaporated fruits, fresh beef, pork, mutton, veal and coffee; and that there had been slight decreases in lard, cheese and butter.

## PROCEEDINGS OF THE JOINT INDUSTRIAL COUNCIL OF THE OTTAWA BUILDING TRADES

---

### Report of chairman of Joint Council in dispute between various Firms, members of the Ottawa Branch of the Association of Canadian Building and Construction Industries, and certain of their employees

**D**URING the month of July a dispute between Local No. 724, International Brotherhood of Electrical Workers, and Mr. H. L. Allen, Electrical Contractor, was referred to the Joint Council which had been constituted by agreement between the Ottawa Branch of the Association of Canadian Building and Construction Industries and the Building Trades Council of Ottawa embracing practically all the various Unions of the building trades of Ottawa (LABOUR GAZETTE, June, 1919, p. 682). A chairman had not been agreed upon by the members of this Council and the Minister of Labour was requested to make the nomination. After careful consideration he named Mr. J. A. Machado, Vice-President of the American Bank Note Company, Ottawa. Mr. Machado rendered his report concerning the matter to the Department of Labour, an outline of which is as follows:—

There were present at the meeting representatives of the Ottawa Branch of the Canadian Building and Construction Industries, as well as representatives of the Allied Trades; also Mr. H. L. Allen,

Mr. Crowe, of the firm of Costello, Crowe and Bellamy, and one or two others. It was agreed after a very full discussion that both sides would agree to abide by the decision of the chairman.

At the outset it appeared that the recent strike in Mr. Allen's establishment was called in violation of clauses 7 and 8 of an existing agreement between the electrical contractors of the City of Ottawa and the electrical workers of Local Union No. 724 of Ottawa, which read as follows:—

“Clause 7.—We agree to an Industrial Council, consisting of five (5) representatives from the Building Trades Council, and five (5) from the Ottawa Branch of the Association of Canadian Building and Construction Industries, with an independent chairman to be agreed upon by both parties.

Clause 8.—In case of any dispute between the parties to this agreement, it is understood that, before a strike is resorted to, the dispute in question shall be laid before the Industrial Council, this Council to be called within twenty-four (24) hours after being notified by either party, or on forty-eight (48) hours' notice on work outside the City Limits.

It was claimed that “the employer had in his employ a man other than an

electrical worker who was doing electrical work". It developed after investigation, however, that there is considerable work done on the premises of the electrical contractors that is clerical and not in any sense electrical, as well as other work of a simple sort that can readily be done by a clerk of average intelligence with little or no electrical training. Some of this work might perhaps be classed as electrical work, but it is commonly done by clerks not classed as electrical workers. Mr. Machado was of the opinion that Mr. Allen had not departed to any serious extent, if at all, from the usual practice in Ottawa.

The Union made a second claim that the employee complained of is employed during normal working hours by another employer, which it was alleged was in violation of clause 18 of the above mentioned contract. Clause 18 reads as follows:—

"All journeymen and improvers while in the employment of an electrical contractor are prohibited from doing private work of any kind. By violation of this rule he offers himself liable to a fine of Twenty-five Dollars (\$25), payable to the examination Board, and said journeyman or improver to stand suspended until such fine is paid. No action can be taken until the contractor or contractors' Association enters a protest in writing."

The findings in this connection were that while it was agreed that the employee in question was not classed as a journeyman or an improver, the Union's point of contention was not well taken. The interpretation appeared to be that this clause was placed in the agreement for the protection primarily of the employer, in order to provide against his workmen working for some other or rival contractor, or undertaking competitive work on their own account during their spare time, and further that by this regulation the employees would be in the best condition to render full service to their employer during their working hours. This appeared to be a matter for adjustment between the employer and his employee and it was considered that Mr. Allen had not departed from the prevailing practice in the trade in Ottawa.

The Committee representing the Ottawa Branch of the Canadian Building and Construction Industries presented a letter to the Council asking for a ruling upon the question of responsibility for the loss caused to Mr. Allen by the calling of the strike; but Mr. Machado did not consider this a subject to be one under the jurisdiction of the meeting and therefore did not touch upon it.

## PROCEEDINGS UNDER THE BRITISH INDUSTRIAL COURTS ACT, 1919

### Decisions of Courts of Inquiry in cases of (a) Dockworkers, and (b) Coal Trimmers

THE conciliation machinery of the British Industrial Courts Act, 1919, which confers upon the Minister of Labour power to appoint Courts of Inquiry to investigate the causes and circumstances of any existing or apprehended trade dispute, was discussed briefly in the February issue of the LABOUR GAZETTE. It should be repeated that these temporary Courts of Inquiry have no power to settle disputes by arbitration, but are limited to making a statement of the case and a recom-

mendation as to the best course to be pursued. The settling of disputes by arbitration, after other means have failed, is the work of the permanent Court of Arbitration, termed the Industrial Court, created under Section 2 of the Act.

The first important case before a Court of Inquiry was heard in London during February and March last, and was that of the dock workers' application for increased wages and unemployment maintenance. The Court, which was

composed of three employers' representatives, three of labour, and two of the general public, with Lord Shaw as chairman, recommended in a majority report that the claims of the dock workers be granted.

The principal claim of the dock workers was for a standard minimum wage of 16 shillings per day for a 44-hour week. The question of continuity of employment was also advanced. It was claimed that the lack of continuous employment was one of the chief handicaps of the dock worker, and as dock owners had need of a reserve of labour on which they could depend in emergency, the Court was asked to consider this problem. The dockers urged the adoption of a scheme of labour registration to be entrusted to trade unions; for the payment of a maintenance allowance to unemployed dockers, the money to be provided by a levy on shipping; and for the direct and equal representation of labour on the governing authorities of ports and docks.

The case for the workers was conducted by Mr. Ernest Bevin, Secretary of the Dockers' Union, in a manner which aroused much favourable comment in the press. Witnesses were questioned with regard to the profits made by shipping companies. The chairman was at first inclined to rule such questions out of order on the ground that the subject of the inquiry was not profiteering but a claim for higher wages based on the standard of living, but he later admitted the relevancy of such evidence respecting profits after it was pointed out that at the preliminary negotiations between the employers and the workers the former had pleaded "inability to pay." It was alleged that the exceptional profits made by the shipping companies made possible the payment of the higher wages claimed without adding to the cost of commodities to the consumer. Considerable interest was shown in Mr. Bevin's striking presentation of a family budget for a docker with a wife and three children. He exhibited to the Court plates of food to illustrate his argument that the daily ration of the docker's family, as set

forth by the employers' council, was quite inadequate. With respect to the problem of casual labour, it was pointed out that employers had every incentive to keep on hand a floating supply of casual labour which may be employed or kept idle as occasion required. It was estimated that at the London docks the proportion of unemployed casual labourers had increased from 2 per cent in 1914 to 27 per cent in 1919. On this point the report states "that the system of casualization must, if possible, be torn up by the roots. It is wrong. And the one issue is as to what practical means can be adopted of readily providing labour, while avoiding cruel and unsocial conditions."

The report of the Court, issued early in April, contained the following main recommendations: That a national minimum wage should be established of 16 shillings a day for a 44-hour week; that there should be a system of registration for dock labour in all ports, docks and harbours of the United Kingdom, that the principle of the maintenance of unemployed casual labour be approved; that dock wages be paid weekly; and the Whitley Councils be introduced for dock labour.

#### **Court of Inquiry Disapproves Unnecessary Night Work**

A demand of the coal tippers of South Wales for the substitution of two continuous shifts for the existing broken shift system, which involved night work, was recently conceded as the result of the decision of a Court of Inquiry appointed following the failure of negotiations between representatives of the railway companies, dock authorities, colliery owners, coal shippers, and the National Transport Workers' Federation. The Court affirmed that it was hardly in dispute that the quantity of coal arriving at the Bristol Channel ports could be shipped in 16 hours; the point to be settled was whether it could be done in 16 consecutive hours or in two broken shifts. On the one hand the men claimed that they had a strong objection to night work, based on (a) the

greater discomfort to which they are subjected than in the daytime; (b) a greater liability to accident when working at night; (c) the dislocation of their household arrangements; (d) their lessened vitality and efficiency, especially in the small hours of the morning; (e) their inability to obtain the necessary sleep in the daytime. The employers contended that it would not be practicable to ship the quantity of coal now exported from the Bristol Channel ports in the proposed two consecutive shifts, and that the reason of the broken shifts was that necessary preparatory work

had to be done in the intervals between shifts. The men replied that arrangements could be altered so as to allow subsidiary work to conform to continuous shifts; they further undertook to utilize unavoidable stoppage during each shift for taking meals, so that work would not require to be stopped for that purpose. On this understanding the Court recommended that the system of continuous shifts be put into operation as from July 14.

A number of other differences are pending before the Industrial Court and various Courts of Inquiry.

### STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1920

**T**WENTY strikes, involving 2,509 employees were reported as having commenced during July. There were in existence at some time or other during the month 49 strikes, involving about 6,734 workpeople. The total time loss on account of industrial disputes was estimated at 80,221 working days, as compared with 155,502 in June, and 683,896 in July, 1919. The time loss occasioned by the 20 strikes which began in July was 26,225 working days, while a loss of 53,996 is charged to the 29 strikes that commenced prior to July. Termination was reported in the case of 16

disputes which commenced prior to July. Fourteen of the disputes commencing during July terminated during the month, leaving the following 19 strikes affecting approximately 1,442 workpeople on record on July 31: loggers, Simoon Sound; pottery workers, St. John's; stonecutters, Ottawa; carpenters, Campbellton and Sherbrooke; engineers, Hamilton; machinists, Toronto and St. John; moulders, Amherst, Collingwood, Edmonton, Hamilton, Montreal and Toronto; rolling mill employees, Montreal; egg candler, Montreal; meat packers, Calgary and glass workers, Hamilton.

#### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—Four strikes, involving 286 workpeople and resulting in a loss of 5,787 working days, were reported in this group. All had been carried from the previous month's record and information received indicated three had terminated during the month, leaving the strike of loggers at Simoon Sound still in existence.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—Three strikes affected this group, involving 55 workpeople and resulting in a time loss of 420 working days. The only new strike occurring during the month was that of some twenty stonecutters at Ottawa who demanded increased wages. This strike remained unterminated at the close of the month. The miners' strike at Minto, N.B., which had been in existence since December, 1919, was considered as having lapsed during July.

**BUILDING AND CONSTRUCTION.**—Four new strikes occurred in this group

## STRIKES AND LOCKOUTS DURING JULY, 1920

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>Strikes commencing prior to July, 1920</b>			
LUMBERING—			
Loggers, Grassy Bay, B.C.....	Commenced June 18. Demanding an open shop. Settled by replacement of strikers and work resumed July 28.	54	1,242
✓ Loggers, North Vancouver, B.C.....	Commenced April 24. Alleged grievances against food and cook. Information received indicates this strike was terminated during June.		
Loggers, Port Moody, B.C.....	Commenced June 22. Against the employment of particular persons. Strikers decided to call the strike off and resumed work July 19.	97	1,455
✓ Loggers, Simoon Sound, B.C.....	Commenced May 26. For better living conditions. Unterminated.	65	1,690
✓ Loggers, Union Bay, B.C.....	Commenced May 8. For improved camp conditions. Camp was closed to undergo repairs and work resumed July 25.	70	1,400
✓ Lumber workers, Fort Frances, Ont.....	Commenced June 1. Demand for 8-hour day. Information received indicates this strike was terminated the latter part of June.		
MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—			
Miners, South Minto, N. B.....	Commenced December 6, 1919. For increased wages and improved working conditions. Information received indicates conditions are no longer affected.		
Pottery workers, St. Johns, Que.....	Commenced November, 1913. Against a reduction in wages. Unterminated.	35	
BUILDING AND CONSTRUCTION—			
Carpenters, Campbellton, N.B.....	Commenced May 1. For increased wages. Unterminated.	100	2,690
Carpenters, Sherbrooke, Que.....	Commenced June 15. For increased wages. Unterminated.	222	5,772
Hodcarriers and labourers, London, Ont.....	Commenced June 26. For increased wages. Settled; called off by Union and work resumed July 26.	160	3,369
Painters, Windsor, Ont.....	Commenced April 1. For increased wages. Information received indicates conditions no longer affected.		
METALS, MACHINERY AND CONVEYANCES—			
Electrical workers, Peterborough, Ont.....	Commenced May 18. For increased wages and better working conditions. Work resumed July 12.	140	1,260
Engineers, Hamilton, Ont.....	Commenced May 1. For increased wages and better conditions. Unterminated.	24	624
Machinists, Lethbridge, Alta.....	Commenced June 25. For recognition of the union. Settled by replacement of strikers and work resumed the latter part of June.		
Machinists, Owen Sound, Ont.....	Commenced May 17. For increased wages. Settled by negotiations work resumed July 26.	24	504
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Unterminated.	8	208
Machinists, Toronto, Ont.....	Commenced June 17. For a minimum rate of wages. Strike called off July 19.	20	450

STRIKES AND LOCKOUTS DURING JULY, 1920.—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
<i>(Continued)</i>			
Machinists, toolmakers, etc., Peterborough, Ont.	Commenced May 6. For increased wages and shorter hours. Settled by negotiations; work resumed July 12.	92	828
Moulders, Collingwood, Ont.	Commenced June 1. For increased wages. Unterminated.	10	260
Moulders, Amherst, N.S.	Commenced June 22. For increased wages. Unterminated.	51	1,326
Moulders, Edmonton, Alta.	Commenced June 26. For increased wages and shorter hours. Unterminated.	24	624
Moulders, Halifax and Dartmouth, N.S.	Commenced June 24. For increased wages and 8 hour day. Settled by negotiations; work resumed July 13.	33	528
Moulders, Hamilton, Ont.	Commenced May 5, 1919. For increased wages and shorter hours. Unterminated.	17	442
Moulders, Montreal, Que.	Commenced May 5. For increased wages and shorter hours. Unterminated.	100	2,500
Moulders, Toronto, Ont.	Commenced May 1, 1919. For increased wages and shorter hours. Unterminated.		
Moulders and coremakers, Amherst, N.S.	Commenced June 3. For a minimum wage scale. Settled by negotiations; work resumed July 15.	50	600
Tinsmiths, Hamilton, Ont.	Commenced May 1. For increased wages, shorter hours and recognition of the union. Information received indicates conditions no longer affected.		
<b>WOODWORKING—</b>			
Woodworkers, Ottawa, Ont.	Commenced June 12. Demand for a minimum wage scale and recognition of the union. Men returned to work July 15, pending an award from a Board of Conciliation appointed under the Industrial Disputes Investigation Act.	450	5,400
Woodworkers, Owen Sound, Ont.	Commenced June 22. For increased wages. Settled by negotiations; work resumed July 9.	259	1,813
<b>CLOTHING—</b>			
Garment workers, Hamilton, Ont.	Commenced June 23. For increased wages and alleged short payment of a number of employees. Information received stated strike had terminated latter part of June, when strikers' demands were granted.		
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Bakers, Victoria, B.C.	Commenced May 1. For increased wages and a new agreement. Settled by negotiations; work resumed July 2.	28	28
<b>TRANSPORTATION—</b>			
Teamsters, Fernie, B.C.	Commenced June 12. For increased wages. Information received indicates strike was terminated during June.		
Longshoremen, Prince Rupert, B.C.	Commenced June 4. For increased wages and better working conditions. Men returned to work July 15, pending decision of a Board of Conciliation appointed under the Industrial Disputes Investigation Act.	75	900

## STRIKES AND LOCKOUTS DURING JULY, 1920.—Continued.

Industry or Occupation.	Particulars.	No. of employees in working affected.	Time loss in working days.
<b>PUBLIC UTILITIES—</b> Hydro-electric employees, Chippewa-Queens- ton, Ont.	Commenced June 19. Against the re-introduction of a straight 10-hour day. Settled by negotiations; work resumed July 12.	2,000	18,000
<b>MISCELLANEOUS—</b> Glass workers, Hamilton, Ont.	Commenced June 7. For increased wages and shorter hours. Un- terminated.	7	152
Tire builders, Guelph, Ont.	Commenced April 12. For increased wages on piece work. Inform- ation received indicates conditions no longer affected.		
<b>Strikes commencing during July, 1920</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS</b> Etc.— Stonecutters, Ottawa, Ont.	Commenced July 7. For increased wages. Unterminated.	20	420
<b>BUILDING AND CONSTRUCTION—</b> Bench carpenters, Calgary, Alta.	Commenced July 2. For increased wages. Settled by negotiations work resumed July 5.	32	64
Bricklayers and masons, Kingston, Ont.	Commenced July 2. For increased wages. Settled by negotiations; work resumed July 9.	40	240
Electricians, Ottawa, Ont.	Commenced July 19. Against the employment of particular persons. Settled by mediation; work resumed July 23.	10	40
Hod carriers and labourers, Hamilton, Ont.	Commenced July 9. For increased wages and improved working con- ditions. Settled by negotiations; work resumed July 21.	450	4,050
<b>METALS, MACHINERY AND CONVEYANCES—</b> Ironworkers (Ornamental), Toronto, Ont.	Commenced July 3. For increased wages and improved working con- ditions. Settled by negotiations; work resumed July 24.	80	1,440
Machinists, Toronto, Ont.	Commenced July 26. Against discharge of employee. Unterminated.	24	144
Machinists, boiler makers and helpers, Lon- don, Ont.	Commenced July 5. For increased wages and recognition of the union; Settled by negotiations; work resumed July 7.	80	160
Moulders, Amherst, N.S.	Commenced July 6. For increased wages. Settled by negotiations; work resumed July 19.	12	120
Rolling mill employees, Montreal, Que.	Commenced July 15. For increased wages and better working con- ditions. Unterminated.	450	6,300
<b>FOODS, LIQUORS AND TOBACCO—</b> Brewery workers, Lethbridge, Alta.	Commenced July 2. For increased wages. Settled by negotiations work resumed July 5.	36	72
Egg candlers, Montreal, Que.	Commenced July 8. For increased wages. Unterminated.	19	380
Egg candlers, Montreal, Que.	Commenced July 12. For increased wages and shorter hours. Un- terminated.	40	720
Meat packers, Calgary, Alta.	Commenced July 14. For increased wages and improved working conditions. Unterminated.	250	4,000

STRIKES AND LOCKOUTS DURING JULY, 1920.—*Continued.*

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>TRANSPORTATION—</b>			
Teamsters, Montreal, Que.....	Commenced July 3. For increased wages. Settled by negotiations; work resumed July 27.	200	4,000
Teamsters, Montreal, Que.....	Commenced July 19. For increased wages. Settled by negotiations; work resumed July 22.	300	1,200
<b>PUBLIC UTILITIES—</b>			
Electric linemen, Winnipeg, Man.....	Commenced July 5. For improved working conditions and against discharge of employee. Settled by negotiations; work resumed July 19.	31	372
<b>MUNICIPAL EMPLOYMENT—</b>			
Landscape trimmers, Montreal, Que.....	Commenced July 21. For increased wages. Settled by negotiations; work resumed July 28.	8	48
<b>MISCELLANEOUS—</b>			
Barbers Montreal, Que.....	Commenced July 7. For increased wages. Settled by negotiations; work resumed July 13.	387	1,935
Barbers, Regina, Sask.....	Commenced July 12. For increased wages. Settled by negotiations; work resumed July 26.	40	480

making a total of seven strikes, involving 1,014 workpeople and resulting in a time loss of 16,126 working days. The new strikes included bench carpenters at Calgary, bricklayers and masons at Kingston, electricians at Ottawa, and hodecarriers and labourers at Hamilton. All but the electricians' strikes at Ottawa concerned increases in wages, while the electricians objected to the employment of particular persons. These strikes, together with that of the hodecarriers and labourers at London, Ont., which was carried over from the previous month's record, were terminated, leaving two strikes, those of carpenters at Campbellton and Sherbrooke, still in existence at the end of the month.

**METALS, MACHINERY AND CONVEYANCES.**—This group showed 19 strikes, involving 1,249 workpeople and time losses of 18,358 working days. Five new strikes occurred during the month, the chief one being that of some 450 rolling mill employees of three firms in Montreal, who demanded increased wages and

improved working conditions. The new strikes included, besides the rolling mill employees at Montreal, ironworkers at Toronto, machinists at Toronto and at London, and moulders at Amherst. Increased wages and other changes were responsible for four of the new strikes, while the machinists at Toronto objected to the dismissal of one of their workmen. Eight strikes carried over from the previous month's record and one of those commencing during July remained unterminated at the close of the month.

**WOODWORKING.**—Two strikes, involving 709 workpeople and resulting in a time loss of 7,213 working days, were carried over from the previous month. These strikes affected woodworkers at Ottawa and Owen Sound. A Board of Conciliation appointed under the Industrial Disputes Investigation Act was to deal with the Ottawa strike and the men returned to work pending a decision from this Board. An increase in wages was granted the Owen Sound strikers and work was resumed July 9.

**FOODS, LIQUORS AND TOBACCO.**—Four new strikes occurred during July making a total in this group of 5 strikes, involving 373 workpeople and resulting in a time loss of 5,200 working days. The strike of bakers at Victoria which had been in existence since May 1, terminated early in the month. The four new strikes—brewery workers, Lethbridge; two of egg candlers in Montreal and meat packers at Calgary—all involved increased wages. The Lethbridge brewery workers had their demands granted while the three other strikes remained unterminated at the end of the month.

**TRANSPORTATION.**—One strike carried from the previous month—'longshoremen at Prince Rupert—was terminated by the strikers resuming work pending the decision of a Board of Conciliation appointed under the Industrial Disputes Investigation Act. Two strikes of teamsters at Montreal occurred during July. Both were for increased wages and affected some 500 employees. In both cases the men resumed work under the same conditions as existed prior to the strike.

**PUBLIC UTILITIES.**—The strike of hydro-electric employees engaged on

the Chippewa-Queenston development scheme resumed work July 12 by carrying out as far as possible in the shops, the principle of the 8-hour day in three shifts, and on outside work in two 10-hour shifts. At Winnipeg on July 5, some 31 employees of the Portage la Prairie hydro-electric line went on strike for improved working conditions and against the discharge of employees. Conditions satisfactory to the strikers being arrived at, work was resumed July 19, after some 372 working days had been lost.

**MUNICIPAL EMPLOYMENT.**—Eight civic employees, engaged in tree trimming, at Montreal went on strike July 21 for increased wages. After being out six days an increase was granted and work was resumed.

**MISCELLANEOUS.**—Three strikes, involving 434 workpeople and resulting in a time loss of 2,597 working days, were in existence during the month. Barbers at Montreal and Regina ceased work during July for increased wages. In both cases, however, work was resumed before the close of the month. The strike of glass workers at Hamilton still remained in existence at the end of the month.

---

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING JUNE, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during June, 1920, based on returns from employers and workpeople, are taken from the June issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes involving a stoppage of work reported to the

Department as beginning in June was 183, as compared with 204 in the previous month and 127 in June, 1919. In these new disputes about 65,000 workpeople were directly and nearly 6,000 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the

disputes). In addition, over 57,000 workpeople were involved, either directly or indirectly, in 95 disputes which began before June, and were still in progress at the beginning of that month. The total number of disputes in progress in June was thus 278, involving about 128,000 workpeople, as compared with about 138,000 workpeople involved in disputes in progress in May, 1920, and about 548,000 in June, 1919.

The following table classifies the disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during June:—

Groups of trades	Number of Disputes			Number of workpeople involved in all disputes in June	Aggregate loss of working days during June
	Started before June 1.	Started in June.	Total.		
Building.....	21	25	46	9,000	159,000
Mining and Quarrying ...	5	17	22	26,000	121,000
Metal, Engineering and Shipbuilding.....	25	52	77	42,000	298,000
Textile and Clothing.....	11	17	28	15,000	250,000
Woodworking & Fitting.....	5	10	15	12,000	237,000
Other Trades....	28	62	90	24,000	192,000
Total, June, 1920	95	183	278	128,000	1,257,000
Total, May, 1920.....	80	204	284	138,000	1,169,000
Total June, 1919	84	127	211	548,000	3,836,000

Of the 1,257,000 working days lost in June by all disputes in progress, nearly 812,000 were lost by disputes which began before June and were still in progress at the beginning of that month, and about 445,000 by disputes which began in the month.

CAUSES.—Of the 183 new disputes 111, directly involving over 21,000 workpeople, arose on demands for advances in wages; 18, directly involving nearly 6,000 workpeople, on other wages questions; 5, directly involving about 1,000 workpeople, on questions respecting working hours; 11, directly involving nearly 16,000 workpeople, on details of working arrangements; 23, directly involving nearly 12,000 workpeople, on questions respecting the employment of particular classes or persons; 12, directly involving nearly 4,000 workpeople on questions of Trade Union principle; and 3, directly involving over 5,000 workpeople, in sympathy with other disputes.

RESULTS.—During the month settlements were effected in the case of 94 new disputes, directly involving over 40,000 workpeople, and 32 old disputes, directly involving over 5,000 workpeople. Of these new and old disputes, 25, directly involving over 18,000 workpeople, were settled in favour of the workpeople; 34, directly involving nearly 8,000 workpeople, in favour of the employers; and 67, directly involving over 19,000 workpeople, were compromised. In the case of 40 other disputes, directly involving nearly 20,000 workpeople, work was resumed pending negotiations.

## WORKMEN'S COMPENSATION LEGISLATION IN CANADA

### A Comparison of the Various Provincial Laws on the Subject.

#### Introductory

**I**N view of the interest that has been evinced in the matter of a greater degree of uniformity in the Canadian legislation regarding workmen's compensation, an examination of the various provincial laws appears timely.

The Royal Commission on Industrial Relations, appointed in April 1919, which recommended that a conference be held in Ottawa to consider various matters of interest to employers and employed, suggested that this conference take up "the question of unifying and co-ordinating the existing legislation bearing on the relations between employers and employed, now in force in the several Provinces and in the Dominion" (Report of the Royal Commission on Industrial Relations par. 107). It was unanimously recommended by the National Industrial Conference in September, 1919, that a board or commission, representing the Dominion and Provincial Governments and the employers and employees of the various provinces, be appointed to study the matter.

In pursuance of this report, such a commission was appointed in April, 1920, the provincial laws regarding factory inspection, regulation of mines, minimum wages, industrial disputes and workmen's compensation, being made the subject of discussion and inquiry. The recommendations of this commission have been communicated to the different Provincial Governments with a view to the legislative action required for the adoption of the standards approved by the commission.

The committee on workmen's compensation legislation appointed by the commission submitted a report in favour of certain standard provisions for these

laws. It endorsed the principle of state insurance, the inclusion within the scope of the acts of public employees, and of workmen without regard to the amount of their remuneration, the burden of payment by the employer, the furnishing of medical and hospital aid, the limitation of the period for the filing of claims and their payment directly by the Board, the extension of laws to cover industrial diseases and to permit the making of rules and regulations by the Board for the prevention of accidents, equal privileges on the part of employers and employees with regard to election to be brought under an act, the payment of the cost of administration by the Government concerned and the adoption of a uniform scale of compensation in cases of death or injury. (LABOUR GAZETTE, May, 1920, pp. 538-543).

Compensation for industrial accidents has been provided for by law in all the Canadian provinces (with the exception of Prince Edward Island), in the Yukon and by the Dominion Parliament. Progress in the movement has been marked by three stages. According to the common law of England, that is, those principles which have no written law to prescribe them but which have become interwoven with the written law and form a part of the legislative code, a workman bore the same relation to his employer in case of accident that a victim of any accident bore to any other person. The workman had ground for damages only when negligence or carelessness on his employer's part could be proved. The employer, therefore, could not be held responsible for injury to an employee through the fault of a fellow-workman and thus was developed the doctrine of "common employment" which proved a bar to the recovery of damages in the majority of cases. It was contended that the workman had

assumed all risks involved in the employment other than those due to the employer's personal negligence.

### Employers' Liability

The introduction of power-driven machinery and the factory system into industrial life caused a great increase in the proportion of accidents that could not be foreseen and, consequently, in the number of workmen who, injured through no fault of their own, were unable to recover damages from an employer equally free from personal fault. This development led to the second stage in the history of legislation concerning compensation for industrial accidents. In 1880 the British Employers' Liability Act was passed removing the defence of common employment where the injury was due to a defect in the machinery, the negligence of a superintendent, foreman or signalman. In 1897, an amendment abolished this principle altogether and extended the law to a wide range of industries. Several amendments were made in the following years, and in 1906 a new Act was passed making the right to compensation an incident of the contract of service, removing the defence of contributory negligence on the part of the workman and rendering the employer liable for all accidents arising out of and in the course of employment. The Act of 1906 is a Workmen's Compensation Act as distinguished from the Employers' Liability Act of 1880 and marks the third stage in the movement. With the development from the principle that negligence or carelessness on the part of the individual employer is the sole ground of action to the theory that the employer is liable for accidents caused by carelessness or other fault on the part of any one in his employment, we pass from the common law to the Employer's Liability Act. The adoption of the doctrine of professional risk, that is, that accidents are inherent in the nature of certain occupations and the burden of their cost a legitimate expense of the industry, is the outstanding feature of the Workmen's Compensation

Act of 1906 and the basis of the legislation of the present day.

Canadian law regarding industrial accidents followed that in Britain, the principles underlying the Employer's Liability Act being adopted by the provinces beginning with British Columbia in 1891, amendments gradually broadening the provisions of the original Acts until they were replaced in nearly all the provinces by laws along the lines of what is called workmen's compensation.

The Province of Quebec forms an exception to this rule. The civil law of that province was based on French law, not British, and in the matter of compensation for accidents, the doctrines of common employment and contributory negligence were not recognized in French law. The employer was responsible not only for his own fault but for that of any of his workmen and if fault on the workman's part contributed to the accident it was a ground for reducing damages, not refusing them. In 1909, Quebec passed an Act which accepted the principle of professional risk and provided for compensation for all accidents occurring in the course of employment in certain industries, damages to be recovered directly from the employer through action in the courts. Compensation might be increased or reduced according as the accident was due to fault on the part of the employer or workman respectively. This law is still in operation.

Alberta and Saskatchewan, as the North-West Territories, were under ordinances passed by the Governor in Council until 1905, and until that year the principles of the common law operated in regard to compensation. In 1905 an ordinance was issued abolishing the rule of common employment, and in the same year the two new provinces were formed. In 1911, Saskatchewan passed a law of her own removing the defences of common employment and contributory negligence, and, like Quebec, leaving the administration of the Act to the Courts.

In the Yukon Territory, an ordinance was passed in 1908, the model evidently being the British Employers' Liability Act. This was replaced in 1917 by a Workmen's Compensation Ordinance which authorizes the Judge of the Territorial Court to settle all disputed claims.

#### State Insurance

In other parts of the Dominion, that is in the provinces of Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia and Ontario, the movement has been, in recent years along the lines of the German system of Workmen's Compensation. The employers' liability acts have been gradually replaced, beginning with the province of Ontario in 1914, by a plan of collective liability as in operation in Germany and an exclusive state fund as adopted in the State of Washington. The laws providing for compensation by this method of so-called state insurance were promulgated in Ontario in 1914, in Nova Scotia in 1915, in British Columbia in 1916, in Alberta and New Brunswick in 1918, and in Manitoba in 1920. The last-named province enacted a law in 1916 establishing an accident fund made up of contributions from private insurance companies in which employers were compelled to insure their risk; but at the session of the legislature in 1920 the system adopted in the other provinces was embodied in a new law and the machinery of private insurance companies abandoned. In Alberta, the Act of 1918 repeals the Act of 1908 only so far as any employments covered by the former are concerned. In the other five provinces, provision is made for such industries as are not included in the provisions of the main part of the Act in a section of the law which furnished to workmen in these occupations the protection afforded by the older laws on employers' liability. The terms of this part of the act remove from the employer the defence of common employment and provide that contributory negligence is not a bar to recovery of damages but a ground for their reduc-

tion. Such employers are free to cover their risk by insurance in an accident insurance company.

#### Workmen's Compensation Boards

In Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia and Ontario, a Workmen's Compensation Board of three members is established by law to administer the provincial accident fund to which all employers covered by the act are required to contribute. Industries are divided into classes according to the hazard of the employment and uniform rates of assessment are fixed for the employers within each group, rates varying with the class. The board has power to fix and collect premiums, investigate and decide claims and pay compensation. Workmen within the industries covered are entitled to compensation without regard to whether or not the employer has contributed to the accident fund, but the board has authority to bring an action against such defaulting employer. Members of all these provincial boards hold office during good behaviour but in British Columbia, the term of office is limited to ten years. In Manitoba, New Brunswick, Nova Scotia and Ontario, commissioners are to cease to hold office at the age of seventy-five years. Exclusive and final jurisdiction regarding all matters committed to them is given the boards, New Brunswick and Nova Scotia alone providing for an appeal to the Supreme Court and only upon questions of law with the permission of the judge of the court.

Thus, methods of administration of workmen's compensation laws are largely similar in the six provinces having a system of state insurance. In the industries covered, classes of workers included, amount of compensation provided and in other provisions, there is considerable variation among these provinces and still greater differences between the terms of the laws of Quebec and Saskatchewan and those of the other provinces.

### Industrial Diseases

In all the provinces except Saskatchewan, Quebec and Prince Edward Island, where, as noted, there is no workmen's compensation law, and in the Yukon, compensation is payable for injury due to certain enumerated industrial diseases. (LABOUR GAZETTE, March, 1920, pp. 304-310.) British Columbia and Manitoba specify anthrax, ankylostomiasis and poisoning due to lead, mercury, phosphorus and arsenic, as the diseases to which the law applies. Alberta and Ontario add to this list miners' phthisis and in 1919, Nova Scotia added three other diseases peculiar to miners. In the New Brunswick Act, no diseases are specified but provision is made for compensation for any industrial disease due to the nature of the employment in which a workman was engaged within the twelve months prior to the date of his disablement.

### Scope of Laws

Each of the Canadian Acts specifies the industries to which the law applies. In all cases agriculture and domestic service are excluded. In Alberta, men employed in the running trades of the railroads are excluded but boilermakers, shop-workers and similar employees are within the scope of the Act. Saskatchewan includes all manual workers employed in or about factories, mines, engineering works and railways whose remuneration does not exceed \$1,800 per annum. Quebec excludes from the benefits of the Act workers in the industries covered who are earning more than \$1,500 per annum and exempts navigation by means of sails. In the Yukon, the law applies to any industry defined as an "establishment, undertaking, trade or business" in which five or more workmen are employed. Outworkers and casual workers employed otherwise than for the purposes of the employer's trade or business are excluded from the operation of the law in Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario

and the Yukon. Travelling salesmen are without the benefits of workmen's compensation in British Columbia, New Brunswick and Nova Scotia; and clerical workers not exposed to the hazards of the industry, are exempted in British Columbia, Manitoba and New Brunswick. Alberta excludes also persons employed in an industry of an itinerant nature. In British Columbia and Nova Scotia members of the employer's family are not eligible for benefits; and in Manitoba and Ontario, benefits are payable to the members of the employer's family only if they are carried on the pay-roll and only to the extent such wage entitles them. New Brunswick and Nova Scotia exclude municipal firemen and police forces. The provinces operating under a system of state insurance provide that on the application of the employer and with the approval of the Board any industry or workmen not within the scope of the Act may be brought under its provisions. In Alberta, this may only be done when not objected to by a majority of the employees, and in British Columbia any industry may be included on the application of the workmen or of the employer. In Ontario, an industry coming normally within the scope of the Act may be excluded by the Board if only a small number of workmen are employed. In such an industry, however, the Act provides that either the employer or a workman may elect to have the industry brought under the Board's authority.

### Non-resident Dependants

The laws of the six provinces having a collective liability system and of the Yukon, provide for payment of compensation to non-resident dependants if the jurisdiction under which such dependants live makes similar provision. Quebec limits payment of compensation to Canadians. The Alberta law presumes that a workman, two years after his arrival in Canada, has no non-resident dependants other than his parents. Where the workman is not of British

nationality, the period allowed is one year. British Columbia empowers the Board to limit the compensation payable to non-resident alien dependants to such amount as will maintain them in a like degree of comfort as similar dependants in Canada. Ontario prohibits the payment of compensation to dependants resident in ex-enemy countries.

#### **Accidents Outside the Province**

Alberta, British Columbia, Manitoba, Nova Scotia and Ontario provide for compensation for accidents occurring outside the province. In the two western provinces and in Ontario, if the employer's chief place of business and the usual residence of the workman are within the province or if the employment is such that the workman is required to be both within and without the province, compensation is payable. Manitoba makes such provision in the latter case only and Nova Scotia limits the benefits of the Act to workmen in those industries carried on outside the province which, on the application of the employer have been admitted as being within the scope of the Act and where a certificate to that effect has been issued by the Board.

#### **Waiting Period**

There is some variation in the Canadian laws in regards to the length of time over which the disability must extend in order that compensation may be payable. Alberta provides that if a workman is disabled for ten days or more he is compensated for the full period of his disability, but, that if he is disabled for less than ten days benefits shall date from the fourth day. British Columbia and New Brunswick enable the payment of compensation only at the expiration of a waiting period of three days and seven days respectively. The new Manitoba law contains a similar provision to that of British Columbia, no compensation, other than medical aid, being payable for first three days. Nova Scotia and

Ontario pay no compensation if the disability does not extend over six days, but payments are dated from the first day if the effects of injury are of longer duration. Quebec makes provision for compensation for the full period in the case of total and permanent disability but none for the first week if it is temporary. Saskatchewan limits compensation to cases of disability of more than one week and in the Yukon only accidents causing disability for more than fourteen days are compensated, payments being dated from the time of the injury.

#### **Limited Period for Filing Claims**

The provinces have restricted the time within which claims must be filed with the Workmen's Compensation Board or action brought in the courts to recover compensation. British Columbia, Manitoba, New Brunswick and Nova Scotia require claims to be filed within one year after the accident or, in fatal cases, after the death of the workman. Nova Scotia requires further, that claims must be established to the satisfaction of the Board within fifteen months after the accident. Alberta limits the period for filing claims to three months while Ontario allows six months, but in both these provinces, failure to present a claim within the stated period is not a bar to the recovery of compensation if the board approves the claim. Saskatchewan and the Yukon provide that an action must be brought in the courts within six months of the accident.

#### **Accident Prevention**

The law of the British Columbia and that of Alberta, as amended in 1920, empower the board to issue regulations with a view to the prevention of accidents and diseases and to require the installation of safety devices and appliances and the maintenance of proper sanitary conditions. In New Brunswick, Nova Scotia and Ontario, authority is given to employers' associations to make regulations for accident prevention,

such rules to be binding on all employers in the class represented by the association.

### Medical Aid

The provision of medical service in connection with industrial accidents and diseases has been added to other compensation in the majority of the Canadian provinces. Alberta and the Yukon make special provision for the payment of medical or surgical aid, nursing and maintenance in the case of death where there are no dependants. In Alberta the board determines what amount shall be paid, and in the Yukon a maximum of \$500 is fixed out of which not more than \$150 may be paid for burial expenses. In Quebec, the cost of medical aid and burial may not exceed \$50. Alberta, Manitoba, New Brunswick, Nova Scotia and Ontario provide for the installation of first-aid appliances. Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia and Ontario permit the provision of medical aid by an employer on a plan approved by the Board. If such an approved plan is adopted in New Brunswick, Nova Scotia and Ontario the employer is reimbursed from the accident fund or his rate of assessment reduced. Alberta provides that the cost to the employer of such medical aid shall be met by the deduction from the wages of the workmen of such amount as the board determines to be reasonable. In Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia and Ontario, the provincial board is authorized to defray the expenses of medical aid; but, in the case of Alberta and British Columbia, the cost is not paid from the accident fund, as in the other provinces, but is met by retaining from the workmen's wages an amount approved by the Board, in Alberta and in British Columbia one cent per day from every workman employed. In British Columbia, Manitoba, New Brunswick, Nova Scotia and Ontario, medical aid includes medical, surgical, nursing and hospital service and transportation. In British Columbia, Manitoba, and Ontario, crutches, artificial

limbs and any other necessary apparatus are also furnished by the Board. In Nova Scotia, the provision of medical aid is limited to a period of thirty days.

### Benefits

DEATH.—The scale of benefits payable in case of death or disability varies from province to province, there being some degree of uniformity in this respect in the laws of the provinces operating a system of state insurance. In each of these provinces and in Quebec the amount of compensation was increased at the legislative session of 1920. In Quebec the maximum amount payable for burial expenses in the event of a fatal accident is \$50. British Columbia and Nova Scotia allow \$75; Alberta, Manitoba and New Brunswick \$100 and Ontario \$125. Alberta, Manitoba, New Brunswick and Nova Scotia provide for the payment of a monthly allowance to a widow or invalid widower of \$30 with an additional \$7.50 for each child under 16 years of age and each invalid child. In New Brunswick, allowances are payable in respect of a girl up to eighteen years of age. The maximum amount payable monthly in respect of such dependants is fixed at \$60 in Alberta, Manitoba and Nova Scotia and in New Brunswick the limit established is 55 per cent of the workman's average earnings. British Columbia makes a monthly payment of \$35 to a widow or invalid widower together with \$7.50 for each child under 16 years of age and each invalid child. In similar circumstances, Ontario allows \$40 and \$10. Where there are orphan children, Alberta pays an allowance of \$10 for each child up to a maximum of \$40 per month. British Columbia allows \$12.50 for each orphan child with a maximum of \$50 and Manitoba, Nova Scotia and Ontario fix the amount at \$15 for each child and in the two former provinces, a maximum of \$60 per month is fixed. Manitoba permits the continuance of such payments up to eighteen years of age to enable the child to obtain a better education. In Alberta, British Colum-

bia, Manitoba, New Brunswick, Nova Scotia and Ontario, the allowance to a widow or invalid widower is continued through life or till re-marriage. In the latter case, Alberta and British Columbia provide for a maximum payment of \$480. Manitoba, New Brunswick and Ontario allow, in the event of re-marriage, a lump sum equal to the amount of the monthly payments for two years and Nova Scotia provides for a payment or payments of amounts not to exceed in the whole the equivalent of \$20 per month for 25 months from the date of marriage. The Ontario law authorizes the payment to a widow of a lump-sum of \$100 in addition to other compensation.

Alberta, British Columbia, Manitoba, Nova Scotia and Ontario also make specific provision for cases where the dependants of workmen are other than widows, widowers and children. British Columbia and Nova Scotia permit the payment to a parent or parents of not more than \$30 per month and of not more than \$45 to all dependants other than widows, widowers or children. Alberta authorizes the payment of not more than \$20 and \$30 in such circumstances and Manitoba allows a maximum of \$20 to one such dependant but not more than \$40 in all. Ontario makes  $66\frac{2}{3}$  per cent of the workmen's average earnings the maximum that may be paid to such dependants. New Brunswick requires the Workmen's Compensation Board to determine a reasonable amount and in these six provinces allowances to such dependants are payable only so long as it seems probable that the workman would have contributed to their support had he lived. In British Columbia, special provision is made for cases where there is a widow or invalid widower without children or where there are orphan children and where the workman leaves a dependent parent or parents. Ontario provides that where a suitable person acts as foster-mother to orphan children, the same allowance shall be paid as to a widow with children. In New Brunswick, Nova Scotia and Ontario,

a further limit is placed on the amount of compensation payable on the death of a workman from accident or disease due to his employment. The two eastern provinces provide that, exclusive of burial expenses, not more than 55 per cent of the workman's average earnings may be paid, but Nova Scotia makes an exception in favour of widows, invalid widowers and children when the deceased workman was not an officer and shareholder of the company concerned or the workman or any of his family were not holders of a majority of the shares of the stock of such company. In Ontario, the maximum amount of compensation payable in case of death is  $66\frac{2}{3}$  per cent of the average earnings at the time of the accident.

In Quebec, the law provides that a sum equal to four times the average yearly wages when the injury was received shall be apportioned by agreement or by the court among the consort, children under sixteen years of age and parent or parents of whom the deceased was the principal support. This amount must not be less than \$1,500 and not more than \$3,000. Any payments made on account of disability before death are deducted from the compensation payable on death. In the Yukon, the workman's dependants are entitled to receive \$2,500 on his death from accident while at work. The Saskatchewan Act authorizes the court to determine within certain limits what is a reasonable amount for compensation. The workman in case of disablement or his dependants in the event of his death are to receive either a sum equal to his earnings for three years or \$1,800 whichever is the larger, but in no case may compensation exceed \$2,000.

**TOTAL DISABILITY.**—In cases of total disability, permanent or temporary, British Columbia and Nova Scotia allow compensation of 55 per cent of the average earnings of the workman, but if earnings are less than \$5 weekly the full amount of the wage is to be paid. New Brunswick makes a somewhat similar provision but the mini-

imum that may be paid is \$6 per week and the maximum 55 per cent of \$125 per month. Manitoba and Ontario provide 66⅔ per cent of the average earnings but in Manitoba if the earnings are less than \$6 per week, the full wages are paid and in Ontario this minimum is fixed at \$12.50 per week. Quebec allows a pension equal to 50 per cent of the yearly wages and in the case of temporary disability the allowance is not to be less than \$4 per week. In the Yukon a sum of \$3,000 is paid in cases of permanent total disability. Where permanent total disability occurs to a workman in Alberta, he is paid \$10 weekly with \$2 for the first dependant and \$1 for each additional dependant until the weekly compensation reaches \$16. Pensions in all cases are payable for life or during disability.

**PARTIAL DISABILITY.**—For injuries causing permanent partial disability Alberta and the Yukon pay compensation according to a schedule laid down in their respective laws. For temporary disability, the Yukon ordinance awards 50 per cent of the daily average wages for a period of not more than six months. New Brunswick empowers the Board to establish a schedule though a maximum of \$2,500 is fixed by the Act. For temporary partial disability causing a loss of more than 10 per cent in wages, Alberta and New Brunswick award compensation at the rate of 55 per cent of the diminution of earning capacity. In the latter province, this calculation must not be made on a basis exceeding \$125 per month. In British Columbia, Nova Scotia, Manitoba, Ontario and Quebec, no distinction is drawn between permanent partial disability and temporary partial disability. In the two former provinces, the allowance is 55 per cent of the difference between the average earnings of the workman prior to the injury and his earnings subsequent to it. Manitoba and Ontario fix this percentage at 66⅔ per cent, but Ontario requires that not less than \$12.50 per week be paid and Quebec allows 50 per cent of the diminution of earning capacity.

**AVERAGE EARNINGS.**—Compensation is limited, further, by the restriction on the amount of wages that may be taken into consideration in calculating the average earnings of the injured workman. In Quebec yearly remuneration exceeding \$1,000 and under \$1,500 (workmen receiving more than the latter amount are without the scope of the Act) gives a right only to one-quarter of the compensation. British Columbia, Manitoba and Ontario provide that no more than \$2,000 per year may be used as a basis for calculating the average earnings. New Brunswick fixes the maximum at \$1,500 and Nova Scotia at \$1,200.

#### **Dominion Legislation**

In order that employees of the Dominion Government might not be without the benefits provided for the employees of the various Provincial Governments and of private employers, the Federal Parliament enacted in 1918, a law enabling any employee of the Dominion Government to receive such compensation as he or his dependants would be entitled to receive if he were in private employment. Such compensation is determined and awarded by the province in which the accident occurs in accordance with the law of the particular province. Provision is made that employees of the Intercolonial and Prince Edward Island Railways may elect to accept compensation under this Act or in accordance with the Provident Fund Act relating to those railways.

#### **Conclusion**

It will be readily seen from this survey that the majority of the Canadian provinces have been gradually adopting the principles which the commission on uniform labour laws recommended as standard provisions for uniform provincial laws on workmen's compensation. Six provinces have exclusive state insurance; six provinces and the Yukon pay compensation to workmen without regard to the amount of their remuneration; in all the provinces and in the Yukon the burden of payment rests on

the employer but in six provinces the liability is borne collectively by groups of employers. Full medical and hospital aid is furnished the injured workman in five provinces but in Nova Scotia it is limited to thirty days. In Alberta and British Columbia, the cost of medical aid is paid by deductions from wages. There is some uniformity in the length of time allowed for the filing of claims, all the provinces limiting it to some period. Six provinces make injuries due to some industrial diseases compensable, and two provinces authorize the Workmen's Compensation Board to issue regulations designed to prevent accidents. Three other provinces delegate this authority to employers' associations. Alberta and British Columbia alone

grant equal rights to employers and workmen with regard to election to be brought under the Act. There is little uniformity in the method of meeting the cost of administration. In the six provinces having a system of state insurance the majority pay the salaries of the members of the Board from the Consolidated Revenue Fund and make some further contribution to the general cost of administration. The scale of benefits shows more uniformity in the compensation allowed in cases of death than for disability. In the event of the latter, even where the same percentage of average earnings is payable in different provinces, the varying restrictions on the calculation of average earnings destroys the apparent uniformity.

### PROGRAMME OF THE COMMITTEE ON INDUSTRIAL FATIGUE

THE formation of the Committee on Industrial Fatigue as a branch of the Dominion Honorary Advisory Council for Scientific and Industrial Research was noted in the LABOUR GAZETTE for July, together with a brief outline of its objects. Fuller particulars of the services offered to the factories of Canada by the Industrial Fatigue bureau have since been embodied in a statement prepared under the direction of the Committee by its secretary, Mr. R. M. Hutton.

To fulfil its purpose of assisting factories has at its disposal the services of the departments of physiology of the various universities with their laboratories and specialists, trained for research and experiments. "Thus, for example," writes Mr. Hutton, "where manufacturers are in doubt as to the possible health effects of some new method or process, the question might be answered in a scientific laboratory where the actual effects of the process could be discovered by practical experiment. Again, where certain physical symptoms appear among employees engaged on similar work, scientific investigation can

decide whether the symptoms are caused by direct contact, by fume inhalation, or by skin absorption, and in each case, should be able to indicate the preventive measure to be taken."

The bureau will serve as a repository of ascertained knowledge in matters of industrial hygiene, to which manufacturers and workers may turn without incurring the delays and expenses of private investigation. A well equipped and indexed library is maintained, comprising the best current literature, reports of trade enquiries, plant physicians, health doctors, sanitary engineers, safety officers and other experts, the library being designed as a general clearing house of information. "Special attention," Mr. Hutton writes, "is paid to occupational hazards, whether disease or accident, particularly from the point of view of preventive medicine." The information supplied will deal with the immediate source of danger, the best preventive measures in use, and the best medical treatment after the trouble has arisen. Information will also be available on smaller matters as for instance the most useful form of sickness record.

In offering, however, to cooperate in investigations in different industries into such questions as the incidence of sickness, or the relation between hours or conditions of work and production, the Committee shows that it does not intend to rely entirely on data thus collected in a large degree from foreign countries, but that it is prepared to undertake original inquiries in Canada and thus ascertain the actual facts in this country. With this purpose in view the bureau is already, with the cooperation of certain employers, investigating the actual proportion of time lost in certain plants from sickness.

The Committee claims that industrial health supervision is the best means to prevent sickness, and it will set itself to collect all information as to the results attained by such means as plant hospitals, visiting nurses, or merely the provision of a first aid kit. The benefits of supervision to the employee are obvious, since it tends to bring conditions into correspondence with the health and

capacity of the workers; while employers are equally interested in a service of such direct economic value as that indicated in the following report from the medical officer of a plant employing about 12,000 men: "The number of infections following injuries has been reduced from 28.6 per cent in 1912 to 7.57 per cent in 1916. The time lost from infections in 1912 amounted to 1,987 days, or an average of 2  $\frac{3}{5}$  days per case, while time loss from this cause in 1916 amounted to 816 days, or an average of 1  $\frac{1}{8}$  days. This was accomplished in spite of the fact that the working force had increased approximately one-fourth during the same period. This represents a saving of some \$3,000 in wages and approximately \$5,000 in hospital bills, compensation, etc."

Enquiries will be welcomed by the Committee and should be addressed to the Secretary, R. M. Hutton, Committee on Industrial Fatigue, The Medical Building, University of Toronto.

### THREE YEARS' EXPERIENCE IN CO-OPERATIVE PRODUCTION

#### "Payment by Results" System in the Machinery Plant of Messrs. Priestman Bros., Ltd., Hull, England

THE scheme of co-operative production, or "payment by results", adopted in April 1917, in the machinery factory of Priestman Brothers, Limited, of Hull, England, was described in the LABOUR GAZETTE for May, 1919. Adopted originally for the duration of the war as a means of increasing production, the success of the scheme from the point of view both of the employer and the worker has since led to its establishment as a permanent institution. The plan, it will be remembered, is based on the principle of payment by results, but differs from ordinary piece-work in that the benefits resulting from increased production are shared by all the workers including the office staff, and in the

further advantage that a fair standard of efficiency is kept steadily in view.

Three years' experience, it is stated, have confirmed both officials and workers in the favour with which the scheme was regarded ever since it was first approved and adopted by the trade unions concerned. The chief benefits reported appear to be those resulting from co-operation, not only between employer and employed, but between one worker and another. As the works foreman over the moulders reports: "Never in the history of labour have employer and employee worked so amicably together under any scheme. We (the workers) have now a combination of interest instead of an individual

outlook". Equally marked was the improvement industrially, production showing a gain of 40 per cent, directly attributable to the scheme, while the effect on "industrial relations", according to Messrs. Priestman, has been that "from the day when the scheme was put into operation to the present time, the relations between employer and employed altered completely, and ever since have been of the most harmonious character."

The leading features of the plan may be briefly recapitulated. A "standard of output" is established, being a fixed quantity of finished product (in this case machinery reckoned by weight) which a certain number of men are capable of turning out at ordinary day rates. Then, if this standard can, by means of better co-ordination and collective effort, be increased, without any addition being made to the number of workers or hours of employment, the day rates of wages are supplemented by a percentage equivalent to that by which the output exceeds the standard. Careful details of every article completed are recorded in a book, the record requiring confirmation by the Works Committee, and if it is approved the result of the four weeks' work is then posted in the shops, every employee receiving with each payment of his four subsequent weeks' wages a percentage on his individual earnings, the percentage figure being determined by the extent to which the output of the whole plant for the month is found to exceed the "standard" output. In addition, the company have from the first granted an additional 10 per cent of the former daily wages whether or not the standard is exceeded. (This ten per cent, state Messrs. Priestman, was the lever that gave motion to the scheme: it did what, for thirty years, the company without its assistance, had failed to obtain. The ten per cent was interpreted by the workers as "a guarantee of the *bona fides* of the scheme, and it is believed was the principal factor in inducing the men, through their unions, to accept the proposition.") Minor additions to, or reductions in, the staff or plant do not affect the standard

of output: but if substantial additions to the working forces are made, or if there is any appreciable reduction either in the number of workers or in the hours worked, then the standard weight is correspondingly increased or reduced, the new standard weight being mutually agreed upon.

When orders begin to fall off reductions in payments to workers are of course inevitable as they would be under piece work, overtime and all other plans. However, under co-operative production the necessary reduction in wages and hours is distributed over the whole staff, and no worker under this system is suspended from employment until the point is reached at which the total average payments to workers fall below the average level of the day wages in the district. Thus, it is claimed, workers at the Priestman plant could at the present time, by reducing their working week from 47 to 33 hours, withstand a decline in orders for machinery up to 29 per cent, without any of their number being thrown out of employment, without a reduction in wages below the average level in the district, and with the advantage of having more leisure to follow their own private pursuits. The opinions quoted below of some of those concerned in this scheme of co-operative production after three years' experience are of considerable interest.

Mr. Wilfrid Hill, one of the signatories to the Whitley Reports, speaking of the Priestman system of co-operative production, or "payment by results", said he had examined many undertakings which had for their object the settlement of unrest in labour, but of all the schemes he had looked into this was decidedly the best.

Representatives of the employees reported as follows after three years' experience of the plan:—

The foreman of the fitters and erectors stated that in three years he had only received one application for a leaving certificate, and that was on domestic grounds; "the scheme is considered by the men to be a very good one". The foreman of the machine department said

the opinion of the men was that it was "the best they had ever heard of", and that confidence and good will was created by the opening of the company's books for the men's inspection; "we are working for the firm and ourselves at the same time." The foreman of the blacksmiths gives a similar opinion: "Having had experience with platers and rivetters on piece-work, and smiths, drillers, etc., on the scheme, I can safely say the men on the scheme are far happier. There is a spirit of helping each other, but in individual piece work there is jealousy." The foreman of the moulders declared that the evils inherent in piece-work vanish under the co-operative plan: "Never, I am sure, in the history of labour have employer and employee worked so amicably together under any scheme." The foreman of the pattern makers also refers to the substitution of mutual help for the old antagonism. The representative of the en-

gineers declared that the employees in that line were strongly and unanimously in favour of the scheme. The moulders' representative said, "The men were delighted with it; the days pass more brightly than they did under the old system; both men and youths seem to take more interest and pleasure in their work." The blacksmiths' representative declared "The scheme certainly raises the tone of the works as everyone is working towards one common goal; in the old days (of piece-work) there was always more or less discordance at the smithy, and sometimes the ill feeling went beyond discord; now there is a more general feeling of good fellowship; dissention is a rarity and the men are far more ready to give assistance to each other. The opinion of the smithy is that the scheme is the very one required to bridge over the difficulties that from time to time arise between employer and employee."

---

## COMPARISON OF AN EIGHT-HOUR PLANT AND A TEN-HOUR PLANT

THE United States Public Health Service has issued a bulletin (No. 106) on a comparison of an eight-hour plant and a ten-hour plant. It is the first of a series of studies dealing with the problems of fatigue in relation to working capacity. At the time of the investigation the ten-hour plant working two shifts of 10 and 12 hours each was making brass fuses, and the eight-hour plant, which was working on three shifts, was engaged in the manufacture of automobiles. The report deals primarily with two tests of working capacity among factory employees, namely the variations in actual hourly output, and the variations in the hourly incidences and accidents. For the purposes of the investigation, the various kinds of work were divided into a number of classes according to whether they were hand work or machine work, and whether they required mainly muscular exertions or dexterity. For determining the variations in hourly output the basic period

taken was the hour of greatest production and in the case of accidents the basic period was the hour of fewest accidents. The processes selected for observation involved repetition work of diverse types, but did not include the tending of purely automatic machinery the speed of which was wholly independent of the operator. In order to exclude the inconstant factors such as those due to conditions of health, etc., an average of a large number of individuals was taken for each operation.

The results of the investigation lead to the conclusion that of the two systems the eight-hour system is the more efficient. In the day shift under the eight-hour system there is a steady maintenance of output; work with almost full power begins and ends approximately on schedule, lost time is reduced to a minimum; and the output varies according to individual capacity.

Under the ten-hour system there is a decline in output during the second

period; work ceases regularly before the end of the spell and lost time is frequent; and the artificial limitation of output is widely prevalent.

With regard to accidents, the investigation showed the important bearing of fatigue on accident risk as evidenced by the greater proportion of accidents (1) in the second spell of a working day as compared with the first;

(2) in muscular work as compared with dexterous and machine work, and (3) at the ten-hour plant as compared with the eight-hour plant.

The chief characteristics of the twelve-hour night shift as worked in the ten-hour plant are the abrupt fall of output in the last two hours and the progressive showing in rate of production during the night.

## CIVIL SERVICE INSURANCE AND VOCATIONAL RE-TRAINING LAWS IN THE UNITED STATES

### Old Age and Invalidity Insurance for Federal Employees

IN the closing days of last session the United States Congress passed two important measures which had been actively promoted by the American Association for Labour Legislation. The first of these, known as the Sterling-Lehlbach bill, establishes a system of compulsory and contributory old age and disability insurance for the 300,000 classified civil servants in the United States; the other provides for federal and state co-operation in "vocational rehabilitation."

Following the Federal Workmen's Compensation Law of 1916, which provided indemnity for half a million civilian employees in case of accident or occupational disease, the new act marks a further step forward in Federal social insurance. The measure provides for the retirement of railway mail employees at the age of sixty-two; mechanics, letter carriers and post office clerks at sixty-five, and all other members of the classified civil service at seventy. Any employee who is able and willing to carry on his duties efficiently may, in the discretion of the head of his department, and on approval of the Civil Service Commission, be continued in his position beyond the retirement age for two periods of two years each, but no longer. On retirement an employee becomes automatically eligible for a yearly pension ranging from \$180 to \$720 according to salary and length of

service. No one who has not been employed by the Government for at least fifteen years is entitled to benefits under the law. In addition to the old age pension provisions the act establishes the same benefits for those who, after fifteen years' service, but before the retiring age, become totally disabled because of disease or injury "not due to vicious habits, intemperance, or wilful misconduct." Employees' contributions are made through a deduction of  $2\frac{1}{2}$  per cent from all salaries. Benefits, however, are granted at a flat rate of \$720 for all employees whose income is \$1,200 or over, the result being that higher salaried civil servants pay at a higher rate for their annuities than those who receive less pay. The interests of those who leave the Service or die before attaining the age or length of service necessary for retirement, are fully protected. Employees' contributions cover about one-third of disbursements under the law; the remaining two-thirds will be paid by the Government out of general taxation. In commenting on the Act, the *Labour Legislation Review* says that its adoption "should quicken the growing movement for old age pension legislation by the States for workers in both public and private employments, just as accident insurance legislation was stimulated by the Federal Government's original adoption of the workmen's compensation principle."

The other important measure referred to was the Fess-Kenyon bill, providing for federal and state co-operation in the "vocational rehabilitation" of industrial cripples. Twelve states had already made provision by law for such vocational retraining, and preparations are now in progress for similar measures in other states. The Fess-Kenyon Act, which became law on June 2, authorizes an appropriation of one million dollars an-

nually to encourage the individual states to undertake the work of rehabilitation, the money to be allotted to the various states in amounts not exceeding the amount appropriated by each state for rehabilitation. It is estimated that over 100,000 persons in the United States are permanently handicapped by industrial accidents, this number being augmented at the rate of over 10,000 casualties a year.

## PUBLIC DEBATE ON THE KANSAS COURT OF INDUSTRIAL RELATIONS

### The Right of the State to Forbid Strikes

**P**UBLIC interest in the principles underlying the Kansas Court of Industrial Relations, established last January, (See LABOUR GAZETTE, March, 1920, page 300) was renewed by a debate before a large audience in New York on May 28, between Governor Henry J. Allen, the originator of the law by which the Kansas Court was created, and Samuel Gompers, president of the American Federation of Labour. The debate resolved itself into a discussion of the general topic of the compulsory settlement of labour disputes, with particular reference to the right of labour to strike. According to Mr. Gompers, this right was nothing more than the right of the individual to cease work when the terms governing the purchase and sale of labour power have proved unsatisfactory and he has failed to persuade the other side to his terms. Mr. Gompers claimed the worker's freedom to cease work as an "inalienable, fundamental human right, which could not be taken away from man except at the price of liberty." He maintained that the right to work or not to work belonged solely to the individual man and was not to be disturbed by Government, State, or Courts. "There is one thing about the labour question that is axiomatic," continued Mr. Gompers, "that is, if you attempt to outlaw strikes by legislation, depend upon it, your law

will be futile and you will make criminals and lawbreakers of workmen who are honest, patriotic citizens." The labour leader agreed that violence during strikes was an offence against the state, but to tie men to their jobs by making strikes unlawful was a confession that republican institutions and democracy had failed. He contended that the strike had been necessary to the progress, advancement and betterment of the workers in society, and cited in proof that the abandonment of child-labour and sweating were the direct result of strikes, and would never have been obtained by any other means. Finally Mr. Gompers maintained that if the compulsion of labour were concluded, compulsion should be applied so that the full benefits of labour instead of accruing mainly to the employing class, should be enjoyed by society as a whole; and, further, that it should be applied all along the line, and all should be compelled to work for society.

Governor Allen took his stand on public welfare as outweighing individual rights, and claimed that the Kansas Court was an effective instrument for protecting public rights. "We have not forbidden to any man the right to quit work," he asserted; "we have not taken away from any man his 'divine right' to quit work. We have merely taken away from Mr. Gompers his divine

right to order a man to quit work." After giving instances of violence during strikes, and describing the equitable working of the new Industrial Courts, Governor Allen propounded the following question to Mr. Gompers, who, considering it irrelevant to the present discussion, reserved his reply to it for a future occasion: "When a dispute between capital and labour brings on a strike affecting the production or distribution of the necessities of life, thus threatening the public peace and impairing the public health, has the public any rights in such a controversy, or is it a private war between capital and labour? And if he answers this question in the affirmative, how would he protect the rights of the public? And in addition I wish him to define for us, if he will, who had the divine right to forbid the switchmen to strike in their 'out-law' strike; who controls this divine right to quit work?"

President Gompers, replying subsequently to these questions in a statement which appeared in the *American Labour World* said that to describe a strike as a private war between capital and labour was to come perilously near the language of thoughtlessness or ridicule of

the struggle of humankind towards the attainment of an ideal. Employment to workers was the means of sustaining life and the reward they secured by their labour power fixes the measure of life they may enjoy. But to employers labour is only the basis of profit. There must be conflict so long as industry is conducted for profit alone, and this conflict will not be ended by statute law, or argued or legislated out of existence. "The public has no rights which are superior to the toiler's right to live and to his right to maintain himself against oppression. Instinctively the workers put life before property, social welfare before material gain for the employer. It is the duty of the public to throw the weight of its influence on the side of the protagonists of progress and justice—the workers." "Industrial peace is desirable," the statement continues, "industrial greed is what prevents it. The workers will struggle and organize and strike when necessary to prevent industrial injustice. The strike—the withdrawal of their service—is the one final effective weapon that they possess. The State can offer no substitute, the public can hope for no state-made substitute, for the struggle is in industry, not in politics."

## THE GOVERNING BODY OF THE INTERNATIONAL LABOUR OFFICE

Fourth Meeting of Body, held at Genoa, June 8-9, 1920

**R**EPORTS received by the Department of Labour show that the Governing Body of the International Labour Office held its fourth meeting on June 8 and 9 at Genoa under the presidency of M. Fontaine. M. Albert Thomas, Director of the International Labour Office, was appointed Secretary-General of the Seamen's Conference meeting at Genoa on June 15. Reports were received from the British Government laying stress on the importance of the adoption of international regulations with regard to working hours for sea-

men and trusting that the forthcoming Conference would arrange an agreement on this matter just to both officers and sailors, and with proper consideration for the special difficulties of service at sea. It was added that the British delegates would do all in their power to secure the adoption of an international agreement with these aims in view. On the suggestion of M. Albert Thomas, the question of a weekly day of rest and the institution of the "English Week" were put on the agenda to be submitted to the next International Labour Conference

which is to be held at Geneva next year. The questions of minimum rates of pay, State insurance, annual holidays and the democratisation of industry were left over for consideration at a later meeting of the Governing Body. On the request of a Hungarian Labour representative, and under the terms of the Peace Treaty with Hungary which authorized the International Labour Office to institute a Commission of Inquiry into conditions of employment, the Director

was instructed by the committee to arrange for the appointment of a commission to inquire into the alleged "White Terror" in Hungary. In view of the present circumstances, nothing further was done with regard to the commission of inquiry, appointed at the March meeting of the Governing Body, into conditions in Russia. The seat of the International Labour Office is to be transferred to Geneva, where the committee will meet again on October 5.

## NEW LABOUR ORGANIZATIONS IN CANADA

### Labour Bodies formed during First Half of 1920

SINCE the issuance of the Ninth Annual Report on Labour Organization in Canada which contained the names of all labour bodies in the Dominion which had been formed up to the time of its publication, a number of other labour unions have been organized. During the first half of the present year information has been received of the formation of one trade union federation, one district council and thirty-nine local branch unions, 28 of the latter

being branches of international organizations, eight of non-international bodies, two national Catholic unions and one unit of the One Big Union. For the same period information has been received of the dissolution of seven local branches of international organizations and one non-international.

The following is the list of new labour bodies by provinces, not included in the 1919 report, the name and address of the president and secretary of each, where obtainable, being given:

### Federations of Trade Unions

*London Building Trades Council.*—Sec., Fred England, Queen's Ave., nr. Ontario St., London, Ont.

### District Councils

*Ontario District Council, Amalgamated Sheet Metal Workers' International Alliance.*—Pres., F. Mackay, Labour Temple, Toronto, Ont., Sec., G. March, 274 Robert St., Hamilton, Ont.

### Local Branch Unions

#### NOVA SCOTIA.

*Railway Carmen, No. 1389, Brotherhood of.*—Sec., Percy Rafues, Amherst, N.S.  
*Electrical Workers, No. 1068, International Brotherhood of.*—Pres., W. T. Wilkie, North Sydney, N.S. Sec., Otto McKinnon, North Sydney, N.S.

#### NEW BRUNSWICK.

*Carpenters and Joiners, No. 2389, United Brotherhood of.*—Pres., Emanuel Albert, Campbell-

ton, N. B. Sec., John B. Glover, Campbellton, N.B.

*Lathers, No. 434, International Union of Wood, Wire and Metal.*—Pres., A. P. Gaudet, 27 O'Brien Ave., Moncton, N.B. Sec., J. T. Dupuis, 11 Harris Ave., Moncton, N.B.

#### QUEBEC.

*Catholic Workmen's Corporation of Lachine.*—Pres., Joseph Comeau, 17-13th Ave., Lachine, Que. Sec., Raoul Legendre, 33-7th Ave., Lachine, Que.

*Carriage, Wagon and Automobile Workers Federal Labour Union, No. 29, (T. & L. C.).*—Sec., A. Maillard, 328 Wolfe St., Montreal, Que.

*Machinists, No. 631, International Association of.*—Sec., H. R. Stark, 492 Seigneur St., Montreal, Que.

*Textile Workers of America, No. 1112, United, (Oilcloth Workers).*—Pres., Aristide Girard, 1322 Lafontaine St., E., Montreal, Que. Sec., D. Leblanc, 1049 St. Catherine St., E., Montreal, Que.

*Machinists, No. 1481, International Association of.*—Sec., G. H. Bolter, Richmond, Que.

*Bricklayers, Masons and Plasterers of Canada, Canadian Federation of.*—Sec., Arthur Marois, 148 King St., Quebec, Que.

*Secretariat of the Catholic Syndicate of the City of Quebec.*—Pres., Abbé Maxime Fortin, 669 St. Valier St., Quebec, Que.

*Carpenters Union of St. Hyacinthe, National (C. F. of L.).*—Sec., J. T. Leclerc, 11 Têtu St., St. Hyacinthe, Que.

#### ONTARIO.

*Electrical Workers, International Association of.*—Sec., E. Charlton, Brockville, Ont.

*Machinists, No. 1395, International Association of.*—Sec., Harry Abray, 36 Ingram St., Chatham, Ont.

*Cobalt, Unit O. B. U.*—Sec., L. Bound, P.O. Drawer 921, Cobalt, Ont.

*Machinists, No. 1500, International Association of.*—Pres., James Kean, Box 175, Espanola, Ont., Sec., P. Larocque, Espanola, Ont.

*Painters, Decorators and Paperhangers of America, No. 1262, Brotherhood of.*—Pres., A. H. Kendrick, Guelph, Ont. Sec., A. McRobbie, 44 Norwich St., Guelph, Ont.

*Machinists, No. 327, International Association of, (Auto Mechanics and Helpers).*—Sec., Wm. O'Connor, 79 Grant Ave., Hamilton, Ont.

*Retail Clerks' International Protective Association, No. 554.*—Pres., Bert Clarkson, Princess Ave., East., London, Ont. Sec., Miss Heard, 419 Rectory St., London, Ont.

*Canadian Federal Labour Union of Orillia, (C. F. of L.).*—Pres., Wm. Landell, Jr., Orillia, Ont. Sec., Edward Nolan, Box 242, Orillia, Ont.

*Labourers, No. 566.*—Sec., W. Bowler, 121 Pine St., Ottawa, Ont.

*Teamsters, Chauffeurs, Stablemen and Helpers, No. 93, International Brotherhood of, (Milk Drivers and Dairy Employees).*—Pres., A. H. Craig, 13 Rupert St., Ottawa, Ont. Sec. C. R. Paquette, 538 McLeod St., Ottawa, Ont.

*Electrical Workers, No. 1, Canadian Brotherhood of (C. F. of L.).*—Pres., Robert Burns, 107 College St., Port Arthur, Ont. Sec., Fred. H. Starling, 613 Helen St., Port Arthur, Ont.

*Plumbers and Steam Fitters, No. 576, United Association of.*—Pres., W. Lake, 101 Browning Ave., Toronto, Ont. Sec., R. Hatton, 385 Kee-watin Ave., Toronto, Ont.

*Roofers, Damp and Waterproof Workers' Association, United Slate, Tile and Composition.*—Pres., E. R. Tinsley, 370 King St., W., Toronto, Ont. Sec., James Cowan, 104½ St. Patrick St., Toronto, Ont.

*Federal Labour Union, (A. F. of L.).*—Pres., Antonio Cuda, 72 Crowland St., Welland, Ont. Sec., Emanuel Caron, Box 1893, Welland, Ont.

*Hod Carriers, Building and Common Labourers' Union, No. 542, International.*—Sec., H. Luttman, 21 London St., Windsor, Ont.

### Unions Dissolved

The locations and names of the branches of labour organizations which were reported as dissolved during the first half of the year are as follows:

QUEBEC.—Railroad Stationmen and Railroad Employees' Alliance, No. 162, International Brotherhood of.

BRANTFORD.—Railroad Stationmen and Railroad Employees' Alliance, No. 146, International Brotherhood of.

LONDON.—Stationary Firemen and Oilers, No. 503, International Brotherhood of.

MIDLAND.—Railroad Stationmen and Railroad Employees' Alliance, No. 173, International Brotherhood of.

NORTH BAY.—Machinists, No. 852, International Association of. (Helpers).

PETERBOROUGH.—Electrical Workers, No. 772 International Brotherhood of.

BRANDON.—Sanitarium Employees' Federal Labour Union, No. 72, (T. & L. C.)

WINNIPEG.—Machinists, No. 863, International Association of.—(Helpers).

REGINA.—Machinists, No. 1280, International Association of.

## ANNUAL CONVENTION OF THE CANADIAN MANUFACTURERS' ASSOCIATION

THE forty-ninth annual convention of the Canadian Manufacturers' Association was held at Vancouver, B.C., on June 7-9. The retiring president Mr. T. P. Howard, of Montreal, referred to the success of Canadian producers and manufacturers in meeting post-war conditions, pointing out that the export trade of Canada amounted to \$1,286,658,709 during the year ended March 31, 1920, as compared with \$1,268,765,285 in the preceding year. With regard to labour matters, he alluded to the investigation of the Royal Commission on Industrial Relations, the National Industrial Conference at Ottawa and the International Labour Conference at Washington as three outstanding events. He expressed the opinion that there had been a gradual elimination of the revolutionary element in labour organizations by moderate men, and that a great deal had been done by the moderate wage-earners, with the co-operation of others, to make the conditions and rewards of wage-earning citizens more satisfactory. With regard to hours of work, he said that they must be governed by the country's necessity for

production, and that the experiment of establishing a national eight-hour day by law did not seem to have been satisfactory in France. The Minister of Commerce of that country referring to the report of a commission which investigated the results of the eight-hour day said that production in France had decreased in exact proportion to the reduction in the hours of labour.

The report of the Executive Committee contained a review of the year's activities of the Association. An extensive campaign was conducted for the sale of "Made-in-Canada" goods, to which it was stated strong support had been given by Canadian labour papers.

The Industrial Relations Committee submitted its first report. Brief reference was made to the Royal Commission on Industrial Relations which conducted its enquiry in the spring of 1919 and summaries were given of the work of the National Industrial Conference which met at Ottawa in September last, and of the International Labour Conference at Washington.

The Membership Committee reported a total membership of 4,061 on April 30,

1920, a net gain of 531, there having been 131 resignations and 662 new members accepted.

The Insurance Committee reported that acting on instructions from the Executive Council it had requested the Department of Insurance to provide the necessary facilities for the transaction of industrial group life insurance in Canada. The department complied with the request, and it is now possible for life insurance companies to insure groups of employees in this country without examination and at considerable lower rates than hitherto. The committee believed that the only practicable form of group insurance was the one-year renewable term insurance, under which there is no equity unless the renewal of the policy is maintained. This accounts for the low premiums. No medical examination is required of the employees, provided that at least fifty are insured. It was claimed that the advantages of group life insurance have been proved in the United States to be very great, and that it has the effect of doing away with a great many labour troubles, discouraging strikes and generally improving the morale of the employees. The committee stated, however, that this form of insurance was scarcely yet out of the experimental stage. Some of the members who had tried it endorsed it strongly; others were doubtful of its benefits, and a few condemned it.

Resolutions were passed advocating the appointment of a permanent tariff board, urging provision for scientific research work in the various provinces in relation with the central institute which is to be established by the Dominion Government at Ottawa; and requesting the Dominion government to require imported goods to be marked

with the name of the country of origin, in addition to the declaration at present required.

Honourable John Oliver, Premier of British Columbia, addressed the members at a luncheon. He sketched the great natural resources of the province, showing the immense possibilities of their development. Among the other speakers at the convention were Professor L. W. Gill, of the federal Department of Labour, director of Technical Education for Canada, Sir John Willison, president Canadian Reconstruction Association; Captain Robert Dollar of Vancouver; Mr. G. G. McGeer, M.L.A.; Mr. J. B. Thomson, chairman of the Pacific division of the Canadian Manufacturers' Association; and Mr. M. J. O. Cameron of the Cameron Lumber Company, Victoria, B.C. Professor Gill spoke on the subject of technical education. To illustrate the need of it he pointed out that under our public school system 90 per cent of boys between 14 and 18 years of age received no instruction or vocational guidance whatever and only one per cent of all the pupils received vocational training by attending the universities to fit themselves for the professions. Sir John Willison addressed the meeting on the subject of Canada's New Taxation. Captain Dollar spoke on Canada's Trade Prospects with the Orient. Messrs. J. B. Thomson, G. G. McGeer and J. O. Cameron spoke on the industrial position of British Columbia and the possibilities of industrial development in that province.

The following officers were elected for the ensuing year: President, J. S. McKinnon, Toronto, Ont.; First Vice-President, W. S. Fisher, St. John, N.B.; Second Vice-President, J. R. Shaw, Woodstock, Ont.; Treasurer, Thomas Roden, Toronto, Ont.

## ANNUAL CONVENTION OF THE BRITISH LABOUR PARTY

---

THE twentieth annual convention of the British Labour Party was held at Scarborough, Yorkshire, on June 22-25, some 1,100 delegates attending. The programme of the Conference has since been described as "a Labour manifesto to the nations and the world." In the forefront were questions of international concern—the revision of the Peace Treaty with a view to settling the conflicts of Europe and putting the nations on a firm economic foundation; the recognition of the Russian government; the ending of all intrigues directed against foreign states and interference in their affairs by military missions; the denunciation of all secret agreements; economic arrangements to deal with the famine in Central Europe; the reconstruction of the League of Nations. The Conference resolved to send a deputation to the Prime Minister to bring before him the results of the investigations which the Labour Party's representatives had recently made in Hungary, Russia and Finland.

The question of nationalization was discussed at length, and the Conference re-affirmed its belief "that nationalization, with joint control between representatives of the producers, consumers, and the State, is the only satisfactory solution of the mining problems," and instructed the Executive Committee and the Parliamentary Party to oppose the Government bill for re-organizing the mines. This bill proposes to divide the mining industry into a number of centres, each centre to be

responsible for the payment of the workers employed there. It was claimed by Mr. Robert Smillie, President of the Miners' Federation of Great Britain, that this would mean "bringing down the miners' wages to the level of the very worst mines in the worst districts and lead to sectional fighting with the Government." On this subject, the Chairman Mr. W. H. Hutchinson, declared that the "Mines for the Nation" campaign had failed for the moment, but had had great educational value both in showing how far removed was their idea of nationalization from bureaucracy and state control, and in revealing the impossibility of expecting that capitalism, while controlling the State, would acquiesce in any change that would help to undermine its power.

On the third day of the Convention a motion to join the Third Moscow International was rejected by a vote of 2,940,000 to 225,000, and the party therefore remains affiliated to the Second International, with headquarters in Brussels. Mr. J. Ramsay MacDonald declared that the Moscow International "stands for revolution by violence—for the dictatorship of the proletariat. When people talk in this fine, academic revolutionary style about the dictation of one class or the other, have they realized there need be neither one nor the other? If we use our power and do our duty, we can make this a real revolution without fire and bloodshed. We have not yet found the basis of either the Russian Revolution or the Third

International, and we cannot do so until we have peace in Russia and external pressure has ceased—then international forces will operate. We ought to hold an absolutely open attitude to the Third International.” The Second is to be reconstructed at a convention to be held at Geneva next October, when representatives of all parties and nations will meet to devise a programme, designed to unite the revolutionary and labour parties of the world.

Fourteen organizations sponsored a State bonus scheme for pooling 20 per cent of the national income and distributing the proceeds equally amongst the population, the motion being referred to the Executive. Resolutions in favour of general invalidity pensions and against conscription were carried without discussion. The convention protested against the stoppage of out-of-work donations to civilians and asserted the principle of the right to maintenance. The inclusion of seamen in the Hours of Employment bill, limiting the working week to 48 hours, was urged.

The United Textile Factory Workers' Association were sponsors for a resolution which was adopted, calling for “stern measures to stamp out the shameless exploitation of necessities,” and asking the Parliamentary Party to introduce a bill to empower municipalities to undertake the production and distribution of milk, and another “to confiscate the huge fortunes made during the war by the shipping fraternity.”

A resolution, submitted by the National Socialist Party, and referred to the Executive, proposed that Labour should undertake for a stated period not to make any demand for higher wages provided the Government would undertake to carry through a policy along certain lines to reduce the cost of living. The resolution was as follows: “This Conference repudiates the suggestion that the increased cost of the necessities of life is primarily due to increased wages, and expresses the de-

sire, subject to a reasonable standard of life being guaranteed to all workers, that an understanding should be given to the Government on behalf of the organized labour movement to refrain for a stated period from putting forward any demand for increases of wages, provided that during that period the Government will undertake to initiate and carry through a policy calculated to secure (1) the establishment of effective control of the national food supply and protection of the community from the profiteering trusts and combines; (2) the development of the nation's agricultural resources on cooperative lines for the benefit of the whole people; (3) the nationalization of mines, railways, shipping, and other means of transport, as a preliminary to complete industrial reconstruction on collectivist lines.”

Other resolutions were passed by the Conference denouncing the Peace Treaty as violating the objects which the Allies professed during the war; demanding that the Government should arrange for the Irish people to elect by proportional representation a Constituent Assembly to determine the country's future, and should withdraw the British troops from Ireland; approving the principle of self-determination also for Egypt and India; expressing grave concern at existing social and economic conditions in Central Europe, and asking the Prime Minister to receive a deputation of the Labour Party to discuss the subject; and demanding full recognition for the Soviet Government of Russia.

A motion favouring the prohibition of liquor in Great Britain was rejected by a card vote of 2,603,000 to 472,000, while another resolution declaring for local option was carried by a vote of 2,003,000 to 623,000.

The Conference heard an address from Alderman Heaps, of Winnipeg, on the proposed appeal to the Privy Council from sentences passed on the Winnipeg strike leaders.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE PERIOD OF JUNE 21 TO JULY 19, 1920

**R**EPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada show a slight increase in the number of placements during the four weeks' period covered by the present report as compared with the period ended June 19, the number of placements during the four weeks from June 21 to July 17 being 26,995, while the number of placements during the period ended June 19 was 26,445.

During the period under review (June 21 to July 17) regular placements were reported by weeks as follows: Week ending June 26,—7,039; week ending July 3—5,726; week ending July 10—7,108; week ending July 17—7,122. In addition placements in casual jobs (employ of a duration of less than one week) were as follows: Week ending June 26, 1,566; week ending July 3, 1,887; week ending July 10, 1,818; week ending July 17, 1,860.

The accompanying chart shows graphically the number of applications and

vacancies registered as well as the number of placements made for the full period of the record. The chart indicates that for the four weeks' period under review there was a general increase in the number of vacancies registered as compared with the previous period. The sharp decline at the end of June was due in the main to the Dominion Day holiday and to some extent to the closing of a few temporary offices. There was a slight falling off in the number of applications, but placements have maintained on the whole the same average as for the preceding period.

The accompanying table shows in some detail the work of the offices for the four weeks' period ended July 17. It will be observed that at the beginning of the period (June 21) the number of persons remaining unplaced totalled 4,931, of whom 3,787 were men and 1,144 were women. This compares with 2,813 men and 850 women, a total of 3,663 unplaced at the end of the four weeks' period. On June 21, 10,681 vacancies

notified by employers remained unfilled, of which 6,321 were for men and 4,630 were for women workers as compared with 7,487 for men and 3,564 for women, a total of 11,051 at the end of the period under review. During the same period 30,282 men and 3,916 women applied for employment, while 30,184 new vacancies for men and 4,633 for women were notified by employers to the Service. This would indicate that while the demand for women workers still exceeded the supply, that in the case of men the supply (applications) was still slightly in excess of the demand (vacancies) though not to such an extent as reported for the

preceding period, when there were 30,740 applications registered as against 28,618 vacancies for men.

The regular placements during the period under review totalled 26,995 of which 24,241 were for men and 2,754 for women, as compared with 24,283 for men and 2,162 for women during the previous period, an increase on the whole of 550. In addition, the offices of the Service made 7,131 casual placements during the period, a slight decrease as compared with the preceding four weeks.

The following table gives in summary form, by provinces, the reports of placements from March 1, 1919 to July 17,

## CHRONOLOGICAL SUMMARY OF PLACEMENTS MARCH 1919—JUNE 17, 1920.

Week Ended.	REGULAR PLACEMENTS.												Casual Place- ments, Canada.

1920. Regular placements refer only to those applicants for whom employment found was likely to be of more than one week's duration, while casual placements refer to those applicants for whom employment found was likely to be of less than one week's duration. It will be noted that the number of regular placements from the beginning of the period

until July 17 totalled 454,084 or at the rate of 6,306 per week, while the number of casual placements for the same period was 80,955 or a weekly average of 1,124. The number of applications for regular employment made during the period totalled 678,388, while the number of vacancies for regular positions notified by employers to the Service amounted to 617,258.

### UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JUNE, 1920, AS REPORTED BY UNIONS MAKING RETURNS.

**T**HE present article on unemployment among the members of local trade unions deals with unemployment as at the end of June, 1920, and is based on returns received from 1,565 labour organizations with a total membership of 194,023. For all occupations reporting, 2.48 per cent of the members were unemployed as compared with 2.88 per cent at the end of May, 1920, and with 2.57 per cent for June, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other

than their own trades or who are idle because of sickness or as the direct result of strikes or lockouts, are not considered as unemployed. As the number of unions making returns varies from month to month with consequent variation in membership upon which the percentage of unemployment is based, it should be understood that the percentage of unemployment figures have reference only to those unions reporting.

The chart following gives the curve of unemployment by quarters for 1916, 1917 and 1918; by months for 1919 to

June of this year, and shows the increasing activity for organized workers year by year during the war period. The percentage of unemployment at the end of December, 1915, (the percentage for March, 1916, is not available) stood at 8. From then unemployment, except for seasonal fluctuations, grew gradually less with the more complete organization of labour forces on a war footing, until in June, 1918, the percentage of unemployment was only one-half of one per cent. Following the cessation of hostilities, and consequently of war industries, unemployment showed an upward curve, which was increased by the usual winter slackness. At the end of February and March, 1919, the percentage of unemployment stood at 5.6 per cent. From then it gradually declined to 2.2 in September. Seasonal unemployment caused the curve to mount slightly with the approach of winter, until it reached nearly 5 per cent at the end of December. The curtailment of operations incident to the holiday and inventory period very probably increased this percentage, as recovery was manifested in January, February and March. Continued improvement was shown in April when the percentage of unemployment stood at 2.83. Very little change was recorded during May, and at the end of June the curve showed a slight downward tendency, the percentage dropping to 2.48.

That the percentage out of work at at the end of June, was slightly smaller than in both May, 1920, and June, 1919, was due to there having been greater activity for workers in nearly all groups of industries, the increase in employment being particularly marked in the manufacturing and mechanical industries.

Table I on this page summarizes the returns by provinces. In comparison with the returns for May, 1920, decreases in unemployment were reported in all provinces except Nova Scotia and Prince Edward Island and Saskatchewan, where the percentages of unemployment were slightly larger. As compared with the corresponding month of 1919, Manitoba and British Columbia, only, recorded increases in unemployment, that in the former province being inconsiderable, while in the latter it was substantial.

June 1920.....	.56	.28	2.82	1.68	1.41	2.15	1.15	9.57	2.48

The percentages reported idle in the different groups of industries are indicated in table II on page 1039.

Unemployment in the manufacturing and mechanical industries as recorded by 392 unions having a combined membership of 51,259, was not as prevalent as at the end of May, 2.17 per cent of the members having been unemployed as

compared with 3.40 per cent in the preceding month. In comparison with the returns for June of last year a decrease in unemployment was also shown, the percentage out of work in that month having been 3.16. Workers in metals, machinery, and conveyances, printing, publishing and paper goods, and wood-working and furniture reported smaller percentages of unemployment both as compared with the preceding month and also with the corresponding month of last year. In food, tobacco and liquors and glass bottle blowing, considerable increases in the volume of unemployment were shown, both as compared with May and with June, 1919. Workers in clothing and leather, boots, shoes and rubbers, were more fully engaged than in the preceding month, but the percentages of unemployment were larger than in June of last year. In textiles,

carpets and cordage no change took place in comparison with the returns for May, but a decrease in unemployment was shown in comparison with June, 1919. In the pulp, paper and fibre, jewelry working, and oil refining groups as reported by 26, 3, and 1 union, respectively, no members were reported as out of work.

Reports from 636 organizations of transportation workers, having a combined membership of 79,149 persons, indicated that 2.49 per cent of the members were unemployed as compared with percentages of 2.62 in May, 1920, and 1.84 in June, 1919. Employment among steam railway employees (whose returns constituted nearly 73 per cent of the entire group membership reporting) showed slightly less activity than in May, 1920, but improvement was recorded in comparison with June of last

TABLE III.—UNEMPLOYMENT ON JUNE 30, 1920.

year. Street and electric railway employees showed a decrease in unemployment both as compared with May and with June of last year. Navigation workers were better employed than in the preceding month but in comparison with June, 1919, conditions were not as good. Teamsters and chauffeurs, as reported by 21 organizations, showed an unemployment percentage of .23 as compared with no members idle in May and with 2.28 per cent in June, 1919.

In the mining, quarrying and refining of ores group returns were received from 41 unions having a total membership of 10,916 persons and show that .38 per cent of the members were out of work as compared with 1.16 per cent at the end of May and with .58 per cent at the close of June, 1919. Miners were more fully engaged than in the preceding month and also than in June of last year while quarry workers and mill and smeltermen showed no members idle.

The percentage out of work in the building and construction group as reported by 275 organizations having an aggregate membership of 31,959, was 4.28, as compared with unemployed percentages of 4.32 in May and 4.71 in June, 1919. Bricklayers, masons and plasterers, electric workers and granite and stone cutters reported increased activity, as compared with the figures for both May, 1920, and June, 1919. Painters, decorators and paperhangers, tile layers, lathers and roofers and bridge

and structural iron workers reported larger percentages of unemployment than in May, but considerable improvement was registered in comparison with the returns for June of last year. Plumbers and steamfitters and hod carriers and building labourers showed increased unemployment as compared with both May and June, 1919, while the percentage of idleness among carpenters and joiners remained stationary. Steam shovel and dredgemen recorded more activity than in May, but conditions were not as good as in June, 1919.

In the public employment group, as reported by 75 unions having a combined membership of 5,957, no members were reported out of work as compared with .04 per cent of unemployment in May and with no members idle in June of last year.

Unemployment in the group of miscellaneous trades, as indicated by returns received from 140 organizations with 12,696 members, was slightly more noticeable than in the preceding month, 2.48 per cent of the members being reported unemployed as compared with a percentage of 1.57 at the end of May. In comparison with the returns for June, 1919, however, considerable improvement was shown, the percentage unemployed in that month having been 3.99.

The tabulated statement on the preceding pages presents the returns in some detail.

EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD  
JUNE 5 TO JUNE 29, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from June 5 to June 26 inclusive show continued improvement in the employment situation, the increase in the volume of employment being particularly marked in the second week of the period.

The accompanying chart shows the weekly percentage of change in the number of persons on payrolls since the base week (January 17, 1920) as reported by employers making returns, the number reporting averaging over 5,100. The chart indicates gains in the volume of employment during each of the weeks under review as compared with the base week, the returns for June 26 indicating, for those employers making returns on that date, additions to staffs of 56,521 persons or 8.1 per cent. The returns for the week ending Jan-

uary 17 were taken as a base. It had been the intention to use the week of January 1, but this was found impracticable because of the abnormal situation at that time due to the annual inventory period and the consequent reductions in staff. The week of January 17 coincides fairly closely with the close of this period and accordingly reflects more normal conditions.

The changes recorded for each of the four weeks under review as compared with the preceding week were as follows:

Week ending June 5, an increase of 480 persons, or .1 per cent.

Week ending June 12, an increase of 4,846 persons, or .6 per cent.

Week ending June 19, an increase of 3,136 persons, or .4 per cent.

Week ending June 26, an increase of 2,967 persons, or .4 per cent.

For the four-week period under review employment conditions were substantially the same throughout Canada, increases on the whole being reported in all districts and in all provinces. Only the Prairie district, however, showed an increase each week, but within this district it may be noted that Manitoba showed slight fluctuations from week to week, while in Saskatchewan and Alberta there were steady increases in the volume of employment. In the Maritime Provinces, Quebec and Ontario and British Columbia, as mentioned before, increases on the whole were registered. There were, however, slight declines during one or more of the weeks under review, the reduction of 680 persons in British Columbia, which occurred on June 5, being the largest decline recorded by any district. On the other hand, an increase of 3,085 persons registered by the district of Quebec and Ontario during the second week was the most substantial gain reported by any district during the period under review.

A summary of the returns by industrial groups shows that Building and Railway Construction, Lumber and its Products, Miscellaneous Manufacturing Industries, (chiefly tobacco and chemicals) Coal Mining, Non-Metallic Minerals other than coal (quarrying), Hotels and Restaurants, Personal Services, (chiefly laundries) Telegraph and Telephone Operation and Wholesale Trade recorded gains during all four weeks of the period under review. Clay, Glass and Stone Products, Edible Plant Pro-

ducts, Fur Goods, Non-Ferrous Metal Products, Pulp and Paper, Rubber Goods, Wood Distillates, Metallic Ores, Local and Railway Transportation showed fluctuations from week to week with net gains during the period as a whole. On the contrary, Logging, Edible Animal Products, Iron and Steel, Leather and Leather goods, Mineral Products n.e.s. and Textiles reported decreases, taking the period as a whole, with increases during one or more of the weeks.

As during the two preceding periods, the increases recorded in the Railway Construction group were the most noteworthy, the additions registered during the four weeks amounting to 3,360 persons. Lumber and its Products with an aggregate increase of 2,975 persons, showed the next largest gain. In the case of this group, as has been mentioned previously, the additions in staff were due to increased activity in saw mill operations. The increase in employment in Building and Construction and Hotels and Restaurants is also due to the resumption of summer activity. In Edible Animal Products the declines may be attributed to the closing of the fishing season, particularly in the Maritime Provinces. The reductions in the staffs of Iron and Steel concerns were almost entirely caused by the continued shortage of fuel and materials which had been manifest for several months. Seasonal inactivity in Leather and Textiles partly accounts for the decreases in employment which were registered in these groups during the period under review.

#### EMPLOYMENT IN THE BUILDING TRADES DURING JUNE, 1920, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 55 cities showed an increase during June as compared with the preceding month, the total value of building permits rising from \$12,155,879 in May to \$13,295,041

in June, an increase of \$1,139,162, or 9.4 per cent. Ontario, Saskatchewan and British Columbia reported decreases in this comparison, that of \$887,137 in Ontario being the largest. On the other hand, Nova Scotia, Quebec, Manitoba and Alberta reported increases, those

in Quebec and Manitoba of \$1,165,655 and \$813,786 respectively being the most noteworthy.

As compared with the corresponding month in 1919 there was an increase of \$5,717,695, or 75.5 per cent, the value for June 1919, having been \$7,577,346. In this comparison Saskatchewan alone reported a small decline in the value of the permits issued. In the remaining provinces large increases were recorded, that in Quebec of \$2,483,568 being the most substantial.

Of the larger cities, Montreal, Winnipeg, Edmonton and Vancouver reported increases in the value of permits issued, both as compared with the figures for May, 1920, and for June 1919. Toronto registered a decrease as compared with May, but in comparison with the returns for June of last year a substantial increase was reported.

Of the smaller centres, Halifax, St. John, Sherbrooke, Kingston, Kitchener, Peterborough, St. Catharines, St. Thomas, Sault Ste. Marie, St. Boniface, Calgary and New Westminster recorded increases as compared with both May, 1920 and June, 1919.

The returns from 35 cities formerly used in this report (which are distinguished by asterisks, and which are also tabulated separately for statistical purposes, show that the total value of building permits issued by these particular cities amounted to \$12,210,839, an increase of \$1,391,483, or 12.9 per cent, as compared with the returns for May 1920. In comparison with the figures for June, 1919, an increase of \$5,740,624, or 88.7 per cent, was recorded.

# REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES, JUNE, 1920

**R** EPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the month of June showed an increase of over 2 per cent in the number of workers and of not quite 8 per cent in the amount of wages paid as compared with the preceding month. In June, 1920, 10,982 persons were temporarily employed, and the payrolls amounted to \$1,126,092 as compared with 10,719 employees and an aggregate payroll of \$1,044,099 in May.

In comparison with the same period in 1919, increases of about 13 per cent in the number of employees and of not quite 66 per cent in the wages paid are indicated, there having been 9,801 employees

with an aggregate payroll of \$679,260 in June, 1919. It should, however, be noted in this comparison that the June, 1919, figures did not represent a normal situation as the numbers of employees on the civic payrolls at that time in Winnipeg and Brandon were largely decreased on account of the strikes in those cities.

Toronto, Hamilton, Winnipeg, Brandon and Victoria reported increases in the number of employees both as compared with the preceding month and also with June, 1919. St. John, Regina, Saskatoon, Calgary and Vancouver showed increases as compared with the returns for May, but in comparison with the figures for June of last year declines were registered. On the other hand, in Ottawa and London there were reductions as

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, JUNE 1920, COMPARED WITH MAY 1920, AND WITH JUNE 1919.

compared with May, but increases over the figures for June of last year. In Moose Jaw the same number of people was employed during May and June, but there was a nominal increase as compared with the returns for June, 1919. In Edmonton there were decreases in both comparisons.

As to wages, Montreal, Ottawa, Toronto, Hamilton, Winnipeg, Brandon, Regina, Saskatoon and Calgary reported increases both as compared with the re-

turns for May and also for June, 1919. St. John registered an increase as compared with the payrolls for May, while in comparison with the figures for June, 1919, there was a decrease. On the other hand, London, Moose Jaw, Vancouver and Victoria reported declines in comparison with the May figures while substantial increases over the returns for June of last year were recorded. Edmonton showed decreases in both comparisons.

### AGREEMENT BETWEEN COAL MINERS AND OPERATORS IN DISTRICT 18 OF THE UNITED MINE WORKERS OF AMERICA

**S**INCE June, 1917, coal mining operations in Alberta and the eastern part of British Columbia, District No. 18 of the United Mine Workers of America, have been carried on under the control of Mr. W. H. Armstrong, at that time appointed Director of Coal Operations under the War Measures Act, with power to make inquiries into wages, hours and all working conditions and operations, and to make orders as to wages, working conditions, operations and prices. An agreement had been entered into in March, 1915 for a period of two years but in July, 1916 the miners demanded an increase in wages owing to the increased cost of living. Strikes occurred and adjustments in wages to meet increases in the cost of living were made from time to time. In August, 1916, there was a  $7\frac{1}{2}$  per cent increase and from November a flat increase or war bonus of \$1.75 per week until March 31, 1917, was given, following a cost of living inquiry by Mr. F. E. Harrison of the Department of Labour. In March, 1917, miners and operators attempted to frame a new agreement to replace that expiring but were unable to reach a settlement. There was much contention as to a "penalty clause" providing for the discharge of employees causing a stoppage of work in violation of agreement. Strikes again occurred in nearly all the mines in the district. The Dominion Government

then appointed the Director of Coal Operations, whose first order was to put into effect the disputed draft agreement, eliminating, however, the "penalty clause." This agreement has since become known as the "Tentative Agreement." Provision was also made by an order for the adjustment of the cost of living war bonus every four months according to the findings of a commission of three, namely, Mr. Frank Wheatley, representing the United Mine Workers, Mr. W. F. McNeil representing the operators and Mr. F. E. Harrison of the Department of Labour as Chairman. From time to time the Director has issued orders amending the agreement and also orders affecting working conditions, rates of pay for special places, etc., following investigations undertaken at his direction.

In December, 1919, the Director issued orders approving and putting into effect the agreement between the United Mine Workers and the Western Canada Coal Operators Association as to the "closed shop," providing that only members of the United Mine Workers should be allowed to work in the mines under control of the Director. In December, 1919, an increase of 14 per cent in wages was given, dating from December 1, following a similar increase to bituminous coal miners in the United States. Details with respect to this appeared in the LABOUR GAZETTE, January,

1920, at page 72. In the spring of 1920, the Director of Coal Operations appointed a sub-committee to report on a basis for new agreement between the mine workers and the operators to take effect from the date of expiry of the two-year "Tentative Agreement" on March 21, 1920. This committee reported on June 10, recommending that an agreement be made for two years from April 1, 1920, to March 31, 1922, that the increase in wages be that recommended in the United States by the Federal Coal Commission, that is, a general increase of 27 per cent over the rates on October 31, 1919, including the cost of living bonus, and that the "Tentative Agreement" with the amendments made by order of the Director be the basis of the new agreement, thus restricting employment in the mines to the members of the United Mine Workers. These recommendations, as stated in the LABOUR GAZETTE, July, 1920, at page 897, were acceptable to the operators and the workers, and accordingly an agreement was entered into and signed on July 20, 1920, between the United Mine Workers and the following companies, members of the Western Operators' Association.

The agreement is reproduced below in full, except that a table of rates and conditions for contract miners working by the ton, yard, etc., according to mines, seams and other conditions, is omitted. On page 1054, however, will be found a table showing the average earnings of contract miners per shift during May. It will be understood that under the new agreement these amounts will be increased by the difference between the 14 per cent increase paid since December last and the 27 per cent increase over rates on October 31, now agreed upon.

#### Text of Agreement

Agreement entered into between District No. 18, of the United Mine Workers of America, of the First Part, and The Western Canada Coal Operators' Association, of the Second Part.

It is mutually understood and agreed that the following conditions and rates shall govern the parties hereto from April 1, 1920, to March 31, 1922, and that the parties hereto will meet in conference thirty days prior to

the expiration of this Agreement to discuss a renewal thereof.

**RETROACTIVE PAY:** The retroactive monies from April, 1920, shall be paid on or before August 1, 1920.

**MANAGEMENT OF MINE:** The right to hire and discharge, the management of the mine and the direction of the working forces are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right. However, the Company agrees not to discharge employees or refuse work to applicants on account of, or because of, their affiliation with the United Mine Workers of America.

**NOTE:** It is not the intention of this Clause that miners working under contract will be taken from their working place indefinitely to perform Company work.

**CHECK-OFF:** This contract is made and entered into for the sole use of the members of the United Mine Workers of America and the members of the Western Canada Coal Operators' Association. All men who work in and around the mines who are eligible to become members of the United Mine Workers of America shall join that organization and agree to sign check-off for all dues, assessments and fines, and the management of the mines agree to forward deductions made to the Acting Secretary of the District or such other person as that official may designate.

#### "FORM OF ORDER.

.....192....

To .....  
.....

I authorize and empower you to deduct and pay to the Acting Secretary of District No. 18, U.M.W. of A., or such other person as that official may designate from my earnings from month to month the sum of Five Dollars or such less amount as may be designated by the Acting Secretary of the District or such other person as he may appoint by Order.

(Signed) .....

Witness .....

**SETTLEMENT OF LOCAL AND GENERAL DISPUTES:** (a) In case any disputes or grievances arise under this Agreement or any local agreement made in connection therewith, whether the dispute or grievance is claimed to have arisen by the Company, or any person or persons employed, or by the men as a whole, then the parties shall endeavor to settle the matter as hereinafter provided. But before any grievances or disputes shall be submitted to the Pit Committee, the person or persons affected shall endeavor, by personal application to the Pit Boss, Overman or Foreman in charge of the work where the dispute arises, to settle

the matter, and in the event of them agreeing their decision shall be final.

(b) In case of any local dispute arising in any mine and failure to agree between the Pit Boss, Overman or Foreman in charge of the work where the dispute arises and any employee, the Pit Committee and Mine Superintendent or Mine Manager shall endeavor to settle the matter, and if they agree their decision shall be final.

(c) In the event of the failure of the Pit Committee and the Mine Superintendent or Mine Manager to settle any dispute so referred to them, as well as in the event of other disputes arising, the matter in dispute shall be referred in writing to the Commissioner of the Western Canada Coal Operators' Association and the President of District No. 18, United Mine Workers of America, who shall meet as soon as practicable, and not in any event later than fourteen (14) days, with a Joint Committee of six (6), composed of the Commissioner of the Western Canada Coal Operators' Association, the General Manager or General Superintendent of the mine where the dispute arose, and another appointed by him, the President of District No. 18, United Mine Workers of America, the President or Secretary of the Local where the dispute arose, and one other District Officer. If they agree their decision shall be binding upon both parties. In the event of their failure to agree, they shall endeavor to select an Independent Chairman, and failing to agree upon an Independent Chairman, the Commissioner of the Western Canada Coal Operators' Association and the President of District No. 18, United Mine Workers of America, shall ask the Minister of Labour to appoint such Chairman. The decision of the Committee thus constituted shall be binding upon both parties, provided, however, during the term of office of the Director of Coal Operations, he shall act as, or appoint the, Independent Chairman mentioned herein.

(d) In the meantime, and in all cases while disputes are being investigated and settled, the miners, mine laborers and all other parties involved must continue to work pending investigation and until final decision has been reached; but where miner, miners, mine laborer or mine laborers has or have been discharged by the Company, he or they shall not remain in the employ of the Company while his or their case is being investigated and settled. If the claim be made within five (5) days, where a man or men has or have been unjustly discharged, the case shall be dealt with according to this Article, and if it is proven that he or they have been unjustly dealt with, he or they shall be reinstated. If a claim is made for compensation for time lost, in cases where reinstatement has followed, it shall be left to the Joint Committee as provided for in Sub-Section "C" to decide what amount (if any) is to be paid.

(e) Any breach of this Agreement by any of the parties hereto is not to void the said Agreement, but the same is to be continued in full force and effect.

(f) If the Commissioner of the Western Canada Coal Operators' Association or the President of District No. 18, United Mine Workers of America, is unable, on account of sickness or absence from the District, to attend to the duties hereinafter set out, these duties in the first instance would be assumed by either the President or Vice-President of the Western Canada Coal Operators' Association, and in the second instance by either the Vice-President or Secretary of District No. 18, United Mine Workers of America. Due notice of who would attend to these duties to be sent immediately, in the first instance, to the Party of the First Part and in the second instance to the Party of the Second Part.

(g) All settlements and decisions that have been made and are in effect should be considered in taking up disputes, during the life of this Agreement.

**DUTIES OF PIT COMMITTEE:** The Pit Committee shall be a Committee of three (3) to each mine or other plant covered by this agreement, selected by the employees working at such mine or other plant from among their own number, except one (1) member may be a Checkweighman or an Officer of the Local Union, not necessarily an employee of the Company. This member must previously have been selected as Checkweighman or officer from amongst the employees of the aforesaid mine or other plant. Due notice of such selection, properly certified in writing, shall be given to the Company.

The duties of the Pit Committee shall be confined to the settlement of disputes between the Pit Boss or Foreman and any employee working in or around the mines, arising out of this Agreement and all Agreements made in connection therewith, the Pit Boss or Foreman, and man or men, having failed to agree.

The Pit Committee, in discharge of its duties, shall, under no circumstances, go around the mine, for any cause whatever, unless called upon by the Pit Boss or Foreman, or by a Miner or Dayman, who may have a grievance which he has first tried to and cannot settle with the Boss.

Members of the Pit Committee employed as Daymen shall not leave their places of duty during working hours except by permission of the Pit Boss or Foreman, or in cases involving the stoppage of the mine.

**NEW WORK:** Whenever any new work arises a price for which has not been provided for in this Agreement, on the request of the Company or the Miners, a Joint Committee of six (6), composed of the Commissioner of The Western Canada Coal Operators' Association, the General Manager or General Superintendent of the mine where the price is asked

for, and another appointed by him, the President of District No. 18, United Mine Workers of America, the President or Secretary of the Local where the price is asked for, and one other District Officer, shall meet within fourteen (14) days. If they agree their decision shall be binding upon both parties. In the event of their failure to agree they shall endeavor to select an Independent Chairman, and failing to agree upon an Independent Chairman, the Commissioner of the Western Canada Coal Operators' Association and the President of District No. 18, United Mine Workers of America, shall ask the Minister of Labour to appoint such Chairman. The decision of the Committee thus constituted shall be binding upon both parties. Provided, however, during the term of office of the Director of Coal Operations, he shall act as, or appoint the, Independent Chairman mentioned herein.

Whenever any new system is inaugurated or radical change in the present system is made in any mine where there is a contract price fixed thereon, the Company or the employee may ask for a price to be fixed on the work as "New work"; as, for example, a change from "Longwall" to "Pillar and Stall," or *vice versa*, shall be considered "New Work."

In making the prices for New Work the Company shall be guided by existing prices in the same mine or other mines in the neighborhood.

Meantime, if the work is continued until such price has been arranged, all men shall be paid on the Day Wage Scale.

**EMPLOYEES NOT UNDER JURISDICTION:** All employees connected with the Management of the Mine are not to be under the jurisdiction of the United Mine Workers of America or be members thereof, and shall include the following:

Mine Manager or Superintendent, Overman or Assistant Overman, Pit-bosses, Fire-bosses, Boss Driver, Stable Boss, Master Mechanic, Electricians, Weighman, Head Carpenter, Head Blacksmith, Tipples or Breaker Foreman, Loader Boss, Night Watchman, Coke Oven Foreman, Outside Foreman, and all other Foremen, Time-keepers, Coal inspectors and Head Lampmen.

**CONSTRUCTION AND EXTENSIVE REPAIRS:** It is agreed that all men working on improvements and extensive repairs are not included in the jurisdiction of the United Mine Workers of America.

The erecting of head frames, tipples, breakers, washers, builders, coke ovens, scales, machinery, railroad tracks and switches, etc., necessary for the completion of a plant, all being in the nature of construction work and extensive repairs or rebuilding of the same class of work, are to be considered as improvements and extensive repairs, and the employees thereon are to be excluded as above when employed on such work only.

**PENALTY FOR ABSENCE FROM WORK:** When an employee absents himself from his work for a period of two (2) days, unless through sickness or by first having properly arranged with the Pit Boss or Foreman and obtained his consent, he may be discharged. All employees whose absence would cause any stoppage of work must, before absenting themselves, properly arrange with or notify the Pit Boss or Foreman for or of their absence, otherwise they may be discharged. Any employee who habitually, to the extent of five (5) days per month, absents himself from work may be discharged.

**CHECKWEIGHMAN AND CHECKMEASURERS:** The Company will grant the right to the miners to employ Checkweighers and Checkmeasurers, and will grant the said Checkweighers and Checkmeasurers every facility to enable them to render a correct account of all coal weighed or checked, and will allow the cars to be tared from time to time, and the machine to be properly tested from time to time, and will deduct from the wages of all Contract Miners such amounts as may be designated from time to time, and will pay over the same to the Checkweigher or Checkweighers, Checkmeasurer or Checkmeasurers.

**PREFERENCE OF EMPLOYMENT:** In case an employee is thrown out of employment, unless discharged, he shall be given preference over new men in other mines in the same camp operated by the same company.

**MINIMUM RATE:** When a miner's working place becomes deficient owing to any abnormal conditions, or where coal in any district becomes so hard, preventing him from earning the minimum wage of \$6.35 per shift, the Company shall pay him a sufficient amount to secure him the said minimum, providing he has done a fair day's work. Provided, however, regard shall be had to the pay period in which the deficiency is claimed. This shall not apply where work is performed in two separate places, one being normal and the other abnormal.

**MINERS TAKEN TO DO COMPANY WORK:** The Company shall pay the sum of \$6.35 per day for all miners taken from contract work to do Company work.

**DELIVERY OF MATERIAL:** In accordance with the Coal Mines Regulation Acts of British Columbia and Alberta, the Company will, at all times, deliver an adequate supply of suitable timber, rails, ties, planks and sheet iron at the nearest cross-cut to the face of all raise workings, and in places where the regular pit cars go to the working face, without being handled by the miner, they shall be delivered on the cars to the working face; in other places across the pitch the timber, rails, ties, planks and sheet iron will be delivered at the mouth of the room.

**LOADING OF COAL FROM CHUTES:** In pitching seams, where chutes are used, the Company will handle all coal placed in the chutes by the miners.

**DOCTOR AND HOSPITAL ARRANGEMENTS:** The matter of doctor and hospital arrangements is to be arranged as provided by the Workmen's Compensation Acts of Alberta and British Columbia.

**STORE:** It shall be understood and agreed that the employees shall be at perfect liberty to purchase goods wherever they may choose to do so.

**HOLIDAYS:** The following days only shall be observed as holidays:

New Year's Day, Good Friday, May First, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, District International Election Day, Christmas Day.

**FUNERALS:** In the event of an instantaneous death by accident in the mine or outside the mine, the miners underground and all other employees may suspend work in the seam where the accident occurred on the day of the accident, but shall resume work on the following day and continue to work till the day of the funeral, when it is optional with them whether they shall work or not.

**SUB-CONTRACTING:** No sub-contracting shall be allowed in any mine operated by the Company, but this shall not apply to the employment of Backhands.

**EMPLOYEES TO CARE FOR MINE:** In case of either local or general suspension of mining, either at the expiration of this Agreement or otherwise, the Engineers, Fireman and Pumpmen shall not suspend work, but shall, when mining is suspended, fully protect all the Company's property under their care, and operate fans and pumps, and lower and hoist such men and supplies as may be required to protect the Company's property, and any and all coal required to keep up steam at the Company's plant; but it is understood and agreed that the Company will not ask them to hoist any coal for sale on the market.

**SINGLE SHIFT:** The single shift system in rooms and pillars shall be adhered to as far as practicable.

**WET PLACES:** A working place in the mine where water drops from the roof in quantities sufficient to wet a man's clothing, or where standing water is over six inches deep, shall be considered a "Wet Place." The rate for wet places shall be sixty-four cents per day extra for all inside day wage men. Where extra remuneration is now provided for in contract rates in the Tentative Agreement, same will not be affected.

**ROCK MINING:** Where a man is engaged on rock work where hammer and steel are used, he shall be considered a "rock miner" and paid rock miner's wages.

If an air drill is used, the driller shall be paid machine runner's wages, and the helper paid machine runners's helper's wages. The other men engaged shall be classed as "miners or labourers," as may be.

When a man is engaged on work in both rock and coal, if the amount of loose rock is greater than the amount of loose coal he shall

be classed as a "rock miner," and where the amount of loose coal is greater than the amount of loose rock he shall be classed as a "coal miner."

**BRUSHING:** When a man is engaged on brushing, either top or bottom, using usual drills and tools, he shall be classed as a "coal miner." If the brushing is done by hammer and steel, he shall be classed as a "rock miner."

Timbermen taking out rock while engaged in retimbering or repairing shall not be classed as "rock miners."

**RETIREMENT:** Where any employee has drawn his time before the regular payday, he thereby severs his connection with the Company, and any alleged grievance he may have ceases to be a question for consideration under this Agreement. The words "drawn before the regular payday," are satisfied by the application of the employee for, and his receipt of, his time-check before the regular payday.

**NOTE:** This clause shall not apply with respect of retroactive monies from April 1, 1920.

**CHINESE LABOR:** The United Mine Workers of America do not in any way prohibit the employment of Chinese in or around the mine, but where such labor is employed they shall be paid the scale for such work, with the following provisions, *i. e.*, that where they are now employed at Bankhead and Canmore the present rates shall not be interfered with in any way by the United Mine Workers of America during the life of this Agreement.

**OIL:** Present conditions to prevail.

**PAYDAY:** All wages earned by any person or persons employed in or about a mine shall be paid in accordance with the Coal Mines Regulation Acts of Alberta and British Columbia. Any employee desiring to leave the service of the Company, on his request shall be paid all monies due him within two days after his stoppage of work.

**MARKET RESTRICTIONS:** It is agreed that District No. 18, United Mine Workers of America, will not in any way restrict or interfere with the marketing of coal or coke to any person, firm or corporation.

**TURN OF CARS:** The Company shall, as far as possible, supply each and every miner with an equal turn of cars.

**BACKHANDS:** The present practice of working miners either as partners or with miners and laborers, as it exists in the several camps at the present time, shall be adhered to.

On all Company work the Company shall employ such class of men as the work requires and at the rate of wages provided for in this Agreement.

**CONTRACT NOT TO BE VOIDED BY MINERS' CONSTITUTION OR RULES:** This contract is in no case to be set aside because of any rule of the United Mine Workers of America now in force or which may hereafter be adopted; nor is this contract to be set aside by reason of any

provision in the National, District or Local Constitutions.

**OVERTIME:** All overtime shall be paid for at the Scale Rate per hour.

Operators are hereby requested to eliminate overtime and work on Sundays and holidays as far as practicable.

**BLASTING:** Where in the future blasting is prohibited in the mine, and it can be shown that the earnings of the miners are decreased thereby, the contract rates shall be taken up as under the "New Work" Clause and an equitable allowance shall be made.

**POWDER:** Where explosive supplies are being sold to the miners, they shall be furnished at cost price, which shall include handling, transportation and insurance.

**NOTE:** In case any dispute should arise under this clause with respect of selling price, it shall be determined by the Joint Committee in the same manner as is provided in Clause "C" of "Local and General Disputes." It is suggested that representatives of employers and employees in the several fields meet and endeavor to agree upon the selling price.

Where by mutual consent this Contract is changed, which change would increase the earnings of the men to a greater degree than provided in the basic agreement, the same shall become effective from the date of signing of this agreement.

That the application of the H. C. L. 92c. on contract miners' wages (which shall include all contract workers) be made by adding the 27 per cent on the 92 cents or \$1.17 to his wages for each day's work.

## NOTE:—

The average earnings for contract miners for the month of May, 1920, in the principal mines of District Eighteen are.....\$9.30 per shift.

## RECENT INDUSTRIAL AGREEMENTS

**T**HE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Mining—Coal

**WESTERN COAL OPERATORS' ASSOCIATION AND THE UNITED MINE WORKERS OF AMERICA, DISTRICT 18.** Full text of recent agreement between these bodies is reproduced on pages 1047 to 1054 of this issue.

### Construction—Other than Railway

**MONCTON, N.B.—BUILDERS AT MONCTON, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, No. 1698.** Agreement in effect from May 5, 1920 to May 5, 1921.

Hours of labour: eight hours per day, forty-eight per week.

Wages: Per hour, journeymen, 70 cents; foremen, 80 cents. Overtime, time and one-half; Sundays and holidays, double time.

Factory rates: per hour, machine men, 55 cents; bench men, 60 cents; cabinet makers, 65 cents. Hours of labour: nine hours per day, five hours Saturday.

**BEEBE, QUE.—EMPLOYERS OF GRANITE CUTTERS OF BEEBE, QUE. AND DISTRICT, AND GRANITE CUTTERS' INTERNATIONAL ASSOCIATION.** Agreement in effect from July 16, 1919 to April 1, 1922, and yearly thereafter, subject to three months' notice of change prior to April 1.

Wages: Per hour, from July 16, 1919 to August 1, 1919, 70 cents; from Aug-

ust 1, 1919 to April 1, 1920, 75 cents; from April 1, 1920 to April 1, 1921, 80 cents; from April 1, 1921 to April 1, 1922, 85 cents.

The minimum rate not to apply to workmen incapacitated through old age or physical disability, whose cases shall be referred to a joint committee.

Hours of labour: eight hours per day, four hours on Saturday.

Overtime, time and one-half; double time from dark until daybreak, and Sundays and holidays.

National, Provincial or Municipal laws enacted for the betterment of wages and conditions in the granite industry to be respected alike by employer and employee.

All operators of granite cutting, polishing and tool sharpening machines to be members of the Union.

Apprentices: one apprentice granite cutter to first four journeymen, and one to each additional six. Term of apprenticeship to be six years, with indenture of apprenticeship binding after six months. One apprentice tool sharpener for three journeymen, two for eight, and one additional for each additional four. Term of apprenticeship, two years. One apprentice polisher for two journeymen steadily employed. Term of apprenticeship, two years.

Disputes to be submitted to a committee of two members from each party, and if these do not agree, a fifth to be selected by them. The decision to be binding with no suspension of work, lock-out or strike pending consideration of the dispute.

**MONTREAL, QUE.—DOMINION BRIDGE CO., LTD., AND INTERNATIONAL ASSOCIATION OF BRIDGE AND STRUCTURAL IRON WORKERS, No. 304, 307, ERECTION EMPLOYEES OF MONTREAL AND VICINITY AND ROAD ERECTION EMPLOYEES.** Agreement in effect from June 1, 1920 to May 31, 1921.

Hours of labour, eight hours per day, four hours Saturday. Overtime rate, time and one-half. No work on holidays except in dire necessity. Double time on holidays.

Foremen to be paid straight time, with time and one-half for overtime, and pay for all holidays. Wages: Per day \$2.00 above minimum. Foremen to have right to appoint apprentices and assistant foreman, the latter to receive \$1.00 per day above minimum.

Minimum wages: Per hour, steel erectors, 85 cents; apprentices, 65 to 75 cents; road scale, 15 cents extra.

If cost of living has increased on September 1, 1920, and quarterly thereafter, wages to be increased proportionately.

SHERBROOKE, QUE.—CANADIAN ASSOCIATION OF BUILDING AND CONSTRUCTION INDUSTRIES, SHERBROOKE BRANCH, GENERAL CONTRACTORS SECTION, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA. Agreement in effect from July 5, 1920 to April 30, 1921.

Hours of labour: nine per day.

Minimum wages: Per hour, 70 cents. Overtime, time and one-half until 10 p.m., double time thereafter, and on Sundays and holidays.

Apprentices, wages: Per hour, first year, 40 cents; second year, 50 cents; third year, 60 cents.

KINGSTON, ONT.—MASON CONTRACTORS OF KINGSTON, AND BRICKLAYERS, MASONS AND PLASTERERS UNION No. 10. Agreement in effect from July 1, 1920 to March 31, 1921.

Wages: Per hour, until March 31, 1921, 85 cents thereafter, \$1.00.

Contractors to employ only union men, and members of the union to work only for contractors who recognize the agreement. No member to contract or sub-contract any work.

Hours of labour, eight hours per day. Overtime and holidays, time and one-half. Sundays, double time.

Each firm in business one year to have one apprentice to serve four years, and a second apprentice provided the former has served for three years. Apprentices

to be under eighteen, and properly indentured.

No labourer to be allowed to spread cement or mortar, said cement or mortar to be spread with a trowel by union mason. No labourer to be allowed to do any mason work.

TORONTO, ONT.—MASTER PLASTERERS' SECTION OF THE BUILDERS' EXCHANGE OF TORONTO, AND INTERNATIONAL UNION OF PLASTERERS OF AMERICA, No. 48. Agreement in effect from April 1 to December 1, 1920.

Arbitration Committee of five members from each party to hear and adjust the various questions arising.

Wages: Per hour, from April 1 to May 14, 1920, 90 cents; from May 15 to December 31, 1920, \$1.00.

Overtime, till 10 p.m., time and one-half. Double time Sundays, holidays, after 6 p.m. on Saturdays and 10 p.m. other nights. No work Saturday afternoons.

No member of the Union to leave the employers to accept work for anyone outside. The employees not to strike before matter has been brought before joint Committee, nor to leave work or strike except upon two-thirds vote or subject to Building Trades Council.

A firm in business one year to have one apprentice, starting at sixteen years, and indentured for four years, and regularly attending night classes at Toronto Technical School during two years of service. Any firm or person employing eight men may have a second apprentice only when eldest apprentice starts his third year.

NIAGARA FALLS, ONT.—CONTRACTORS AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, NOS. 713 AND 2624. Agreement in effect May 1, 1920 to April 30, 1921, and thereafter from year to year unless three months notice be given.

Hours of labour: eight hours, and four hours on Saturday. Overtime, Sundays and holidays, double time.

Wages, minimum: Per hour, 85 cents; foreman, not less than 5 cents per hour

in addition; carpenters on pit and tunnel work, working under compressed air, 5 cents per hour above regular rates, and 5 cents per hour extra for every 20 feet over 50 feet when on high scaffolds or in other dangerous positions.

Carpenters in planing mills or factories, on maintenance work (not construction), 9 hours per day, until noon on Saturday, with 80 cents per hour.

One apprentice for every five journeymen, at 30 cents per hour.

Employers to hire only union men when available.

MERRITTON, ONT.—TWO LOCAL FIRMS, AND UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, No. 1402.—Agreement in effect May 1, 1920 to April 30, 1921, and thereafter from year to year unless three months' notice is given.

Hours, overtime and apprentices as in Niagara Falls agreement above.

Minimum wages: Per hour, journeymen, 85 cents foreman 95 cents.

Carpenters in mills and factories, as in Niagara Falls agreement.

KITCHENER, ONT.—MASTER PLUMBERS OF KITCHENER AND WATERLOO, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, No. 527. Agreement in effect May 1, 1920 to April, 30, 1921, and from year to year thereafter, with one month's notice of change.

Hours of labour nine hours per day, five hours on Saturday.

Minimum wages: Per hour, 75 cents. Overtime to midnight and Saturday afternoons, time and one-half; after midnight and on holidays, double time.

Employers to use efforts that all men in their employ shall be members of the United Association. Employees to use efforts that no member shall work for anyone but a licensed plumber.

Grievances to be referred to a joint arbitration board of three members from each party; no strike or lockout to take place until matter has been referred to the General office of the United Association, and a decision rendered.

CALGARY, ALTA.—CALGARY CONTRACTORS AND CALGARY CARPENTERS DISTRICT

COUNCIL. Agreement in effect from July 1, 1920 to May 31, 1921.

Wages: per hour, journeymen, July 1, 1920 to May 31, 1921, \$1; this wage to be taken as a standard for future adjustments.

Hours of labour eight hours, and four hours Saturday.

Overtime: time and one-half from quitting time until midnight; double time from midnight to 8 a.m., after 5 p.m. Saturdays, and Sundays and holidays.

Members of union not to work for outside contractors for less than \$1 per hour.

EDMONTON, ALTA.—MASTER PLUMBERS' ASSOCIATION, AND UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, No. 448. Agreement in effect from May 1, 1920 to April 30, 1921.

Hours of labour: eight hours per day and four hours on Saturdays.

Minimum wages: Per hour \$1.

Overtime, time and one-half until midnight, and Saturday afternoons; double time after midnight, after 5 p.m. Saturdays and Sundays and holidays.

Plumbers' apprentices to serve five years, working the fifth year with tools, under instruction of a journeyman.

A steamfitter to be allowed only one helper.

Each shop to be allowed one plumbers' apprentice and one other for each additional five journeymen. The number of apprentices not to exceed four in one shop, and age not to exceed 18 except in case of returned soldiers.

Members of one branch of trade not to work at any other. Employers to employ only union men, and employees to work only for members of Master Plumbers' Association.

Grievances to be settled by Local's business agent waiting on employer; or failing this, a committee of two to four of each party.

GUELPH, ONT.—MASON CONTRACTORS OF GUELPH AND BRICKLAYERS', MASONS' AND PLASTERERS' UNION, No. 3. Agreement in effect from April 1, 1920 to March 31, 1921.

Wages: Per hour \$1.

Hours of labour: eight hours per day, four hours on Saturday. Overtime, Sundays and holidays, double time.

No employees to strike or leave work before question at issue has been brought before joint Arbitration Committee.

Union to supply, to the best of its ability, sufficient mechanics. No member of union to work for employer employing non-union men.

WINNIPEG, MAN.—CERTAIN LOCAL CONTRACTORS, AND INTERNATIONAL ASSOCIATION OF HEAT AND FROST INSULATORS AND ASBESTOS WORKERS, No. 15. Agreement in effect from July 1, 1919, to May 1, 1921.

Hours of labour: eight hours per day, and four hours on Saturdays. Overtime: time and one-half from 5 p.m. until midnight and Saturday afternoons; double time, from midnight until 6 a.m. and Sundays and holidays.

Employers not to execute any part of the work, nor employees to undertake any contracting.

Employees to work only for contractors conforming to this agreement.

Wages: Per hour, July 1, 1919 to May 1, 1920, journeymen, 80 cents; first class improvers, 60 cents; May 1, 1920 to May 1, 1921, mechanics, 90 cents; improvers, 70 cents.

Disputes to be settled by joint Trade Board with four members from each party.

The number of improvers not to exceed number of mechanics.

A first class improver may execute work alone.

MONTREAL, QUE.—EMPLOYERS, AND INTERNATIONAL ASSOCIATION OF HEAT AND FROST INSULATORS AND ASBESTOS WORKERS, No. 23. Agreement in effect from May 1, 1920 to April 30, 1921.

Hours of labour: eight hours per day, four hours on Saturday.

Overtime: from 5 p.m. until midnight, and Saturday afternoons, time and one-half; from midnight until 8 a.m. and Sundays and holidays double time; Labour Day, triple time.

One improver to every two mechanics. No improver to work unless with a mechanic.

Disputes to be settled by a Trade Board, composed of five members of each side.

No lockouts or strikes except when ordered by Building Trades Council. Disputes to be settled without cessation of work.

In emergency cases, when supply of union men fails, non-union men may be temporarily engaged.

Minimum wages: Per hour, mechanics, 67½ cents; improvers, first year, 35 cents; second year, 45 cents; third year, 55 cents. Mechanical examination to be held quarterly by joint examining board.

Employers to employ only union labour.

CALGARY, ALTA.—GENERAL CONTRACTORS ASSOCIATION, AND BRICKLAYERS', MASONS', AND PLASTERERS'—INTERNATIONAL UNION, No. 2. Agreement in effect July 1, 1920 to May 31, 1921.

Minimum wages: Per hour, \$1.25; foremen not less than 10 cents per hour in addition; member working outside city, not less than 10 cents per hour above minimum, as well as railway fare and pay for time travelling.

Overtime, double time.

Hours of labour: eight hours per day; four hours on Saturday.

TORONTO, ONT.—WOOD, WIRE AND METAL LATHERS' UNION, No. 97, AND EMPLOYERS. Agreement in effect from April 5, 1920, to April 4, 1921.

Hours of labour: eight hours per day; four hours on Saturdays. Overtime, Sundays and holidays, double time.

Wages: Per hour, first-class men, 90 cents; second-class men, 80 cents.

On and after May 14, 1920, Wages: Per hour, first-class \$1.00; second-class, 90 cents. Foremen to receive not less than 50 cents per day above maximum for first-class men.

Disputes to be referred to an arbitration board of five members from each party.

Employees to work for no one excepting contracting lathers recognized by the union.

OTTAWA, ONT.—OTTAWA BRANCH OF THE ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES, AND BUILDING TRADES COUNCIL—INTERNATIONAL BROTHERHOOD OF PAINTERS, DECORATORS AND PAPERHANGERS OF AMERICA, No. 200; INTERNATIONAL UNION OF PLASTERERS OF AMERICA, No. 124; INTERNATIONAL HOD CARRIERS, BUILDERS AND COMMON LABOURERS, No. 428; AND BRICK AND TILE LAYERS' UNION, No. 7; AND MARBLE MASONS' UNION No. 14; INTERNATIONAL UNION OF STEAM AND OPERATING ENGINEERS, LOCAL No. 473; WOOD, WIRE AND METAL LATHERS; SHEET METAL WORKERS, ELECTRICAL WORKERS. Agreement in effect from May 1, 1920 to April 30, 1921. A similar agreement with the Ottawa District Council of the United Brotherhood of Carpenters and Joiners was summarized in the LABOUR GAZETTE for June, on page 718.

Certain clauses are standard in all agreements for 1920 entered into by the above parties, as follows:

Hours of Labour: not more than eight hours, and four hours on Saturday, in all trades excepting labourers, where eight or nine hours may be worked.

Overtime: till 10 p.m., time and one-half; thereafter and holidays, double time.

Disputes to be referred to an Industrial Council, with five representatives from each party; strike not to be resorted to without this having been done.

Employers agree to principle of International Closed Shop, it being understood that employers may hire non-union men when union men are not available.

The Agreements refer to the Building Industry, not including sewers, road work, bridge work, heat and frost insulators and asbestos workers or structural iron workers.

The individual agreements have special provisions, as follows:

Brick and Tile Layers and Marble Masons: No members either individu-

ally or collectively to leave work or take part in sympathetic strike except under authority of Executive Board of the B. M. and P.I.U. During dispute between a contractor and an owner, no member, when officially notified, to work on job in dispute, unless so instructed by the Joint Industrial Council. Members not to work for contractors not recognizing the agreement. A firm established in Ottawa two years, and employing two bricklayers, to have an apprentice; a firm established four years, and employing five bricklayers, to have two apprentices; each apprentice to serve four years under indenture. Foremen to receive 10 cents per hour above regular rates.

Hod Carriers' builders' and common labourers' wages: Per hour, 60 cents; foremen, 10 cents over regular rate.

Plasterers: a firm in business one year to be allowed one apprentice indentured for four years; a firm employing eight men to be allowed a second apprentice only when eldest apprentice starts his third year. When ten or more members are employed by one contractor, one superannuated member may be started.

Wage scale for various trades for year 1920: Per hour, masons and bricklayers, marble and tile setters, \$1.00; labourers, 60 cents; plasterers, 85 cents; cement finishers and wood, wire and metal lathers, 75 cents; stone cutters, first four months, 87½ cents; remaining eight months, \$1.00; sheet metal workers, 75 cents; engineers, steam shovels and drag line, \$1.00; steam shovel cranemen and dinky engineer, orange peel buckets and clam shells, derricks and steam rollers and cable ways, steam and electric hoists, 75 cents; steam concrete mixers and steam air compressors, and engineers not specified, 70 cents; Carpenters, 85 cents; electricians, 80 cents; painters, 75 cents; roofers 70 cents; roofers' labourers, 55 cents. Horse team owners, two horse team and teamster, \$1.25; one horse and teamster, 70 cents.

Wood, wire and metal lathers: Employees to be members of union. One apprentice to four mechanics.

Sheet metal workers: Apprentices to be at least 15 years of age; to serve five

years; and to serve one year as junior journeymen, at 50 cents per hour. Two apprentices together must work under a journeyman. Foremen to receive 10 cents per hour over regular rate.

Electrical workers: wages, Per hour, journeymen, 80 cents: improvers, 55 cents.

A journeyman must have served four years, hold a journeyman's card, and have passed an examination. An improver is one who has worked three years. Apprentices are those who have worked less than three years, and are over sixteen. No private work to be done.

#### Metals and Machinery

TORONTO, ONT.—SHEET METAL SECTION OF BUILDERS' EXCHANGE AND SHEET METAL WORKERS UNION, No. 30. Agreement in effect May 1, 1920 to December 31, 1920.

Union men to be employed when available. After July, 1920, employees to work only where agreement is recognized.

Minimum wages: Per hour, to August 31, 1920, 85 cents September 1 to December 31, 1920, 90 cents.

Hours of labour: eight per day; forty-four per week. Overtime, time and one-half until midnight, double time thereafter and Sundays and holidays.

Apprentice to be under twenty years; to get a card from union, renewable yearly; to serve four years under mechanic; to take a course in sheet metal drafting during third year.

Apprentices to receive wage increase every six months, based on following percentage of recognized minimum union rate of wages:

	%	to Aug. 31	to Dec. 31
1st six months,	33	\$12.50	\$13.00
2nd six months,	38	14.00	15.00
3rd six months,	43	16.00	17.00
4th six months,	48	17.75	19.00
5th six months,	53	19.75	21.00
6th six months,	58	21.50	23.00
7th six months,	63	23.50	25.00
8th six months,	70	26.00	28.00

ST. CATHARINES, ONT.—THE ENGINEERING AND MACHINE WORKS OF CANADA,

LIMITED, AND SKILLED EMPLOYEES OF THE BOILER DEPARTMENT OF THE COMPANY.—Agreement in effect from May 15, 1920, to May 15, 1921.

Hours of labour, day: nine hours for five days; five hours on Saturday. Night: eleven hours for five nights. Overtime: time and one-half until midnight, and Civic Holiday, Good Friday, and Thanksgiving Day; double time Sundays and other holidays. No work on Labour Day.

Apprentices to be taken from ranks of helpers and to be advanced every six months; not more than one apprentice to six mechanics.

Grievances to be adjusted by joint committee. Work not to cease until arbitration has been resorted to.

Minimum wages: Per hour, flanger, 85 cents; first class boilermaker, 75 cents; second class boilermaker, 67 cents; welder and cutter, 75 cents; acetylene cutter, 60 cents; holder-on, 54 cents; punch and shearer, 57 cents; pipe fitter, 67 cents; drillers, 57 cents (operators of three large radial and one man on dallet drill,  $2\frac{1}{3}$  cents extra); large crane, 57 cents; 10-ton crane, 55 cents; side floor crane, 50 cents; helpers, 52 cents; rivet heaters, 52 cents (one each day and night).

#### Shipbuilding

TORONTO, ONT. — DOMINION SHIP BUILDING CO., AND INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIP BUILDERS AND HELPERS OF AMERICA, No. 128. Agreement in effect May 1, 1920 to May 1, 1921.

Hours of labour: nine hours each of first four days; eight hours on Friday.

All overtime, double; no work on Labour Day. Dirty work, time and one-quarter.

Grievances not settled by foreman to be taken up with manager by committee of the men.

No apprentice to be sent out unless he has served two years and each to be accompanied by a journeyman.

## WAGES AWARD OF UNITED STATES RAILROAD LABOUR BOARD

---

**T**HE first award of the United States Railroad Labour Board, granting wage increases aggregating six hundred million dollars, or about 21 per cent over the wage rates established under the authority of the United States Railroad Administration, to more than 1,800,000 railway employees, was announced at Chicago on July 20 by the chairman, Judge R. M. Barton. The demand of the men had been for advances amounting in the aggregate to a billion dollars. The Railroad Labour Board was created under the Railway Reorganization Act passed in February last. Details with respect to the organization of the Board, a tripartite body of nine members equally representing the carriers, the workers and the public, appeared in the April issue of the *LABOUR GAZETTE*.

While Canadian railways are not directly affected by the award of the United States Board, it was expected that the representatives of the 200,000 workers in the Canadian Brotherhoods would use the award as a basis for negotiation with the Railway Association of Canada, (formerly known as the Canadian Railway War Board). The Canadian National Railways, in fact, were already contemplating increases affecting 12,000 employees, which, according to a statement by Mr. A. R. Mosher, Grand President of the Canadian Brotherhood of Railway Employees, would provide "wages and working conditions as good or better than those awarded by the United States Board to the railwaymen of that country."

The award of the Railroad Labour Board, which concedes about sixty per cent of the increases sought, was ac-

cepted under protest at an executive conference in Chicago on July 22 by fifteen of the sixteen recognized railway unions in the United States, though at the same time they decided to renew their case before the Board. The remaining organization, the Brotherhood of Railway Telegraphers, referred the award to its membership together with a strike proposition. Almost simultaneously with the announcement of the award, Mr. E. T. Whittier, representing more than 300 railways involved, announced that an increase of 18 per cent in freight rates would be required to meet the advance in wages. Mr. Samuel Gompers, president of the American Federation of Labour, thereupon issued a statement in which he voiced his opposition to any increases in railway rates to meet the proposed increase in wages. "Such action, or the levying of taxes to make up deficiencies, would be unnecessary," Mr. Gompers declared, "if the railroads were operated more efficiently."

The \$600,000,000 increase is apportioned by the award as follows: Railway clerks and freight handlers, \$123,000,000; maintenance of way employees, \$160,298,000; engineers and trainmen, \$157,000,000; railway shopmen, \$139,237,000. The remainder is divided among station employees, yardmen and dispatchers, and marine employees on tugs, ferries, and other railway-owned harbour boats. No mention is made in the award of the new unions which were joined by many of the railway workers immediately prior to the strike last April, but the Board states that as the strikers violated the Transportation Act by walking out without first submitting their grievances, the case of the strikers was not before them.

The full text of the decision is printed below, except that Article I giving the railroads affected, and Article X giving wage rates to marine employees in certain harbours, are omitted.

**United States Railroad Labour Board****Decision No. 2 (Dockets 1, 2 and 3)**

Chicago, Ill., July 20, 1920.

This decision is upon a controversy or dispute between the organizations of employees of carriers and the carriers named below. The subject matter of the dispute is what shall constitute just and reasonable wages and working conditions on these carriers. In March, 1920, pursuant to the Transportation Act, the dispute was considered in conference between representatives of the parties and not having been there decided was referred by them to this Board.

This decision is upon that portion of the dispute which covers wages and does not deal with working conditions. The organizations, parties hereto are: International Association of Machinists, Sheet Metal Workers' International Alliance, Brotherhood of Locomotive Engineers, Brotherhood of Railroad Trainmen, Brotherhood of Railway & Steamship Clerks, Freight Handlers, Express and Station Employees, Switchmen's Union of North America, Brotherhood of Railway Signalmen of America, Brotherhood of Stationary Firemen and Oilers, Railway Employees' Department, A. F. of L., United Brotherhood of Maintenance of Way Employees and Railroad Shop Laborers, Order of Railroad Telegraphers, Brotherhood of Railway Carmen of America, International Brotherhood of Electrical Workers, Brotherhood of Locomotive Firemen and Enginemen, Order of Railway Conductors, International Brotherhood of Boilermakers, Iron Ship Builders and Helpers of America, International Brotherhood of Blacksmiths, Drop Forgers and Helpers; Masters, Mates and Pilots of America.

The carriers parties to the dispute are named in Article I of this decision.

A number of carriers, including many so called "short lines" are not parties. Hence they are not directly affected by this decision. Any dispute between them and their employees, when properly brought before this Board, will be heard at an early date.

A statement of the origin and nature of the controversy follows:—

On December 28, 1917, the President, as a war measure, under the Possession and Control Act of August 29, 1916, took over and operated through the Director General of Railroads approximately ninety-three per cent of the railroad mileage of the country. The Transportation Act of Feb. 28, 1920, terminated Federal control and on March 1st these railroads reverted to their owners.

From August, 1914 to December, 1917, the wages of railroad employees remained substantially unaltered. By December, 1917, the social and industrial changes which accompanied the World War had thrown such wages seriously out of line with those in other industries and with the cost of living. A short time prior to Federal control, organizations of railroad employees presented to the managements requests for substantial increases. The Director General

on January 10, 1918, appointed the "Lane Commission," referred these requests to it and empowered it to investigate the compensation of railroad employees and to make such recommendations as should be deemed proper. On the basis of the Commission's report, the Director General's Order No. 27 was promulgated on May 25, 1918. It increased the pay of railway employees then receiving less than \$250.00 per month by percentages graduated from 43 per cent to the lower paid employees to zero per cent, to those receiving salaries of \$249.00 per month. The principle back of this order was thus stated in the Lane report: "In fairness a sufficient increase should be given to maintain that standard of living which obtained in the pre-war period . . . and upon those who can best afford to sacrifice should be cast the greater burden."

General Order No. 27 was based upon the cost of living at the time it was formulated. These costs, however, continued to rise through the years 1918 and 1919. In January, 1919, the shop crafts and thereafter other railroad employees presented requests for further wage increases aggregating some \$800,000,000 per annum. The Director General transmitted these requests to the President, who, on August 25, 1919, urged the employees to refrain from pressing them, pending a better opportunity to estimate the permanence of high living costs.

In February, 1920, these costs having continued to rise and a reasonable time for the appearance of a trend toward lower living costs having elapsed, the organizations of railroad employees renewed their requests for wage increases to the Director General, who declined to act, and was supported by the President in so doing, in view of the approaching termination of Federal control. The President, however, on February 13th, agreed to use his influence toward the establishment by Congress of legal machinery to deal with controversies between the carriers and their employees. On February 28, 1920, the Transportation Act became law. This Act provides for the appointment by the President of a Railroad Labour Board which shall decide disputes with reference to wages and working conditions of railroad employees. Section 301 of the Act provides that all such disputes shall be considered and, if possible, decided in conference between representatives of the carrier concerned and representatives of its employees. At the suggestion of the President the requests for increases in wages and for changes in working conditions submitted to the Director General in February were the subject of conference between representatives of the carriers and of the the organizations concerned. This conference extended from March 10 to April 1, 1920, but resulted in complete failure to agree.

This long delay and succession of disappointments, coupled with the pressure of a further rise in living costs produced deep and not unreasonable dissatisfaction on the part of railroad employees who felt themselves called on to make sacrifices, as they believed far beyond those of any other class. Nevertheless, the great majority have continued to serve and to conduct the

transportation of the country awaiting with disciplined and patriotic patience, the reduction of living costs, the decision of the Director General on their requests, the action of Congress, the conclusions of the conference, the appointment of this Board, the presentation of evidence to it and this decision. Eighteen months will have elapsed when this decision is rendered from the original presentation in January, 1919 of the first of the requests which it in part determines. For these reasons and as a measure of justice it was decided and announced by this Board on June 12, that this decision, when made, would be effective as of May 1, 1920, and would apply according to the time served to all employees who were in the service as of May 1st and who have remained therein or who have come into the service since and remained therein.

The Board, on the day after its members were confirmed by the Senate (April 15, 1920), received the controversy which had been so long pending and which had remained so long unsettled in spite of the efforts and conferences noted above. From that day until the date of this decision it has been constantly and assiduously engaged in receiving evidence, hearing arguments, reading and considering the many volumes of testimony offered and the many thousands of pages of exhibits and statements. Approximately two million men, comprehended in more than one thousand classifications, are affected by this decision. It is believed that few more serious, difficult and intricate problems have been presented to tribunals of this country.

In arriving at its decision, the Board has taken into consideration, as the Transportation Act prescribes:

"(1) The scale of wages paid for similar kinds of work in other industries:

"(2) The relation between wages and the cost of living;

"(3) The hazards of the employment;

"(4) The training and skill required;

"(5) The degree of responsibility;

"(6) The character and regularity of the employment, and

"(7) Inequalities of increase in wages or of treatment, the result of previous wage orders or adjustments."

Besides the circumstances set out above the Act provides the Board shall consider in determining wages "other relevant circumstances." This, it understands, comprehends, among other things, the effect the action of this Board may have on other wages and industries, on production generally, the relation of railroad wages to the aggregate of transportation costs and requirements for betterments, together with the burden on the entire people of railroad transportation charges.
